Swatara Branch (6 m'ths)	6.00	0.68	6.68
	355.32	82.13	437.45

Making due allowance for the time the Mount Carbon, Union and Swatara roads have been operated by this company, the cost of repairs per mile of track has been $599 33, against $642 79 in 1861; and on the aggregate tonnage it has been 8.45 cents per ton against 10.49 cents in 1861.

The cost of renewing rails has been 2.56 cents per ton carried 100 miles, which is less than it has been for the previous eight years, and there has been one rail removed from the track for every 210 tons carried.

The following is an abstract from the General Account of the Company, November 30, 1862:

Cost of road		$14,449,398 39
" depots		477,699 22
" engines and cars		3,481,451 10

Sinking funds	491,458 04
Balance of renewal fund	177,686 99
	$1,437,880 44

At the Annual Meeting of the Stockholders of the Philadelphia and Reading Railroad Company, held January 12, 1863, the following gentlemen were unanimously elected officers for 1863:

President.—CHARLES E. SMITH.

Managers.—Asa Whitney, S. M. Felton, H. Pratt McKean, Wm. Sellers, John H. Towne, A. E. Borie.

Treasurer.—SAMUEL BRADFORD.

Secretary.—WILLIAM H. WEBB.

Trade and Navigation of Canada.

From the annual tables of the trade and navigation of the province for 1862, we learn that the value of goods paying specific duty (declared free by a change in the tariff on 9th June) amounted to $38,021. Of these, goods to the amount of $14,369 were imported from Great Britain, of $444 from North America, and of $23,203 from the United States; the total amount of duty collected on goods of this class being $10,202. Goods paying specific and ad valorem duties—total value, $5,202,510; imported from Great Britain, $1,879,252; from North America, $245,797; from the West Indies, $37,188; from the United States, $2,297,495; from other foreign countries, $742,778; total duty collected, $1,022,142. Goods paying 100 per cent. ad valorem—total value, $87,561; imported from Great Britain, $57,409; from North America, $5,507; from the West Indies, $1,263; from the United States, $3,258; from other foreign countries, $20,124; total duty collected, $71,568. Goods paying 40 per cent. ad valorem—total value, $39,030; imported from Great Britain, $5,978; from North America, $12; from the United States, $28,459; from other foreign countries, $4,581; total duty, $15,585. Goods paying 30 per cent. ad valorem—total value, $487,804; imported from Great Britain, $112,725; from North America, $8,661; from the United States, $273,180; from other foreign countries, $93,238; total duty, $138,975. Goods paying 25 per cent.—total value, $203,423; imported from Great Britain, $117,692; from North America, $1,340; from the United States, $81,588; from other foreign countries, $2,803; total duty, $42,605. Goods paying 20 per cent. ad valorem—total value, $16,038,785; imported from Great Britain, $12,244,900; from North America, $22,155; from the United States, $3,129,270; from other countries, $642,460; total duty, $3,165,071. Goods paying 15 per cent. ad valorem—total value, $2,540; imported from Great Britain, $422; from the United States, $2,118; total duty, $381. Goods paying 10 per cent. ad valorem—total value, $1,870,084; imported from Great Britain, $1,556,387; from North America, $499; from the United States, $283,595; from other foreign countries, $29,603; total duty, $186,215. Free Goods—Coin and bullion—total value, $2,619,694; imported from Great Britain, $89,397; from the

United States, $2,530,297. Other free goods, total value, $22,004,569; imported from Great Britain, $5,100,781; from North America, $251,054; from the West Indies, $400; from the United States, $16,514,077; from other foreign countries, $138,257. Grand totals—value, $48,594,021; imported from Great Britain, $21,197,312; from British North America, $535,469; from the West Indies, $38,851; from the United States, $25,166,542; from other foreign countries, $1,673,844; total duty collected, $4,652,748. Foreign reprints of British copyright works—total value, $6,612, all imported from the United States. The duties represent the actual amounts received at all the ports in the province and include fractions, but not the duties on the goods imported into the free ports. The values include goods imported into the free ports of Gaspe and Sault Ste. Marie. A comparative statement, showing in contrast the quantities and values of the principal articles of British and foreign merchandise entered for consumption in Canada during the years 1860, 1861, and 1862, exhibits an increase in the value of the goods imported in the latter years, but a decrease in the amount of duty. The total value in 1860 was $34,447,935; duty collected, $4,758,465; value in 1861, $43,054,836; duty, $4,768,182; value in 1862, $48,600,633; duty, $4,652,748.

The total value of goods imported from the West Indies was $315,012; of these the value of goods imported direct from the West Indies *via* the St. Lawrence amounted to $95,027; through the United States, $176,195; through Nova Scotia, New Brunswick, Newfoundland, or Prince Edward's Island, $43,790. A comparative statement of the quantity and value of the principal articles imported into Canada from sea, *via* the St. Lawrence, during the years 1861 and 1862 shows the value of such in 1861 to have been $17,249,055, and in 1862, $18,091,317. The total value of goods enumerated in the Reciprocity Treaty, being the growth and produce of the United States and imported into Canada in 1861 and 1862, was in 1861 $9,980,937, and in 1862 $44,430,626. The total value of goods imported *via* the St. Lawrence from Nova Scotia in 1862, was $376,915; from New Brunswick, $56,203; from Prince Edward's Island, $3,630; from Newfoundland, $98,721; total value, $535,469. Another statement exhibits in contrast the value and amount of duties collected on goods entered for consumption in Canada during the years 1859, 1860, 1861, and 1862 respectively:—Imported from Great Britain, 1859, $14,386,084; 1860, $15,859,890; 1861, $20,986,937; 1862, $21,179,312. From North American colonies, in 1859, $381,755; 1860, $393,864; 1861, $499,187; 1862, $535,460. From the West Indies, 1859, $533; 1860, $15,802; 1861, $371; 1862, $38,851. From the United States, 1859, $17,592,916; 1860, $17,273,029; 1861, $21,063,388; 1862, $25,173,157. From other foreign countries, 1859, $793,873; 1860, $905,260; 1861, $1,098,963; 1862, $1,673,844. The grand totals are as follows:—1859, $33,555,161; 1860, $34,447,935; 1861, $43,054,836; 1862, $48,600,633. The duty collected was, in 1859, $4,437,846; 1860, $4,758,465; 1861, $4,768,192; 1862, $4,652,748.

Produce of the mines, $703,906; of the fisheries, $703,896; of the forest, $9,482,896; animals and their products, $3,923,590; agricultural products, $15,041,002; manufactures, $415,827; coin and bullion, $178,997; other articles, $242,002. The total value of the exports was $30,690,617, of which there was exported to Great Britain to the value of $14,235,989; British North America, $826,871; West Indies, $13,775; United States, $15,003,730; other foreign countries, $550,252. Then there were 28 vessels built in Quebec during the year—35,534 tons at $42 per ton, $988,328, which increases the total value of the exports as reported to $31,679,045. The value of exports from Quebec was $6,813,154; from Montreal, $8,765,594; from Gaspe and outports, $691,075; from Rimouski, $40,988; from Isle Verte, $31,591. Total from seaports, $16,342,402; inland ports as reported, $15,336,643; estimated amount not reported at inland ports, $1,917,080; grand total of exports, $33,596,125. The total value of the exports in 1861 was $34,361,890. The total value of the exports seaward *via* the St. Lawrence was in 1861 $21,113,255; 1862, $19,619,769. The total value of imports and exports *via* the St. Lawrenec in 1861 was $39,773,790 and in 1862 $38,690,514. The value of the exports to Great Britain and foreign countries in 1862 was $33,596,125; value of imports, $48,600,635. Tonnage of British vessels entered inwards, 2,611,708; cleared outwards, 2,603,384. Tonnage of foreign vessels entered inwards 2,403,917; cleared outwards, 2,255,634. Total entered inwards, 5,022,025; cleared outwards, 4,859,018. The value of the exports in 1861 was $36,614,195; 1862, $33,596,125. Imports, 1861, $43,054,836; 1862, $48,600,633. Total imports and exports—1861, $79,669,031; 1862, $82,196,758. Increase in 1862, $2,527,726, or 3 1-6th per cent. The value of the exports of the domestic produce and manufactures, the value of goods entered for consumption, and the amount of duties collected at the port of Montreal during the years 1859, 1860, 1861, and 1862 is shown to be as follows:—1859—exports, $3,044,762; imports, $15,553,571; duty, $2,336,239. 1860—exports, $6,020,715; imports, $15,334,010; duty, $2,453,853. 1861—exports, $10,415,738; imports, $16,197,574; duty, $2,393,086. In 1862—exports, $8,765,594; imports, $20,183,836; duty, $2,490,557. In 1858 the net revenue of Customs' duties was $3,026,294; 1859, $4,123,511; 1860, $4,405,104; 1861, $4,411,160; 1862, $4,272,780.

We next come to the free ports of Gaspe and Sault Ste. Marie. The value of the trade of Gaspe with foreign ports in 1861 was imports, $374,729; in 1862, $429,189; increase in 1862, $45,451. Exports, 1861, $630,477; 1862, $691,075; increase in 1862, $60,498. Sault Ste. Marie, 1861, imports, $92,704; 1862, $90,420; decrease in 1862, $2,284. Exports, 1861, $235,516; 1862, $305,858; increase in 1862, $70,342. Then, without going into the trade with other ports, the total trade in 1862 was as follows:—Gaspe—imports, $144,819; exports, $58,269. Sault Ste. Marie—imports, $280. exports, $70,321. The amount of duties from distilleries was in 1860 $200,497; 1861, $235,213; 1862, $372,833. Ditto from breweries, 1860, $43,931; 1861, $50,734; 1862, $108,014. Total excise revenue, 1860, $244,428; 1861, $295,947; 1862, $480,848, that of the latter year being nearly double, it will be noticed, of that of 1860. In 1860 the total quantity of grain, &c., and for distilling and brewing, was 1,661,912 bushels; in 1861, 1,803,883; and in 1862, 1,830,219. The total number of vessels that arrived from sea with cargoes or in ballast at the ports of Quebec, Montreal, Gaspe and outports, New Carlisle, Isle Verte, and Rimouski, in 1862 was 2,187, the tonnage being 922,439. The number of departures was 2,127; tonnage, 906,847. The following figures represent the intercourse (exclusive of ferriage) between the United States and Canada in 1863:—Canadian steam and sail, 3,584,127; American steam and sail, 4,468,230.

Albany and Susquehanna Railroad.

AN ACT to facilitate the construction of the Albany and Susquhanna Railroad. Passed April 3, 1863; three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:—

SECTION 1. Whenever the Albany and Susquehanna Railroad Company shall duly prove to the Comptroller of this State, that they have expended at least one million of dollars, in the construction and equipment of said road, and in good faith put the same into operation forty miles from the city of Albany, through a portion of the county of Schnectady, to the town of Cobleskill, in the county of Schoharie, the Treasurer of the State is hereby authorized and required to pay to the treasurer of the said company the sum of two hundred and fifty thousand dollars: and it is further provided, that whenever the said company shall in like manner prove to the Comptroller of this State, that they have in good faith put the said road in operation another forty miles, to the town of Oneonta, in the county of Otsego, in all eighty miles from the city of Albany, the Treasurer of the State is hereby authorized and required to pay to the treasurer of the said company the further sum of two hundred and fifty thousand dollars: which several sums are hereby appropriated (for public purposes,) to aid in the construction of the said Albany and Susquehanna railroad.

SEC. 2. There shall be imposed, for each of the fiscal years commencing on the first day of October, one thousand eight hundred and sixty-three, and one thousand eight hundred and sixty-four, a State tax of three sixteenths of a mill, in each year, on each dollar of the valuation of the real and personal property of this State, to be assessed, levied and collected in the usual manner prescribed by law, for raising State taxes, to be paid by the several county Treasurers into the Treasury of this State, and to be held by the State Treasurer for the special purpose designated by this act.

SEC. 3. The Comptroller of this State is hereby authorized and required to draw his warrant upon the Treasurer thereof, for the said several sums hereby appropriated, to be paid as aforesaid, whenever the said conditions shall have been complied with on the part of said company (provided, however, that the last mentioned sum of two hundred and fifty thousand dollars shall not be payable during the next fiscal year;) but in case the said company shall fail to comply with the said conditions within two years next after the passage of this act, the said moneys shall be applied to and for the uses of the general fund of this State; and if there shall be an overplus, after paying the said sums hereby appropriated, the same shall in like manner be applied to the general fund. The said moneys thus received by the said company, to be applied and used in the construction and equipment of said railroad, and for no other purpose whatever.

☞ A fine large Union depot is immediately to be erected at Erie, Pa. It will be built jointly by the Cleveland and Erie, the Erie and Pittsburg, the Philadelphia and Erie, and the Buffalo and Erie Railroad Companies. It is to be of brick, 350 feet in length, with offices, baggage rooms, eating-house, and everything demanded by the immense railroad business centering there. The track is also to be extended to the harbor, for the convenience of transferring heavy freight.

Indiana Central Railroad.

The earnings of this road for the year ending December 31, 1862, were:

From passengers		$184,525 88
" freights		231,361 22
" mails and express		16,487 48
" indidentals		9,518 15
		$442,892 73

Disbursed as follows:

Repairs of engines & cars	$53,296 45	
Pay of train hands	30,391 13	
Station expenses	40,347 27	
Wood and oil	39,242 66	
Loss and damage	2,809 15	
Tax on passenger receipts	1,893 97	
Other expenses	4,370 24	
		172,350 87
		$270,541 86
Sales of land, rents, etc.		11,065 41
		$281,607 27

From which deduct:—

Repairs of road	$41,638 80	
Salaries of officers, etc	5,600 00	
Interest on 7 per ct. bonds	42,000 00	
Interest on 10 per ct. bonds	65,450 00	
Interest on unfunded debt	3,250 75	
Unfunded debts	27,286 00	
10 per cent bonds	7,000 00	
Dayton and Western R. R.	67,794 44	
Taxes, commissions, etc	5,817 50	
Sleeping cars	2,050 00	
Right of way, etc.	765 42	
		268,753 91
Balance		$12,953 91

The earnings for 1861, were $398,490 30—showing an increase in 1862 of $44,402 40, a little over 11 per cent. The report says:

The Richmond and Covington Railroad Company, of Ohio, are engaged in constructing a line of railway from the eastern terminus of our present line to a point on the Columbus, Piqua and Indiana Railroad, near Covington and about nine miles west of Piqua, in which our Company and each of the others will have a very large mutual and very probably an actual interest, and which will form an uninterrupted line between the Capitals of Indiana and Ohio, of about the same length of the present line via Dayton and Xenia, and at Columbus we will come in contact with the lines centreing there, and which lines will have equal interests in reciprocating business and interchange of car service with us that they have with other lines; and for the first time it will open an unbroken east and west line across the centre of Ohio and Indiana, with a community of interests in an east and west business. It will also form what is believed to be the shortest and best rail routes to Lake Erie at Toledo and Sandusky, and will also have a connection with Cleveland, via Milford Centre, only a few miles longer than the shortest route to that city, and one that we are persuaded must be highly prized and very valuable to the Cleveland, Columbus and Cincinnati Railroad Company, and their eastern connections.

In this connection it is proper to say that under a notice served on us by the Board of Directors of the Dayton and Western Railroad Company, our operating of their line will cease with the 10th day of March, 1863.

Travel has not increased on our line in proportion to the increase in freights, though the latter half of the year it was moderately fair. Over three-fifths of it, however, was purely local to our line.

Freights have been so abundant and pressing that we have been able with our limited car facilities to take only a comparatively small proportion of the through freights offered us, and our local shippers have suffered for want of cars.

Our road-bed has been kept in good condition the past year, and the line has been faithfully, promptly and safely operated, with very trivial losses from accidents.

We have made many valuable improvements in our trestle bridges, and culverts of a durable character, and it is our policy as well as our true interest, so fast as we can afford the means and as our culverts and stock-pits, need repairs, to make them with stone and of a permanent character.

We have continued to fence the more exposed portions of our line, thereby adding to the safety of our trains and diminishing the losses arising from killing live stock.

We have had about ninety-six tons of our rails re-rolled and replaced in the track, at an expense of twenty-one, twenty-three, and twenty-five dollars per ton, varying as the value of iron and materials have advanced, through the year.

We have continued to use, in our repairs of track, the improved, heavy, solid-lipped chair, and are satisfied that the durability has fully repaid the additional cost. Scarce one of them has ever broken since we have commenced their use.

Our interest has been promptly paid, and our unfunded debt almost entirely discharged, and we hope in a few months to say it is entirely wiped out.

The tendency of our freight and travel, is, between East and West, on our own parallel, and impediments that have arisen between our line and those leading to Cincinnati, have taught the dealers and people on it to look eastward for their markets for their surplus productions, and their interest in selling in those markets and purchasing their supplies from first hands, thus saving in freights and commissions, and profits to intermediate dealers.

Our hopes have been long deferred in regard to receiving profits on investments in our line. But it is some consolation to know that if we have been over-sanguine we do not stand alone in that particular. Our stock, though not marketable at satisfactory prices, has never been so low as that of several now strong companies were before they looked up, and some of which have passed all points from ten cents on the dollar to fifty per cent. premium. We cannot but hope that we have passed the lowest point of depression, and that the future indicates improvements in our business, and an advance in the value of our investment.

The number of way passengers carried was 125,230; through passengers, 26,665—total, 151,895. Passengers carried east, 77,902; do west, 73,993.

The equipment consists of 19 locomotives; 17 passenger, 6 baggage, and 266 freight and construction cars.

General Balance Sheet.

Construction		$1,667,039 03

Common Carriers.—Accidents upon River Navigation.

THE PHRASE "UNAVOIDABLE DANGERS OF THE RIVER NAVIGATION" CONSTRUED. A CARRIER TO AVAIL HIMSELF OF THIS EXCEPTION IN A BILL OF LADING MUST SHOW THAT THERE IS NO DEFAULT ON HIS PART.

The plaintiffs S. B. & C. Hays were partners, and shipped on the steamboat "Nat Holmes" at the port of Wheeling, Virginia and bound for St. Louis, Missouri, two carriages, which the defendants, who were common carriers and owners of the steamboat, contracted to deliver safely and in good order, "the unavoidable dangers of the river navigation and fire excepted." While descending the Ohio river (then at high water), near Aurora, Indiana, the "Nat Holmes"—being in the proper place, having given the usual signals, and using all possible means to avoid the collison—was run into by the steamboat "David Gibson" ascending the river, was immediately sunk, and the carriages were lost. The plaintiffs brought this action, to recover the value of the lost carriages, against the owners of the "Nat Holmes." A trial was had in the District Court of Allegheny county, Pennsylvania, and the jury found in favor of the plaintiffs for the sum of $489 15, subject to the opinion of the court upon the following question of law: "Whether under the said recited exception in the bill of lading, and upon the above recited facts, the plaintiffs are entitled to recover?" The court below then entered judgment for the defendants; and the plaintiffs carried the case to the Supreme Court, which now affirms the decision of the court below; and holds that the loss was covered by the exception in the bill of lading; that "unavoidable accidents or dangers" in a bill of lading mean such accidents as are unavoidable by the carrier; but a carrier, in order to avail himself of the exception to his liability must prove the existence of the danger, and also show, by clear and conclusive testimony, that there was no default on his part. The following is taken from the opinion of the court rendered at the decision of the case.

Lowrie, C. J.—By a collision between two steamboats on the Ohio river one of them sunk, without any carelessness on its part, and by reason of carelessness on the part of the other; are the owners of the sunk boat liable, as carriers, for goods lost by the accident, under a bill of laiding that contains the exception of "the unavoidable dangers of the river navigation?"

The counsel have thought it necessary to discuss the question, whether or not this exception in the contract in any degree varies the liability of the carriers from what it would be at common law, or without the exception; and they have discussed it with great ability and research. With their assistance, we find that this question has been very often considered, and that it cannot yet be regarded as finally settled either way. Courts, judges, and writers on law, have expressed the opinion that the exception of unavoidable accidents is exactly equivalent to the exception of the common law, "act of God or public enemies."

* * * * *

A careful study of these cases exhibits a degree of confusion of thought, in the judicial administration of this class of cases, that must while it lasts, breed much discord in decisions. Some treat the phases, inevitable accident, perils of the

sea, navigation or road, as entirely equivalent to the phrase, act of God, as used by lawyers and judges, and others treat them as expressing different ideas. Again, some treat them as identical terms, for the purpose of making inevitable accident mean act of God, in the sense of a sudden and violent act of nature, as lightning, tempests &c., while others make them equivalent for the purpose of making act of God mean any accident which the carrier cannot, by proper care, foresight, and skill, avoid. And many of them overlook entirely the common custom of merchants, which is the common law in such matters, that all bills of lading, and all the printed forms of them contain the exception against losses by inevitable accident, perils or dangers of the sea or road. No man expects any other form unless when he especially contracts for it; and therefore no man is in danger of being caught up by the technical phrase, act of God, unless when he has failed to sign the usual bill of lading. If he signs the bill he is held according to the usual custom of commerce, he ought to be held no otherwise when he fails to sign it. Surely all this ought to lead us to suspect that there has been some mistake of the meaning of the term act of God, since it has led to such a conflict of decisions with each other, and especially with the well known usages of commerce. * * * * * * *

We can never administer rights of contract justly by arbitrarily infusing into them terms which are never intended by the parties, which are not sanctioned by the actual customs of the people, and which are not involved in the very nature of the relation created by the contract. It is by a proper administration of the remedy that we secure the rights intended to be contracted for; and the main principle of the remedy is that, from the very nature of the relation, the burden of proof of a loss by inevitable accident is thrown upon the carrier. He must prove not only an accident which the law admits as inevitable in its character, but also that he was guilty of no fault in falling into the danger, or in his efforts to extricate himself from it. Pertinent to this subject we have some very wise remarks of Sir William Scott in the case of the Generous, which we may be allowed to quote. The law itself and the administration of it must yield to that to which everything else must bend—necessity, the law in its most positive and peremptory injunctions is understood to disclaim as it does in its general aphorisms, all intention of compelling men to impossibilities, and the administration of laws must adopt that general exception in the consideration of all particular cases. In the performance of that duty it has three points to which its attention must be directed. In the first place it must see that the nature of the necessity (or accident) pleaded be such as the law itself would respect, for there may be a necessity which it would not. A necessity created by a man's own act, with a fair previous knowledge of the consequences that would follow, and under circumstances which he then had the power of controlling, is of that nature. Secondly, that the party who was so placed used all practicable endeavors to surmount the difficulties which already formed that necessity, and which on fair trial, he found insurmountable. I do not mean all the endeavors which the wit of man, as it exists in the actual understanding might suggest; but such as might reasonably be expected from a fair degree of discretion and an ordinary knowledge of business. Thirdly, that all this shall appear by distinct and unsuspected testimony; for the positive injunctions of the law (or terms of the contract), if proved to be violated can give way to nothing but the clearest proof of the necessity that compelled the violation."

Theft from a carrier or robbery of him, while he is within the protection of the state is not an excuse which the law respects, for by the very nature of his contract the carrier, by himself or his agents, is bound to be always with the goods during their carriage, and the law presumes and must in all ordinary cases presume, that, if he is watchful the ordinary police of the state will be entirely adequate for his protection. It is therefore because he is presumed, and almost conclusively presumed to be in fault in such cases, that he is held liable; and not because he has a remedy over against the wrong doer, or the township or hundred. He is not liable when he is robbed by pirates on the high seas or the public enemies, because against these he has no police protection and there is no presumption of fault on his part. It is important to have a clear idea of this. The carrier is bound to carry safely, and if he fail to do so, the burden of proof of a valid excuse is cost upon him. If he show a cause which the law admits to be sufficiently serious to be called inevitable, he has nearly prepared the way for showing that he used all possible care. At this stage of the case the law does not presume any fault on his part; but simply demands that he shall complete his excuse by showing that, in the midst of the danger, he exerted all the skill and the care he could to avoid it. If this be made out then he stands entirely without fault before the law, having performed his whole duty under his contract, as it is interpreted by the law, according to the custom of merchants and carriers.

Now if instead of charging him because his excuse leaves him still in fault, we charge him because he has a remedy over, then we should have to inquire of the fact, has he such a remedy as can be of any avail to him. He has none, of course, in a case of inevitable collision, without fault on either side. He may have none where the other vessel is sunk by the accident. He may have none if the collision happened off the coast of Africa, or his vessel be seized by order of some foreign government. He can have none that is available, if the opposite parties to the collision are irresponsible. Surely we have no evidence in commercial customs that a carrier insures against such accidents, and for such a reason, and if such were the reason, then there is no insurance, when both colliding vessels are free from fault, for then neither has a remedy. And certainly the law cannot impose such a liability for such a reason; for one state cannot make laws for another state as it would do by saying that the injured vessel shall have its remedy against the wrong doer wherever he may be found. If the law imposes the insurance, "independent of the contract," instead of enforcing the terms which are involved in it, then the insurance cannot reach beyond the state which imposes it, for no state enforces the mere law of another state, while all civilized states do enforce contracts made abroad, according as those contracts were understood in the place where they were made. We might easily carry out these views so as to show that the defendants, being without fault in this collision, are not liable; but we prefer not to do it. We rather wish that what we have said, may be useful in leading to an investigation that will expose in a conclusive way, the fundamental mistake which has led to so much discordance as prevails in the decisions of courts, and between many of them and the actual customs of trade. We can decide this case well on other grounds. We are quite satisfied that the weight of authority and of reason, shows that the ordinary exceptions in bills of lading of unavoidable accidents, have a much larger sphere than that which is attributed to the term act of God, by the very strict interpretation of some writers and judges; while for the present we think that the expression has been unduly narrowed. There are cases where there is no bill of lading, or where the ordinary exceptions of perils of the sea does not appear, and where the innocent carrier is held liable; or where both were innocent and both liable. These cases must proceed upon the notion that there is an insurance against collision, and other analagous accidents, where at least, the usual exceptions are not provided. There are cases where there is the exception of perils of the sea; where both were innocent in the collision, and yet were held liable. These cases must proceed upon the notion that there is a warranty against collision, even when the usual exception is expressed. But several cases decide, and almost all careful text-writers agree, that the carrier who is not in fault in the collision is not liable under a bill of lading containing the usual exceptions.

Whatever may be said, therefore, respecting the meaning of the phrase, act of God, we think it can have no application in a case where the parties have expressly provided a different rule of liability, by expressing themselves in terms that cannot reasonably be interpreted in the narrow sense often attributed to that phrase. When they provide that they shall not be liable for the unavoidable dangers of the navigation, they mean dangers that are unavoidable by *them*, supposing that they have exercised all the precaution care and skill that the law usually demands of common carriers. They mean that they shall be answerable as insurers against accidents which the law respects as inevitable; but that, if they prove such an accident falling on them without any previous fault of theirs, and that they had a proper vessel and crew, and did all in their power to extricate themselves from the danger, they shall be as free from liability as they are from fault. We think, therefore, that this case was rightly decided.

Judgment affirmed.

Rensselaer and Saratoga Railroad.

We learn from the Cohoes *Cataract* that the Albany division of the Rensselaer and Saratoga railroad is being put in capital trim for the summer business. New ties have been put down nearly the whole distance between Albany and Cohoes, and everything that can contribute to the comfort and convenience of the traveling public has been added to render the road complete in all its parts. Under the admirable management of Supt. White, and the general efficiency of all the officers connected with the road, it is fast growing in popular favor.

Railroad Earnings--Monthly.

The earnings of the Erie Railway for May, 1863, were $838,866 65
May, 1862 ..... 587,416 22

Increase $251,450 43

The earnings of the B. N. Y. and E. R. R. are not included in the above statement.

The earnings of the European and North American Railway for May, 1862 and 1863, have been as follows:

	1863.	1862.
Passengers	$4,823 13	$4,573 81
Freight	5,277 30	5,553 62
Mails & sundries	1,057 97	525 34
Total	$11,158 40	$10,652 77
Increase, 1863		$505 63

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of May ult., compared with the same period of last year, were as follows, viz:

	1863.	1862.
From freights	$282,062 19	$180,558 18
" passengers	118,360 96	78,251 43
" express matter.	2,757 50	2,700 00
" mails	7,825 00	7,825 00
" rent of railway.	7,083 33	7,083 33
" miscellaneous..	650 84	590 66
Total	$418,739 82	$277,008 60
Increase		$141,731 22
Earnings from Jan. 1 to May 31	$2,047,639 34	$1,423,159 88
Increase for 5 months		$624,479 46

Increase for May, 51.2 per cent.; increase to May 31, 43⅞ per cent.

The business of the Illinois Central Railroad in May was:

LAND DEPARTMENT.

Acres construction lands sold	12,127.60 for	$128,538 31
Acres interest fund lands sold	3,958.48 "	34,393 63
Acres free land sold	4,745.44 "	58,482 41
Total sales during the month of May, 1863	20,831.52 "	$221,414 35
To which add town lot sales		1,925 48
Total of all		$223,339 83
Acres sold since Jan'y 1, 1863	84,130.22 for	$895,128 80
Acres sold previously, net sales	1,198,326.00 "	15,139,473 89
Total	1,282,456.22 "	$16,034,602 66
Construction bonds cancelled previous to May 31, 1863		$2,408,000 00
Cash collected in May		110,936 84

TRAFFIC DEPARTMENT.

Receipts from passengers	$102,893 83
" freight	194,913 85
" mails	6,358 33
" rent of road	4,000 00
" other sources	6,000 00
Total receipts in May, 1863	$314,166 01
" " 1862	206,245 70

The earnings of the Housatonic Railroad for May, 1863, were $24,567 07
" 1862 ..... 21,293 82

Increase $3,273 25

The earnings of the Norwich and Worcester Railroad in May, 1863, were $29,408 72
May, 1862 ..... 27,097 90

Increase $2,310 82

The earnings of the Long Island Railroad Company for May, 1863, were:

Passengers $21,938 23
Freight 15,172 12

Total $37,110 35
May, 1862 ..... 21,860 06

Increase $15,250 29

The business of the Philadelphia and Reading Railroad Company for the month of May, 1862 and 1863, has been as follows:

	1863.	1862.
Received from coal.	$394,869 07	$189,356 82
Do. merchandise.	57,498 30	44,701 31
Do. travel, etc. ..	53,149 55	49,938 24
	$505,516 92	$283,996 37
Transport'tion, roadway, dumpage, renewal fund, and all charges	248,320 03	147,412 24
Net profit for the m'th	$257,196 89	$136,584 13
Do. previous 5 mos..	960,796 34	589,262 62
Total net profit for 5 months	$1,217,993 23	$725,846 75

The earnings of the La Crosse and Milwaukee Railroad for May, 1863, were $147,499 45
Do., 1862 ..... 125,999 19

Increase $21,500 26
Earnings for the first 5 months of 1863. $451,174 13
" " " 1862. 334,518 29

Increase $116,655 84

The receipts of the Harlem Railroad for May, 1863, were $108,605 19
May, 1862 ..... 94,156 67

Increase $14,448 52

The earnings of the Cleveland and Toledo Railroad in May, 1863, were $100,255
May, 1862 70,151

Increase $30,104

The earnings of the Toledo and Wabash Railway Company for the month of May were:

	1863.	1862.
Passengers	$27,357 55	$16,374 02
Freight	106,914 25	90,471 42
Total	$134,271 80	$106,845 44
Increase		$27,426 36

The Chicago and Rock Island Railroad earned in May, 1863 ..... $144,397
May, 1862 89,172

Increase $55,225

The earnings of the Chicago and Northwestern Railroad for May, 1863, were as follows:

Passengers	$35,756 93
Freight	68,605 99
Mail	2,033 33
Express	1,411 67
Miscellaneous	58 33
Total	$107,866 25
May, 1862	84,552 26
Increase, 27½ per cent.	$23,313 99

The earnings of the Michigan Central Railroad for May, 1863, were $186,039 00
1862 ..... 236,453 00

Increase $50,417 00
The first half of the fiscal year gives .. $1,457,945
Same period last year 1,103,507

Increase $354,358

The earnings of the Galena and Chicago Union Railroad for May, 1863, were $166,156 88
March, 1862 ..... 158,194 03

Increase $7,952 85

Corrected earnings for the previous month, $136,601 18.

The earnings of the Hudson River Railroad for May, 1863, were $241,771 50
May, 1862 ..... 192,442 41

Increase $49,329 10

The earnings of the Michigan Southern Railroad for May, 1863, were $263,981 00
May, 1862 ..... 200,826 00

Increase $63,155 00

The earnings of the St. Louis, Alton and Terre Haute Railroad for May, 1863, were:

Passengers	$38,362 95
Freight	70,847 92
Miscellaneous	4,587 56
Total	$113,798 43
May, 1862	68,194 34
Increase	$45,604 39

The aggregate receipts for five months, since January 1st, are $577,624.

The earnings of the Panama road have been:

March	$159,774 04
April	163,770 14

The aggregate for the first four months of the year is $616,196 49.

The earnings of the Milwaukee and Prairie du Chien R. R. in May, have been as follows:

	1863.	1862.
Freight	$81,273 39	$109,603 23
Passengers	21,601 33	16,371 73
Mails and rents	4,092 12	4,243 05
Total	$106,966 84	$130,218 01
Decrease	$23,251 17	
Total for five months	$383,330 87	$385,797 51
Decrease do.	$2,466 64	

☞ A railroad convention was held at Hastings, Barry county, Michigan, on the 18th inst., to adopt measures for the construction of a steam or horse railroad to connect that place with some point on the Central or Detroit and Milwaukee railroads.

☞ A section of the first railroad built on the Island of Sicily, has just been opened. It extends from Palermo, on the northern shore, to Bagheria, nine miles, and when completed will cross the Island. A great illumination was made on the occasion of its opening, which promises to annex Sicily a second time to continental Italy.

☞ The Detroit *Tribune* says that the Amherst, Lansing and Traverse Bay Railroad is being rapidly graded between Owosso and Saginaw, and the Port Huron road will be built to Flint this season without doubt.

☞ Preparations are nearly completed to commence the grading of the Milwaukee & Northern Illinois Railroad, beginning at Milwaukee.

☞ The Amboy, Lansing and Traverse Bay Railroad is being rapidly graded between Owosso and Saginaw.

☞ The Passumpsic River Railroad, from Barton to Newport, is nearly completed.

American Railroad Journal.

Saturday, June 27, 1863.

Stock Exchange and Money Market.

The money market, though as yet the current rate of interest is 7 per cent, is pronounced much easier, as large amounts have come in from the country for employment. It is a curious circumstance, that when money is sought for in large quantities for any purpose, borrowers come to the city to obtain it; but when it bears a high interest in the city, the country is sure to bring in large and continuous supplies. We presume this circumstance is in part explained by another; that finance is a constant subject for study in commercial circles where capital most abounds; that its laws and relations are consequently better understood; the profits of good investments are quicker earned and more rapidly realised, so that New York having all these advantages, naturally commands the confidence, as it stimulates the desire for gain, which exists in remoter places. Almost every Bank, Broker, and private operator in the country has some trusted correspondent in New York, whose advice and opinions are eagerly taken in money matters. Not only this, but there are a keen set of operators in all our most thriving cities and villages, all through the North and West, who indulge in what are technically called in Wall street, "flyers" and are continually venturing in railway stocks, and gold.

Thus we have often seen long and friendly letters from persons at a distance, to their bankers in this city, the main point of which lay in a P. S. "By the bye look sharp after my little venture in the ——— Railway."

The financial condition of the country is in reality sound, for production is going on with an enormous force. Our agricultural resources are expanding year by year with unceasing activity. The Great West promises larger crops than were ever before known; the railway interest is becoming more stable every hour, new lines of communication are projected and being carried forward with a rapidity quite unprecedented. Improvements in water communication between the Lakes and the Ocean are put forward with great confidence, and now within a few days past we have been assured that the project of making a ship canal between the St. Lawrence and the Hudson, is about to receive the attention of the City of Troy, where we believe it originated many years ago. A letter now before us from the Mayor of that city, gives us reason to expect that it will come formally under the notice of its Common Council at its next meeting. If we are to have ship canals, this is an opportunity not to be passed by, as the commerce of the whole Lake countries, and that of Canada can be diverted to this city by the construction of two short works; that is to say by the enlargement of the Chambly and Champlain canals, offering every facility for enlargement at small expense. We have in a former number briefly advocated this measure, and in reply to a letter to Major Gen. Wool alluded to on that occasion received the following note:

NEW YORK June 18, 1863.

DEAR SIR:—Owing to my absence from the city I did not receive your favor of the 10th until to day. If I had received your letter at Troy, I could have furnished you with all proceedings of a meeting, of which I was chairman, assembled some years since at Saratoga to consider a project to connect the waters of the St. Lawrence and Lake Champlain. I need not tell you, that there was but one opinion on the subject, of those assembled, composed of gentlemen from New York and Canada, that the connection of a properly constructed canal, which could easily be done, and comparatively at small expense would not only be of great value to the Northern part of the state, but to this city, and at the same time pay a large interest on the outlay.

My only wonder has been that our capitalists and enterprising merchants have not long since accomplished the object. Why the project proposed at the time was not prosecuted is more than I am able to tell.

I am very respectfully your obt. serv.

JOHN E. WOOL,
Major General."

This opinion from one of our ablest military men, familiar with the topography and resources of the State of New York is of great value. We pass from the subject with a single remark, that the Champlain Ship Canal equally favors all the American ports on the American Lakes, discriminating against none of them, while the Chicago project was the advancement of one point to the probable ruin of all the others.

We have to announce on good authority, that the Secretary of the Treasury has determined to continue his policy of conversions of currency into the 5 20's, after the 1st of July, the heretofore supposed limit of time. In this he acts with his usual good sense. The amount deposited with Mr. Cisco on Tuesday last was $1,750,000, which is an increase on the average of the last two or three weeks. No better investment offers at the present moment. The interest is regularly paid in gold, an advantage no other securities in this country can offer at present, or may be able to offer for years to come. The dividends are in fact equivalent to 50 per cent advance on the interest itself, a profit nowhere else to be found in such transactions.

Thus a large amount of gold is constantly thrown into circulation, supplying in a great degree the wants of importers, whether as remitters abroad, or duty payers at home. We are not aware that this system of Governmental finance was ever dreamed of in France or England, and is a curious illustration of the superior skill, with which the American mind provides for emergencies, and baffles even fate itself. We cannot avoid quoting a few statements from a late number of Thompson's Bank Note Reporter, which fully sustain the views this JOURNAL has put forth in regard to the resources and condition of this country the last seven or eight months.

There are in the United States more men and estates that can be assessed for one million dollars each, than there were at the close of the Revolution, that could be assessed for $10,000 each.

The cash value of the property of the United States (excluding the States in rebellion), is one hundred times what it was in all the States at the close of the Revolution.

The gold and silver in the United States is one hundred to one at the close of the Revolution.

Joint Stock Companies—Bank, Insurance, Railroad, Steamboat, Manufacturing, &c.—are as one thousand to one at the close of the Revolution.

The annual product of gold and silver that enters into and braces our currency and credit is as five hundred to one at the close of the Revolution.

Our commerce, inland and foreign, is as five hundred to one at the close of the Revolution.

A Spanish quarter dollar was of more importance in the eyes of the people then than a double eagle is now.

The country, as the basis for borrowing and paying, is more than one hundred times greater than at the close of the Revolution. Where, then, is the point, in likening our Government Currency and Securities to Continental money.

Old and first-class nations are able to sustain immense debts—see England and France—while new and minor nations are classed as of doubtful future, and shunned by money lenders.

We are now a first-class nation. At the close of the Revolution we were the youngest and smallest of all nations.

The power to sustain a debt is as the cube of the base on which the debt rests. This holds good with national, corporate, and individual payers.

The share market is strong and holders are confident. There is considerable movement in Hudson and Harlem in the street, the latter rising on the credit of an act recently passed by the Legislature of Connecticut, by which a short route to Boston *via* the Harlem is contemplated.

We have again and again pointed out how this Company may become a first-class one, but it can only be by an additional expenditure of several miliions of dollars; by a connection with the Housatonic at Kent, its extension north from Chatham, and its appropriation of the routes to the Central Park and Bowling Green through the city.

In our notice last week of the Union Pacific Railway, Eastern division, we quoted from the act of Congress to show that the construction of the central portion was practicable and likely to be effected without the necessity of any further legislation, or even the action of the corporators of the original company. We find our views still further sustained by another paragraph in the 10th section of the act, which leaves no possible doubt on the subject. It is the following: "And the Central Pacific Railroad of California, after completing its road across said State, is authorized to continue the construction of said Railroad and Telegraph, *through the Territories of the United States to the Mississippi river*, including the Branch roads specified in this act, upon the routes hereinbefore and hereinafter indicated, on the terms and conditions provided in this act in relation to the said Union Pacific Railroad Company, until said roads shall meet and connect and *the whole line* of said railroad and branches, and telegraph is completed."

We may here take occasion to compliment Mr. McDougall, the Senator from California, and Mr. Phelps, the member of Congress, for their sagacity in the conduct of the measure before Congress; for it is evident enough now, if not before, that it has been the determination of that rich and enterprising State, that the road shall be made in all events. The delay, and we had almost said neglect of the corporators under the act, can do no harm. They have made the merits of the scheme patent if nothing else, and have so far done well. But the Californians are actually at work on the Western division, the Eastern division is also commenced with a powerful and wealthy organization; an understanding if not a contract between these interests exists, the act sanctions their combined or individual operations, and the road will be made without any further action being necessary on the part of the corporators referred to. To galvanize them into new life will therefore be entirely unnecessary, and a waste of metal and acid.

As we had finished the foregoing sentence we received a number of printed circulars in relation to this subject of an extraordinary character. They purport to be the act of a meeting held in this city on the 11th of May last, probably the same which we have before noticed, signed by Geo. Opdyke, J. V. L. Pruyn, F. S. Winstow, Wm. E. Dodge, Cornelius S. Bushnell, A. A. Low, and H. V. Poor, the latter gentleman the only one who belongs we believe to the number of corporators calling for subscriptions to the Union Pacific Railroad Company. These circulars require some remark if not criticism, as they are accompanied by a printed proxy nominating Messrs. Opdyke, Pruyn, Bushnell, Wm. B. Duncan, and H. V. Poor, attornies to vote at the election of directors. A more palpable effort to obtain the control of the company could not be imagined. It would be time enough to get proxies after the subscriptions were made, and much fairer for the stockholders to meet and select the best men for the direction after due consideration of their merits and responsibilities. The appearance of proxies at such a moment has, to say the least, a very suspicious appearance. But, as we have before demonstrated, all this trouble is useless, and the arrangement, though ever so, promising comes too late.

We refer our readers to our carefully corrected tables for the information we have not space at this time to present in a more extended form.

The Vermont and Canada Railroad Company has declared a dividend of four cent, payable on demand.

The Boston and Providence Railroad Company has declared a dividend of 4 per cent. free from Government tax payable July 1.

The Boston and Lowell Railroad Company has declared a dividend of $15 per share, free of Government tax, payable July 1.

The Worcester and Nashua Company pay a semi-annual dividend of $2 per share, free of tax, July 1.

The Old Colony and Fall River Railroad Company pay a dividend of $3 per share, free of Government tax, on July 1.

The Eastern Railroad Company has declared a dividend of $3 a share free from Government tax, payable on the 1st of July. Stockholders residing out of the State will receive the same amount as those residing in the State, the Company ignoring the law passed by the last Legislature, putting an extra tax upon stockholders residing out of the State.

The Fitchburg Railroad Company has declared a semi-annual dividend of 3 per cent. Non-resident stockholders will be subject, under the State law to a deduction of 20 cents per share.

The Metropolitan Railroad Compay has declared a dividend of $2.50 per share, payable July 6.

The Boston and Maine Railroad Company has declared a dividend of four per cent payable July 1.

The Chicago and Alton Railroad Company will pay the first coupon of the first mortgage bonds on presentation at the office of G. S. Robbins & Son, No. 54 William street.

The interest coupons of the Brooklyn City and Newtown Railroad, due July 1, will be paid on that day at the office of the Comyany, corner of Front and Dock streets, Brooklyn.

The coupons of the Joliet and Chicago Railroad first mortgage bonds will be paid at the office of Messrs. M. K Jesup & Co.

The Middlesex Horse Railroad Company has declared a semi-annual dividend of $4 per share, free of Government tax, payable July 6th.

The Philadelphia, Wilmington and Baltimore Railroad a stock dividend of the shares owned by the Company, payable Aug. 1st equal to about 9 per cent in stock.

The six per cent coupons, and the interest on the scrip of the North Pennsylvania Railroad Company, due July 1st, will be paid at the office of the Company in Philadelphia.

The holders of Coupons of the Philadelphia and Reading Railroad Co., due on the 1st proximo, are requested to leave them at the Office on or before the 30th instant, when receipts will be given and checks will be ready for delivery on the 1st proximo, in exchange for the said receipts.

The Buffalo, New York and Erie Railroad Company, have declared a Cash Dividend of 5 per cent. from earnings prior to May 1st, 1863, payable at the Office of the Company, in Buffalo July 1st, in New York city funds.

The Norwich and Worcester Railroad Company has declared a semi-annual dividend of 3 per cent.

The Rome, Watertown and Ogdensburg Railroad Company have declared a dividend of three and a half per cent, payable on the 15th of July.

The Camden and Amboy, and Delaware and Raritan Canal Companies have given notice that the Treasurer is prepared to pay the bonds due on August 1st, being the 5 per cent. converted sterling loan; and also the last coupon.

The Buffalo and State Line Railroad Company have declared a dividend of 5 per cent cash, and 30 per cent in Erie and Pittsburg 7 per cent 1st Mortgage Bonds, payable July 1.

The Panama Railroad Company have declared a dividend of three per cent out of the earnings of the road for the three months ending 30th inst., and one per cent out of the earnings of Steamers, Sailing Vessels, &c., payable 6th July.

The Hartford and New Haven Railroad Company has declared a quarterly dividend of $3 per share, free of Government tax, payable at the Union Bank in this city on the 1st of July.

The Interest Coupons upon the Jersey City Water Loan, due July 1, will be paid on presentation at the Ocean Bank, New York, or the Bank of Jersey City.

Holders of the overdue first mortgage bonds of the Crawfordsville and Wabash R ilroad Company are requested to present the same without delay at the office of Winslow, Lanier & Co., for payment in full.

Holders of overdue Coupons under the First Mortgage ($300,000 loan), of the Scioto and Hocking Valley Railroad Company, are requested to present the same for payment at the office of Winslow, Lanier & Co., No. 52 Wall st. Holders of the said Mortgage Bonds, are requested to present their Bonds at the same office without delay, to arrange for the extension thereof in pursuance of the decree of the Court.

A special meeting of the stockholders of the Cleveland and Mahoning Railroad will be held in Cleveland July 9, to pass upon the proposed lease of the road for ninety-nine years to the Atlantic and Great Western.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Illinois coupon bonds, 1870, 106; Ohio and Miss. Certificates, 35; Miss. and Mo., 25; do., L. Cleveland and Toledo Railroad.

At the annual meeting of the stockholders held in Cleveland on the 17th inst., the following gentlemen were elected directors for the ensuing year: John Gardiner, Norwalk, Ohio; James Mason, Joseph Lyman, H. B. Hurlbut, Cleveland, Ohio; Samuel M. Young, Toledo, Ohio; William M. Vermilye, A. G. Jerome, New York City; A. Stone, Jr., Cleveland, Ohio; A. N. Ramsdell, New London, Ct.

The arrangement previously entered into for the consolidation of the earnings of this road with the Cleveland, Columbus and Cincinnati, Cleveland, Painesville and Ashtabula, Erie and Northeast, and Buffalo and State Line Railroads was approved by the stockholders. An arrangement, previously made by the directors of this company with the Atlantic and Great Western, whereby the Cleveland and Toledo is to carry the through freight of the Atlantic and Great Western, and to give that road, in return, an equal amount of through freight, going East, the latter stipulating to maintain the regular prices, was also ratified by the stockholders.

Propeller Idaho.

This new vessel which is pronounced by the Buffalo newspapers, one of the finest ever built for the lake service at a cost of $70,000 has been put on the line of the New York Central, Buffalo and Cleveland, and Buffalo and Chicago propellers. Her burthen is 915 tons, and her accommodations are in all respects of the first class.

Quakake and Mahanoy Railroad.

The rails on this road are laid down to the summit, four miles from the Catawissa junction, and the iron is on the ground for ten miles of track. By the first of August, it is said, the road will be opened to Mahanoy City.

The Lehigh and Mahanoy Railroad begins in a junction with the Beaver Meadow Railroad 13 miles from Mauch Chunk, and thence to the Catawissa Railroad junction the distance is 14 miles. From the Catawissa Railroad to Girardville the distance is 18 miles, and to Centreville 24. From Centreville to Mauch Chunk the distance is 51 miles, and to Elizabethport 161 miles.

☞ We learn that a company has been organized to build a railroad from St. Louis, Mo., to the Pittsburg coal mines, in St. Clair county, in that State, and that the work has already commenced. The mines were opened several years ago, but the Company failed. It is said the present Company have sufficient means.

Milwaukee and St. Paul Railroad.

Judge Miller, of the U. S. Court, rendered his decision upon the petition of the Milwaukee and St. Paul Railway Company, for actual possession of the La Crosse road. The decision was to the effect that the Milwaukee and St. Paul Company be given possession of all the working railroad property, station depots, etc., of the entire road from Milwaukee to La Crosse, that the present receiver be discharged from all connection with the west end of the road, from Portage to La Crosse, and that his connection with the eastern division be to receive and disburse the earnings on that part of the road. The Milwaukee and St. Paul Railway Company are required to give a bond in the sum of $100,000 to faithfully keep an account of the earnings of the Eastern division, and to pay the money over to the Receiver.

The Court also decided that the road from Milwaukee to La Crosse was an unit, and that the business could not be diverted at Portage City over some other road to Milwaukee without the consent of the parties owning the eastern division, they could then run cars from La Crosse to Milwaukee, either over the eastern division or by way of Watertown, at their pleasure.—*Milwaukee Wis.*

Chicago, Burlington and Quincy Railroad.

At the annual meeting of this company, held at Chicago on the 19th inst., Messrs. John Van Nortwick, of Batavia, Ill., Chauncey S. Dolton, of Galesburg, Ill., James F. Joy, of Detroit, Mich., Erastus Corning, of Albany, N. Y., John M. Forbes, John W. Brooks, Henry P. Kidder, Robert S. Watson, Sidney Bartlett and William Boott, of Boston, and Edward L. Baker, of New Bedford, Mass., were unanimously re-elected Directors for the ensuing year. The annual report shows the entire cost of the property of the company to have been $12,883,116 76. The funded debt bearing interest at an average rate of 6.42 per cent., is $6,102,593 75. The balance of the cost of the property is represented by stocks, 57,386.4 shares, each share representing $118 15, amounting to $6,780,523. The income for the fiscal year ending April 30, 1863, was $2,427,148 18. The operating expenses, rent of depots and tracks, State and National taxes, interest on bonds, and expenditures for improvements, were $1,531,417 81; the dividends amounted to $432,652; payments to sinking fund, $151,515; leaving a surplus of $311,563 37. The expenditures for new locomotives and freight cars, paid out of the above surplus, has been $97,679. Fifteen additional locomotives and 150 additional freight cars have been contracted for early delivery, to relieve the pressing demand for transportation, beside the preparation for manufacturing cars at the company's shops.

Minneapolis and Cedar Valley Railroad.

The old directors of the Minneapolis and Cedar Valley Railroad Company made a formal transfer of the road to the new company June 18th. The following directors were then elected: Selah Chamberlin, Alex. Mitchell, Daniel S. Wells, Ira Y. Munn, F. P. James, Perry H. Smith, Geo. W. Rogers, Russell Sage and C. D. Nash. Selah Chamberlin was elected President, *pro tem.*, and R. Baldwin, Secretary. The road will be prepared for iron to Northfield or Faribault this season, and the track will be laid next Spring,

☞ A special meeting of the stockholders of the Cleveland and Mahoning Railroad will be held in this city on the 9th of July, to take action upon the proposed contract between that Company and the Atlantic and Great Western Co.—*Cleveland Herald.*

Milwaukee and Northern Illinois Railroad.

We understand that preparations are nearly completed to commence the grading on this road. The work will begin on this end of the route within the limits of the city. Considerable stock has been subscribed since the attention of the public was especially called to the matter last winter. Mr. Young, the engineer of the road, is now in Milwaukee, preparing to commence the work.—*Milwaukee Wis.*

Albany Passenger Railroad.

Monday morning will initiate a new era in the history of our city, the effect of which time alone must determine. If successful, the time is not far distant when our city will be "gridironed" by ties and railroad iron. On Monday morning the horse cars will be put on the railroad in Broadway; but for the present they will only run as far North as the Lumber District. As soon as the road is completed they will run to Troy.—*Alb. E. Jour., June 20.*

Taxes upon Dividends.

The Commissioner of Internal Revenue has decided that taxes assessed upon and paid by Corporations upon their dividends or profits prior to the division of the same, are not proper deductions from the income of the stockholders.

The Welland Railway.

This is a work constructed in 1860–'61 on the bank of the Welland Canal, twenty-five miles in length. It was intended to supply additional facilities for the transportation of produce between Lakes Erie and Ontario. For this purpose the cars were built after a peculiar form like the hopper of a mill, of the shape of an inverted pyramid, opening at the bottom, so that grain might be easily dropped into vessels at the points of transhipment. It is admitted that of the fifty millions of bushels of grain shipped from Chicago in 1862, but four millions five hundred bushels were carried over this railway in consequence of the want of steamers to connect with it, and that to have a full share of the business, additional facilities have become necessary. At a recent meeting of the shareholders in England, the affairs and condition of the company were fully discussed, and from the remarks of the chairman and others of the proprietors, we have been able for the first time to obtain some information in regard to it.

The receipts in 1860 were £12,430; in 1862 they were nearly £20,000. The expenditure in 1860 was £8,600; in 1862, £10,085. Amount still due creditors £16,000. Shares unissued 2,100, equal to £43,155. Amount due on 1st and 2d mortgage bonds, £150,000.

The actual amount of capital paid up is not stated. It is now proposed to purchase four propellers at a cost of £8,000 each which, with the debt already stated of £16,000, will amount to about £50,000. To raise this sum an agreement for the signature of the bondholders has been prepared in the following words:

"With the view to the liquidation of the debts of the company, and providing steam vessels and other requisites for the development of the Welland Railway, we, the undersigned holders of the first and second mortgage bonds respectively for the amounts set against our names, do hereby authorise the Directors of the company to take steps for raising by means of a preferential loan, a sum not exceeding £50,000 on the best terms which can be obtained, and as a security for the same, we hereby authorise the Directors to apply for an act of the Canadian legislature if necessary, giving to the lenders a first charge on the company for the amount, and also to withhold such portion of the interest due to us upon our bonds *pro rata* towards payment of interest on the said sum of £50,000, or any part thereof."

Many of the large bondholders have already signed it. Messrs. Cunard & Brassey also expressed their willingness to come into the arrangement, and it was resolved that the Directors should be empowered to carry out the plan proposed.

The following is an extract from the report presented to the meeting:

"Notwithstanding the exceptional state of affairs which has prevailed on the American continent, and heavy losses incurred by the depreciation of the American currency, a sum of nearly £4,000 net profit has been earned in the year 1862; a strong indication of the substantial character of the undertaking, and of the results which may be expected, when the incumbrances which now weigh down the concern are removed. The two main difficulties in the undertaking, and to which the Directors desire to draw the earnest attention of the proprietors, are—First: The amount of debts still owing for the construction and equipment of the line. Secondly: The want of steam vessels to carry off the produce, which is merely waiting for the completion of facilities for transportation, to be brought in abundance to the line. It appears by the annexed accounts, that there is still owing to creditors a sum (including interest not hitherto computed) of about £16,000, and the Directors have reason to fear, that any longer delay in liquidating their claims may occasion serious detriment to the undertaking. There are now remaining unissued shares to the number of above 2,100 representing a nominal capital of £43,155, and £4,100 second mortgage bonds. If upon the security of these two amounts a sum of £20,000 could be raised, the whole of the debts of the company might be paid off, additional power of discharging vessels provided, the line placed in a thorough state of repair, and in a condition to carry twice the amount of traffic which has ever yet passed over it; and from thenceforth the earnings of the road might be appropriated towards the payment of interest. With regard to the second point, viz., the want of steam vessels, the Directors are assured from all quarters, that the uncertainty and lack of despatch occasioned by the want of propellers in connection with the Welland Railway, are the sole reasons why a much larger amount of traffic is not now forwarded by that line. By testimony of both agents and shippers, the Welland line holds out advantages which cannot be rivalled by any other route, if it can only be provided with the necessary appliances for the despatch of business. The subject of propellers has been frequently brought before the notice of the proprietors, and the feeling hitherto expressed has been reluctance to embark their capital in any shipping undertaking, and rather to wait till the ordinary course of commerce shall have provided the necessary amount of carriage for the growing traffic on the lakes. Without questioning the prudence of this principle, and its ultimate success, the directors are of opinion, that, owing to the great want of capital in Canada, and the slow progress therefore of commercial enterprise generally, it is desirable that the company should anticipate the period of this natural supply of steamers by becoming shipowners to the limited extent of, say, four vessels, a course which was strongly recommended by Mr. Bidder in his report in 1858. This course would entail a further outlay upon the company of about £30,000, making, together with the £20,000 for debts and repairs, a sum of £50,000, which, added to the sum of £150,000 already borrowed upon first and second mortgage bonds, would make a charge upon the company of £200,000 bearing interest. Now, it appears from the statement of the general manager in his last report, already in the hands of the proprietors, that "with propellers of their

own, our net profits for 1862 would have been at least $120,000," or £24,000, being at the rate of 6 per cent. upon £400,000. It would seem, then, to be for the interest of the company to enter at once upon this more extended outlay. The Directors have thus endeavored to place before the proprietors the true position of their affairs, and the steps which seem to be necessary for the development of the capabilities of the Welland Railway. If no exertion is made to free the line from debt, and to provide it with such facilities for traffic as experience has proved to be indispensable, the directors cannot lead the proprietors to expect any prosperous result. On the other hand, they believe, that by a judicious outlay on vessels, and liquidation of debts, which, compared with the interests at stake, amount really to but an insignificant sum, the line might be placed by the commencement of the navigation season in 1864, in such a state as would insure a good return to all who have embarked in the undertaking.

It is a question whether the railway will be as profitable an investment as was first supposed. It requires considerable repair, and does not of itself secure all the traffic expected. We confess we do not see what great inducement there is for a vessel loaded with grain to unload for the purpose of transhipment by a railway of that extent, when it can pass through the Welland Canal without encountering this delay, and the expense of handling the cargo twice over.

The reports of the company are so general and vague, we find it quite impossible to present a statement of its affairs in the clear and intelligible form usual in our columns.

St. Paul and Winona Railroad.

The St. Paul and Pacific Railroad Company have a corps of engineers engaged in surveying their branch road from St. Paul to Winona, and the work will be pushed as rapidly as possible. The line starts from St. Paul, and proceeding along the east side of the river crosses over at Hastings, whence it will continue to the west bank of the Winona. The work is being done under the direction of Mr. Charles A. F. Morris, Chief Engineer of the Company.—*St. Paul Pioneer.*

The Latest Needle News.

Those of our readers who have WHEELER & WILSON Machines in their families—and who has not?—will be pleased to learn that still another improvement has been added to their invaluable home companions—a "trimmer," so called from its being designed to "trim" ladies' dresses. This little attachment stitches braid of any width on one edge only; and really, when one observes the hundreds of elegant robes decorated around the skirt with half a dozen rows of braid, more or less, now worn, it is surprising that this improvement was not sooner "thought of." There is no computing the weary hours of labor its steel and crystal circlet will economize.—*N. Y. Express.*

Prairie du Chien and La Crosse Railroad.

The following gentlemen have been elected officers of the above Railroad Company, viz: C. K. Lord, President; L. C. McKenney, Secretary; E. D. Campbell, Treasurer; Hugh Cameron, Attorney; Thomas Spence, Superintendent. The books will soon be open for subscription, and work will be commenced at an early day, and a portion of the track laid this summer. The distance from La Crosse to Prairie du Chien is but 58 miles—40 shorter than by water.—*Democrat.*

Milwaukee and Horicon Railroad.

The Milwaukee and Horicon Railroad was sold by the U. S. Marshal, at Milwaukee, on the 13th, for $670,000. The purchasers were Russel Sage, of New York, and Hon. Washington Hunt, of Lockport, N. Y.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending June 12, 1863, was as follows:

Passengers	$20,919 12
Freight and live stock	21,021 42
Mails and sundries	1,715 96
Total	$43,656 50
Corresponding week of 1862	42,743 23
Increase	$913 27

The earnings of the Grand Trunk Railway for the week ending June 6, 1863, were:

Passengers	$24,489 67
Freight and live stock	3,000 00
Mails and sundries	52,693 35
Total	$80,183 02
Corresponding week, 1862	62,852 71
Increase	$17,330 31

The earnings of the St. Louis, Alton and Terre Haute Railroad for the 1st week in June, 1863, were $25,932 62
Same week, 1862 16,338 03
Increase $9,594 59

The earnings of the Toledo and Wabash Railroad Company for the 2d week of June, 1863, were $36,550 87
Same week, 1862 28,308 10
Increase $8,242 77

The earnings of the Chicago and Northwestern Railway for the 2d week in June, 1863, were $27,111 59
Do., 1862 30,268 11
Decrease $3,156 52

The earnings of the Michigan Southern Railroad for the 2d week of June, 1863, were $50,200 00
Do., 1862 35,400 00
Increase $14,800 00

The earnings of the La Crosse and Milwaukee Railroad for the 2d week in June, 1863, were $30,762 16
Same week, 1862 26,491 29
Increase $4,270 87

The earnings of this road will be reported hereafter, as of the Milwaukee and St. Paul Railway Company, it having passed into the possession of that company on the 14th inst.

The earnings of the Galena and Chicago Union Railroad for the 2d week of June, 1863, were:

Freight	$46,102 80
Passengers	9,227 61
Mails	1,300 00
Total	$56,630 41
Same week, 1862	56,832 80
Decrease	$202 39

The earnings of the Chicago and Alton Railroad for the 2d week of June, 1863, were:

Passengers	$14,640 72
Freight	23,625 69
Sundries	1,035 83
Total	$39,302 24
Same week last year	25,252 99
Increase	$14,049 25

Vermont and Canada Junction Railway.

Gangs of men are at work on the grading of both ends of this work within the Province—St. Athanase and South of Moer's corner. Mr. Lindsay, Civil Engineer, is the contractor.

Milwaukee and Chicago Railroad.

The consolidation of the Milwaukee and Chicago Railroad Company with the Chicago and Milwaukee Railroad Company is now completed, under the name and style of the Chicago and Milwaukee Railway Company. Mr. Walter S. Gurney and E. K. Rodgers of Chicago, Mr. Charles L. Frost of New York, and John V. Ayer of Kenosha, have been appointed provisional Directors, who will manage the new Company until the election of officers. Mr. Frederick Schuchardt of New York, Hon. John V. Ayer of Kenosha, and Sidney O. Sage, Esq., of Racine, are appointed trustees to wind up the Milwaukee and Chicago Railroad Company; and Messrs. Blodgett, Gurnee and Witt of Chicago, are appointed to wind up the affairs of the Chicago and Milwaukee Railroad Company.

The forms of consolidation are substantially as follows:

The roadbed, rolling stock and franchises are put with the new company, mile for mile, on a basis of $25,000 per mile, which amounts to	$2,125,000
The Chicago and Milwaukee Company receive a bond of stock in the new company, in consideration of the excess of bonded debt on the Milwaukee and Chicago road, and value of depot grounds in Chicago	112,500
Stock reserved by the new company to pay expenses	12,500
Making the capital stock of the new company, for which certificates of the new company will be issued	$2,250,000
The bonded debt on the Chicago and Milwaukee road is	900,000
On the Milwaukee and Chicago road	850,000
Total bonded debts	$1,750,000

The following gentlemen have been elected directors of the newly organized company: Alexander Mitchell, of Milwaukee; James Luddington, of Milwaukee; Stillman Witt, of Cleveland; E. K. Rogers, of Chicago; John Turner, of Chicago; John V. Ayer, of Chicago; J. Wadsworth, of New York; Charles L. Frost, of New York, and Fred. Schuchardt, of New York. The new board organized by electing A. Mitchell President and E. K. Rodgers Vice President.

Cleveland, Painesville and Ashtabula R. R.

The following gentlemen have been elected directors of this company for the ensuing year:

A. Stone, jr., T. M. Kelly, S. Witt, George B. Ely, H. B. Payne, William Collins, Jas. Miles, J. W. Wetmore, Samuel J. Randall, Hamilton White, E. M. Gilbert, C. C. Dennis, Henry E. Parsons.

President—A. STONE, jr.

Vice President—STILLMAN WITT.

Secretary and Treasurer—GEORGE B. ELY.

Superintendent—HENRY NOTTINGHAM.

SMITH'S
Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of SMITH'S AIR LIGHT FOR RAILROADS, and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks, chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.

In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.

You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

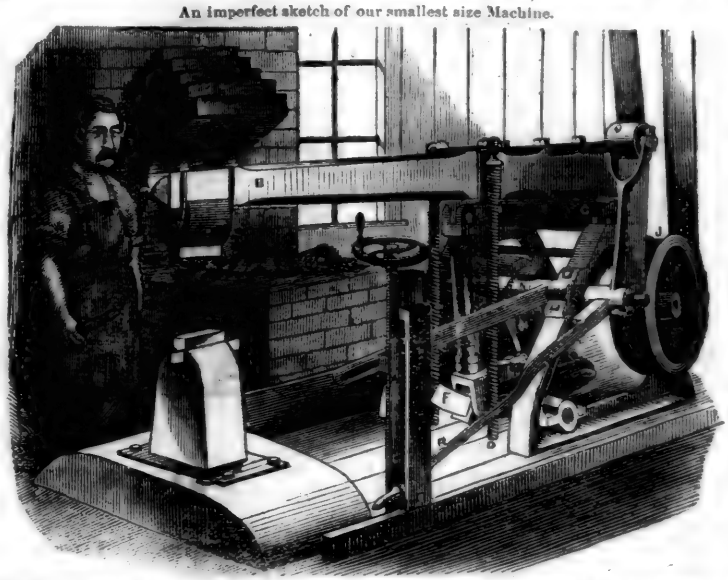
300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,

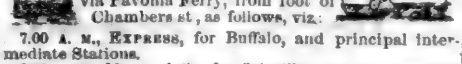


I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, **21 Nassau st.**, or by addressing
CHAS. W. WELSH,
Secretary.

AMES IRON WORKS,
OSWEGO, N. Y.,
SOLE AND EXCLUSIVE OWNERS AND MANUFACTURERS, UNDER PAYE'S PATENT.



An imperfect sketch of our smallest size Machine.

PAYE'S PATENT FORGE HAMMER. A HAMMER ADAPTED TO BOTH HEAVY AND LIGHT FORGINGS, with an adjustable stroke of from one inch to three feet. This hammer is adapted to both heavy and light forgings; the force of the blow being entirely at the will of the operator, and for all forgings under six inches, either round or square, is the best hammer now in use, and requires but one-half the power used by every other hammer to do the same work. For an engraving and description of this hammer, see page 1, Vol. V (new series) of the SCIENTIFIC AMERICAN; some valuable improvements have, however, been since made. All communications should be addressed to H. M. Ames, Box 422, New York, or Ames Iron Works, Oswego, N. Y.

These hammers may be seen in operation at the Allaire, Neptune, Secor, Delamater, Fletcher & Harrison, Duncan & Crampton, Anderson & McLaren, Dulhurst & Emerson, Charles T. Porter, all in New York City; Joseph Colwell, Jersey City; Wm. White, Newark, N. J.; Providence (R. I.) Tool Co.; Whiting & Wilcox, Kaigh's Point, Phila.; Mallory & Cottrell, Mystic, Conn.; J. Dillion, Rondout; James Horner & Co., Sing Sing; Henry Esler & Co., Brooklyn; James B. Eads, St. Louis, Mo.; Central Railroad Shop, Albany; Burlington, Quincy & Chicago Railroad Shop, Ames Iron Works, Oswego; M. Guinness, Albany; Sweet Brothers, Syracuse.

ERIE RAILWAY.

PASSENGER TRAINS leave, via Pavonia Ferry, from foot of Chambers st., as follows, viz:

SPERM, WHALE, LARD AND OTHER OILS,
For Railroads, Steamers, Machinery and Burning.

FOX LATHES.

F. W. BACON & CO.,

No. 23 PLATT, corner of GOLD ST.,

NEW YORK,

RESPECTFULLY ask attention to their stock of Machinists' and Brassfinishers' tools from the establishment of Messrs. Geo. H. Fox & Co., of Boston.

Nason's Patent Screw Chasing Lathe manufactured solely by the above firm is without a rival or substitute for the manufacture of Cocks, Valves, Hose Couplings, Steam and Gas Fittings, and general Brass Finishing.

They have and are constantly receiving from the same celebrated manufacturers, Chucks, and Slide Rests, Shafting, Pullies, Hangers, etc.

The Hangers manufactured by them are of the most approved kind. The bearing being suspended by a universal joint; its advantages over the rigid Hanger will be at once seen and appreciated by any mechanic. It is every way calculated for economy, being fitted with a patent box, which adjusts itself to the shaft, and they guarantee it to run SIX MONTHS WITHOUT RE-OILING, thereby saving labor, friction, oil, and the disagreeable and sometimes destructive effects of the dripping of oil from above.

ELEVATORS

For warehouses, manufactories, hotels, mechanics' shops, stores, or any other use where power Elevators are required; they guarantee all the safety that can be combined in any machine that is made. They are arranged with an improved apparatus, to hold the load in case the rope parts, which is unerring; also an invention of their own, to automatically arrest the descent of the load, if by any cause it should move downwards beyond the prescribed speed.

They also manufacture and are the exclusive licensees of Otis Tuff's Patent Elevator. The distinctive features are: the winding drum is driven by an endless screw—two or more ropes are used instead of one, thereby insuring more than double the safety—a peculiar mode of shipping the driving Belts, which insures it to stop at the required point. It operates without noise or jarring.

Belting, Belt Lacing, and Picket's Patent Belt Fastenings kept on hand and furnished to order. Steam and Water Gauges, Gauge Cocks, Packard's Patent Ratchet Drills.

ALL DESCRIPTIONS OF MILL WORK MADE TO ORDER.

BABBITT METAL.

Parties wanting Shafting, Elevators, or any other machinery, will be waited on by an experienced Engineer, their premises surveyed, plans and estimates made, machinery located, and the erection superintended when desired.

Having made this branch of Engineering a SPECIALITY the past ten years with uniform success, they confidently offer their services to those requiring such aid.

DELAFIELD & BAXTER'S,

Late OGDEN & DELAFIELD,

ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well papered, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

PACIFIC RAILWAY.

THE undersigned will receive proposals to furnish four thousand (4,000) tons of railway iron (or any part thereof) for the track of the first section of the Union Pacific Railway, Eastern Division. The iron to be of American manufacture, of the best quality, and to be delivered either at Leavenworth or Kansas City. Communications for further information to be addressed to the undersigned or to SAMUEL HALLETT & Co., 58 Beaver st., New York. Terms, cash on delivery.

J. C. FREMONT,
Pres't Union Pacific Railway, E. D.

NEW YORK, June 9, 1863.

SAFES.

FIRE AND BURGLAR-PROOF SAFES.

M. MOSSMAN,
24 West Broadway.

SUBSTITUTE FOR

CAR DUCK.

Kingman's Car Covering.

THIS is a kind of Elastic Mastic, a thick coating of which is applied to the top of the Car, and into it a heavy Burlap or Bagging is imbedded and thoroughly painted, thus making a covering VERY MUCH LIKE **CAR DUCK**, but at this time at half the cost. It is now successfully used by several New England Roads and Car builders. Directions and particulars sent when requested. This Mastic and Burlaps for sale by

WILLIAMS & PAGE,
67 Water street,
Boston.

March, 1863.

Semi-Steel Locomotive Tires, Fire-box & Tube Sheets,

AND BOILER PLATES.

TIRES—ROLLED, BLOCKED AND WELDED TO FIT ANY GIVEN DIAMETER OF CENTRE
PLATES—ROLLED AND CUT TO ANY PATTERN AND SIZE ORDERED.
ROLLED AND HAMMERED BARS, AXLES AND FORGINGS OF SAME METAL.

MANUFACTURED BY
CORNING, WINSLOW & CO.,
ALBANY IRON WORKS, TROY, N. Y.

SOLE AGENT,
GEORGE T. M. DAVIS,
47 EXCHANGE PLACE, N. Y.

CAST STEEL WORKS

OF

FRIED. KRUPP,

At ESSEN, in RHENISH PRUSSIA.

Patent Railway Tires, without a weld. **Axles, Cannon, Anchor-Flukes, Propeller Blades and Shafts. Cranked Axles and Shafts up to Twenty Tons weight.**

CAST STEEL IN BARS, BEST QUALITY,

Suitable for Axles, Shafts, Rolls, Tools, Dies, Needle and Music Wire, Fine Cutlery, etc.

KRUPP'S TIRES

ARE CHEAPER AT THEIR COST THAN IRON ONES GRATIS.
THEY WILL, WITHOUT TURNING, ENTIRELY OUTWEAR THE BEST IRON ONES.
WEAR UNIFORMLY, WITHOUT FLAT PLACES, OR LAMINATION.
ARE NOT AFFECTED BY EXTREME COLD.
MORE THAN SIXTY THOUSAND OF THESE TIRES HAVE BEEN SUPPLIED.

KRUPP'S AXLES

Possess similar advantages over Iron ones that the Tires do.

American Railroad Journal.

New York, Saturday, July 4, 1863.

Flint and Fentonville Railroad.

This is the name of a corporation lately organized in Michigan, of which about two-thirds of the stock has been taken by parties in New Bedford. The directors are Henry H. Crapo and J. B. Walker, of Flint, and Thomas Knowles, Humphrey W. Seabury, Joseph C. Delano, Pardon Tillinghast, and Oliver Prescott, of New Bedford. Mr. Crapo is President.

The road will be 16 miles in length, connecting Flint, the shire town of Genesee County, with Fentonville station on the Detroit and Milwaukee Railroad. It is estimated to cost about $260,000.

Rome, Watertown and Ogdensburg R. R.

At a meeting of the Board of Directors of this Company, held at the St. Nicholas Hotel on the 17th ult., it was resolved to submit to the stockholders a proposition to increase the capital stock of the company from $1,500,000, the present captal, to $2,000,000, and a meeting of stockholders to pass upon that question was called for the 15th inst., at Watertown. The new stock if issued, will be offered to the present stockholders *pro rata* till the 1st of September. It will be used to diminish the funded debt, and to make some necessary improvements in the way of machine shops, etc.

Illinois Central Railroad.

The Directors of the Illinois Central Railroad Company, give notice to the shareholders that the net earnings during the past six months, have exceeded 3 per cent on the capital stock. They have made a dividend of 2 per cent and reserve the surplus until the declaration of the next semi-annual dividend, with the expectation at that time of paying a dividend of 4 per cent, in order to cancel the lien upon 345,000 acres of land now held in trust for the payment of the interest on the full paid stock, and thus transfer the proceeds of the said lands to the general interest fund of the Company.

Resolved, That there be a dividend of 3 per cent, free from Government tax, upon all the shares and canceled bonds scrip standing in the names oi holders on the books of the Company at the close of business, on the 20th day of July, inst, payable on and after the 1st of day of August, upon all shares the calls upon which shall have been duly paid. And that the dividend upon the full paid stock, shall be a discharge of the interests payable thereon the 1st day of January next, and payable upon surrender of the coupons issued thereon.

Milwaukee and St. Paul Railroad.

The Milwaukee and St. Paul Railway Company advertise for proposals to construct 28 miles of road from Columbus to Portage City, Wisconsin. The construction of this road gives them a good claim to the lands donated by Congress to the late La Crosse Railroad Company, and also a through route from Chicago and Milwaukee to the Mississippi river, independent of the Eastern Division of the late La Crosse Railroad. The Milwaukee and St. Paul Railway Company is the successor of the late La Crosse and Milwaukee Railroad Company, the Milwaukee and Western Railroad Company (commonly called the Watertown Road), and the Milwaukee and Horicon Railroad Company. They own all the rolling stock and equipments of the above companies, and operate their whole lines of road, 346 miles in all. Of this 346 miles the St. Paul company own absolutely 251 miles, including the 28 miles to be built. The remaining 95 miles—the Eastern Division of the La Crosse—are still in litigation.

☞ In the Philadelphia City Council, on the 26th ult., the ordinance directing the erection of an iron bridge over the Wissahickon was adopted.

Ontario Steamboats.

On the 22d ult., the splendid steamer Ontario resumed her place, thus forming a daily line through Lake Ontario and the river St. Lawrence. The Bay State—Capt. Morley; Ontario—Capt. Estes, and Cataract—Capt. Ledyard, constitute the line so well known to pleasure and business travelers. The steamers connect with all the lines of travel along the route, both in Canada and on this side; at Kingston with the Grand Trunk Railway and steamboat for the Bay of Quinty; at Ogdensburg with the steamers for Montreal and Quebec, the Watertown and Rome Railroad, and the Northern Railroad for Boston and all points east; at Prescott with the Prescott and Ottawa Railroad, for Ottawa and the North; at Oswego with the New York railroads in all directions.

Our National Gold Mines.—A Sure Basis of Credit.

Few people are more favored than our own in the possession of those material advantages which facilitate national security and progress. Among these, and by no means the least of them, is the possession of so many auriferous mines scattered throughout our States and Territories. An accident first revealed the golden treasures of the soil of California. Captain Sutter, the first white man who had established himself in the district where the Americanos joins the Sacramento, having erected a saw-mill on the former river, whose tail race turned out to be narrow, took out the wheel, and let the water run freely off. A great body of earth having been carried away by the torrent, laid bare many shining yellow spangles, and on examination, Mr. Marshall, his surveyor, picked up several little lumps of gold. He and Captain Sutter then commenced a search together, and gathered an ounce of the ore from the sand without any difficulty; and with his knife the captain picked out a lump of an ounce and a-half from the rock. A Kentuckian workman employed at the mill had espied the supposed secret discovery, and when, after a short absence, the gentlemen returned, he showed them a handful of the glittering dust. The captain hired a gang of fifty Indians and set them to work. From this discovery has resulted the immense yield of gold in California, familiar to all of our readers. The history of the production of gold in California and the States of

the Union, is well told in the following table, showing the deposits of gold in the limits of the United States; it being a statement of gold of domestic production deposited at the Mint of the United States and its branches, from 1804 to June 30th, 1857.

Previous to the discovery of gold in California and Australia the annual yield of the precious metals from all other countries was comparatively insignificant. Thus the quantity of gold which may be considered as having been brought into the European market, every year on an average, from 1790 to 1802, is, from the old continent 8,800 *lbs. avoir.*, and from the new continent 40,260 *lbs. avoir.* The present yield of the gold and silver mines of the United States is probably not less than ninety million dollars per annum. It is difficult to get at the precise figures; but it is estimated by good judges that California alone yields $79,000,000 per annum. Equally good authority estimates the yield of Colorado at $8,000,000. But a portion of the gold and silver finds its way to the mints and its branches, and of course, only this portion is officially reported upon. Other portions are sent directly to Europe, with rarely the stamp of a private assayer, marking its value. The following is an official statement of gold and silver of domestic production, deposited at the mint and its branches during the fiscal year ending June 30, 1862.

GOLD.

California	$26,854,667 59
Colorado	2,035,416 50
North Carolina	2,313 38

California	8,224 00
Arizona	105 00
Parted from domestic gold	245,122 47
Total silver	$1,032,264 45
Total gold and silver of domestic production	$32,008,857 69

This table shows, at a glance, the number as well as the principal sources of our gold and silver production. Many of these are new, and the mines just discovered or just beginning to pay. Colorado is fast becoming a territory of great importance, as is attested by the yield of its mines, and its growth in population. We have recently been assured, by a scientific gentleman holding a high official position, that the mines of Colorado *are richer than those of California*, and when machinery proper for separating the gold from the peculiar formation in which it is found, shall have been introduced into this Territory, the yield of the precious metals will rival that of our Pacific State.

With this immense annual yield of precious metals, we respectfully suggest that we have a fine basis of credit. There is no production of labor which can be taxed, with so great profit to the Government, because the tax would be in proportion to the yield and would be payable in the bullion itself, thus giving to the Government the advantage of any premium it might bear. The tax would not be felt by the public at large, because so long as gold is principally used as a currency, the community gain nothing, but are rather losers, by an increase of the volume of currency; and if taxation resulted in a decrease of the number of miners or mining companies, the loss would not be felt by the public.

By the Common Law of England, mines of gold and silver are the property of the Crown, and gold and silver are therefore called royal metals. The Crown leases mines or mining rights to its subjects, who pay an annual rent in advance, and in addition the lessee pays a royalty upon the amount of gold actually mined. Why should not this be the case with us? The Government at Washington represents the unity of our people, and mines of gold and silver properly belong to *the people*, wherever or upon whatever land they may be found; and private individuals should pay the *people* for the privilege of working them. We think that this is an immense source of revenue, which, so far, the authorities at Washington have overlooked.

Chicago and Rock Island Railroad.

The earnings of this road for the year ending March 31, 1862, have been as follows:

From passengers		$433,297 33
" freight		1,034,850 29
" mails, etc		60,993 40
		$1,529,141 02

The disbursements for maintaining and operating the road during the same time were:

Repairs of road	$161,251 98	
" engines	71,861 87	
" cars	102,449 58	
" bridges	13,806 04	
" buildings, etc.	18,862 49	
" fences, etc	12,732 04	
Cost of iron for repairs	79,178 07	
Fuel	98,384 83	
Oil, waste, etc	12,513 39	
Loss and damage	4,857 97	
Contingent account	7.773 60	
Salaries of agents, etc	60,544 37	
Labor, handling freight	59,131 64	
Pay of train hands	78,422 83	
Station house expenses	11,780 47	
Stationery, etc	6,300 14	
Exchange	1,185 81	
		800,987 12
Leaving net earnings		$728,153 90
From which deduct—		
Cost of new works and rights of way	$45,791 34	
Taxes, including U. S. Government tax on pass	40,354 36	
Legal expenses	3,907 91	
Interest on bonds	97,790 00	
Rent of Peoria road	125,000 00	
Interest on income bonds	2,345 00	
Dividends	338,239 48	
		653,428 09
Leaving a surplus of		$74,725 81

There has been expended upon the road, properly chargeable to construction, $59,098 72. Of this amount, $32,021 48 is included in the item of repairs. The balance, $27,077 24, is charged to construction repairs. In addition to which their has been 27 pile and trestle bridges rebuilt of an aggregate length of 1,610 feet, at a cost of $9,190 77.

INCOME ACCOUNT.

Balance to credit, April 1, 1862	$540,444 15
Earnings, as above	1,529,141 02
	$2,069,585 17
Interest on bonds, July 9, 1862	$48,895 00
Dividend July 10, 1862, 3 per cent	168,090 00
Rent of Peoria Branch to July 31, '62	62,500 00
Interest on income bonds, Oct. 31, '62	2,345 00
Dividend Jan. 8, 1863, three per cent	165,045 00
Government tax on same	5,104 48
Interest on bonds Jan. 8, 1863	48,895 00
Rent of Peoria Branch to Jan. 31, '63	62,500 00
Operating expenses, as above	800,987 12
Taxes	35,001 07
Legal expenses	3,907 91
U. S. tax on passengers	5,353 29
Balance March 31, 1863	660,961 30
	$2,069,585 17

The new materials placed in the tracks during the year have been: 145,230 ties, 1,003 tons rails, 814 tons rails re-rolled, 1,504½ kegs spike, 8,668 fish plates for rail joints, 17,366 bolts for fish joints, 3,622 cast chairs and 10,000 bolts for cast chairs. The value of the above materials is put down at $127,007 57. There has been relaid with

new rails, and mostly with new ties, 20¼ miles of track.

The company have 61 locomotives, most of which are in good working condition. Two of this number are in the service of the Illinois Central Railroad Company.

The number of miles run by engines with passenger trains was 354,267; with freight trains, 579,115; with wood and gravel trains, 97,502—total miles run, 1,030,884. The cost per mile run for each locomotive is 20.78; last year it was 19.90 cents, an increase of 0.87 cents. The proportion of expenses to earnings, including new works, extraordinary repairs and expenses, is 57.9 per cent. Less new work, legal expenses and taxes, 52.4 per cent.

The total amount of freight transported over the road during the year was 759,757,810 lbs. The number of loaded cars was 47,623, viz: going West, 16,395; going East, 31,228. Tons carried one mile, 38,558,462.

The whole number of passengers carried over the road was 253,244; of which 122,566 went West, and 130,678 East. Of these, 250,543 were first class, 1,667 second class, and 1,034 emigrant. Through passengers, 29,352; way do., 223,892. Number carried one mile, 14,206,292. Number of soldiers, 20,625; of these, 13,821 went East, and 6,804 West.

The number of lbs. transported across the Mississippi bridge for the year was 221,152,070, viz: going West, 78,078,740; going East, 143,081,330. Number of car loads passing East, 8,306; do., West, 5,866. Foot passengers going East, 4,166; do., West, 40,277. Number of steamers passing the draw going North, 353; do., going South, 354. Total number of rafts, 287.

BALANCE SHEET.

Capital stock account	$5,603,000 00
Mortgage bonds	1,397,000 00
Income bonds	70,000 00
Suspense account	8,250 00
Unpaid coupons	3,827 60
Profit, balance of income account	660,961 30
	$7,743,038 90
Cost of roads and equipment	$7,069,727 59
1,015 shares company's stock	101,500 00

Cash and loans in hands of Treasurer	182,761 93
	$7,743,038 90

President—HENRY FARNAM.

Directors—Thomas C. Durant, Francis H. Tows, David Dows, Charles W. Durant, E. W. Dunham, Thomas T. Sturgess, Geo. T. M. Davis, Harvey Kennedy, Nathan Peck, Henry Farnam, John F. Tracy, Robert A. Forsyth.

Treasurer—E. W. DUNHAM.

Secretary—FRANCIS H. TOWS.

Superintendent—JOHN F. TRACY.

Assistant Superintendent—W. H. WHITMAN.

Cashier—FRANK D. SHERMAN.

Decision Relative to Transactions in Coin.

The Commissioner of Internal Revenue has made the following important decision relative to the sale of gold and silver coin, or bullion and loans thereon:

First: All contracts for the purchase and sale of gold and silver coin or bullion, and all contracts for the loan of money or currency secured by the pledge of deposit or other disposition of gold or silver coin of the United States, if to be performed after a period exceeding three days, must be in writing or printed, and signed by the parties, their agents or attorneys.

Second: Such contracts must bear adhesive stamps equal in amount to one-half of one per cent. of the price to be paid, or of the amount of money or currency loaned, and in addition thereto, stamps equal to the amount of interest at the rate of six per cent. per annum, upon the contract, for the longest time named therein.

Third: A renewal of the contract would be subject to the same conditions, and if a contract originally made for a period not exceeding three days be renewed, or in any way extended, such contract must be duly stamped when so renewed or extended.

Fourth: No loan of currency or money on the security of gold or silver coin of the United States, or of any certificate or other evidence of deposit, payable in gold or silver coin, can be made for an amount exceeding the par value of the coin pledged or deposited.

Fifth: Gold and silver coin loaned at the par value thereof is subject only to the duty imposed on loans.

Sixth: Contracts, loans, or sales of gold or silver coin or bullion, not made in accordance with these regulations, are void; and in addition to existing penalties for violation of the Excise law, any party to said contract may, within one year from the date thereof, bring suit to recover back for his own use and benefit the money paid on any such contract.

Seventh: Nothing in these regulations shall apply to any transactions by or with the Government of the United States.

Troy and Greenfield Railroad.

The Boston correspondent of the Springfield *Republican* states that Judge Redfield and Judge Washburn have submitted to the council elaborate legal opinions on the question of the legality or validity of the second mortgage bonds of the road. The following hint of their tenor is given:

"It is understood that Judge Redfield thinks but little of the legality of the bonds, because they were issued in defiance of the statute which declares that corporations may, for the purpose of funding their floating debt or for money borrowed for any purpose sanctioned by law, issue bonds to an amount not exceeding the capital stock not paid in. Assuming that nothing like $900,000 has been paid in, the issue of second mortgage bonds to that amount would be illegal. On the other hand, it is argued that the bonds have a certain validity, some of them being held by innocent parties, towns and individuals, who have done work or lent money, and that only a judicial decision could determine how much they are worth. Judge Washburn is believed to hold a little better opinion than Judge Redfield of the bonds. The question of how thick and tangible is this cloud on the Commonwealth's title bothers the Governor and Council, and they are very properly trying to settle it. How many new questions are to succeed it I cannot say. For the present, at least, I presume the State authorities will not resume work upon the road or tunnel."

Morris and Essex Railroad.

By an arrangement with the New Jersey Railroad and Transportation Company, the line of the Morris and Essex Railroad is to be extended to Philipsburgh, on the Delaware river, opposite Easton.

Minneapolis, Faribault and Cedar Valley Railroad Company.

At a meeting held at Minneapolis on the 18th of May, upon the resignation of the Corporators and Directors of the old Board, organized under the act of 1862, a new Board was chosen consisting of Selah Chamberlin, of Cleveland, O., Alexander Mitchell, Milwaukee, Daniel S. Wells, Milwaukee, Ira T. Munn, Chicago, Frederick Jones, New York, Perry H. Smith, Chicago, George W. Rogers, New York, Russell Sage, New York, and Chas. D. Nash, Milwaukee.

At a subsequent meeting in the evening, Selah Chamberlain was elected permanent President, and R. J. Baldwin, Secretary. A deposit of $50,000 was placed by the new Board in the hands of R. J. Baldwin as a security for the fulfillment of the conditions of transfer. The new company comprises many gentlemen of wealth and distinguished reputation in railroad enterprises, besides those named above as Directors, and we have assurances that the work will be rapidly pushed forward, and entirely completed and in running order in two years. A commencement will be made immediately at the Minnesota river. The foundation for the bridge will be completed before winter, and the superstructure early in the spring. The road bed to Northfield and Faribault will be prepared for the iron before fall, and if navigation is not obstructed during the whole season by extreme low water, a considerable portion of the track will be laid before winter.

As considerable anxiety is felt in regard to the construction of the branch from Mendota to "St. Paul or West St. Paul," we are glad to state, upon authority, that it will be completed simultaneously with the main line. It is a part of the project, and the Directors have no disposition to evade that provision of the charter any more than others under which they propose to act.—*St. Paul Pioneer.*

Cleveland and Mahoning Railroad.

The Brookfield branch of the Cleveland and Mahoning Railroad is now located from Youngstown to the Pennsylvania State line, distant about one mile from Sharon, to which point it will be extended when the necessary legislation is had. The road, as now located, is twelve miles in length, ten miles of which will be completed during the present season, affording an outlet to the immense coal fields of Hubbard and Brookfield, now being extensively opened up. A large part of the grading of the road is already completed, and several miles of track from Youngstown northward have been laid.

Chicago and Northwestern Railroad.

The contract for the construction of that part of the Chicago and Northwestern Railway between Bay de Noquet and Marquette, Lake Superior, the iron mines, has been let to Mr. Wells, of the late firm of French & Wells, the gentlemen who built the road from Appleton to Fort Howard. The contract time for the completion of this road is the 1st of June next, but the contractor thinks there is no doubt but he can have it all (about 25 miles) in running order by the first day of May. Mr. White, the gentlemen who furnished ties for the Chicago and Northwestern Railroad, has the contract for the ties on this extension, and will have 75 men at work getting them in a few days. The work on the road will be commenced on this end and the ties and iron put down as fast as graded, in order to use the engine in filling and constructing that part running through the cedar swamp several miles. When this piece of road is completed, travelers will be able to go by the Northwestern Railroad, from Chicago to Lake Superior in about 25 hours. Next Spring, with the assistance of the swift steamer Arrow, we shall expect to take breakfast in Green Bay and tea in Marquette, on the cool banks of Lake Superior.—*Green Bay Advocate.*

New Hampshire State Debt.

The condition of the New Hampshire State Treasury for the fiscal year ending June 1st, 1863, was as follows: Liabilities, $1,378,441 71; assets, $984,944 43. There is thus left, as the State debt, $393,497 28. Included in the above amount, due from the United States, are vouchers principally for money expended by the State in bounties which have been suspended or disallowed by the third auditor, amounting to $441,630 46, which if deducted from the assets will leave the State debt $835,127 74; but the committee were of the opinion that a considerable portion of these suspended vouchers may ultimately be paid by the United States. If the amount of the State debt claimed by the cities and towns for the year ending June 1st, 1863, which is not yet adjusted and which is estimated at $485,000, be added, the State debt on the 1st of June, 1863, would be $1,320,127 74.

Pennsylvania Railroad.

The following is a comparative statement of the operations of this road for the year's ending December 31, 1861 and 1863:

Earnings:	1861.	1862.
From passengers	$1,406,018 41	$1,731,392 20
" U. S. troops	145,158 14	379,393 21
" U. S. mails	74,398 62	74,773 43
" expresses	75,120 00	146,851 96
" freight	5,398,025 56	7,668,419 85
" miscellaneous	201,280 22	303,460 31
	$7,300,000 95	$10,304,290 96
Expenses:		
Conducting transp.	$1,199,131 24	$1,320,459 78
Motive power	1,102,406 36	1,824,005 37
Maintenance of road	1,011,677 14	1,345,961 67
" cars	270,825 00	867,332 13
General expenses	69,023 02	73,313 64
	$3,653,062 76	$5,431,072 59
Net earnings	$3,646,938 19	$4,873,218 37

Compared with the year 1861, the gross earnings show an increase of $3,004,290 01; with an increase in expenses of $1,778,009 83—making the increase in net earnings, $1,226,280 18.

The following is a comparative statement of the earnings, expenses and net earnings of the road for the years 1860, 1861 and 1862:

	Gross earnings.	Operating expenses.	Net earnings.
1860.	$5,932,741 88	$3,636,299 08	$2,296,402 40
1861.	7,300,000 95	3,653,062 76	3,646,938 19
1862.	10,304,290 96	5,431.072 59	4,873,218 37

The following will show the gross earnings, expenses, etc., of the canals owned by the company during the same time:

	Earnings.	Expenses.	Net.
1860	$209,365 85	$154,760 63	$54,605 20
1861	176,109 04	147,872 59	28,236 45
1862	251,481 76	258,091 56	*6,609 80

* Decrease.

The following will show the numbers of passengers and tons of freight carried during the years named:

	Passengers.	Freight.
1860	1,303,444	1,346,525
1861	1,059,088	1,620,586
1862	1,143,418	2,058,548

The above tonnage of freight is inclusive of coal, but exclusive of fuel and other materials transported for the use of the company; the latter, in 1860 amounted to 124,597 tons; in 1861, to 138,499; and in 1862, to 164,503. The coal tonnage of these years was 523,233; 707,754; and 835,146, respectively.

This company entered into the possession of the Philadelphia and Erie Railroad on the 1st of February, 1862. The following is a statement of the receipts and expenses of the transportation department of that road for eleven months ending Dec. 31, 1862:

Receipts:

From freights		$221,228 04
" tolls on individual cars		6,945 08
" passengers		145,874 75
" expresses		5,742 93
" U. S. mails		12,214 59
" U. S. troops		3,950 15
" individuals and companies		11,821 96
" sundry sources		17,910 11
Total receipts		$425,687 61
Expenditures, viz:		
Conducting transportation, including 30 per cent to Philadelphia and Erie Railroad Co		$204,447 58
Motive power, including labor and materials on individuals and company's account		68,155 46
Maintenance of way		70,515 30
" cars		6,225 82
Total expenditures		$349,344 16

The details of the above show the earnings and expenses due the Philadelphia and Erie Railroad for the same period as follows:

Total receipts as above		$425,687 61
Less sundry drawbacks		16,696 67
Leavings earnings proper		$408,990 94
Conducting transportation as above		$204,447 58
Less 30 per cent. to Philadelphia and Erie Railroad	$122,697 26	
Less drawbacks, etc.	398 65	
		123,095 91
		$81,351 67
Motive power	$68,155 46	
Less labor and materials furnished by lessee	22,507 24	
		45,648 22
Maintenance of way		70,515 30
" cars		6,225 82
Working expenses		$203,741 01

This is 49.8 per cent of the earnings. The earnings of the cars of the Pennsylvania Co. in use on the Erie road for service on other road, was $4,476 06, which added to the earnings, gives a total of $413,467, and leaves, after paying the Erie Company's proportion, ($122,697 26), and the working expenses ($203,741 01), the sum of $77,028 73, to meet the outlay of the Pennsylvania Railroad Company in the equipment of the Erie road.

The balance sheet of the P. & E. Railroad for eleven months is as follows:

Bills during 1862	$259,726 82
Pay rolls	117,793 26
	$377,520 08
Expenditures, as above	$349,344 16
Road and shop stock on hand January 1, 1863	28,175 92
	$377,520 08

Including the receipts from the Philadelphia and Erie Railroad Line, and its canals, the total revenues of the Pennsylvania Railroad Company in 1862, were:

From Pennsylvania R. R. proper	$10,304,290 96
From Philadelphia and Erie Railroad, including service of cars on other roads	413,467 00
From the Pennsylvania canals	251,481 77
Total	$10,969,239 72

The financial condition of the company, December 31, 1862, is shown in the annexed.

Capital stock		$13,274,100 00
First Mortgage Six per cent. Dollar Bonds, payable 1880		4,980,000 00
Second Mortgage Six per cent. Dollar Bonds, payable 1875		2,421,000 00
Second Mortgage Six per cent. Sterling Bonds, payable 1875		2,126,400 00
Bonds due the State of Pennsylvania, bearing 5 per cent. interest		7,000,000 00
Mortgages and Ground Rents on Real Estate		169,363 84
Total Shareholders' Capital, and Funded Debt of company		29,970,863 84
Accounts payable, including pay rolls for December, 1862		764,524 91
Dividend due to stockholders unpaid		24,793 50
State and United States Tax, unpaid		4,313 40
Amount due other Roads		45,540 07
Contingent Fund		885,640 74
Balance		3,628,536 79
		$35,324,213 25
Cost of road including engineering, land damages, fencing and buildings from Harrisburg to Pittsburgh, and station and warehouses on the Philadelphia Division		$16,840,272 13
Cost of Philadelphia and Columbia Railroad	$6,500,000	
Cost of Canals and Portage Railroad	1,000,000	
	$7,500,000	
Less payment made of debt to State, charged to profit and loss	500,000	
		7,000,000 00
Cost of equipment of Road		3,582,204 21
Cost of real estate of company		1,891,840 42
Cost of telegraph line		45,264 28
Extension of Penna. R. R. to Steubenville and Pittsburgh Railroad		18,661 74
Extension of Pennsylvania Railroad to Delaware River and Gas Works, including Wharves and Grain Elevator		510,308 76
Total cost of Roads, Canals, and their appendage		$29,888,551 54
Stock of the Pittsburgh, Fort Wayne and Chicago Railway Company		821,330 00
Bonds of the Philadelphia and Erie Railroad Company, purchased under the stipulations of the lease of that road		600,100 00
Bonds and Stock of Municipal and Railroad Corporations		129,852 96
U. S. Certificates Indebtedness		109,000 00
Bills and Accounts Receivable		703,571 99
Amounts due from other roads		21,090 50
Amount of sinking fund		1,226,235 68
Fuel and Materials on hand		514,311 19
Balance in hands of Agents		656,884 63
Balance in hands of Treasurer, December 31st, 1862		653,284 76
		$35,324,213 25

The officers and directors for 1863-'64 are as follows:

President—J. Edgar Thomson.

Vice-President—Thomas A. Scott.

Directors—Elected by the stockholders. J. Edgar Thomson, Josiah Bacon, Thomas Mellon, John Hulme, G. D. Rosengarten, Wistar Morris, G. W. Cass, Pittsburgh, W. H. Smith, Pittsburgh, Samuel T. Bodine, Joseph B. Myers.

By the city of Philadelphia, Hugh Craig, Sylvester J. Megargee, David Solomon.

By the board, Thomas A. Scott.

Treasurer,—Thomas T. Firth.

Secretary—Edmund Smith.

Hoosic Tunnel.

We understand the executive council, which has been giving a good deal of attention to the mysteries and miseries of the Troy and Greenfield railroad, have decided to adopt the plan of the State commissioners of last year, for going on with the work as a State job, as authorized by the last Legislature. Precisely how the question of the validity of the second mortgage bonds stands or was disposed of by the council, we are not informed: it is probable they are wholly disregarded, and the risk of the courts sustaining them as a charge upon the road, and consequently as a claim against the State, as its present possessor and operator, considered so small, after the opinion of the attorney general and Judges Redfield and Washburn against them as not to justify a further delay in resuming the work on the road and tunnel.

The holders of the bonds are quite content with this view of the case; indeed they are probably the most rejoiceful party over the actual assumption of operations on the road by the commonwealth. The amount of these bonds issued has been a point of much doubt; but, we believe we are correct in saying, that of the $900,000 authorized, over $700,000 have parted company with the trustees. Somewhere near half this amount went into the hands of Mr. Haupt, the late contractor and engineer of the road; and it is safe to say that the State will not escape their payment without maintaining a thorough and successful defense in the courts. The historian of the tunnel enterprise and the State treasury ought to be collecting material for his work.—*Springfield Repub.*

Iron Passenger Cars.

The Central road sent out an Iron Passenger Car, on an experimental trip, last Thursday. It is five or six tons lighter than the wooden cars, and, if it shall prove a success, others will be immediately placed upon the road. It was built in this city by J. M. Davidson & Co.—*Albany Ev. Journal.*

North-West British America.

BY H. Y. Hind.

Historians tell us that one of the characteristics of a wise and unselfish statesman is seen in the forethought and care with which he provides for the future of his country.

The public in general are too much occupied with social and political questions of the day and private individuals too much engrossed with personal concerns to devote that attention to the future which they often encourage themselves to regard as a duty devolving upon posterity—the heirloom, indeed, of the actors on the stage of life when they shall have become indifferent to its ambitions or are laid, like their predecessors, to moulder in the dust.

The experience of Europe in the rise of nations to power and prosperity can scarcely be accepted for our guidance in America. Events succeed each other so unexpectedly and with a rapidity so extraordinary on this continent that the wisest speculations often fall short of the reality, and the most sanguine anticipations scarcely grasp the actual results of a few years' transition and progress.

To-day a wilderness—to-morrow a populous state. To-day the wild Indian's hunting-ground—to-morrow asserting equal rights in a community of civilised nations! So rapidly, indeed, do momentous events affecting the interest of millions follow one another, with us springing from new commercial relations, new discoveries, new political combinations, or new invasions of a previously unoccupied wilderness, that the most sagacious statesman is often behind public opinion and vainly endeavors to hold in check the bold ideas and the broad license of popular belief, which often find expression in an uncontrolled liberty of speech, the prevailing characteristic of American civilization.

British Americans who are true to the sympathies and patriotism of their forefathers and who care to look forward to the future of their country must view with some suprise, not unmingled with anxiety, the spirit of inquiry which the people of the North-Western frontier states of the American Union are exhibiting with respect to the vast region in Central North America drained by the rivers flowing into Lake Winnipeg. Such inquiries would excite no other feeling but those of admiration at the characteristic enterprise which gives birth to them, if it were not for the unscrupulous action to which they point, alike neglectful of British feeling and opposed to the aspirations of the majority of the people of British America who speak the Anglo-Saxon tongue. "Manifest destiny" is by no means recognized in the physical conformation of the great North-West, when that destiny implies an union with the American States, the absorption of a vast and fertile part of British America by a Northern federation, and the annihilation of hopes long cherished by British American people that their empire will one day be established from ocean to ocean, in peaceful union with the empire from which they have sprung.

"Manifest destiny" ought only to be regarded as the dream of the American visionary or revolutionist, who, setting aside all considerations of right, nationality, descent, and blood, boldly and unscrupulously commences his crusade with this specious cry, and seeks, not unsuccessfully, to enlist even senates to his side.

It is some consolation to know that, even among Americans, "manifest destiny" does not always imply incorporation with the United States by fair means or foul. Able men there are who, while advocating the colonization of the basin of Lake Winnipeg, view the prospect of its continuance as a British province—one of a series extending from the Atlantic to the Pacific—as within the limits of probability. "One thing is very apparent, unless the English Government shall very promptly respond to the manifest destiny of the great interior of British America,—the basin of Lake Winnipeg—the speedy Americanization of the fertile district is inevitable. The indispensable requisites to the integrity of British dominion on this continent are such action in behalf of the Saskatchewan and Red River districts as the Fraser River excitement secured for the area fronting on the North Pacific three years ago."*

Not much more than half a century has passed since Canada was a wilderness from the Ottawa to the St. Clair. Many men now living remember the time when the scanty settlements were threatened by famine if the snow fell so deep that the wolves destroyed the deer. Yet in two generations this wilderness has gained a population exceeding that of the ancient kingdom of Denmark. Viewing its future expansion in the light of its past development and progress, many now naturally turn with anxiety to the vast unoccupied region which lies between it and the gold-producing mountains and valleys of its sister colony, British Columbia. Running in the race of progress side by side with the most powerful and energetic republic the world has ever seen, Canada looks with an anxious eye upon the rapid strides with which neighboring states are advancing in the direction of a territory which her people always have been taught to consider as their own, either as subject to their jurisdiction or soon to be joined to them by ties of kindred institutions and laws—a link in one great chain of provinces acknowledging the same allegiance and enjoying the same liberty, protection, and rights.

The great North-West has become a household word in Canada; and as the time has now arrived when its admission into the family of British provinces is about to be consumated, a knowledge of its resources should be familiar to every British American.

The North-West territory is no longer a *terra incognita*. Its vast plains have been traversed; its rivers and lakes carefully traced and mapped; its mountain ranges and secluded valleys explored; its treasures of iron, and coal, salt, and even gold, have been laid bare; and its rich expanses of fertile prairies are now known to possess the capability of supporting a numerous population, equaling in numbers those now densely thronging the British Isles.

It is proposed to describe the physical features and fitness for colonization of North-West British America under the following heads:—

1. The Basin of Lake Winnipeg.
2. The Arthabaska River.
3. The Rocky Mountain region.
4. A telegraph and road across the continent.

In order to examine the question in all its aspects, it will not only be necessary to include British Columbia, but also to paint in its true colors the real capabilities of that visionary far west of the United States, to which, in defiance of all known facts, popular credulity ascribes, boundless fertility, converts an arid and uninhabitable desert into future populous states, and regards as a suitable and attractive field for the indefinite expanse of the Union a vast region exceeding one million square miles in area, alike incapable of cultivation and unfitted for the abode of civilised men.

THE BASIN OF LAKE WINNIPEG.—GEOGRAPHICAL FEATURES.

The southern portion of Lake Winnipeg lies exactly in the centre of the American continent on the 51st parallel of latitude.* The great basin it drains has a length of 920 miles, a breadth of 380 miles, and an approximate area of 360,000 square miles. The eastern tributaries to the Winnipeg River rise on the boundary line of the province of Canada, about 100 miles west of Lake Superior and 1,485 above the sea. The great glaciers in the Rock Mountains, from which the Saskatchewan takes its rise, near Howse Pass for the north branch and the Vermillion Pass for the south branch, form the western limits. Its southern extension stretches far into the state of Minnesota; but west of the Souris River the international boundary line roughly represents its extension in that direction, as does the north branch of the Saskatchewan in approximate northern limits.

This great central basin is drained by three large rivers—the Winnipeg, the Red River of the north, and the Saskatchewan. It is through the valley of the Winnipeg, or its tributaries, that the canoe route between Lake Superior and Selkirk settlement lies, and through which a road will be eventually constructed, connecting the rich pariries west of the Lake of the Woods with Fort William, on Lake Superior. From the Lake of the Woods to the eastern flanks of the Rocky Mountains there exists a belt of fertile soil, 80 to 100 miles in width, once covered with trees but now converted in great part into prairie land by the de-

* Relations between the United States and North-West British America. Executive Document, House of Representatives, 1862. Letter from James W. Taylor to the Hon. S. P. Chase, Sec. of the Treasury.

* The basin of Lake Winnipeg extends from the 90th to the 118th meridian. Its most easterly point is the lake and swamps from which the Savanne River takes its rise, in long. 90 deg. 14 min., lat. 48 deg. 53 min., 106 miles by the Kaministiquia canoe route from Lake Superior; and the most westerly limit from which its rivers draw contributions is probably the great glacier near Howse Pass, long 117 deg. 35 min., lat. 51 deg. 52 min. Its southern boundary extends as far as Lake Traverse, in Dacotah territory, long. 96 deg. 45 min., lat. 45 deg. 58 min. It stretches north as far as Frog Portage, long. 103 deg. 30 min., lat. 55 deg. 26 min. The elevation of its eastern boundary is 1,485 feet above the ocean, and the height of land near the sources of the tributary of the Saskatchewan, which rises farthest to the west, is 6,347 feet above the same level. Its northern boundary is separated from the valley of the Mississippi by a low ridge, over which water flows during floods, thus connecting the valley of the Saskatchewan with that of the Mississippi. Towards the southern limit, Lake Traverse, 820 feet above the sea, sends water into the Mississippi and Red River during spring freshets. The outlet of the Winnipeg basin is through the contracted and rocky channel of Nelson River to Hudson's Bay.

struction of the forests, owing to the periodical burning of the prairie grass. German Creek, which rises near the Lake of the Woods, the Red River, the Assiniboine, and the north branch of the Saskatchewan flow through this rich belt, which has an area of not less than 80,000 square miles,* is susceptible of cultivation or depasturage throughout, and extends in one unbroken broad belt from the Lake of the Woods to the Rocky Mountains.

Lake Winnipeg and its associated lakes, Manitobah and Winnepegosis, occupy the lowest depression of the central basin and are about 628 feet above the sea level, having a water area slightly exceeding 13,000 square miles, or twice the size of Lake Ontario. They are bounded on the west by a low tract of country, having an elevation of from 30 to 100 feet above the lakes and an approximate area of 70,000 square miles. This low region is limited by the abrupt terraces of the Pembina Mountain, which form the limit of the great prairie plateau of the North-West. The prairie plateau covers an erea which may be roughly represented by 120,000 square miles, and in its northern part the fertile belt of land before referred to lies. West and south of the prairie plateau are the great plains, bounded on the north by the continuation of the fertile belt and on the west by the abrupt wall-like precipices of the Rocky Mountains. The area of the arid and uncultivable plains of the basin of Lake Winnipeg exceeds 100,000 square miles. These dimensions, when tabulated, furnish the subjoined view of the surface of Central British America:—

	Area in sq. mls.	Mean elevat'n above the sea level.
Lakes Winnipeg, Manitobah, and Winnepegosis	13,000	640 feet.
Low country, composed chiefly of swampy land or shallow soil resting on limestone rock (1st plateau)	70,000	700 "
Terraces of Pembina Mountain	1,500	900—1,100 "
Great Prairie Plateau (2nd plateau)	120,000	1,200 "
Great Plain Plateau (3rd plateau), for the most part arid and uncultivable	108,000	1,600—4,000 feet.
Total of Winnipeg basin, east of the Lake of the Woods, about	312,000	

AGRICULTURAL CAPABILITIES.

The area in the great central basin available for cultivation is fully 80,000 square miles, or very nearly as large as England; and is capable of supporting an agricultural population exceeding 15,000,000. It extends from the Lake of the Woods to the Rocky Mountains.

The outlying patches of fertile land lying within the limits of the great plains, together with the deep, narrow valleys of the rivers which run through those arid regions, the east flanks of the Rocky Mountains, and the lowlands in the region of the great lakes might support another 10,000,000; so that the present available area of arable soil—the greater portion of which is susceptible of being at once turned up by the plough—would sustain an agricultural population equal to that of the kingdom of Prussia.

The great plains rise gradually as the Rocky Mountains are approached, until they attain an elevation of 4,000 feet above the sea level. With only a very narrow intervening belt of hilly country, the mountains rise almost abruptly from the plains and present lofty precipices that frown like battlements over the level country to the eastward.* North of the fertile belt is the subarctic forest region as far as longitude 105. Here the fertile belt greatly expands in a northwesterly direction and includes the valleys of the Arthabaska and part of Peace River. South of the fertile belt lies the true arid district. It occupies most of the country drained by the south branch of the Saskatchewan and reaches as far north as latitude 52 deg. This is the extension into British territory of the great American desert, an uncultivable region, extending as far south as Texas and varying from 400 to 600 miles in breadth.

The fertile belt is occasionally diversified with clumps of aspen, and here and there a few spruce fir are found—the remains of that former extension of the forests which once reached to the northern limits of the arid plains of the great American desert west of the 98th degree of longitude. The wooded part of the basin of Lake Winnipeg is almost exclusively confined to the first or lowest plateau west of the great lakes, the valley of the Winnipeg River on the east, and the flanks of the Rocky Mountains, where the forest extends to the height of 7,000 feet. From the western boundary of the province of Canada to Rainy Lake white spruce, larch, pines of several species, poplars, and birch form a thick forest. From Rainy Lake to Red River settlement, elms, oaks, ash, basswood, beech, iron wood, largely intermingled with spruce and pine, abounds. North-west of Red River, on the low plateau and the flanks of the precipitous escarpment which forms the denuded boundary of the great prairie plateau, the forest consists of aspen, larch, birch, spruce, and pines.

This forest extends to the banks of the Assiniboine, but consists chiefly of aspen, although some very fair oak and elm luxuriate in the deep and narrow valleys in which that river and its tributaries flow. The most common tree in the woodland country north of the Saskatchewan is the white spruce; then follows the canoe birch, the larch, the balsam fir, the red pine, the balsam poplar and the ever present aspen.

The beech, ironwood, ash, cedar, arbor vitæ, and the white pine do not extend beyond Red River. The red elm has been found as far west as Carlton House;* and the false sugar maple was seen on the North Saskatchewan, long. 108 deg.

Within the fertile belt there are detached groves of aspen; and in the flats of the alluvial river valleys the balsam poplar rises from a dense thicket of willows, thorns, and the poire of the French-Canadian—the delicious Misaskatomina‡ of the Crees, which on the south branch of the Saskatchewan attains an altitude of eighteen feet and is loaded with the most luscious fruit.

The northern limit of the great American desert reaches as far north as lat. 52 deg. The surface is formed of cretaceous and tertiary strata, which is often highly impregnated with glabers salts and gypsum (sulphates of soda and lime); and it bakes in the early summer into a hard and cracked surface. The characteristic plants on this sterile soil are the shrub sage, or absinthe, and the prickly prairie apple (*opuntia*). There are many fertile spots in the arid region, like oases in a desert; yet as a whole it must be regarded as unfit for the abode of civilised man. Along the eastern base of the Rocky Mountains there is a large area of fine land with very rich pasture; but the constant occurrence of sharp night frosts would render the raising of common grain crops precarious. M. Bourgeau, an accomplished botanist, accompanied the expeditions sent out by the British Government in 1857–8 and 9 across the continent through British America. In a report submitted by this gentleman to Sir William Hooker, he speaks of the Saskatchewan district, in the neighborhood of Carlton House, as much more adapted to the culture of the staple crops of temperate climates—such as wheat, rye, barley, oats, &c.—than one would have been inclined to believe from its high latitude. "In effect, the few attempts at the culture of the cereals already made in the vicinity of the Hudson's Bay Company's trading posts demonstrate by their success how easy it would be to obtain products sufficiently abundant to largely remunerate the efforts of the agriculturists. There, in order to put the land under cultivation, it would be necessary only to till the better portions of the soil. The prairies offer natural pasturages as favorable for the maintenance of numerous herds as if they had been artificially created." The vetches found in the rich prairies of the fertile belt are as valuable for the nourishment of cattle as the clover of Europe.

The agricultural capabilities of the basin of Lake Winnipeg may be summed up as follows:—

	Acres.
On the route from Fort William, Lake Superior, to the Lake of the Woods, including the valley of Riang River.	200,000
The fertile belt, stretching from the Lake of the Woods to the flanks of the Rocky Mountains and as far north as the 54th parallel, on the Arthabaska, west of M'Leod's River (80,000 square miles.)	51,200,000
Isolated areas in the Prairie Plateau, south of the Assiniboine	2,000,000
Isolated areas in the great Plain Plateau, the extension northwards of the great American desert, and in the valleys of the rivers flowing through it.	1,000,000
Total area of land available for agricultural purposes	54,400,000
Approximate area fitted for the abode of civilised man	84,400,000
Approximate area of the basin of Lake Winnipeg, within British territory	199,680,000
Area fitted for the abode of civilised man	84,400,000
Desert area unsuitable for the permanent abode of man	115,280,000

Comparing this extent of surface with Canada, we arrive at the following results:

	Acres.
Area of the province of Canada (340,000 square miles)	217,600,000
Area occupied by the sedimentary rocks (80,000 square miles)	51,200,000
Area occupied by crystalline rocks	166,400,000
If we suppose that one-sixth of the area occupied by crystalline rock is capable of cultivation, as regards soil and climate (an estimate probably in excess), the total amount of land in Canada available for the purpose of settlement will be approximately	78,900,000
Showing an excess of land fitted for the permanent abode of man in favor of the basin of Lake Winnipeg over the province of Canada of	5,500,000

(To be continued.)

* In this estimate of the area of the fertile belt the region about the Lake of the Woods is included, as well as the northern extension near the east flank of the Rocky Mountains, the Arthabaska, or Elk River.

☞ To lunch pleasantly is a great desideratum for men of business; to dine well when they are unable to join the family circle for that purpose, is an object. We therefore can say a good word for BAKER'S DINING AND LUNCH ROOMS 125 and 129 Grand street. Railroad travellers coming from the East, will also find this establishment convenient and agreeable, both for themselves and their families, if they are at a loss where to get a good meal on their arrival in the city. Good fare and cool saloon are very appetising, and Baker offers both.

Champlain Canal.

The navigators of the Champlain Canal have applied to the Canal Board to alter the draught "of boats going north" from 3 feet 5 inches to 3 feet 9 inches. The application was denied. We hope to see the day when this Canal will pass Lake propellers.

The Great Lake Tunnel.

The Board of Public Works of the city of Chicago have taken the first steps toward the construction of a tunnel two miles out into Lake Michigan, to supply the city with pure water. The proposed tunnel will be five feet in diameter on the inside of the wall, and will require two years in construction. Four hollow cylinders will be sunk in the lake at a distance of half a mile apart, the lower end penetrating the bed of the lake to the level of the proposed tunnel, and from these shafts the tunnel will be dug in two directions, and also pushed as rapidly as possible from the shore. All these cylinders will be closed after the completion of the tunnel, and will be removed to such a depth as not to interfere with navigation, with the exception of the outside one, which will be constructed with reference to its becoming the inlet for the water or gate chamber, and perhaps be surmounted with a small light house; and so arranged that the water can be shut off from the tunnel. The cost of the tunnel will be only $307,552, and it is supposed by the board that, if the tunnel is constructed there will be no necessity for building new pumping works, as it will be constructed opposite the old works.

Indianapolis and Cincinnati Railroad.

The Cincinnati *Gazette* states that the earnings of the first five months of 1862 of the Indianapolis and Cincinnati Railroad, as compared with the corresponding months of 1862, show an increase of $88,000, and for the half year ending June 30, 1863, the increase will be over $100,000. The earnings for the first half of 1863 will be between $50,000 and $60,000 greater than any other half year since the road was opened.

Curious Railway Invention.

Chas. Weed, of Milledgeville, Illinois, has invented a method of raising water at railway stations, by the weight of the locomotive acting on a yielding portion of the track. A deflexion of half an inch in the rails operates mechanism which pumps up the required quantity for supplying the engine.

Chicago and Milwaukee Railroad.

At the election of officers for the consolidated Chicago and Milwaukee Railroad, the following gentlemen were chosen: Alex. Mitchell, President; E. K. Rogers, Vice President; A. S. Downs, Secretary; S. C. Baldwin, Superintendent; A. V. Carpenter, General Ticket Agent; J. T. Morely, General Freight Agent.

St. Paul and Pacific Railroad.

We are authorized by Mr. Litchfield, the superintendent and contractor for the construction of the St. Paul and Pacific Railroad, to state that nearly all the grading between this city and Anoka has been done; the ties distributed along the line; that the iron for this section will surely arrive during June, and that the road will be in running order to Anoka by the 15th of July. Mr. Litchfield has been notified that one of the locomotives contracted for will be here by the 20th of July, and another by the latter part of August, and ten freight cars, now in course of manufacture at Clinton, will be delivered in St. Paul on the 10th of July. Iron sufficient to complete the road to Watab, eight miles above St. Cloud, has been purchased, to arrive before the close of navigation, and there is scarcely a doubt of the completion of the road to St. Cloud at least before the 1st day of January, 1864. We are further informed that engineers have been employed, and the survey of the branch road from St. Paul to Winona will be commenced next week, and carried on with vigor to its completion.—*St. Paul Pioneer.*

Public Debt of the United States.

The forthcoming Circular of Messrs. Samuel Hallett & Co., will furnish the following statement of the exact condition of the public debt on the 29th of June:

4 per cent.:		
Temporary loan		$23,526,203 19
5 per cent.:		
Bonds due 1865	$3,461,000 00	
Bonds due 1871	7,022,000 00	
Bonds due 1874	20,000,000 00	
Temporary loan	71,244,498 91	
		101,727,498 91
6 per cent.:		
Bonds due 1868	$18,323,591 80	
Bonds due 1881	69,457,800 00	
Bonds due 1882	182,414,401 67	
Treasury Notes	776,650 00	
Certificates of Indebtedness	156,835,241 65	
		427,807,685 12
7 3-10 Bonds due Aug. 19, 1864	$52,931,000 00	
7 3-10 Bonds due Oct. 1, 1864	86,989,500 00	
		130,920,500 00
United States Notes		387,662,000 00
Fractional Currency		20,192,456 00
Total		$1,100,836,343 22

In relation to the extension of time for exchanging legal tender notes for the five-twenty year bonds to the 1st of July, it is remarked: "This order is not operative for a longer period, unless renewed; as the policy of the Secretary thereafter "must be determined by exigencies as they arise." We have the assurance, however, that the Secretary will continue "to adopt that course which seems likeliest to secure prompt payment of demands upon the Treasury, and especially the pay of the army and navy, with the least possible disturbance of the course of business, and with the greatest possible economy."

Pennsylvania Coal Company.

At an election for directors of the Pennsylvania Coal Company, held, pursuant to notice, in the village of Hawley, Penn., on Wednesday, June 17, 1863, the following gentlemen were elected directors for the ensuing year: John Ewen, Isaac L. Platt, John Q. Jones, Charles Morgan, Wm. F. Havemeyer, Wm. R. Griffith, Jonathan Thorne, Thos. W. Pearsall, Geo. L. Brown.

At a subsequent meeting of the directors, John Ewen was unanimously re-elected President of the Company for the ensuing year.

Hannibal and St. Joseph Railroad.

This company have completed their arrangements to re-organize the securities of their road, which is now the western terminus of the overland route to California, and is 200 miles in length. from the Mississippi river to the city of St. Joseph, It is also the route to the gold fields of Pike's Peak, in Colorado, and completes a continuous line from New York by rail of about 1,500 miles, and extends further west than any other line.

The Broadway Railroad.

The Broadway Railroad, which it was expected would have been completed by July 4, is now about three-quarters built; unless there is unforeseen delay in procuring timber, it will be in running order by the first of August. The road will run from the junction of Broadway and Main street to Cambridge street, at a point near the Harvard College Gymnasium.—*Boston Journal.*

Richmond and Covington Railroad.

The Richmond and Covington Railroad, from Richmond, Indiana, to Covington, Ohio, is now completed, and trains are running over it. This road connects the Columbus, Piqua and Indiana Railroad, with the Indiana Central Railroad, and forms an important link in the through line of railway to St. Louis and all western points.

Buffalo and State Line Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: George Palmer, Dean Richmond, Milton Courtright, Hamilton White, Henry L. Lansing, Charles H. Lee, Alanson Robinson, Wm. Keep, Joseph Field, Addison G. Jerome, James C. Harrison, John A. Tracy, George W. Patterson.

Railroad Earnings—Weekly.

The traffic of the Great Western Railroad for the week ending June 19, 1863, was as follows:

Passengers	$20,574 80
Freight and live stock	21,887 69
Mails and sundries	1,216 63
Total	$43,679 12
Corresponding week of 1862	41,598 25
Increase	$2,080 87

The earnings of the Grand Trunk Railway for the week ending June 13, 1863, were:

Passengers	$28,817 20
Freight and live stock	2,956 00
Mails and sundries	48,489 5
Total	$80,262 76
Corresponding week, 1862	66,372 49
Increase	$13,890 27

The earnings of the Galena and Chicago Union Railroad for the 3d week of June, 1863, were:

Freight	$38,886 72
Passengers	9,183 00
Mails	1,300 00
Total	$49,369 72
Same week, 1862	57,338 00
Decrease	$7,968 28

The earnings of the Chicago and Alton Railroad for the 3d week of June, 1863, were:

Passengers	$20,701 30
Freight	22,216 10
Sundries	1,535 88
Total	$44,453 32
Same week last year	30,164 42
Increase	$14,288 90

The earnings of the Cleveland and Toledo Railroad for the 3d week of June, 1863, were | $22,890 00
Same week, 1862 | 16,012 00
Increase | $6,878 00

The earnings of the Michigan Central Railroad for the 3d week of June, 1863, were | $49,881 64
Same period, 1862 | 43,105 99
Increase | $6,775 65

The earnings of the Michigan Southern Railroad for the 3d week of June, 1863, were | $50,875 00
Do., 1862 | 46,745 00
Increase | $4,130 00

The earnings of the Chicago and Northwestern Railway for the 3d week in June, 1863, were | $26,567 63
Do., 1862 | 26,634 03
Decrease | $66 00

American Railroad Journal.

Saturday, July 4, 1863.

Stock Exchange and Money Market.

There is no disguising the fact, that the events of the past ten days have produced a profound dejection in the public mind; and business, which is like the chameleon, changes its hues to the color of that on which it reposes, has worn a dark and gloomy aspect. We have had the tables turned upon us in the North. A single movement of a skilful general has caused a large number of Northern and Western cities to tremble for their very existence. Pittsburgh, Wheeling, Chambersburg, Harrisburg, Philadelphia, Baltimore and even Washington have all been menaced at the same time, by the military position and bold front of the enemy. Even the President dare not go a few miles from the White House to the Soldier's Home without a strong escort of cavalry, and the members of the cabinet and the great officials of the Government have a sudden dread of captivity. The special interests to which this JOURNAL is mainly dedicated, have suffered enormously under this condition of affairs. The Baltimore and Ohio Railroad has again been occupied, and nearly destroyed for more than ninety miles. The enemy also holds the line of the Cumberland Valley Railroad, the Northern Central, the Hanover Branch, the Wrightsville Railroad and the Susquehanna and Tide Water canal. All traffic on these is now suspended. Their communications are broken, many of their bridges destroyed, and even the magnificent one, two miles in length, over the Susquehanna, at Columbia, has yielded to the

rude touch of war, and has fallen in ashes into the stream which it lately spanned.

An Italian writer on War has recently stated, that it was now necessarily conducted on new principles; viz., those of the railroad and telegraph, and it is certainly true that the principal objects of the armies of both combatants have especially been those of cutting railroads and telegraph lines. No battle has been fought, or fort captured without some previous demonstration of this kind. Out of all this confusion, misery, and loss, the great inquiry is, who is really responsible for them, and with it, there is a grave question in every reflecting man's mind, viz., cannot Mr. Lincoln in all the loyal States find men of talents, foresight and sagacity, competent to manage the war and the Government better than it has been. Have we not in the whole North two men equal to Jefferson Davis and General Lee? Are we to be overwhelmed by an enemy vastly inferior in resources by the superiority of intellect in their leaders, and will not the President awaken to the necessity of meeting the universal demand of the people, to surround himself without a moment's delay with a class of intellects, of whose existence he has appeared to be persistently ignorant. This is no time to jest or trifle. It is no time to praise private virtue as an equivalent for public deficiencies. There have been men before now, whose virtues have undone their country.

The derangement of business on the Pennsylvania and Maryland railroads has been great. We particularly regret the interruption of traffic on the Pennsylvania Railroad. This splendidly equipped road has been actively and profitably engaged in carrying the accumulated products of the West, its two great channels of the Mississippi River and the Baltimore and Ohio Railroad, having been closed. We trust it will again, and shortly, resume its business. Prices are seriously effected, and for shares of the former, no takers could be found in Philadelphia on Tuesday morning. All the lines running North and West in connection with those of Pennsylvania sympathized with the sufferers. Under this state of things the Erie and Central with their lines of connection westward and southward have suddenly found their capacity strained to the utmost, to meet the demands of fugitive Pennsylvanians and alarmed merchants; the Express companies having their centres of operation in this State have also been fully employed in transporting valuables in their compact forms. Ten millions of dollars in specie were received in this city in a single night this week from Philadelphia, and there is no doubt the deposits of diamonds, plate and other precious commodities sent hither for safety from Washington, Baltimore and Philadelphia are more than fifty millions of dollars. It is incumbent on the Fathers of the City that this property shall be carefully protected. Such things as contributions are sometimes levied by invaders, and it would be a disgrace and shame to New York, if its harbor should be entered by an enemy's cruiser, and a forced loan be exacted as an indemnity against violence. We indulge the hope that a change of measures and of men will relieve us from these difficulties; all of which could have readily been guarded against by even a moderate share of sagacity. In the mean time the great Northern and Western railroads continue to transact an enormous business. We continue to note the coupons and dividends coming due from these companies, which will all of them be paid with their usual promptness. The war has brought up all these properties, the holders of which have so far been remunerated proportionably for their losses elsewhere. To every cloud even the darkest, there is a silver lining.

Amidst all this uproar and confusion, the credit of the Government, or to speak more exactly, the confidence of the people in themselves and their resources has not quailed. There is still a large demand for the 5.20's which will continue open to subscriptions by direction of the Secretary of the Treasury to the 31st of July. All those persons who wish a fair interest, and desire to have a little gold in their possession at least twice a year, "go into" the 5.20's. But few securities on the market pay interest in gold; and besides this inducement there is another, founded on the fact fully appreciated by reflecting minds, that if the Government securities fail, nothing else in this country can survive. One tremendous smash would overtake all the institutions which are based on credit or business. A large amount of these Government securities has been absorbed for foreign account, as capitalists abroad believe in the ultimate settlement of our affairs on a favorable basis. Gold has not advanced as much as it was supposed it would, under the gloomy aspect of our military affairs in the middle states: it actually receded on Tuesday after a short exciting advance. It is a difficult article to handle, especially by small operators, as the stamp duty and the restraining act, effectually cut off the credit operations of these persons. Some of our leading state lines continue to advance, as is the case with Erie, Central and Hudson River. We notice that the Atlantic and Great Western is doing a large and increasing business, and its bonds and shares are in demand on the London Stock Exchange. They are obtained here with the greatest difficulty. Harlem has gone through another stage of excitement. The paroxysm has not yet passed off. The movement in the New York Common Council rescinding the previous grant of a right in Broadway, failed in its object. It is with deep regret we see the Legislators of the city stooping from their high and honorable position to co-operate with speculators in the street. Now that it is retracing its steps and repealing its repeal, we hope it will abstain from all further action of this reprehensible character.

The quotations of Pennsylvania securities on Monday the 29th ult., are from outside sales; no regular session of the Board being held on that day.

Money is said to be "comfortable," 6 to 7 per cent being the rate among brokers. Considerable sums of money are coming in from the Western and middle states for employment. We refer our readers to our tables for the usual quotations, which are carefully made up and tabulated.

The coupons of the Cleveland and Pittsburg bonds due 1st July, will be paid by Mr. Wm. C. Gilman, No. 46 Pine st.

The real estate bonds of the Bellefontaine and Indiana Railroad Company, due January 1st, 1863, will be paid on presentation, at the American Exchange Bank, New York. Interest on these bonds will cease after July 1st, 1863.

The interest coupons of the Minnesota 8 per cent. State loan, due July 1, 1863, will be paid at the office of Messrs. P. M. Myers & Co., No. 6 Broad st., New York.

The coupons on the bonds of the Long Island Railroad Company, due July 1, will be paid at the Bank of North America.

The Terre Haute and Richmond Railroad Company have declared a semi-annual dividend of 6 per cent., payable July 1st, at the office of the Farmers' Loan and Trust Company.

The interest bonds of Belmont County, of Muskingum County, and of the City of Zanesville, Ohio, due July 1, will be paid at the Nassau Bank.

The coupons on the bonds of the Dayton and Michigan Railroad Company, due July 1, will be paid at the Bank of America.

The Cayuga and Susquehanna Railroad Company have declared a dividend of three per cent., less the Government tax, payable July 1.

Coupon No. 7 (January, 1863,) of the Extended Bonds of the first mortgage of the Northern (Ogdensburg) Railroad Company will be paid (less U. S. Tax,) on the 1st of July, at the office of Geo. A. Kettell, No. 9 Railroad Exchange, Boston.

Interest on all payments made on subscriptions to the stock of the Schuylkill Haven and Lehigh River Railroad Company, prior to the 1st of July, will be paid at the office of the Minehill and Schuylkill Haven Railroad Company, Philadelphia, on the 6th inst.

The coupons on the bonds of the State of Missouri, issued to the Hannibal and St. Joseph Railroad Company, due July 1, will be paid, less U. S. at the Bank of Commerce.

The plan for a re-organization of the securities of this road, having been completed and ratified by the stockholders at their meeting held at Hannibal, May 30th last, bondholders are notified that the new bonds and preferred stock of the company are ready for exchange for the old bonds, in conformity with the provisions of the Indenture of April 1, 1863, at the office of the Fiscal Agency in Boston. Parties in New York may, if they prefer, deposit their bonds with Messrs. De Launay, Clark & Co., No. 63 Wall st., who will effect the exchange and return them the new bonds and stock.

The New York, Providence and Boston Railroad Company have declared a dividend of 4½ per cent., free of Government tax, payable on the 1st July, at the office of M. Morgan's Sons, No. 37 William st.

The Dubuque and Sioux City Railroad Company have declared a dividend of 2 per cent. in cash, and 1½ per cent. in preferred stock payable July 15th.

The Michigan Southern and Northern Indiana Railroad Company have declared a dividend of 5 per cent. on the guarantied stock, payable 1st of August.

The coupons on the bonds of the Beloit and Madison Railroad Company, due July 1, 1863, will be paid by G. S. Robbins & Son, at No. 94 William street.

The Paterson and Ramapo Railroad Company have declared a dividend of two per cent. free from Government tax, payable on the 3d of July, at the office of the Rogers Locomotive and Machine Works, No. 44 Exchange Place, New York, and after that day at Paterson, N. J.

The Central Railroad Company of New Jersey have declared a quarterly dividend of 2½ per cent. free of tax. A second instalment of ten per cent. is also called on the new stock, payable 15th July.

The Philadelphia and Reading Railroad Company has declared a dividend of 3½ per cent., free of tax, on the preferred stock, payable 20th July, at the office of the Farmers' Loan and Trust Company, New York.

The July interest on the first mortgage 10 per cent. bonds of the Sacramento, Placer and Nevada Railroad Company, of California, will be paid, less the Government tax, by George T. M. Davis, No. 47 Exchange Place.

The July interest on the 3d mortgage bonds of the Harlem Railroad Company will be paid at the Treasurer's office.

The interest and coupons of the Evansville and Crawfordville Railroad Company (formerly Crawfordsville and Illinois R. R. Co.,) due on the 1st July, will be paid at the office of the Farmers' Loan and Trust Co.

A dividend of 5 per cent. on the capital stock of the Delaware, Lackawanna and Western Railroad Company, will be payable, free of Government tax, July 7th.

Coupons of the Housatonic Railroad Company, falling due July 1, will be paid at the office of Messrs. Ketchum, Son & Co., No. 40 Exchange Place.

Interest due July 1, on the Chicago City Seven per cent. Municipal Bonds of 1881 (payable at the American Exchange Bank) will be paid on presentation of the coupons at the office of Duncan, Sherman & Co., corner of Pine and Nassau st., New York.

The Broadway Railroad Company, Boston, have declared a quarterly dividend of 2½ per cent., or $1 25 on each share, free from U. S. tax, payable July 1.

The July interest for 1863 on Kansas State bonds will be paid on presentation at the Metropolitan Bank, city of New York.

The coupons due July 1 on the School, Civil, and Fire bonds of San Francisco, will be paid in gold at the office of W. T. Coleman & Co.

Notice is given to the holders of Iowa State Bonds, that the interest on all of said bonds, payable in the city of New York, will be paid at the Metropolitan Bank, until further notice.

The interest coupons due July 1, on the bonds issued by the State of Michigan and payable in the City of New York, will be paid on presentation at the Metropolitan Bank.

The coupons of the first mortgage bonds of the St. Louis, Alton and Terre Haute Railroad Company, due on 1st July, 1863, will be paid at the Bank of North America, in this city, less the Government tax.

The seven per cent. bonds of the State of Michigan, known as the "Temporary Loan," issued under the provisions of "an act providing for a temporary loan if necessary," approved January 30th, 1858, and numbered from number one to fifty, inclusive, dated July 1, 1858, and for $1,000 each, "redeemable at the pleasure of the State at any time after the expiration of two years from the 1st day of July, 1858," will be paid at the Metropolitan Bank, New York, on the 1st of July. Interest will be stopped from and after that date, and the interest coupons that mature after July 1, 1863, must be surrendered with the bonds.

The Treasurer of the State of Illinois will, on and after the first Monday of July until the 20th day of said month, be ready, at the American Exchange Bank, New York, to pay the interest maturing on the first Monday of July, 1863, on the Public Debt of the State of Illinois. The interest then due, and not called for prior to the 20th day of July, will thereafter be paid only at the office of the Treasurer of the State of Illinois, in the city of Springfield. Holders of Illinois and Michigan Canal Bonds, where coupons are exhausted, are required to present the bonds.

The coupons due July 1, 1863, on the first mortgage bonds of the Dubuque and Sioux City Railroad will be paid at the office of Schuchardt & Gebhard.

The New Bedford and Taunton Railroad Company have declared a dividend of three per cent., payable July 1.

The Western Maryland Railroad Company give notice, that the interest due July 1st, 1863, on the mortgage bonds, will be paid on and after that date at the banking house of Wainwright, Cloud & Co., 176 Baltimore st., Baltimore.

The Paterson and Hudson River Railroad has declared a dividend of 4 per cent., free of tax, payable 3d July, at the office of the Rogers Locomotive and Machine Works, No. 44 Exchange Place, New York.

The Brooklyn City coupons, due July 1, will be paid at the Long Island Bank in that city.

Messrs. Duncan, Sherman & Co. will pay the interest due July 1, on the 6 per cent. New York State Stock, loaned to Schenectady and Troy Railroad, and on the 5½ ditto loaned to the Tonawanda road; the Albany City coupons; the Chicago City Municipal Water Loan coupons; the Detroit and Pontiac Railroad coupons; funded coupons of the Detroit and Milwaukee Railroad; and Buffalo and State Line Railroad coupons.

The interest due July 1st, on the funded debt of the State of Ohio will be paid at the agency, No. 25 William st.

The coupons due July 1, 1863, on the second mortgage bonds of the Dayton and Michigan Railroad that have been guarantied by the Cincinnati Hamilton and Dayton Railroad Company will be paid at the Bank of America, New York.

The Richmond and Covington Railroad Company's interest coupons, due July 1, will be paid at the St. Nicholas Bank, New York.

The coupons due 1st July, 1863, of the first mortgage bonds of the Sacramento Valley Railroad Company, will be paid, less 3 per cent. Government tax, in gold coin, at the office of Schuchardt & Gebhard.

The coupons due 1st July, 1863, on the first mortgage bonds of the Dubuque and Sioux City Railroad Company will be paid on and after that day, at the office of Schuchardt & Gebhard.

Athens County coupons due July 1, will be paid by Wm. Hoge & Co., 58 Wall st.

The Waltham and Watertown Railroad Company have declared a dividend of 4 per cent., payable in Boston, July 1; the Pittsfield and North Adams, 3 per cent.; Concord and Portsmouth (guar.) 3½ per cent.; Taunton Branch, 4 per cent.; Cape Cod, 3½ per cent., payable on the 6th. Berkshire, 1¾ per cent., payable on the 10th. New Bedford and Taunton, at New Bedford, 3 per cent. on the 1st. Agricultural Branch, at Marlboro 3 per cent. on the 1st.

The Harrisburg, Portsmouth, Mount Joy and Lancaster Railroad Company have declared a semi-annual dividend of 3½ per cent., payable in Philadelphia July 10th.

Taunton Branch Railroad.

The annual meeting of the stockholders in the Taunton Branch Railroad Corporation was held in Boston on the 29th ult. The following persons were elected to serve as directors for the ensuing year: Wm. A. Crooker and Edmund Baylies of Taunton; N. H. Emmons, William Sturges and Thomas B. Wales of Boston.

The capital stock of the road is $250,000. Earnings during the last financial year $144,981 97, against $127,254 09 during the year preceding. The reserve fund in 1861 amounted to $52,842 57; it now amounts to $24,769 83; the diminution being attributable to outlay incident to building a

freight house at Taunton, and the reduction of the valuation of the Middleboro' and Taunton Railroad, two hundred and fifty shares of which are held by this corporation. The expenses of the last year were $117,776 36.

Vermont and Massachusetts Railroad.

The holders of the bonds of this company, which are secured by a mortgage dated July 9, 1856, to J. C. Howe and others, Trustees for the Bondholders, are notified that a plan for extending the payment of the Mortgage Bonds for eighteen years from July 1, 1865, with interest semi-annually, payable by Coupons, to be attached to the extended Bonds, has been droposed by said Railroad Company. The Trustees consider the plan of extension to be advantageous to the Bondholders, and they advise its prompt adoption; and recommend the Bondholders to call, with their Bonds to have the extension stamped thereon and the Coupons attached, at the office of the Treasurer of the Company, 13 Exchange street, Boston. The Company reserve the right to pay at maturity, and not to extend any Bonds not presented for extension prior to August 1, 1863.

The Pennsylvania, and Philadelphia and Erie Railroad Contracts.

INJUNCTION TO PREVENT THE CONSUMMATION OF THE SALE OF THE SUNBURY AND ERIE RAILROAD TO THE PENNSYLVANIA COMPANY. CONSTITUTIONALITY OF THE ACTS OF ASSEMBLY RELATIVE TO SAID CONTRACTS.

This was a proceeding on a bill in equity, filed in the Supreme Court of Pennsylvania by Robert H. Gratz. The Pennsylvania Railroad Company being about to purchase the rolling stock and bonds of the Sunbury and Erie Railroad Company, and to lease it for the term of nine hundred and ninety-nine years, the lessee agreeing by the contract to keep the road in repair, maintain its equipment, and pay thirty per cent. of the gross earnings, for taxes, interest on bonds, &c., and the balance of the rent if any to the lessors; this bill was filed to procure an injunction against the proposed purchase and lease; it being contended by the complainant that the companies had no power to enter into any such contract, and that the act of March 7, 1861, authorizing the State treasurer to cancel $3,500,000 of the bonds of the Sunbury and Erie Railroad Company, and directing the satisfaction of the mortgage for $7,000,000, is a violation of Sec. 4, Art. 11 of the constitution of the State of Pennsylvania, relating to the sinking fund.

The Supreme Court have now decided the contracts to be valid because within the corporate powers of the two companies, that the act of March 7, 1861, is constitutional, and the mortgage for $5,000,000 executed March 30th, 1861, is the first lien on that part of the Philadelphia and Erie Railroad leading from Williamsport to Erie, and second only to the $1,000,000 mortgage on the part of the road between Williamsport and Sunbury.

By an act passed April 21st, 1858, the Pennsylvania legislature authorized a sale of the canals then belonging to the Commonwealth, to the Sunbury and Erie Railroad Company for the sum of $3,500,000. The proposition was not to sell for cash, but entirely on credit. To secure the payment of the purchase money, the act required the venders to execute and issue their 5 per cent. bonds for $7,000,000. Of these bonds the State treasurer was directed to receive an amount equal to $3,500,000, in settlement for the purchase money of the said canals and the residue was directed to be deposited also in the office of the State treasurer to be surrendered to the company as the work of completing their railroad progressed. The act also provided that as a further security for the payment of the purchase money of the property sold, the venders should execute and deliver to the State treasurer other mortgages on the canals, and it enacted that in case of default by the vendees in paying the principal or interest of any of the bonds, for ninety days after the same should become due and payable, a *seire facias* should issue, the mortgaged property should be sold, and that the proceeds of the sale of the said canals should be paid into the sinking fund, and applied to the payment of the State debt.

In accordance with this proposition of the assembly, the Sunbury and Erie Railroad Company became the purchaser of the State canals, and executed their bonds for $7,000,000 with an accompanying mortgage upon all their road. The mortgage was recorded, and all their bonds were delivered to the State treasurer in pursuance of the requirements of the act. One half the bonds, to wit., $3,500,000 represented the purchase money of the canals and belonged to the Commonwealth. The other half belonged to the company, and were to be delivered to them for negotiation as the work on their railroad progressed. There was already a mortgage of $1,000,000 which was the first lien upon that part of the railroad extending between Sunbury and Williamsport.

But the company were utterly unable to dispose of their portion of the bonds secured by the $7,000,000 mortgage, which remained in the office of the State treasurer, and of course they were unable to complete their railroad, or even to pay the accruing interest on the bonds owned by the Commonwealth. Accordingly, by the act of March 7, 1861, it was enacted that the name of the Sunbury and Erie Railroad Company should be changed to the Philadelphia and Erie Railroad Company, and that the company might execute new bonds for $5,000,000, secured by a first mortgage to trustees on all their road; except that from Sunbury to Williamsport it should be second to the $1,000,000 mortgage which had before that time been given. To insure the application of the bonds to the completion of the road, the bonds were required to be deposited with the State Treasurer, and by him delivered to the company according to the progress of the work. The act also authorized the company to execute other six per cent. bonds for $4,000,000 and secure the same by a second mortgage to the Commonwealth on the same property. It directed that these bonds and the mortgage should be delivered to the commissioner of the sinking fund, to be held as *collateral security* for the payment of the bonds for $3,500,000 given for the purchase money of the canals. Thereupon the State Treasurer was directed to cancel and surrender all that portion of the $7,000,000 mortgage bonds which belonged to the company, retaining uncancelled, however, the bonds amounting to $3,500,000 which belonged to the Commonwealth; and the trustees of the $7,000,000 mortgage were directed to enter satisfaction, on it, on the surrender and cancellation of the bonds secured by it, except those owned by the Commonwealth. The provisions of this last mentioned act have been accepted and performed.

The complainant now argued that the act of March 7, 1861, is unconstitutional; that the mortgage for $7,000,000 was marked satisfied without sufficient authority of law; that it still remains in force, and consequently the $5,000,000 mortgage is not the first lien on the company's road; that the directing satisfaction to be entered on the mortgage for $7,000,000 is a violation of sec. 4, art. 11, of the constitution. That section provides for the establishment of a sinking fund for the payment of the public debt, and it declares that the sinking fund shall consist of the net annual income of the public works, from time to time owned by the State, or the proceeds of the sale of the same, or any part thereof, and of the income and proceeds of the sale of the stock owned by the State, together with other funds or resources that may be designated by law. It also declares that the said sinking fund may be increased from time to time by assigning to it any part of the taxes or other revenues of the State not required for the ordinary and current expenses of government, and that unless in case of war, invasion, or insurrection, no part of the said sinking fund shall be used or applied otherwise than in extinguishment of the public debt, until the amount of such debt is reduced below the sum of $5,000,000.

The following is the concluding portion of the opinion of the Court rendered upon the decision of the case, upon the constitutionality of the act:

STRONG, J.—Treating then the debt due to the Commonwealth from the Philadelphia and Erie Railroad Company, and evidenced by the bonds as within the sinking fund, and entitled to the protection of the constitutional ordinance as fully as its equivalent in money would be, how does the satisfaction of the mortgage amount to a *use or application* of any part of it, contrary to the constitutional prohibition? To what other use is it applied? Not to the use of the Commonwealth certainly. Not to the use of the mortgagors, for no part of the debt is released by the satisfaction of the mortgage. The debt, and the whole debt, remains due as before. The bonds for $3,500,000 continue in the sinking fund. The mortgagors and obligors are still debtors as fully as ever. The proceeds of the sale of the canals are neither given away nor applied to any new use. And if there be no diversion of the fund from the object to which it was dedicated by the fundamental law, then nothing has been done which the constitution prohibits. It is material also to observe that if the constitution is to be so construed as to bring the evidences of the debt due by the company to the Commonwealth into the sinking fund, as we think it must, it follows as a necessary consequence, that there is power in the government to manage the securities for the debt, and make such changes in them as will best effectuate the grand object which the framers of the constitution had in view. And if this power exists, it must be in the legislature, subject, perhaps, though indirectly to the supervision of this Court. Now, what the framers of the constitntion mainly intended, was the dedication of the proceeds of the sale of the public works irrevocably to the payment of the public debt. The payment of that debt was the great end sought to be obtained. All else was

but subsidiary to it. But this dominant purpose, this main object of the constitutional ordinance would be defeated, if when a security for a debt has gone into the sinking fund there remains no power over it except that of custody. If the commissioner of the sinking fund and the legislature must stand helpless, and see the evidences of the indebtedness belonging to the fund decaying from year to year into worthlessness, if they may not substitute a better for a worse security, then the constitution but "holds the word of promise to the ear, and breaks it to the hope!" Such a view of it is worse than clinging to the letter and sticking to the book, for not even the letter of the constitution prohibits the administration and prudent management of whatever belongs to the fund. It prohibits only its perversion to any other use than the payment of the public debt. So far from inhibiting prudent measures to secure a debt, in spirit it enjoins them. It makes it the duty of all who have charge of the fund to see to it, that all which belongs to it shall be effectively applied to the purpose for which the fund was created. And I cannot doubt that whenever it is made apparent that a possible change of securities is necessary to guard any of the fund from oss, this Court would order it. In doing so they would exercise only the ordinary powers of a Court of equity over trustees, and they would be furthering the design of the framers of the constitution. And if this is so, then it cannot be doubted that a Court of equity would sanction precisely what the legislature did by the act of March 7, 1861, when they ordered the $7,000,000 mortgage to be satisfied. We shall not go over in detail the facts as they have been exhibited to us in the proofs, nor even mention again those which we have recapitulated. Let it suffice to say that the affidavits prove without any attempt at contradiction, what is apparent also from the several acts of assembly, that the debt due to the Commonwealth is much safer since the act of March 7, 1861, than it was before. The original debt, or rather the original evidences of debt remain unchanged. A collateral security only has been given up, while an improved one has been substituted in its place. We think this was not beyond the constitutional power of the legislature to direct. It remains only to add, that in our opinion, the $7,000,000 mortgage was legally marked satisfied; that the $5,000,000 mortgage is the first mortgage upon the entire railroad from Williamsport to Erie, and second only to the $1,000,000 mortgage on the part of the road between Sunbury and Williamsport; and that there is no ground for the injunction for which the complainant moves.

Motion for an injunction overruled.

☞ Messrs. Wason & Co., Springfield, Mass., car builders, have now 74 street cars on the stocks, of which 6 are destined for Shanghai, China, 10 for San Francisco, Cal., and 46 for New York city; and the rest are divided between Brooklyn, N. Y., Chicago, Ill., Hartford and Norwalk, Ct. They are making 35 passenger cars, 22 of which go to California, and 4 upon the New York and Boston express line through Springfield. They have also 80 freight cars ordered from California, part of which go to stock the Central Pacific Railroad. All the California cars are made so that they can be taken to pieces in sections, and thus securely packed and sent "round the Horn." Beside all the above, Wason & Co. are making a sleeping car for a western railroad, which for luxury and elegance they intend shall surpass anything ever made in this country; it differs in many respects from ordinary sleeping cars, and contains many important improvements which reflect great credit upon their designer.—*Boston Com. Bulletin.*

Union Pacific Railway, Eastern Division.

Gen. FREMONT, President of the Union Pacific Railway, Eastern Division, has appointed SAMUEL HALLETT & Co. General Financial Agents of the Company, and for the purpose of increasing their facilities, has placed with them available cash securities to the amount of two million of dollars, to remain with the house until the road is completed, and to be used by them in such way as they may deem best calculated to secure the speedy completion of the railway.—*N. Y. Times, July 2.*

NOTICE to RAILROAD CONTRACTORS.

MILWAUKEE & ST. PAUL RAILWAY COMPANY,
GENERAL OFFICE, Milwaukee, June 25, 1863.

SEALED proposals will be received by the undersigned, at the office of the Milwaukee and St. Paul Railway Company, in Milwaukee, until Saturday the 18th day of July, 1863, for the grading, masonry, bridging, cattle guards, and fencing of 28 miles of the line of road extending from Columbus to the City of Portage.

The line will be divided into sections of convenient lengths, and proposals will be received for single sections, or for the whole line.

The line will be ready for the examination of contractors on and after July 6, and maps, profiles and plans, with specifications, may be examined at the Engineer's Office, in Milwaukee, on and after that date.

Parties proposing, who are unknown to the undersigned, will be required to give satisfactory references.

The work to be offered to contractors will include about 600,000 cubic yards of excavation in a desirable location of the country for doing work. PAYMENTS IN CASH.

The Company reserve the right to reject any or all proposals as may be deemed for their interest.

D. M. HUGHES, President,
Wm. B. GILBERT, Chief Engineer.

NOTICE to RAILROAD CONTRACTORS.

PROPOSALS WANTED.—FLINT to FENTONVILLE (or HOLLY).—Proposals will be received at my office in Flint, Michigan, till TUESDAY, the 14th day of July next, for grading, furnishing ties, building fences, culverts, bridges and cattle guards, and for laying tracks on either of two routes already surveyed from Flint to the Detroit and Milwaukee Railroad, being about seventeen miles in length. Bids to specify:

Price of earth-work, per cubic yard.
Price of cross-ties, per piece.
Price of track-laying, per mile.
Price of clearing and grubbing, per mile.
Price of fencing, per rod, as per specifications.

The line of route and profiles and specifications may be seen at my office.

The company reserve the right to vary the line on final location, as may seem necessary; and also to accept or reject any or all bids made, as the interests of the Company may dictate. They also reserve the right to let the works as a whole or in parcels. Payments, Cash.

SMITH'S
Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of SMITH'S AIR LIGHT FOR RAILROADS, and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE.
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks, chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.

In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.

You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

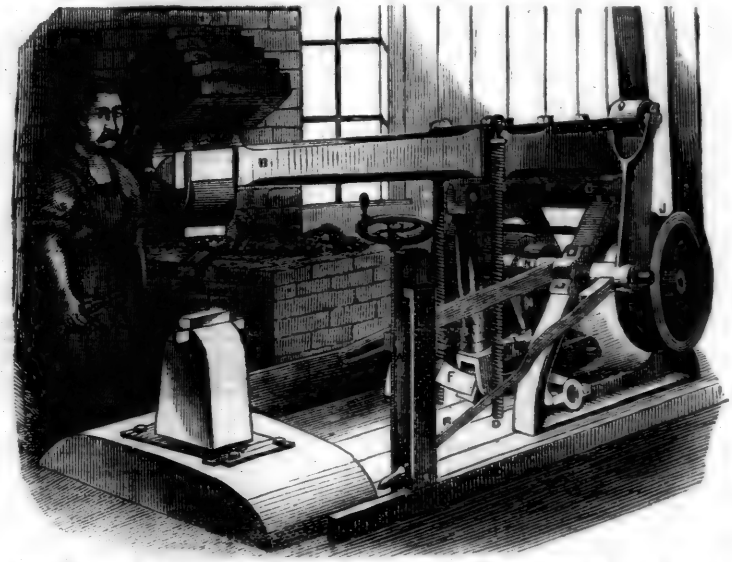
300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,



I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, 21 Nassau st., or by addressing
CHAS. W. WELSH,
Secretary.

AMES IRON WORKS,
OSWEGO, N. Y.,
SOLE AND EXCLUSIVE OWNERS AND MANUFACTURERS, UNDER PAYE'S PATENT.

An imperfect sketch of our smallest size Machine.

PAYE'S PATENT FORGE HAMMER. A HAMMER ADAPTED TO BOTH HEAVY AND LIGHT FORGINGS, with an adjustable stroke of from one inch to three feet. This hammer is adapted to both heavy and light forgings; the force of the blow being entirely at the will of the operator, and for all forgings under six inches, either round or square, is the best hammer now in use, and requires but one-half the power used by every other hammer to do the same work. For an engraving and description of this hammer, see page 1, Vol. V (new series) of the SCIENTIFIC AMERICAN; some valuable improvements have, however, been since made. All communications should be addressed to H. M. Ames, Box 422, New York, or Ames Iron Works, Oswego, N. Y.

These hammers may be seen in operation at the Allaire, Neptune, Secor, Delamater, Fletcher & Harrison, Duncan & Crampton, Anderson & McLaren, Duhurst & Emerson, Charles T. Porter, all in New York City; Joseph Colwell, Jersey City; Wm. White, Newark, N. J.; Providence (R. I.) Tool Co.; Whiting & Wilcox, Kaigh's Point, Phila.; Mallory & Cottrell, Mystic, Conn.; J. Dillion, Rondout; James Horner & Co., Sing Sing; Henry Esler & Co., Brooklyn; James B. Eads, St. Louis, Mo.; Central Railroad Shop, Albany; Burlington, Quincy & Chicago Railroad Shop, Ames Iron Works, Oswego; M. Guinness, Albany; Sweet Brothers, Syracuse.

ERIE RAILWAY.

PASSENGER TRAINS leave, via Pavonia Ferry, from foot of Chambers st., as follows, viz:

7.00 A. M., EXPRESS, for Buffalo, and principal intermediate Stations.
8.30 A. M., MILK, *daily*, for Otisville, and intermediate Stations.
10.00 A. M., MAIL, for Buffalo and intermediate Stations.
4.00 P. M., WAY, for Otisville, Newburgh, Warwick, and intermediate Stations.
5.00 P. M., NIGHT EXPRESS, *daily*, for Dunkirk, Buffalo, Rochester, Canandaigua, and principal Stations. The Train of Saturday, runs through to Buffalo, but does not run to Dunkirk.
7.00 P. M., EMIGRANT, for Dunkirk, and principal Stations.

CHA'S MINOT, *Gen. Sup't.*

QUARTZ MILLS
OF THE MOST APPROVED KIND,

Office, No. 16 Broadway, NEW YORK.
JAMES M. MOTLEY, Vice Pres't and Treasurer.
MANUFACTURERS OF
MASON'S SPERM OIL,
AND DEALERS IN
SPERM, WHALE, LARD AND OTHER OILS,
For Railroads, Steamers, Machinery and Burning.

FOX LATHES.

F. W. BACON & CO.,

No. 23 PLATT, corner of GOLD ST.,

NEW YORK,

RESPECTFULLY ask attention to their stock of Machinists' and Brassfinishers' tools from the establishment of Messrs. GEO. H. FOX & Co., of Boston.

Nason's Patent Screw Chasing Lathe manufactured solely by the above firm is without a rival or substitute for the manufacture of Cocks, Valves, Hose Couplings, Steam and Gas Fittings, and general Brass Finishing.

They have and are constantly receiving from the same celebrated manufacturers, Chucks, and Slide Rests, Shafting, Pullies, Hangers, etc.

The Hangers manufactured by them are of the most approved kind. The bearing being suspended by a universal joint; its advantages over the rigid Hanger will be at once seen and appreciat d by any mechanic. It is every way calculated for economy, being fitted with a patent box, which adjusts itself to the shaft, and they guarantee it to run SIX MONTHS WITHOUT REOILING, thereby saving labor, friction, oil, and the disagreeable and sometimes destructive effects of the dripping of oil from above.

ELEVATORS

For warehouses, manufactories, hotels, mechanics' shops, stores, or any other use where power Elevators are required; they guarantee all the safety that can be combined in any machine that is made. They are arranged with an improved apparatus, to hold the load in case the rope parts, which is unerring; also an invention of their own, to automatically arrest the descent of the load, if by any cause it should move downward is beyond the prescribed speed.

They also manufacture and are the exclusive licensees of Otis Tuft's Patent Elevator. The distinctive features are: the winding drum is driven by an endless screw—two or more ropes are used instead of one, thereby insuring more than double the safety—a peculiar mode of shipping the driving Belts, which insures it to stop at the required point. It operates without noise or jarring.

Belting, Belt Lacing, and Picket's Patent Belt Fastenings kept on hand and furnished to order. Steam and Water Gauges, Gauge Cocks, Packard's Patent Ratchet Drills.

ALL DESCRIPTIONS OF MILL WORK MADE TO ORDER.

BABBITT METAL.

Parties wanting Shafting, Elevators, or any other machinery, will be waited on by an experienced Engineer, their premises surveyed, plans and estimates made, machinery located, and the erection superintended when desired.

Having made this branch of Engineering a SPECIALITY the past ten years with uniform success, they confidently offer their services to those requiring such aid.

DELAFIELD & BAXTER'S,

Late OGDEN & DELAFIELD,

ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

AN INVALUABLE POCKET GUIDE

FOR THE ENGINEER AND MECHANIC!

THE

Mechanic's & Machinist's

PRACTICAL

BOOK OF REFERENCE

Containing Tables and Formulæ for use in Superficial and Solid Mensuration; Strength and Weight of Materials, Mechanics, Machinery, Hydraulics, Hydrodynamics, Marine Engines, Chemistry, and Miscellaneous Recipes. Adapted to, and for the use of all classes of Practical Mechanics. Together with the

Engineer's Field Book

Containing formulæ for the various methods of Running and Changing Lines, Locating Side Tracks and Switches, etc. Table of Radii and their Logarithms. Natural and Logarithmic Versed Sines and External Secants, Natural Sines and Tangents to every Degree and Minute of the Quadrant, and Logarithms of Natural Numbers, from 1 to 1,000.

BY CHARLES HASLETT,
Civil Engineer.

EDITED BY CHARLES W. HACKLEY,
Professor of Mathematics in Columbia College, in New York.

Issued in a compact pocket volume of 520 pages, containing 176 diagrams, bound in morocco, pocket-book form, PRICE TWO DOLLARS. *Copies mailed free of postage on receipt of price.*

The work is eminently a PRACTICAL **POCKET GUIDE** to ALL CLASSES OF **Mechanics** and **Engineers.** As a book for practical use in field work, it is confidently believed that this is more direct in the application of rules and facility of calculation than any work now in use. The original portion of this part of the work is submitted to the profession, fully confident that its use will be practical proof of its superior merits.

The tables and examples have been prepared with great care, and their accuracy may be relied upon. Further information can be derived from the circular containing the contents in full, which will be sent on application to the publisher. Inducements are offered to clubs of six or twelve, for particulars of which also apply to publisher,

JAMES G. GREGORY,
No. 46 Walker St., New York.

Semi-Steel Locomotive Tires, Fire-box & Tube Sheets,

AND BOILER PLATES.

TIRES—ROLLED, BLOCKED AND WELDED TO FIT ANY GIVEN DIAMETER OF CENTRE
PLATES—ROLLED AND CUT TO ANY PATTERN AND SIZE ORDERED.
ROLLED AND HAMMERED BARS, AXLES AND FORGINGS OF SAME METAL.

MANUFACTURED BY
CORNING, WINSLOW & CO.,
ALBANY IRON WORKS, TROY, N. Y.

SOLE AGENT,
GEORGE T. M. DAVIS,
47 EXCHANGE PLACE, N. Y.

CAST STEEL WORKS

OF

FRIED. KRUPP,

At ESSEN, in RHENISH PRUSSIA.

Patent Railway Tires, without a weld. **Axles, Cannon, Anchor-Flukes, Propeller Blades and Shafts. Cranked Axles and Shafts up to Twenty Tons weight.**

CAST STEEL IN BARS, BEST QUALITY,

Suitable for Axles, Shafts, Rolls, Tools, Dies, Needle and Music Wire, Fine Cutlery, etc.

KRUPP'S TIRES

ARE CHEAPER AT THEIR COST THAN IRON ONES GRATIS.
THEY WILL, WITHOUT TURNING, ENTIRELY OUTWEAR THE BEST IRON ONES.
WEAR UNIFORMLY, WITHOUT FLAT PLACES, OR LAMINATION.
ARE NOT AFFECTED BY EXTREME COLD.
MORE THAN SIXTY THOUSAND OF THESE TIRES HAVE BEEN SUPPLIED.

KRUPP'S AXLES

Possess similar advantages over Iron ones that the Tires do.

THOMAS PROSSER & SON, 28 Platt St., N. Y.
SOLE REPRESENTATIVES IN AMERICA.

I. KENDRICK,

AGENT OF THE

UNION COAL & OIL CO.

OF MAYSVILLE, KY.,

FOR THE SALE OF THEIR

Paraffine Lubricating Oil,

FOR ALL CLASSES OF

STATIONARY MACHINERY, LOCOMOTIVE ENGINES,
RAILROAD CARS, COTTON SPINDLES,
SEWING MACHINES AND WOOLEN FACTORIES.

ALSO,

MAYSVILLE COAL OIL
FOR BURNING,
PARAFFINE WAX,
PARAFFINE WAX CANDLES, AND
ROLLING MILL GREASE,
FROM PURE CANNEL COAL.

P. S.—All Oils **warranted** to answer the purpose represented.

☞ **Particular attention given to orders for shipment in cans or barrels.**

VENTILATION.

THE undersigned has devised and patented the only system of VENTILATION for **Buildings, Vessels, RAILROAD CARS,** etc., by which **spontaneous ventilation** can be effectually carried out; and is willing to dispose of the same to parties desirous of purchasing at a reasonable price. Address

HENRY RUTTAN,
Coburg, Canada.

NEW YORK, HARLEM & ALBANY R. R.

CHANGE OF TIME.

SUMMER ARRANGEMENT, commencing MONDAY, May 18, 1863, Trains will leave Twenty-sixth street Depot:

For Albany—10.30 A. M., stopping at Williamsbridge, White Plains, Bedford, Croton Falls, and all stations north to Chatham, Chatham Centre, Kinderhook, and Schodack, connecting with New York Central R. R. for all points west, and with the Northern R. R. for Saratoga and all points north.

For Croton Falls—8.15 A. M., stopping at all stations.

For White Plains—8.15, 10 A. M., 2.30, 4.10, 5 P. M., stopping at all stations.

For White Plains, 6.15 P. M., from White Street Depot.

For Dover Plains—4 P. M., stopping at White Plains and stations north to Dover.

For Williamsbridge—8.15, 10 A. M. 2.30, 4.10, 5, 6.15 and 8.30 P. M., stopping at all stations.

RETURNING WILL LEAVE

Albany—9.10 A. M. on arrival of Northern and Western Trains, stopping at all stations from Chatham to Croton Falls, also Bedford, at White Plains, and Williamsbridge.

Dover Plains—5.45 A. M., stopping at all stations north of and at White Plains.

Croton Falls—5 P. M., stopping at all stations.

White Plains—6.10, 7, 8.20 A. M., and 12.30, 4.15 P. M., stopping at all stations.

Williamsbridge—5.30 A. M. stopping at all stations.

American Railroad Journal.

New York, Saturday, July 11, 1863.

Something New.

Under this title we publish an advertisement of a new kind of waterproof goods called MANDUBA. They are free from rubber or sulphur, have no disagreeable odor, will not *stick* in warm weather, nor crack in cold. When *flocked*, they have the appearance of broad-cloth; otherwise they have a beautiful smooth surface. The great variety of uses to which the material is applicable is explained in a circular which may be obtained by addressing J. A. BROWN, Esq., 447 Broadway, N. Y.

Agricultural College Land Grants.

Under the act of July 2, 1862, granting lands to the States for the benefit of colleges of agriculture and mechanic arts, the general land office, under date of June 18, 1863, has sent to the Governors of the States of Iowa, Kansas, Michigan, Minnesota and Wisconsin special certificates to enable the State authorities to select the lands, together with the necessary forms to facilitate operations under the act. Those States are entitled as follows; Iowa, 240,000 acres; Kansas, 90,000; Michigan, 240,000; Minnesota, 120,000; Wisconsin, 240,000. All to be selected within their respective limits.

New York Canals.

The quantity of flour, wheat, corn and barley left at tide water, from the commencement of navigation to the 30th of June, inclusive, during the years 1862 and 1863, was as follows:

	Flour, bbls.	Wheat, bush.	Corn, bush.	Barley, bush.
1862	387,800	7,543,000	3,979,900	412,500
1863	402,100	5,635,800	6,814,100	55,700
Inc....	14,300	1,907,200	2,834,200	*356,800

* Decrease.

By reducing the wheat to flour, the quantity of the latter left at tide water this year, compared with the corresponding period of last year, shows a deficiency equal to 367,340 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide water, from the commencement of navigation, to and including the 30th of June, in the years indicated:

Canal open—	1861. May 1.	1862. May 1.	1863. May 1.
Flour, bbls	244,000	387,800	402,100
Wheat, bush	7,543,300	7,543,000	5,635,800
Corn	4,468,900	3,979,900	6,814,100
Barley	118,200	412,500	55,700
Oats	1,643,700	1,125,500	2,839,600
Rye	194,100	292,200	91,200
Beef, bbls	300	10,463	7,700
Pork	2,354	123,794	219,000
Bacon, lbs	246,500	4,774,600	3,002,800
Butter	82,500	62,900	38,800
Lard	164,600	4,182,300	16,270,400
Cheese	112,300	369,500	340,400
Wool	6,200	33,700	10,900

Grain Trade of Chicago.

The following table shows the receipts of flour, grain, live stock, &c., at Chicago, since Jan. 1 to June 27, for three years:

	1863.	1862.	1861.
Flour, bbls	654,787	717,889	589,630
Wheat, bush	2,374,116	4,693,134	4,899,123
Corn, bush	14,527,220	10,142,475	8,678,678
Oats, bush	2,651,800	986,313	495,208
Rye, bush	349,768	449,618	211,513
Barley, bush	148,018	423,594	303,091
Seeds, lb	2,834,422	2,329,358	2,652,983
Pork, bbls	52,295	36,509	31,233
Cut Meats, lb	29,744,052	17,162,797	9,274,425
Lard, lb	20,700,366	17,269,793	5,792,675
Tallow, lb	1,965,581	223,468	341,392
Live Hogs, No.	589,366	229,713	137,652
Dres'd Hogs, No.	193,224	172,363	414,115
Beef Cattle, No.	145,074	93,238	75,016

Grain Trade of Buffalo.

The eastward movement of Flour and Grain through Buffalo, this year, up to July 1, is larger than ever before, being in excess over 1862 to same date of 154,208 bbls. of Flour, and 3,475,144 bushels of Grain. The following will show the imports of Flour and Grain into Buffalo by lake and Lake Huron Railway for the month of June, and since January 1, 1863, as compared with three preceding years:

FOR THE MONTH OF JUNE.

Years.	Flour, bbls.	Grain, bushel.	Grain, incl'g Flour.
1863	463,595	10,283,224	12,601,199
1862	415,433	6,188,714	8,265,879
1861	285,853	5,383,065	6,812,330
1860	123,026	2,794,711	3,409,841

FROM JANUARY 1 TO JULY 1.

Years.	Flour, bbls.	Grain, bushels.	Grain, incl'g Flour.
1863	1,191,557	18,384,052	20,095,653
1862	1,037,349	14,908,908	24,341,837
1861	598,491	11,598,164	14,590,610
1860	327,056	6,543,256	8,175,536

Canal Exports from Buffalo from May 1 to July 1, 1863.

Flour, bbls	234,641
Wheat, bush	5,383,612
Corn, bush	8,347,139
Oats, bush	1,927,836
Barley, bush	12,795
Rye	44,060

The Canal Tolls from May 1 to July 1, 1863, received at Buffalo, are $933,958 35 against $835,583 in 1862; $485,474 08 in 1861, and $286,822 81 in 1860.

Iron Passenger Car.

The Rochester *Union* of Saturday says: "On the steamboat train from Albany last evening was an iron passenger car, built in that city, and the first brought out on the Central Railroad. The car contained a number of reporters and others who came on an excursion and were taken to Niagara Falls. The car returned to this city this morning empty. Those who examined this car did not appear to be favorably impressed. It was already indented by blows it had received, and began to show signs of twisting out of shape. It is lighter perhaps than wooden cars, and of course not liable to decay, but it may well be doubted if it would last as many years as those made of wood."

The English and French Coal Trades.

A well-informed correspondent of the *London Mining Journal* writes: "I do not think that any fear need be entertained that France will take less coal from England for years to come, and that she can ever be a competitor with England in the coal markets of the world seems highly improbable. It is true that the English steam coal is used no longer in the Imperial Marine, but the French coal thus withdrawn from the general French market leaves a void which Belgium or England has to fill up. France now requires 15,000,000 tons of coal per annum, while England requires 75,000,000 tons. France produced last year 9,400,000 tons, while England produced last year about 85,000,000 tons. Thus France has to obtain 5,000,000 or 6,000,000 tons of coal from abroad annually, while England can afford to export 9,000,000 or 10,000,000 tons annually. Under these circumstances, I do not see how the two countries can be regarded as competitors in the matter of coal."

The British Foreign Trade.

Ii there is one principle more than another which actuates the policy of England, it is that of fostering its foreign trade. It has not as we have, numerous internal channels of commerce, long and deep navigable rivers, railways in continuous and connecting lines of thousands of miles, great interior lakes, and varieties of climate with differing products of value easily exchangeable; its greatness and its wealth are derived from its foreign trade, and its insular position favors the idea of oceanic enterprise.

As one means of advancing its object, its steam mail service has been vigorously prosecuted and liberally sustained. In looking over the official estimate of the service made up at the British Post office for the year 1863-'4 we find that the contracts embrace the following lines:

Contracts.	Amounts. 1863-'4.
Holyhead and Kingstown	£85,900
Aberdeen and Lerwick	1,200
Thurso and Stromness	1,300
Southampton and Channel Islands	4,000
Liverpool and the Isle of Man	850
Liverpool and Ramsey (Isle of Man)	100
Penzance and Scilly	300
Southampton and Cowes	750
Ryde and Gosport	50
Dunvegau and Lochmaddy	233

Total for contracts	£952,987

This amount exceeds the grants of the preceding year £40,995. In fact the postal service of the world is now principally performed by British Mail steamers. The French, Spanish, Belgian, and American lines are not worth speaking of as competitors; in fact they scarcely exist.

The returns of the Foreign trade for the year 1862 show a corresponding activity, and the war in this country has impaired the commercial resources of England but very slightly. Notwithstanding the failure of the cotton trade in 1862, the real value of British and Irish exports in that year was not quite a million less than those of the previous year.

The following is the official return for several preceding years.

1859	£130,411,529
1860	135,891,227
1861	125,102,814
1862	124,137,812

Notwithstanding the falling-off in the exports of cotton in 1862, a decrease also in hardware and cutlery to the extent of £80,000; machinery other than steam engines, of £500,000; seed oil, £70,000, and wool, £300,000, there was a large increase in other articles of export. In woollen manufactures it amounted to £2,000,000; iron manufactures, £1,000,000; linen do., £1,300,000; arms and ammunitions, £1,200,000; steam engines, £400,000.

The Commissioners of Customs confess their astonishment that "in spite of all the difficulties in the position of America, she *has been able to command* an increased supply of British produce and manufactures as compared with 1861 to the amount of more than £5,000,000." The British exports to America are in—

1860	£21,500,000
1861	9,000,000
1862	14,000,000

The figures for 1860 include the trade with the Southern States, and exclude them for 1861.

Nor is this flourishing condition of commerce owing to the demand for articles required for purposes of war, since the report affirms that the increase the past year has been as large in other more legitimate articles of commerce, and extends throughout the whole rerurn, applying to 24 out of 31 articles. From the same source we learn that the Northern States have exported to Great Britain the past year merchandize to the value of £28,000,000, being an increase from 1861 of £4,000,000 notwithstanding the pressure of the war. The trade with the Northern States thus appears to have been highly favorable, and more profitable than was supposed, and so the fact astonishes the political economists, who declare that it is a phenomenon.

With regard to the contraband trade with the Southern States we have no official informction and indeed could not very well have any. We are of the opinion, however, based on the returns of captures to our Navy Department, and the report of heavy failures in England of parties engaged in those transactions, that while the supplies obtained by the rebels have been of great advantage to them, yet the result to the blockade runners has on the whole been disastrous. We have seen a statement in a London newspaper which computed the losses to these persons at over one hundred millions of dollars.

Pittsburg, Fort Wayne and Chicago Railway.

PITTSBURGH, PA., June 19th, 1863.

To the Editor of the RAILROAD JOURNAL:

DEAR SIR—I have pleasure in handing you, herewith subjoined, a statement showing the financial condition of this company, at April 30th ult.

The balance of $183,671 11 to the debit of Income Account, December 31, 1862, caused by the provision made from the revenue of that year for the liens against the property when purchased, composed of the Bridge bonds of the Ohio and Pennsylvania Railroad Company, and the Chicago Depot bonds, of the late consolidated company, has since been entirely absorbed.

The net revenue for April, after the deduction of all transportation and construction expenditures, and interest on the coupon bonds, amounted to $73,563 04, and from Jan. 1st to April 30th ult., to $221,441 79, from which latter amount the above-named debit balance being deducted, leaves to the credit of Income account the sum of $37,770 68.

The approximate earnings for May ult. were $418,739 82, being an increase of 51.2 per cent.,

and for the first five months, to May 30th ult. they were $2,047,639 84, being an increase of 43⅞ per cent. over the same period of 1862.

Respectfully, &c., &c.,

THO. D. MESSLER,
Comptroller.

GENERAL ACCOUNT, APRIL 30, 1863.

Railroad Opening in Oregon.

We have Oregon journals of the 25th of April. A continuous steam connection between Portland, the Cascades, Dalles and Lewiston has been established. A railroad across the portage at the Cascades, six miles long, and one from Dallas to the mouth of the Deschuttes, 13½ miles, are completed. The opening trip was made on the 20th of April. Dalles is represented as being full of passengers for the gold mines. The passage from Portland to that place has been reduced by competition to $1.

Milwaukee and St. Paul Railroad.

The following is a list of officers and Directors of the newly-organized Milwaukee and St. Paul Railway Company: President, D. M. Hughes; Vice-President, Geo. W. Rogers; General Manager, E. H. Goodrich; Superintendent, S. S. Merrill; Directors—D. M. Hughes, Geo. Smith, Isaac Seymour, F. P. James, Russell Sage, N. A. Cowdrey, H. Galpen, of New York; Geo. W. Rogers, A. Mitchell, A. Noyon, A. Finch, S. Chamberlain, Milwaukee; Wm. Gould, Albany, N. Y.

The new President, Mr. Hughes, is a gentleman every way qualified for his position, and his name will be of great advantage to the Company. Mr. Sage has had a large experience in railroad management, having been for some years a Director of the New York Central Road. With Mr. Goodrich our business community have been familiar for years. He has been Superintendent of the Western Road, and has been widely known for his business capacity and adaptation to the duties of his position.

On the whole, we think that the new management of the Milwaukee and St. Paul Road will be eminently successful and popular.—*Milwaukee Wisconsin.*

Providence and Worcester Railroad.

The earnings and expenses for the years ending November 30, 1861 and 1862, have been as follows:

Earnings:	1861.	1862.
From passengers	$120,081 79	$131,364 08
" merchandise.	175,614 62	183,534 29
" mails	5,114 25	5,018 75
" rents.	2,140 37	2,262 49
" express	5,277 00	5,277 00
	$308,228 03	$327,456 61
Expenses, viz:		
Fuel	$17,694 41	$18,612 34
Oil	2,819 18	2,415 63
Repairs of cars	15,504 29	14,586 37
" locomotives.	15,884 37	11,729 90
Freight department	27,169 92	26,031 27
Passenger "	21,462 73	21,091 96
Maintenance of way	41,580 02	41,546 05
Miscellaneous.	26,666 21	30,086 29
	$168,781 13	$166,099 81
Net earnings	$139,446 90	$161,356 80
Interest paid.	5,158 09	7,416 90
Net income	$134,288 81	$153,939 90

Compared with 1861, the gross earnings of 1862 show an increase of $19,228 58; with a decrease in expenses of $2,681 32—making the increase in net earnings, $21,909 90.

The income account of the company for the year ending November 30, 1862, is as follows:

Net income, as above	$153,939 90
Received for land sold	1,150 00
" cars sold U. S. Gov	17,300 00
Dividends unpaid	968 00
Materials on hand, Nov. 30. 1861.	41,948 88
Notes on hand, Nov. 30, 1861	5,746 00
Cash on hand, Nov. 30, 1861.	65,644 05
	$286,696 83
Accounted for as follows:	
Dividends paid Jan. and July, 1862	$128,000 00
Bonds paid.	50,000 00
New freight cars	17,300 00
Materials on hand, Nov. 30, 1862.	43,083 56
Notes.	6,896 00
Cash and cash items.	41,417 27
	$286,696 83

The equipment of the road consists of 13 locomotives, 14 passenger, 4 baggage, 147 merchandise, and 205 coal cars. The number of miles run by passenger trains has been 122,873; by freight trains, 66,960; by other trains, 16,231—total miles run, 206,064. Number of passengers carried, 668,387; do., carried one mile, 5,912,246. Tons of freight carried 155,673; do., carried one mile, 5,089,743.

Power of Railroad Companies to Assign Stock Subscriptions.--Rights of Stock Subscribers.

A COMPANY WHO'S CHARTER GIVES IT POWER TO MAKE ALL CONTRACTS WHICH ITS INTEREST MAY REQUIRE HAS POWER TO ASSIGN ITS STOCK SUBSCRIPTION.

The case of Downie *vs.* Hoover, recently decided by the Supreme Court of the State of Wisconsin, holds that a railroad company who's charter gives it general power to make all contracts which its convenience or interest may require, has power, in carrying out the enterprise authorized by its charter, to assign its stock subscriptions, provided there is nothing in the charter imposing any specific restriction.

The complaint in the case stated, that in May, 1856, the defendant Hoover made a subscription for five shares of $100 each, of the capital stock of the Milwaukee and Beloit Railroad Company, to be paid at such times as the directors of said company should prescribe, &c., with a condition that the subscription should not be binding until the sum of $100,000 should be subscribed to the capital stock of said company, in the city of Milwaukee, independent of corporate aid; and after alleging the subscription of that amount to the stock of said company, in the city of Milwaukee, as required by said condition, and the making of various calls by the directors, for the payment of instalments upon stock subscriptions, under which the whole sum subscribed by the defendant had become due and payable, averred, that before the commencement of this action, the said railroad company, by an instrument in writing, duly executed, for a valuable consideration, and for purposes connected with the business of the company, assigned and transferred to the plaintiff, the said subscription of the defendant to the capital stock of said company, and all claim and demand of said company against the defendant arising by means thereof. It alleged, also, demand of payment from the defendant, non payment, &c. The defendant demurred to the complaint, upon the grounds, that it appeared upon the face of the complaint, that the plaintiff had no legal capacity to sue, and that the complaint did not state facts sufficient to constitute a cause of action.

The Circuit Court of Milwaukee, before which court the case was argued, decided in favor of the defendant and sustained the demurrer. The plaintiff then appealed. Upon the appeal it was urged in favor of the appellant that a corporation can make all contracts which are necessary and usual in the course of the business it transacts, as means to enable it to effect the objects of its institution, unless expressly prohibited by law or its charter. In behalf of the respondent it was urged that the assignment by the railroad company, of money due on a stock subscription, was unauthorized and void, as against public policy. The following is the decision of the court.

PAINE, J.—The single question presented by this appeal is, whether a railroad company, in carrying out the enterprise authorized by its charter, has any power to assign its stock subscriptions. We think it has the power. A stock subscription is nothing but a contract by which the subscriber is bound to pay the company certain amounts. It would clearly be assignable, as between individuals, and we can see no reason why it should not, in the case of a corporation, acting in execution of the powers conferred by its charter. The fact that a company may abuse its power, and make contracts ruinous to itself, and to the value of its stock does not seem to be a sufficient reason for denying the power. For they may undoubtedly, do this whether this power of assignment exists or not. They may make extravagant contracts for materials, for land, and for labor in building the road, and thus make their stock worthless, as often happens. They become insolvent, receivers are appointed, who may compel the payment of unpaid stock subscriptions for the benefit of creditors, created by these extravagant and ruinous contracts. The fact, therefore, that a company may ruin itself by indiscrete contracts, if such an assignment is allowed, is no reason against the power; for it may ruin itself by such contracts without such power. At all events, even though it might be a reason for the legislature to impose a restriction, it is no reason for the court, where the charter contains no such restriction, but gives the general power to make all contracts which the convenience or interest of the company may require, to deny the power to make this particular contract. The reasoning in the case of Clark *vs.* Farrington, decided at this term is applicable to the question. The order of the court below sustaining the demurrer, is reversed, and the cause remanded for further proceedings.

SECRET AGREEMENTS BETWEEN COMPANIES AND SUBSCRIBERS THAT THE SUM SUBSCRIBED SHOULD NEVER BE COLLECTED DECLARED VOID.

The complaint in this case, entitled Downie *vs.* White was exactly similar to that in the preceding case of Downie *vs.* Hoover. The defendant, however, filed an answer containing several grounds of defence. The first was a denial of the organization of the Milwaukee and Beloit Railroad Company; the second, a denial that at the time of the pretendsd election of directors of the corporation. in March 1856 there had been $50,000 of the capital stock subscribed, as required by law to authorize such election. The third stated that sometime in May 1856, one Reyment, who claimed to be an agent of said company, met the defendant and one Fitzgerald, and told them he had a book of subscriptions to the capital stock of said company, and wanted their names as subscribers; that the defendant refused to become a subscriber, but Reyment stated that he only wanted their names as a matter of form; that their names would be of service to him on account of their being known in the towns through which the said railroad was to run, and that if they would put their names down for $500 each, they should never be called upon to pay; that the defendant, induced by the representations solely, and not intending to bind himself as a subscriber, either wrote his name in the book in pencil, or authorized said Reyment so to write it; that sometime afterwards he was called upon by an agent of the company for payment of several instalments, but refused to pay or admit himself liable as a subscriber, but subsequently, at the instigation of others, did pay and give to the company $225, as a mere bonus to aid the work, as a benefit to the city of Milwaukee, as a mere gift and not as a matter of legal obligation. The fourth defense was the same as that in the preceding case.

The trial was had before the Milwaukee Circuit Court. The plaintiff, after giving in evidence the charter of the company and the subscription made by the defendant for $500 of its stock, introduced proof tending to show the making and notice of assessments therefor as stated in the complaint, and that over $100,000, had been subscribed to the capital stock of the company, in the city of Milwaukee, independent of corporate aid, and that the subscriptions were *bona fide*; but on cross examination a witness called by the plaintiff testified, that certain of said subscription, aside from the one on which this action is founded, were subject to secret or private conditions as to the mode and amount of payment; one subscription of $5,000 having been made with a private understanding that the amount really to be paid should be fixed upon at a future day, and having been afterwards discharged by the transfer of other railroad stock worth about $500, and another subscription of $5,000 having been made with an understanding that it should be paid by the bond of a third party, which bond was according accepted by the company, but had never been collected.

The plaintiffs council offered in evidence an instrument in writing executed by the Milwaukee and Beloit Railroad Company, dated Dec. 16, 1856, assigning to the plaintiff certain claims due to the company upon subscriptions of stock, among which was the claim upon the defendant White for $275, and offered to prove that the assignment was made to the plaintiff in payment for money, advanced by him towards the construction of the railroad of said company; but the counsel for the defendant objected to the evidence, on the ground that the company had no power to assign its stock subscriptions, which objection was sustained by the court, and its ruling excepted to by the plaintiffs counsel. The court then instructed the jury to find for the defendant; and the plaintiff appealed to the Supreme Court. The following is the decision.

PAINE, J.—This case presents the same question as that decided in Downie *vs.* Hoover which must be here decided in the same way. In this case, however, an answer was filed and a trial had. But we do not think the secret understanding which the defendant sets up, to the effect that his subscription was to be merely colorable, nor the evidence offered showing an understanding of a similar kind with other subscribers constitutes any defence whatever. Such agreements are an obvious fraud upon the other subscribers; and the written subscription should be enforced without regard to them.

The third paragraph of the defendant's answer is liable also to the objection, that it sets up a contemporaneous parol understanding inconsistent with the terms of the written agreement.

The judgment must be reversed, and the cause remanded for a new trial.

Boston and Providence Railroad.

The earnings, expenses, etc., of this road for the years ending November 30, 1861 and 1862, have been as follows:

Earnings:	1861.	1862.
From passengers	$297,473 93	$349,861 52
" freight	252,830 92	310,698 38

Dividend	8 00	8 00
Miles run by engines	376,954	435,121
Cost of fuel	9.25 cents.	10.68 cents.

Compared with 1861, the gross earnings of 1862 show an increase of $113,350 29; with an increase in expenses of only $29,981 52—making the increase in net earnings $83,368 77.

In the expenses of the last year are included the cost of one new locomotive $8,000; twelve new cars, $11,550; and $23,358 60, carried as a reserve to the several funds for renewals. The reserve funds now amount to $115,571 24.

During the last year, eleven acres of flats have been filled in at a cost of $43,028 67; which amount, as well as the sum of $8,229 59, the amount of taxes paid the U. S. Government; $17,270 79 paid on account of the new bridge at Berkley street, Boston; and $5,000 carried to fund to meet any losses that may occur beyond insurance, amounting, in the aggregate, to $73,529 05, have been charged to income or surplus account. The balance to credit of that account is now

$180,269 51; at the close of 1861 it was $158,913 93—showing an increase of $21,355 58.

The equipment of the road consists of 25 locomotives; 31 passenger, 9 baggage, 123 house freight, 47 platform, 33 coal, and 20 gravel cars.

CONDENSED BALANCE SHEET, NOV. 30, 1862.

Trade and Navigation of Canada.

(Continued from page 600.)

The value of the British and foreign merchandise entered for consumption in 1862 was $48,700,633 and the duty collected thereon $4,652,748, against value of merchandise entered in 1860 $34,447,935, duty $4,758,465; and in 1861 value $43,054,836, duty $4,768,192. In 1862 the value of the principal articles imported from sea amounted to $18,091,317; in 1861 to $17,249,055, including goods in transit to United States in the former year $490,298 and in the latter year $522,514. Free goods in 1862 $24,624,623, against $14,655,413 in 1861 and $4,176,010 in 1860. Under the Reciprocity Treaty with the United States, the imports amounted in value to $14,430,626 in 1862, while in 1861 it was only $9,980,937. From the provinces of Nova Scotia, New Brunswick, Prince Edward's Island, and Newfoundland there were imported last year goods to the value of $535,469. The value of goods passing through the United States under bond in 1862, and thence into Canada, was $5,508,427; goods purchased in the United States the produce of that country and imported, $21,128,077; goods purchased in the United States and imported being not the produce of that country, $4,045,080. A comparative table of imports, exhibiting the value of and amount of duties collected on goods entered for consumption, from 1859 to 1862, shows that in 1859 the value amounted to $33,555,161, duty $4,437,846; in 1860 value $34,447,935, duty $4,758,465; in 1861 value $43,054,836; duty $4,768,192: in 1862 value $48,600,633, duty $4,652,748. It will be seen that though the imports of 1862 were larger than those of the two previous years, the duties collected fall somewhat short of those of 1860 and 1861. This was owing to the increase in free goods, which in 1862 were nearly equal in amount to one-half of the whole importations of the province. The imports of grain and flour last year show a vast increase as compared with the two years that preceded it; in cotton goods there is a falling off, and an increase in hardware and iron manufactures generally—as well as in sugars, teas, coffee and tobacco.

The value of exports for the year 1862 are returned at $33,596,125, of which the exports to Great Britain are valued at $15,224,417; to the British North American colonies at $826,871; to the British West Indies at $13,775; to the United States at $15,063,734; to other foreign countries at $550,252. The shipments from Quebec amounted in value to $6,813,164; from Montreal to $8,765,594; from Gaspe and outports to $691,075; from Rimouski to $40,988; from Isle Verte to $31,581; and from inland ports to $15,346,643. The comparative exports of the last three years are as follows:

Prod'ce of the mine	$558,306	$463,118	$702,906
Do. fisheries	832,646	663,700	703,896
Do. forest	11,012,253	9,572,645	9,482,897
Animals and their products	4,221,257	3,681,468	3,923,590
Agricultural products	14,259,225	18,236,476	15,041,002
Manufact'res	502,037	289,130	415,327
Coin & bull'n	89,228	224,513	178,997
Other articles	137,240	154,718	242,002
Total value of exports	$31,612,192	$33,305,768	$30,690,617
Value of ships built at Quebec	749,268	1,411,480	988,428
Estimated amount of exp's, short returned at inland p'rts	2,270,439	1,896,947	1,917,080
Grand total of exports	$34,631,890	$36,614,195	$33,596,125

The total imports and exports seaward in 1861, *via* the St. Lawrence, were of the value of $39,773,790, whereof $17,249,055 were imports, and $21,113,255 were exports, besides the value of ships built at Quebec, $1,411,480. Total value of imports and exports *via* the St. Lawrence in 1862, $38,690,514, of which the imports were $18,091,317, the exports, $19,610,769, besides value of ships built at Quebec, $988,428. The value of imports and exports for Canada in 1862 were—Imports, $48,600,633; exports, $33,596,125; total, $82,196,758; in 1861—Imports, $43,054,836; exports, $36,614,195; total, $79,669,031; increase in 1862, $2,527,727, or 3 1-6th per cent.

The Franking Privilege.

We are requested to call special attention to the following change of the law in relation to the franking privilege:

Hereafter, all correspondence addressed to any Executive Department of the Government, or any officer in it, must be prepaid, except official communications written by some officer of the department, or an officer under its control or responsible to it; and in such cases, under the words "official business," on the envelope, the officer must sign his name, with his official designation. All other persons, and all officers writing to departments with which they are not connected, must prepay their postage. All communications to the President, not written by a public officer, and all to the Vice President must be prepaid.

All communications addressed to Postmasters must be prepaid, and if a reply is required, stamps for return postage must be inclosed.

The observance of this regulation will save much disappointment and expense.

Dimensions of the Earth's Coal Fields.

Professor Rogers states, we have it on the authority of competent surveyors, that the great coal field of South Wales, the largest and deepest in Europe, covers a surface of not less than 1,000 square miles, and has a maximum thickness of from 7,000 to 12,000 feet in its coal measures. In this prodigious "book of time," there are, it has been computed, not less than 50 beds of coal, from 6 inches to 6 feet in diameter, and 25 of these are said to be each at least 2 feet thick. The smaller Forest of Dean coal basin contains, according to the "Memoirs of the Geological Survey," 31 coal beds in a thickness of coal measures of 2,400 feet. From the same source (the survey) we learn that the North Staffordshire coal measures have an aggregate depth of about 5,000 feet; while those of the Newcastle district are believed to be at least 2,000 feet thick, and to embrace a total thickness of coal equivalent to 60 feet. In the deepest portions of the extensive coal basin of Scotland, the upper productive coal measures of Mid-Lothian have been found by the survey to possess a thickness of not less than 1,800 feet. The number of the seams of coal wrought in the Lanarkshire field is in all 18. Turning to other countries, the depths or thicknesses of the coal measures, and the numbers of coal beds, will be found to be on an equally grand scale. Looking first to the western side of the Atlantic, North America displays, commensurately with the breadth of her physical features generally, several enormous coal regions, three at least of which are the largest known upon the globe. One of these, the Appalachian basin, has a length of 875 and a maximum breadth of 180 miles, with an area in square miles of 55,500. Where deepest its coal beds have an aggregate thickness of 40 feet. A second, the coal field of Illinois, Indiana, and Kentucky, has length, 370, maximum breadth 200, and area 51,100 miles. This basin has 15 or 16 good coal seams, with a maximum thickness of 50 feet, and the third and largest, but least opened, shows length 550, breadth 200, and superficial area 73,913 miles. In the anthracite basin of Pennsylvania, the thickness of coal measure, amounts to 3,000 feet, while that of the workable coal is not less than 120 feet. The aggregate area of the five chief coal fields of the American continent, amount by careful estimates based upon the latest surveys and the best geological maps, to rather more than 200,000 square miles; a surface greater by about 20 times than the sum of all the coal fields of Europe, or indeed, of the whole Eastern world. The British carboniferous basins may be estimated to embrace some 5,400 square miles of coal; the French a little less than 1,000; and the Belgian about 510. Rhenish Prussia has 960; Westphalia 380; the Bohemian field some 400; that of Saxony only 30; that of Spain probably 200; and that of all Russia scarcely 100 square miles. Comparing the coal areas with the total surfaces of the respective coal producing countries, the United States has one square mile of coal to each 15 of land; Great Britain one to every 22½; Belgium a like proportion; and France but one of coal to every 200 of country. Adopting for the commuted total area of the coal fields of the world 220,000 square miles, and accepting 20 feet (a low estimate) for the average thickness of the available coal, the entire mass of the fuel under the soil for the future wants of man amounts by calculation to a cubic lump of nearly ten miles lineal dimensions, or to a square platean of coals of 100 miles wide in its base, and something more than 500 ft. in height. The British lump of coal is a cube of a little more than three miles in diameter. In 1854 Great Britain extracted from her mines more than 64,000,000 tons. In 1861 the product was about 80,000,000 tons, equal to a cubic block of 430 yards in height. For the present year the probable product may be safely estimated at not less than the enormous

quantity of 100,000,000 of tons. In the preliminary report lately printed on the census of the United States for 1860, it is shown that the coal product of the State of Pennsylvania amounted in that year to about 11,500,000 tons, while that of all the coal yielding States together exceeded 15,000,000 tons. In the year 1850 Belgium took from her mines nearly 6,000,000 tons; France some 4,500,000 tons, and Prussia nearly 4,000,000 tons. It has been calculated that one-fifth at least of the present vast product in coal of the civilized world, which fifth part we may roughly estimate at nearly 30,000,000 tons annually, is applied in the smelting and manufacture of iron alone, and it is probable that more than one-tenth of the whole of the fuel lifted, or some 15,000,000 tons, is converted directly into mechanical power, through the generation of steam for the propulsion of machinery.—*London Artizan.*

Northwestern Virginia Railroad.

The following communication from the Mayor was transmitted to the City Councils of Baltimore on the 23d ult.:

BALTIMORE, June 22, 1863.

To the Honorable the Members of the First and Second Branches of City Council.

I return without my signature the ordinance entitled "an ordinance to aid in a re-organization of the Northwestern Virginia Railroad Company on certain conditions." I am under the impression this power does not exist in the Mayor and City Council of Baltimore. The act of assembly, chapter 146, entitled "An act giving certain powers to the Mayor and City Council of Baltimore in regard to the Northwestern Virginia Railroad Company," empowers the corporation to loan the stock, or bonds of the city, or to guarantee the bonds of the said railroad company, thereby prohibiting the city from becoming a stockholder in the road.

The ordinance entitled "An ordinance to guarantee the bonds of the Northwestern Virginia Railroad Company, approved June 5, 1852," does, by the provisions of the third section, provide for a good and sufficient deed, pledging the property of the said company for the payment of said bonds, or certificates of loan, and the interest thereon, according to their tenor, in which deed there shall be a provision that the said Mayor and City Council of Baltimore, having first obtained authority from the general assembly of Maryland so to do, may at any time during the continuance of, or within five years after the completion of said road, elect to take stock at par to the amount of the bonds, or certificates of loan, so guaranteed, or any part thereof. The act of the General Assembly of Maryland only gave power to loan the credit of the city in aid of the road, and the ordinance especially provides that the corporation must first obtain authority from the General Assembly before they can change the guarantee or become stockholders in the road. If the power did exist, which I feel confident does not, justice to the tax payers demand that we should not relinquish a first mortgage, and agree to come in on an equality with the second and third mortgages, and a stockholder interest and outstanding indebtedness without a single equivalent. If we part with the first mortgage, the tax payers are bound to pay the interest upon the bonds, ninety thousand dollars, yearly, and the principal when the bonds mature in 1873.

The first mortgage covers the entire road from Grafton to Parkersburg, including the first named town and all the buildings and workshops of the company. I feel convinced a better disposition can be made of our interest than the one provided for in the ordinance herewith returned. The principal argument that has been used to induce me to approve the ordinance is this: The Northwestern Virginia Road is entirely in the power of the Baltimore and Ohio Railroad Company, and that the latter company will use all their power to make this interest valueless until this or a similar arrangement is made, giving it the control of the Northwestern Virginia Road. It must be remembered that the Baltimore and Ohio Railroad Company is, to a very large extent, the creation of the tax payers of the city of Baltimore, and that as late 1852, when in great distress for available means, it made an appeal to our citizens for assistance to complete the main stem to Wheeling, and to construct a double track to Piedmont.

This appeal was most liberally responded to by the Mayor and City Council endorsing the bonds of the company to the amount of five millions of dollars. The large pecuniary interest the city holds in the Baltimore and Ohio Railroad Company, with the liberal feeling that has always characterized the corporation towards that road, ought to induce a similar feeling on the part of the company towards the city, but unfortunately this state of affairs does not exist.

We find this company recently expending a million and a quarter of dollars in the State of Ohio to sustain a crippled railroad interest, notwithstanding the remonstrances and entreaties of the city of Baltimore in favor of the Northwestern Virginia Railroad.

It has been asserted, and not without effect, that Judge McLain, of Ohio, has decided that a fourth party coming in to complete a road has a prior right to a first mortgage, and the Baltimore and Ohio Railroad Company claims to be that party in this case, and argues that our first mortgage is valueless. If this be the fact, and the Baltimore and Ohio Railroad Company has this prior right, where is the necessity of any legislation upon the subject? She already has the power she wants, and if she has not, she can easily obtain it by an advance of the amount necessary to complete the Northwestern Virginia Railroad Company, but I am assured by the most eminent legal gentlemen that no such decision has been given, and that the report is a perverted definition of quite a different case. If such a decision had taken place and was the law of Ohio, why did the Baltimore and Ohio Railroad Company go into that State sixty days since and expend a million and a quarter of dollars in a first mortgage with the avowed purpose of securing a further interest, thus occupying a position opposite the one it now seeks to stand in.

There is in the minds of our merchants the conviction that there is a policy of discrimination on the part of the Baltimore and Ohio Railroad Company against the city of Baltimore, and in favor of Philadelphia and New York, and that the trade between Baltimore and the Ohio River is subjected to exclusion in many cases, in consequence of exorbitant rates of freight on coal and other merchandise. This conviction produced a determined effort, when the subject of the re-organization of the Northwestern Virginia Railroad was first agitated, to insert in the ordinance a provision to prevent discrimination against the city of Baltimore. I find no such provision in the ordinance. Why has it been abandoned? It is estimated that the completion of the tunnels, building of the bridge over the Ohio River, and the repair of the entire line from Parkersburg to Grafton, will cost two millions of dollars. The working expenses of the road must first be paid. The interest on the cost, or $120,000, must be paid next, and when that is paid, if this principle of re-organization takes place, we come in for our share of the profits, with about $8,000,000 representation, trusting to the Baltimore and Ohio Railroad Company, who will be by this action the largest stockholder, and can, in consequence, control every movement of the stockholder interest, for such dividend as she may think we are entitled to. The city of Baltimore holds an interest in the Northwestern Virginia Railroad of about one million eight hundred thousand dollars.

We have made repeated applications during the past two years for a statement of the working of this road, but up to this time no response has been received. On the 27th of December, 1860, an agreement was entered into between the Baltimore and Ohio Railroad Company and the Northwestern Virginia Railroad Company, by which the first named company agreed to pay the interest on the guaranteed bonds—ninety thousand dollars yearly. This agreement was complied with for four years only, since which time not one dollar has been paid by the Baltimore and Ohio Railroad Company. A suit is now pending in the courts against the Baltimore and Ohio Railroad Company to recover back the amounts paid by the city. I mention this fact for fear it might be overlooked.

I am, with high regard, your obedient servant,
JOHN LEE CHAPMAN, Mayor.

To the White Mountains.

The Boston and Maine Railroad, as will be seen by an advertisement in another column, offers the advantages of two routes to the White Mountains, over both of which passengers are transported to the terminus of the railroad without change of cars. One of these is the old and favorite route via the Concord and Montreal Railroad to the Weirs' Plymouth or Littleton. At the Weirs this road connects with the steamer Lady of the Lake, which runs to Centre Harbor, whence stages connect with Conway. The other is by the way of Alton Bay, over the Dover and Winnipiseogee Railroad, whence the steamer Dover connects with the Concord and Montreal Railroad at Weirs, or runs up to Centre Harbor. Both of these routes, it will be seen, include a trip on the beautiful Lake Winnipiseogee, which no tourist should miss, in going or coming from the mountains. By either route baggage is checked through, and so perfect are the arrangements that the passenger need give himself no trouble about it until he reaches his destination. The excellent arrangements of Mr. Merritt, the Superintendent of the Boston and Maine road, for the comfort of passengers, in providing well ventilated cars, courteous conductors, faithful baggage masters, and in making sure connections, cannot fail to be appreciated by the traveling public.—*Boston Journal.*

North-West British America.

BY H. Y. HIND.

(Continued from p. 626.)

In Upper Canada with a population of 1,396,091, there are 13,354,907 acres held by proprietors, of which only 6,051,619 acres are under cultivation, cropped or in pasture.* If the whole quantity of land fit for cultivation were occupied in the same proportion, the population of Upper Canada would exceed eighteen millions. At the same ratio of inhabitants to cultivable and grazing land the basin of Lake Winnipeg would sustain a population exceeding 19,000,000, or, leaving out of consideration the land suitable to grazing purposes, its capabilities would be adapted to support 12,000,000 people. If European countries such as France and Great Britain were taken as the standard of comparison, or even many of the states of the American Union, the number would be vastly greater.

It must, however, always be borne in mind that the arid region of the great American desert, which places an uncultivable and unhabitable wilderness between the present north-westerly settlements in Nebraska and the Rocky Mountains, extends into British America only in the form of the apex of the cone-shaped figure it has on the map, with its base in the highest lands of Texas and Mexico. It is well defined in British America by the precipitous and wave-worn escarpment of the Grand Coteau de Missouri, and with the outlying patches between the two branches of the Saskatchewan it certainly does not exceed the estimated area of 108,000 square miles of surface. Much of the Prairie Plateau not included within the fertile belt contains splendid pasturage.

It is at the "Edge of Woods," within the limits of the fertile belt from the Touchwood Hills to the Rocky Mountains, that vast herds of buffalo come in winter, to feed and fatten on the rich

* The number of acres given in the census returns for 1861 as cropped by fall and spring wheat is 1,386,366, or differing from the population by 9,725, from which it appears that in 1861 there were about the same number of acres under wheat as there were people in Upper Canada.

natural grasses which the early frosts in autumn convert into nutritious hay. The perennial supply of food for cattle is a feature of immense importance in the North-West. Without that inexhaustible storehouse of provender it would have been impossible for the prairie Indians to have reached the numbers they attained before the whites thinned their ranks with the diseases they imported. It would have been impossible for the buffalo to have swarmed throughout the land if nature had not provided them with abundance of food at all seasons of the year. Nor could the prairie Indians maintain the large number of horses which form the chief part of their worldly treasure if fodder were not accessible in extraordinary abundance during the winter season. The Indians and the buffalo are fast passing away, and civilised man will soon occupy with his domesticated flocks and herds the rich pastures of the fertile belt, which would still be the hunting grounds of numerous nomadic tribes if the fur trade had not prepared the way for the spread of civilisation.

MINERAL RESOURCES—COAL.

A large part of the region drained by the north and south branches of the Saskatchewan is underlaid by a variety of coal or lignite. On the North Saskatchewan coal occurs below Edmonton in workable seams.

A section of the river bank in that neighborhood shows in a verticle space of sixty feet three seams of lignite, the first one foot thick, the second two feet, and the third six feet thick. Dr. Hector, who made the section, states that the six foot seam is pure and compact.* Fifteen miles below the Brazeaus River, a large tributary to the North Saskatchewan from the west, the lignite bearing strata again come into view, and from this point they were traced to the foot of the Rocky Mountains. On the Red Deer River the lignite formation was observed at various points. It forms beds of great thickness; one group of seams measured twenty feet, "of which twelve feet consisted of pure compact coal." (Dr. Hector.) These coal beds were traced for ten miles on Red Deer River. At one point they were on fire (1858), the beds exposed are a cliff of about 300 yards in length, being at many places in a dull glow, the constant sliding of the bank continuing to supply a fresh surface to the atmosphere. "For miles around the air is loaded with a heavy sulphureous and limy smell, and the Indians say that for as long as they can remember the fire at this place has never been extinguished, summer or winter." A great lignite formation of cretaceous age, containing valuable beds of coal, has a very extensive development on the upper waters of the North and South Saskatchewan, the Missouri, and far to the north in the Valley of the Mackenzie. Colonel Lefroy observed this lignite on Peace River and Dr. Hector recognized it on Smoking River, a tributary of Peace River, also on the Arthabaska, M'Leod River, and all to the north of the Saskatchewan, "thus proving the range of this formation over a slope rising from 500 to 2,300 feet above the sea, and yet preserving on the whole the same characters and showing no evidence of recent local disturbance beyond the gentle uplift which has effected this inclination."†

South and east of the cretaceous lignite or coal region lies the great tertiary lignite formation of Nebraska, which extends into British America, and large denuded areas, containing a vast abundance of lignite boulders, have been discovered on the Souris River in several localities. It is very probable that the Nebraska tertiary lignites extend *in situ* to a considerable distance north of the boundary line on the grand Coteau de Missouri, which is touched by the south branch of the Saskatchewan at the Elbow. In the lignite tertiary, beds of lignite six and seven feet thick have been found near the boundary line of Nebraska. It has also been discovered in beds a foot thick at the Wood Hills, about eighty miles south of the Quesnelle mission. The specimens which have been brought from that locality have the appearance of cannel coal and burn freely. The existence of such extensive deposits of fuel on both the branches of the Saskatchewan and their tributaries is of great importance. The ease with which supplies can be procured on the banks of navigable rivers gives additional importance to wide areas of fertile soil, which, from the absence of timber, would otherwise lose much of their value as a region fit for settlement.

IRON ORES.

A marked feature in the cretaceous rocks of the Winnipeg basin is the extraordinary abundance and wide distribution of clay iron stone. From the Souris River to the Rocky Mountains this ore is found in great abundance. It occurs on the escarpments of the Riding Mountain, west of the great lakes, and for many miles the bed of the Souris River is formed of its concretionary nodules. It has been observed associated with cretaceous coals near Edmonton and Rocky Mountain House, on the Upper Saskatchewan. On Red Deer River, Dr. Hector says that "a few miles above Shell Creek the lower part of the banks are to a great extent composed of a bed largely charged with iron stone nodules, which have very irregular shapes, unlikes the nodules in other parts of the strata. The profusion of these strewn on the slopes of the valley reminded me of the heaps of wasted iron stone scattered in the neighborhood of iron furnaces. A little way further on, where a creek joins the valley, thick beds of coal appear at the base of the section. The lowest bed is four to five feet thick, and very compact and pure." The association of coal and iron ore suggests, without comment, the importance of these mineral deposits. An analysis of the clay iron stones, taken without special selection from the Souris River by the writer in 1858, showed the ore to be of a remarkable purity. The specimen analysed contained not less than 82 per cent. of carbonate of iron, which would give about 40 per cent. of pure iron, the celebrated iron ore of the Glasgow coal field containing 41.25 per cent. of the pure metal.

SALT.

This important material is distributed throughout a large part of the valley of Red River, the basin of Lakes Manitobah, Winnepegosis, and thence northwesterly towards the Arctic Sea. The brine springs occur at the junction of the Silurian and Devonian rocks of the Winnipeg basin, and have already yielded salt of excellent quality in several localities. Many years ago (1823) salt was manufactured at Pembina, and more recently at the salt works, Manitobah Lake, by Red River natives and at Swan River by the Hudson's Bay Company. Springs rich in brine are known to exist in upwards of twenty different places along a stretch of country extending from the boundary line to the Saskatchewan. In the valley of La Riviere Sale, about twenty-six miles from Fort Garry, salt springs are numerous, and the ground in their vicinity is frequently covered with a thick incrustation. Springs issue from the sides of the hills in positions very favorable for solar evaporation in shallow basins, which might be excavated at a lower level than the spring and salt extracted without the employment of artificial heat. The cold of winter might also be employed to obtain concentrated brines, as in France and Russia. The strength of the brines in the basin of Lake Winnipeg is remarkable. The celebrated wells of Onondaga yield one bushel of salt from 30 to 50 gallons of brine; whereas in dry seasons 24 gallons of brine from the Winnepegosis springs will yield one bushel of salt.

BUILDING MATERIALS.

Lime stone admirably adapted for building purposes exists throughout the low regions west and south of the great lakes. The sand stones of the tertiary and cretaceous series which overspread the prairie and plain plateaus are too incoherent and friable to be used as building materials, but then bands of lime stone from six inches to two feet in thickness are not uncommon in those formations.

Clays suitable for bricks occur in many places —on the Assiniboine, the Saskatchewan, the Red Deer River, Battle River, and elsewhere. There is always a profusion of bouldgrs of unfossiliferous rock to be found in the valleys and beds of the different streams, and in some places they are inconveniently numerous.

* Proceedings of the Geological Society, 1861, page 421.

† *Ibid*, page 420.

The Irving House, New York.

The Irving House, situated on the corner of Broadway and Twelfth street, New York, is conducted on the European plan, by Mr. Hunt, formerly connected with the Brevoort House, in that city. Mr. H., who was always popular with the guests of the Brevoort, has made the Irving quite equal to the former establishment. The location of the Irving is most excellent, and the accommodations afforded to guests are liberal and not to be surpassed. The tables are supplied with all the delicacies of the season and they are placed upon the table in a manner suitable to be eaten with some degree of relish. The rooms are all well furnished and are kept in excellent order by attentive servants. The prices of this hotel are reasonable. A gentleman can obtain a good room for one dollar per day and regulate his other expenses at the table by the quantity he consumes in eating and drinking.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending June 26, 1863, was as follows:

Passengers	$20,299 98
Freight and live stock	22,155 44
Mails and sundries	1,938 50
Total	$44,393 92
Corresponding week of 1862	43,087 43
Increase	$1,306 49

The earnings of the St. Louis, Alton and Terre Haute Railroad for the 2d week in June, 1863, were $27,401 48
Same week, 1862 15,893 65

Increase $11,507 83

American Railroad Journal

Saturday, July 11, 1863.

Stock Exchange and Money Market.

The events of the past week have been of the most exciting character. In our last issue, we gave a faithful picture of the gloomy aspect of our public affairs, under the influence of the dangers attending the country from the invasion of Pennsylvania, and the damage done to the particular interests of which this JOURNAL is the advocate.

But all this is suddenly changed like the shifting of the scenes in a drama, and an entirely different view presents itself to the public gaze. Gen. Lee has retired from Pennsylvania with great loss; and on the memorable 4th of July, now more memorable than ever, the strongest fortress in the possession of the enemy, one which has completely commanded and checked the use of the Mississippi river, to the great detriment of the material interests of the Western States, has yielded after an obstinate defence, which in its fierceness reminds us of the various sieges and final fall of Saragossa. The money market at once responded to the news, by a fall of ten per cent in gold in two days; and it is believed a further decline will take place, as there is a considerable pressure to sell, and really no demand for export.

The defeat of Gen. Lee at once liberated the Pennsylvania Railways from further interruption, and though by a natural panic their shares were for a short time nearly unsaleable, they have not only resumed business, but the market in regard to them has recovered its usual tone. They have

all resumed business with scarce any injury to their lines, rolling stock or plant. The Baltimore and Ohio alone, is yet to resume operations, which in fact will be immediate, as it has already sent Engineers and workmen in force to reconstruct and set in motion every portion of the material which has been destroyed or removed in the recent raid of the enemy. And here we may notice the mechanical skill and aptitude shown by our American Engineers and workmen in the rapid repairs and reconstruction of our railways. Whenever the enemy is defeated on a railway line, or whenever he abandons it, the trains almost immediately resume their routes, and business returns with increased alacrity.

The general sentiment, at least for the hour, is, that our recent successes will lead to peace, since it will be next to impossible to raise any new armies in the South. The prisoners recently taken say their whole strength is in the field, and we think so; for if it had been possible to have saved Vicksburg by reinforcements or new levies it would unquestionably have been done. We hope this view of the subject is a correct one; and we shall be but too happy to record the restoration of the Union, which has been in such imminent danger from its own children. And while for the leaders in this conspiracy against the cause of freedom —those anarchs who would carry us back to monarchical institutions, feudalism and despotism, who lighted the torch of war against a country and institutions under which they have been so long favored and promoted—we have no sympathy, no feeling but indignation, and no sentiment but of horror at their audacity: for the poor misguided, unlettered, people whom they have forced into their ranks, we entertain the deepest commisseration; against them we entertain no unappeasable resentment; they have been betrayed if not ruined. But when safe back under our flag, and sheltered by its folds, they will find the North magnanimous and friendly as ever, ready with its capital to assist them in their business, our workshops ready to supply them anew with the implements of husbandry, and Engineers and iron rails to renew their railways. Let us have peace and fraternity once more, with the people of the South, whatever may be the fate of their unscrupulous leaders.

The public mind being of this cast, the inquiry arises, what will be the effect of a sudden close of the war on the financial and commercial interests of the country. Will railway stocks decline, will the public funds depreciate, will bank stocks go down 30 or 40 per cent., will real estate lose its value? Will there be great pecuniary losses to our merchants? While we confess our inability to solve all these questions, and they are continually raised, we do not hesitate to say that we apprehend no such general results.

We have seen no great appreciation in prices, notwithstanding the large increase in paper money, except in a few articles, which can produce any such reaction. The paper of the Treasury has been preferably taken by all dealers and men of business. In the ordinary transactions of life with a few exceptions affected by the tariff, or the scarcity of material, such as teas and sugar, and cotton, a paper dollar has brought a dollar's worth, and if specie payments were to be resumed by the banks to-morrow, the greenbacks so called would pass as readily as now. Under the national banking system the new national currency will have a preference over ordinary bank bills, because they will pass at par throughout the United States, and be received in payment for certain debts due the Government when ordinary bank notes may not.

Some eminent financiers predict that specie payments might be very soon resumed by the banks without injury to themselves or to the currency. For as long as the Government notes are a legal tender, the banks cannot throw them out or refuse to receive them from their debtors. Thus an equality between specie and paper would continue, as long as the Government currency had its present character by the operation of law. With regard to bank, railway and Government securities, we imagine they are all on such a solid foundation, that holders would feel no apprehension about them, particularly the latter which pays interest in gold, just as punctually as in time of peace. The flexibility and adaptability of the American character to surrounding circumstances are all in favor of this view. We expect to see the country more prosperous than ever. Already it is ascertained that the revenue from the customs will this year be over sixty millions of dollars, which will be six per cent. on one thousand millions of dollars. The amount of the income from internal and direct taxes will certainly be twice this amount, if not three times, so that the interest of the national debt will not only be paid, but there will be a margin for the reduction of the principal within a reasonable limit. No more wondrous spectacle than this we are presenting, has been witnessed in any age. A civil war, with armies half a million of men on each side, enormous expenditure in its prosecution, which on our side at least is to be fully reimbursed to the patriotic capitalists who have advanced it, the interest punctually paid, the debt itself capitalized and actually entering into and becoming a part of the means and resources of the industry of the country, and producing enormous profits in the very act of expenditure!

By the semi-official returns of the Treasury, it is ascertained that the whole national debt bearing interest, at the close of the month of June, was but about six hundred and ninety-two millions of dollars. The U. S. Notes and fractional currency amounted to about four hundred millions of dollars bearing no interest, and actually requiring no funds for their redemption, as they will be absorbed and returned in the payment of taxes, acting meantime as a most useful medium of trade, commerce and exchanges. Who would cast a doubt over the power, or credit, or stability of this Government after recognizing such facts as these?

We perceive from the Custom House reports that the revenue will this year be sixty-seven millions of dollars and upwards, so that our estimates of revenue are within bounds, and cannot be erroneous.

We learn also from the same official sources, that our exports exclusive of specie, continue large, exceeding for the past reported week, by a million those of the same period in 1861, and nearly half a million in 1862. The imports of foreign dry-goods at this port appear to have been, from July inclusive 1861 to June inclusive 1863, as follows:

1861	$83,310,345
1862	38,155,720
1863	61,963,038

This fact is in strong confirmation of the opinions entertained in England, which we have alluded to in the leading article in this week's JOURNAL, that our trade with Great Britain has been reciprocally large and valuable, and really seems to have been but little affected by the war; a fact which astonishes British statesmen, and has had no doubt some influence on their political conduct towards this country.

Conversions into Government securities continue without interruption. The management of the Treasury gives great satisfaction to the public, and is creditable to its chief. We take this opportunity of saying on the assurance of a particular and trusted friend of Mr. Chase, that the idea that he is seeking Presidential honors is an aspersion on his character; that he is not a candidate, and that he holds no man his friend who presents him to the public in that light. We are glad to hear this, and that so eminent a statesman and successful a financier keeps aloof from the demoralizing influences of a Presidential canvass, and when, to speak the truth, no one now thought of will have the least chance of success. Let us all think of our beloved country first; its honors will belong justly to those who deserve them.

We continue this week the description of "Northwest British America." This is particularly worthy of the attention of those who take an interest in the future prospects and resources of the country beyond the Lakes; at present not on the best terms with the mother country, and likely from appearances to modify its institutions into either a democratic or monarchical form. In either case this movement concerns us, and is a critical one for them.

The condition of the specie and bullion market at this port on the 1st of July is as follows:

In the Banks and Sub-Treasury 1st June.	$40,160,442
California receipts in June	809,176
From foreign ports	109,997
From hoards, brought out	2,929,211
Total	$44,008,829
Specie exported in June	1,367,784
	$42,641,045

The total amount exported for six months ending 1st June was $20,631,957. Notwithstanding this export, the amount in Banks and Sub-Treasury on the 1st of July was still $42,641,051—showing that the sum shipped was not practically taken from those institutions.

The total of exports exclusive of specie, for the six months ending 30th June was as follows:

In 1861	$67,792,105
In 1862	62,187,058
In 1863	91,752,576

The following half-yearly dividends on the Public Stocks of the United States, are payable, in gold coin, on 1st July:

On 6 per ct. loan of 1881	$68,417,000	$2,052,510
On 6 per ct. loans of 1867-'8	18,333,000	549,990
On 6 per ct. Oregon	1,030,000	30,900
Total 6 per cents.	$87,780,000	$2,633,400
On 5 per ct. loan of 1874	20,000,000	500,000
On 5 per ct. loan of 1871	7,022,000	175,550
On 5 per ct. loan of 1865	3,450,000	86,250
Total Jan. & July stock.	$118,252,009	$3,395,200

The Cleveland and Pittsburg Railroad Company

offer to pay in advance their River Line Certificates due September 15, 1863; also, the interest on their mortgage bonds, due September 1, and November 1, 1863, deducting the Government tax and interest at the rate of six per cent. per annum for the prepayment. Certificates and coupons may be presented for payment at the office of Wm. C. Gilman, No. 46 Pine st., New York.

The Norwich and Worcester Railroad Company pay, on the 15th July, a dividend of three per cent., free of tax, on the preferred stock, at the office of the Farmers' Loan and Trust Company.

The Tenth and Eleventh Street Railroad Company, Philadelphia, have declared a dividend of $1 75 per share. The par of shares is $20.

The Beaver Meadow Railroad Co. has declared a semi-annual dividend of five per cent. payable July 10th.

The Lehigh Luzerne Railroad Company has declared a dividend of four per cent., clear of taxes payable 14th July.

The coupons of the Allegheny City municipal bonds, due the 1st instant, are paid on presentation at the office of Work, McCouch & Co., Philad.

The Minnesota Mining Company have declared a semi-annual dividend of five dollars per share, (being ten per cent. on the capital stock), from the net earnings of 1862, payable free of Government tax, on the 15th inst.

The Little Schuylkill Railroad Company have declared a dividend of 3½ per cent., payable on the 10th inst., free of State and Government taxes.

The Chesnut and Walnut Street Passenger Railway Company, has declared a dividend of $2 per share payable on the 16th instant.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Lackawanna and Western bonds, 108½; Kansas State 7s, 95; Long Island R. R., 80; Illinois Central cancelled bonds scrip, 90; do., full stock, 99; Miss. and Mo., 25½; do., L. G. bonds, 60; Cumberland Coal pref., 21¼; Quicksilver, 39¼; Central American Transit Co., 38; Minnesota Mining Co., 100; American Coal Co., 57; Canton Co., 27¼; Ohio and Miss. Certificates, 31¼.

Boston.—Northern (Ogdensburg) 2d mort., 22½; Rutland and Burlington 2d mort., 13¾; Vermont Central 1st mort., 75¼; Cheshire, 43½; South Shore, 14¾; Worcester and Nashua, 78; Rhode Island 6s, 1883, 110; do., 1871, 105¼; Maine 6s, 1882, 111; New Hampshire 6s, 1873, 108½; St. Louis 6s, 1875, 89½; Cincinnati 6s, 1883, 99½; Bangor 6s, 1875, 104¼; Portland 6s, 1870, 104¾; Fall River 5s, 1878, 100¼; Acton Mining Co., 4⅜; Albany and Boston, 10⅞; Canada, 1½; Chaudere, 37½c.; Copper Falls, 10¼; Great Western, 3¾; Huron, 17; Manhattan, 4; Mesnard, 10⅞; North Cliff, 2⅜; Ottawa, 20c.; Petherick, 2⅝; Pontiac, 6; South Side, 2⅜; Star, 3; Wickam, 75c.; Quartz Hill, 18⅛; Winthrop, 3¼; Hancock, 9¼; Phœnix, 8¼; Toltec, 2¼.

Philadelphia.—Sch. Nav., 13½; do., pref., 25½; do., 6s, 1882, 85; Susq. Canal, 14; do., scrip, 45; Union Canal pref., 3¾; Wyoming Canal, 22; Delaware R. R. bonds, 102½; Camden and Amboy mort., 108; Morris Canal, 72; Lawrence Co., 6s, 25; Wilmington R. R., 70; 17th and 19th streets, 13.

Baltimore.—Central Ohio 2d mort., 101. The latest quotations are: Balt. and Ohio, 78@80; do., 6s, 1867, 95; do., 1875, 99@101; do., 1880, 102¾; do., 1885, 97@100; Northern Central, 38@45; do., bonds, 1885, 98½@100; N. W. Va., 5@10; do., 1st mort., 102; do., 2d mort., 95; do., 3d mort., 20@30; Central Ohio 2d mort., 102½; do., 4th mort., 40; do., income 1857-'60, 15; Western Md., bonds, 82@83; do., guar., 103; Maryland 6s, coupon, 1870, 114; do., Ins., 114½; do., 1890, 113½; Baltimore 6s, 1875, 105¼; do., 1890, new, 105¼; do., coupon, 108; do., 5s, 1838-'70, 95.

Cincinnati.—Cincinnati, Hamilton and Dayton, 125; do., 2d mort., 110; Covington and Lexington 2d mort., 100; Dayton and Michigan 2d mort., 100; Indianapolis and Cincinnati, 85; do., 2d mort., 100; Little Miami, 135; do., only mortgage, 105; Bellefontaine and Indiana R. R., 25; Ohio and Miss. Trustees' Certificates, 35; Marietta and Cincinnati 1st preferred stock, 47@50; do., 2d preferred, 25@26.

Krupp's Cast Steel Tires.

These celebrated tires which we observe are fast coming into general use on the principal roads in this country, appear on every test to give the most gratifying results. The evidence of their superior quality is abundant on European railroads, where they have been in service several years, and the testimony of master machinists leaves no doubt of the great economy subserved in their use. All the reports which have been sent in by American roads are of the same favorable character. The latest report is that of the Housatonic road, Andrew Winslow master machinist. We feel our own readers will thank us for placing it before them, as it shows clearly another step forward in the service of railroading. The preservation of the machinery is of the first consideration, since with it comes economy and safety. Krupp's steel tire may be regarded as one of the principal means to that end.

The data furnished us by Messrs. Thos. Prosser & Son of this city, sole agent for Fried Krupp in America, is as follows:

A set of Krupp's Cast Steel Tyre was shrunk on to the engine "Reindeer" June 25th 1861, the engine going on the road two days afterwards. This locomotive was in constant hard service from that date up to June 3rd 1863, when she was taken off the road for repairs, a template taken from her tyre shows the wear in all that time to be only about 3-16ths, and her run was 72,483 miles. This great distance was accomplished by the tyre *without turning*. The total weight of the engine is 45,050 lbs.

Such a record as this is conclusive and must soon bring the tires into universal service.

Port Huron and Lake Michigan Railroad.

The Detroit *Commercial Advertiser* says "that responsible parties have purchased the property and charter of this company, and are about to take steps to complete the road from Port Huron to Corunna. The road is graded in all some 30 miles, principally from Port Huron westward. The route of the road has been surveyed by a careful engineer, and pronounced a feasible one. Owing to the extreme high price of land at its contemplated eastern terminus, it is proposed to bring the road to the Lake at Fort Gratiot. This point, however, is not yet settled."

Dayton and Michigan Railroad.

The earnings of this road for the year ending March 31, 1863, were:

From passengers	$190,180 58
" freight	430,312 38
" mails and express	43,312 58
Total	$663,705 55
The operating expenses, exclusive of taxes, for the same time were	216,203 08
Leaving net earnings	$447,502 47

Showing that the expenses of operating and maintaining the road were 32.60 per cent. of the gross earnings. The net revenue of $447,502 47 should be reduced by the amount paid to the Cleveland and Toledo, Michigan Southern, and Columbus, Piqua and Indiana railroads, for rent of bridges, depot and track at Toledo and Piqua, and State and national taxes, $20,430 21—leaving actual net revenue, $427,072 26.

Camden and Atlantic Railroad.

The earnings and operating expenses of the Camden and Atlantic Railroad for the years ending December 31, 1862 and 1861, thus compare:

Receipts from	1862.	1861.
Passengers	$99,690 82	$62,593 01
Freight	41,042 05	33,518 73
Other sources	3,653 36	3,320 87
Total	$144,386 23	$99,432 61
Operating expenses	79,258 79	69,356 70
Net receipts	$65,127 44	$30,075 91
	Jan. 1, 1863.	Jan. 1, 1862.
Capital stock paid in	$1,000,553 56	$999,363 56
Funded debt	1,037,375 80	1,037,375 80
Floating debt	117,094 58	92,211 20
Cost of road & equip't	1,837,385 84	1,833,934 88
Interest paid in 1862.	53,725 95	*33,164 00

* In 1861.

Commerce of Philadelphia.

The arrivals at Philadelphia from January 1, to July 1, 1862 and 1863, have been as follows:

	1862.			1863.		
	Foreign.	Coast-wise.	Total.	Foreign.	Coast-wise.	Total.
January	25	465	499	41	1,269	1,313
February	38	989	1,027	37	1,044	1,081
March	48	2,242	2,290	61	1,911	1,972
April	70	3,477	3,547	53	2,977	3,030
May	72	3,758	3,830	72	3,558	3,630
June	67	2,802	2,869	66	3,492	3,558
	320	13,733	14,053	330	14,251	14,684

☞ We read in the newspapers that come to us from Western States, that the cotton crop bids fair to yield a large return to those who are engaged in its growth. From these accounts we have abundant authority for stating that at least six loyal States will this season produce a respectable harvest of cotton, in many instances enough to supply the home demand. In Missouri and Kansas the plantations are probably in the best growing condition, and will perhaps yield a finer staple than the States of Illinois and Indiana. The producers of cotton in Western Kentucky and Tennessee have been somewhat disturbed by the nearness of the battle-fields, but it is gratifying to know that farmers in that region are turning their attention to cotton-raising. In due time it is possible that King Cotton may have a throne to sit upon much nearer the loyal North than his worshippers have hitherto believed to be possible.

The Income Tax.

The assessment of this tax, now in progress, awakens attention and interest in the results of taxation in other nations. In England in 1856 the number of persons assessed on income tax was 256,891. The amount assessed was £4,683,744, or something over $23,000,000. It is a striking fact that of this number assessed 212,610 were charged for incomes of less than £300, or $1,500 per year. There were but 44,281 persons out of over a quarter of a million whose incomes exceeded $1,500 per year. Nearly one half the whole number had incomes between £100 and £150.

We find the following table in Sir S. M. Peto's new work on taxation, which will be interesting to many at this time, showing the classes assessed, the number of each class and amount of tax:

Classes.	Number of persons in each class.	Amount of tax.
Under £100 a year.....	29,916	£63,205
£100 and under £150.....	118,793	634,632
150 " 200.....	40,390	424,329
200 " 300.....	32,511	481,665
300 " 400.....	14,984	318,177
400 " 500.....	7,173	200,877
500 " 600.....	5,414	185,705
600 " 700.....	3,061	126,641
700 " 800.....	2,003	96,931
800 " 900.....	1,703	92,933
900 " 1,000.....	804	50,161
1,000 " 2,000.....	5,271	453,245
2,000 " 3,000.....	1,503	232,548
3,000 " 4,000.....	781	171,749
4,000 " 5,000.....	434	129,468
5,000 " 10,000.....	701	350,074
10,000 " 50,000.....	445	547,568
50,000 and upwards.....	40	23,954
	256,981	£4,683,744

From this table it appears that forty persons in England have an income of over $250,000 per year.

The amount of income on which duty was charged was £74,150,136, or about $370,000,000. The rate per cent. varies with the necessities of the Treasury. In 1853 this rate was 7d. per pound sterling on all over £150 per year. In 1854 this rate was increased to 1s. 2d., and in 1855 to 1s. 4d., on account of the expenses of the Crimean war. This is more than double the rate imposed by our Excise Law.

Statistics of Coal in Great Britain.

Mr. Hunt estimates that 83,635,214 tons of coal were raised in the United Kingdom last year. Of this amount Dunham and Northumberland, with 217 collieries, contributed 19,144,965 tons; Cumberland, with 28 collieries, 1,255,644 tons; Yorkshire, with 397 collieries, 9,874,600 tons; Derbyshire and Nottinghamshire, with 180 collieries, 5,116,319 tons; Leicestershire, with 11 collieries, 740,000 tons; Warwickshire, 16 collieries, 647,000 tons; Staffordshire and Worcestershire, with 580 collieries, 7,253,750 tons; Lancashire, with 373 collieries, 12,195,500 tons; Cheshire, with 39 collieries, 801,570 tons; Shropshire, with 66 collieries, 829,750 tons; Gloucestershire, Somersetshire, and Devonshire, with 112 collieries, 6,514,025 tons; Wales, with 398 collieries, 8,561,021 tons; Scotland, with 424 collieries, 11,081,000 tons; and Ireland, with 46 collieries, 123,070 tons. The coal production of the empire appears to have largely increased during the last eight years. Thus, in 1854, with 2,397 collieries worked 64,661,401 tons of coal were raised; in 1855, with 2,613 collieries, 64,453,079 tons; in 1856, with 2,829 collieries, 66,645,450 tons; in 1857, with 2,867 collieries, 65,394,707 tons; in 1858, with 2,958 collieries, 65,008,649 tons; in 1859, with 2,949 collieries, 71,979,765 tons; in 1860, with 3,009 collieries, 84,042,698 tons; and last year, with 3,052 collieries, 83,635,214 tons. Of this vast quantity, only 7,560,758 tons of coal 286,150 tons of coke, and 79,017 tons of patent fuel were exported, the remainder being absorbed at home. France was last year our best customer for coal, having taken 1,436,160 tons (this year the exports in the same direction have been somewhat reduced in consequence of the use of French coal for the Imperial navy); Denmark came next, with 542,567 tons; Hamburg, 514,427 tons; Prussia, 439,096 tons; Italy, 417,629 tons; Spain and the Canary Islands, 403,238 tons; America (Atlantic Ports), 349,931 tons; Russia (northern ports), 342,513 tons; the foreign West Indies, 262,932 tons; Holland, 262,868 tons; Sweden, 214,004 tons; British India (continental territories), 199,060 tons; Turkey, 174,686 tons; the British North American colonies, 165,824 tons; Brazil, 157,281 tons; Norway, 135,221 tons; the British West Indies, 127,768 tons; Malta, 115,731 tons; Portugal, the Azores, and Madeira, 108,794 tons; and Hanover 100,312 tons. Our other foreign customers took less than 100,000 tons each.—*London Times.*

New Postage Regulations.

In order that our readers who are not officially connected with the mail service may have a full understanding of the changes in postal matters effected by the new law, which went into operation on the first of the present month, we give below from *Holbrook's United States Mail*, a condensed summary of those of its provisions of which it is necessary for persons using the mails to "take due notice and govern themselves accordingly."

1. The rate of postage on all domestic mail letters to be carried any distance within the United States is now three cents per half ounce or fraction thereof, to be prepaid by stamps. The former rate of ten cents to California, Oregon and Washington Territory is abolished.

2. All local or drop letters must hereafter be prepaid by stamps, at the rate of two cents for every half ounce or fraction thereof, instead of one cent each, as heretofore.

3. The postage on transient newspapers and periodicals, sent in one package to one address, is now two cents for each four ounces or fraction thereof, to be prepaid by stamps; on books, double that rate. The postage on single transient newspapers not weighing over four ounces is now two cents.

4. The rate of postage on circulars is now as follows: Three or any less number may be sent, unsealed, to one address, at the single rate of two cents, and in that proportion for a greater number, adding one rate for every three circulars directed to one address. They can no longer be sent at the former rate of one cent each. No extra charge is now made for business cards stamped or printed on the envelopes of circulars.

5. The former carriers' fee of one cent on each letter delivered is abolished. Hereafter, carriers collect nothing, except such unpaid postage as may be due on the letters delivered by them.

6. The extra one cent stamp formerly required on all letters deposited in lamp-post boxes and branch stations is no longer necessary.

7. All communications to any officer or department of the Government (including the President), written by a private citizen, whether on "official business" or otherwise, must now be prepaid by stamps.

8. A fee of twenty cents (instead of five, as heretofore) must hereafter be paid on each registered letter in addition to the postage.

9. A letter cannot be forwarded without a charge of extra postage when it has once been mailed according to its original address.

Atlantic and Great Western Railroad.

About 3,000 men are now at work on the line of the A. and G. W. Railway between Akron, O., and Galion. The line is being pushed towards the Occident with all the energy and dispatch peculiar to the construction of this road.

Canadian Pacific Railway.

The subject of a railway from the Canadian border of the British possessions on the Pacific, is being revived. The Toronto *Globe* says the provincial parliament having desired to be informed what could be done in England towards the project, the imperial authorities have resolved to grant £12,500 a year, and also a very large tract of land, for the purpose of constructing a road across the continent. They request the Canadian Government to say in what shape the enterprise should be carried on, whether by joint stock company or by the direct action of the Government.

Railroad Lands Granted to Michigan.

The General Land Office has just transmitted to the Governor of Michigan three certified transcripts of approved lists in favor of that State, to aid in the construction of railroads, as authorized by act of Congress, approved June 3, 1856.

1. List embracing 26,428 77-100 acres, being "sections in place," falling within the 6 mile limits of the Bay de Noquet and Marquette Railroad.

2. List for 22,244 7-100 acres, as "indemnity," situated between the 6 and 15 mile limits of said roads.

3. List for 3,168 72-100 acres.

Total number of acres, 51,841 56-100.

German Railways.

In the kingdom of Wurtemburg all the railways have been constructed by the State. The net revenue which they produced in 1862 amounted to 6½ per cent., whilst the different loans contracted by the Government for the construction of those lines were obtained at an average interest of 4 per cent. The working of those railway now forms one of the principal resources of the budget of that state. Among the other German governments, Hanover, the Grand Duchy of Baden, and the Duchy of Brunswick, have also constructed all their lines, which have as yet produced a revenue of from 4 to 6 per cent. In Bavaria and Saxony the greater part of the railways belong to the State, but in Prussia the government has only constructed those of Westphalia, and that from Berlin to Koenigsberg and the Russian frontier.

Missouri Bonds.

A movement has lately been made in Missouri sixes, on the strength of the passage of the emancipation ordinance. They have risen from 66 to 71. As they carry 15 per cent overdue interest, the price cannot be considered very high. We presume that the State authorities will within a short period of time see the necessity of redeeming their State credit from its present condition of disgrace, and will effect some arrangement with capitalists by which the back interest shall be liquidated and future payments secured. As the whole State debt of Missouri is a first mortgage on railroads which ought to do a good business, we can see no difficulty in the way of such an arrangement, especially as the State, on becoming free, will naturally enjoy a higher credit than it did when it was a slave State. Some of the bonds will probably become good before the others. Negotiations are in progress, as we learn, by which the interest due on the bonds issued to the Pacific Railroad and the Southwest Branch will be paid this summer, and future coupons paid by the Railroad Company, just as those on the Hannibal and St. Joseph are now paid. Such an arrangement would prove a good investment for the railroad company.—*N. Y. Herald.*

Franklin Branch Railroad.

Regular trains are now running on the Franklin Branch Railroad, between Meadville and Franklin.

New York Central Railroad.

Workmen are busily engaged in laying down the balance of the double track on the Central Railroad, between Rochester and Syracuse. This track has been graded for some time, ready to receive the iron and ties. It is thought that an entire line of double track will be completed during the season between Albany and Rochester, and before the expiration of another year to Buffalo. The completion of this double track between Albany and Buffalo will largely increase the freighting facilities of the Central Railroad Company, and add to the value of their stock. The freighting business of the Central has assumed gigantic proportions within the past five years.—*Syracuse Journal.*

Reading and Columbia Railroad.

The work upon the unfinished portion of the Reading and Columbia Railroad is progressing rapidly, and it is expected that by the first of September next the cars will be able to run through from Columbia to Sinking Spring, where the new road connects with the Lebanon Valley Branch of the Philadelphia and Reading Railroad.

The Columbia Bridge.

The great bridge over the Susquehanna river, at Columbia, Penn., which was destroyed by fire on the 28th ult., was constructed in 1834, and cost $157,000. It was 5,020 feet long, 14 feet above high water, built all of wood, and about 40 feet wide; comprised 28 spans, resting upon stone abutments; was covered; roof above roadway 25 feet; had two tracks also, used for vehicles and foot passengers, and tow paths, the latter for the Susquehanna and Tidewater Canal. It was owned by the Columbia Bank. The credit of the Bank is not affected by the loss.

☞ It is reported that the Air Line Railroad (or Midland, as it is now called) between this city and New York, which has fallen into the hands of enterprising capitalists and is likely to be resuscitated, will be altered to a broad gauge. A connection with the Erie would then be possible, by which merchandise loaded in Boston could be landed at St. Louis without change of cars. We doubt not that such a connection could be made with the cordial co-operation of the Erie Railroad, the liberal management of which has already made it a favorite route for merchandise from Boston to the West.—*Boston Journal.*

☞ A meeting of the Executive Committee of the late Chicago Canal Convention was held on the 2d inst., at the St. Nicholas Hotel. There was but a small attendance, and no business of importance was transacted. The following permanent officers were elected:—Hon. J. N. Arnold, of Chicago, President; A. A. Low, New York, Vice President; Colonel Foster, Illinois, Secretary.

☞ Judge Wylie, sitting in the District Court at Washington, as a Court of Admiralty, is at a loss to know what to do with a large amount of so-called Confederate money, included in property brought before him for condemnation. He says that to condemn it would be to recognize it as property; to sell it would be to give it circulation; and to destroy it would be to give aid and comfort to the enemy by relieving him of his liabilities.

☞ The Commissioner of Internal Revenue has instructed the assessors and collectors to enforce the stamp duty on free goods imported from Canada under the reciprocity treaty of June 5th, 1854. The merchants claim that no tax, whether collected by means of a stamp or in any other way, can be levied on goods declared free on the faith of the nation expressed in a treaty.

Philadelphia and Trenton Railroad.

The necessary arrangements have been made to lay a double track on the Philadelphia and Trenton Railroad from Frankford to Trenton. At Frankford the Branch road, to avoid going through the city of Philadelphia—which has been forced upon the Company by the action of certain citizens and the Councils, thus driving all the through travel from the city—strikes off in the direction of the Schuylkill, and after crossing the river, it will connect with the Reading, Pennsylvania Central, and the Baltimore railroads. About three hundred hands are now employed between Bristol and the Neshaminy widening the bank. The Company want at least two hundred more hands. Very soon they will have a double track from Philadelphia to New York, a large portion of it already being laid beyond Trenton.—*Doylestown Democrat.*

Prince's Metallic Paint.

This article is highly spoken of as a durable and fire-proof paint for iron, tin or wood. It is extensively used by the Boston and Worcester and Grand Trunk Railroads, and many others, who commend it highly. C. Gay, 29 Doane street, is the N. E. Agent.—*Boston Commercial Bulletin.*

North Pennsylvania Railroad.

The earnings of the North Pennsylvania Railroad for the first six months of the fiscal year, to May 31, were:—

1863	$226,123 99
1862	189,770 31
Increase	$36,353 68

☞ The Pennsylvania Railroad has resumed business. All passenger and freight trains are running as usual. The road was not injured at any point by the Rebels.

☞ The Hartford and West Hartford Horse Railroad Company has been incorporated by the Legislature, with a capital of $30,000 and power to increase to $100,000.

☞ The bill incorporating the Succook Valley Railroad and providing for the extension of the Dover and Winnipiseogee Railroad to Portsmouth, has passed both branches of the Legislature of New Hampshire.

No. 121 NASSAU ST.,
NEW YORK.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, July 1, 1863.

THE Board of Directors of the ILLINOIS CENTRAL RAILROAD COMPANY have THIS DAY declared a DIVIDEND of TWO (2) PER CENT. free from Government tax, upon all the shares and canceled Bonds. Scrip standing in the name of holders on the books of the Company at the close of business on the 20th day of July instant, payable on and after the 1st day of August upon all shares the calls upon which shall have been duly paid; and that the dividend upon the full paid stock shall be a discharge of the interest payable thereon on the 1st day of January next, and payable upon surrender of the coupons issued therefor. The transfer books of the Company will be closed from the afternoon of the 20th to the morning of the 30th July.

4127 THOMAS E. WALKER, Treasurer.

NOTICE to RAILROAD CONTRACTORS.

MILWAUKEE & ST. PAUL RAILWAY COMPANY,
GENERAL OFFICE, Milwaukee, June 25, 1863.

SEALED proposals will be received by the undersigned, at the office of the Milwaukee and St. Paul Railway Company, in Milwaukee, until Saturday the 18th day of July, 1863, for the grading, masonry, bridging, cattle guards, and fencing of 28 miles of the line of road extending from Columbus to the City of Portage.

The line will be divided into sections of convenient lengths, and proposals will be received for single sections, or for the whole line.

The line will be ready for the examination of contractors on and after July 6, and maps, profiles and plans, with specifications, may be examined at the Engineer's Office, in Milwaukee, on and after that date.

Parties proposing, who are unknown to the undersigned, will be required to give satisfactory references.

The work to be offered to contractors will include about 600,000 cubic yards of excavation in a desirable location of the country for doing work. PAYMENTS IN CASH.

The Company reserve the right to reject any or all proposals as may be deemed for their interest.

D. M. HUGHES, President,
Wm. B. GILBERT, Chief Engineer.

NOTICE to RAILROAD CONTRACTORS.

PROPOSALS WANTED.—FLINT to FENTONVILLE (or HOLLY).—Proposals will be received at my office in Flint, Michigan, till TUESDAY, the 14th day of July next, for grading, furnishing ties, building fences, culverts, bridges and cattle guards, and for laying tracks on either of two routes already surveyed from Flint to the Detroit and Milwaukee Railroad, being about seventeen miles in length. Bids to specify:

Price of earth-work, per cubic yard.
Price of cross-ties, per piece.
Price of track-laying, per mile.
Price of clearing and grubbing, per mile.
Price of fencing, per rod, as per specifications.

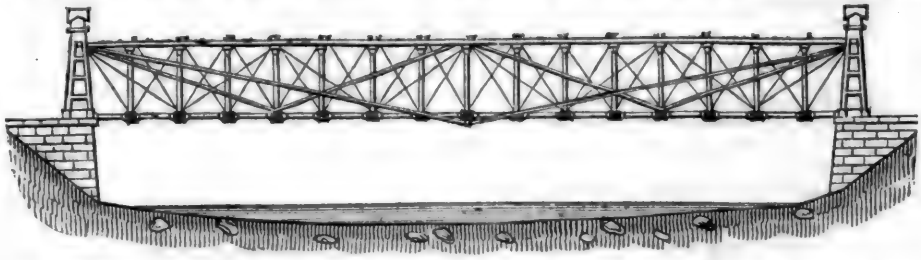
The line of route and profiles and specifications may be seen at my office.

The company reserve the right to vary the line on final location, as may seem necessary; and also to accept or reject any or all bids made, as the interests of the Company may dictate. They also reserve the right to let the works as a whole or in parcels. Payments, Cash.

HENRY H. CRAPO,
Pres't F. & F. R. R. Co.

Flint, Michigan, June 19, 1863.

NOTICE TO



RAILROAD CONTRACTORS.

THE CATASAUQUA AND FOGELSVILLE Railroad Company will receive, until the 15th day of July next, proposals for the grading and masonry, also for the trestling and railroad ties, for the extension of their road from Tretlestown to Rittenhouse Gap, a distance of eight miles.

Specifications, plans and profile of the work can be seen at the office of the Company, at Catasauqua, Lehigh County, Penn., on and after July 10. Any further information obtained on application to

DAVID THOMAS, President,
Or P. BRADY, Engineer,
2127 Catasauqua, Penn.

FINK'S PATENT IRON RAILROAD BRIDGE.

THE undersigned is prepared to manufacture and build in any part of the United States and Canada, at reasonable terms, **FINK'S PATENT IRON BRIDGE** in spans from 20 to 300 feet. The same is favorably known, well tested and already extensively introduced, is stronger and more economical than any other Bridge now in use, requires no repairs, and no adjustment, but is perfectly adjustable. For plans and particulars apply to

SMITH'S
Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of SMITH'S AIR LIGHT FOR RAILROADS, and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.

In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.

You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

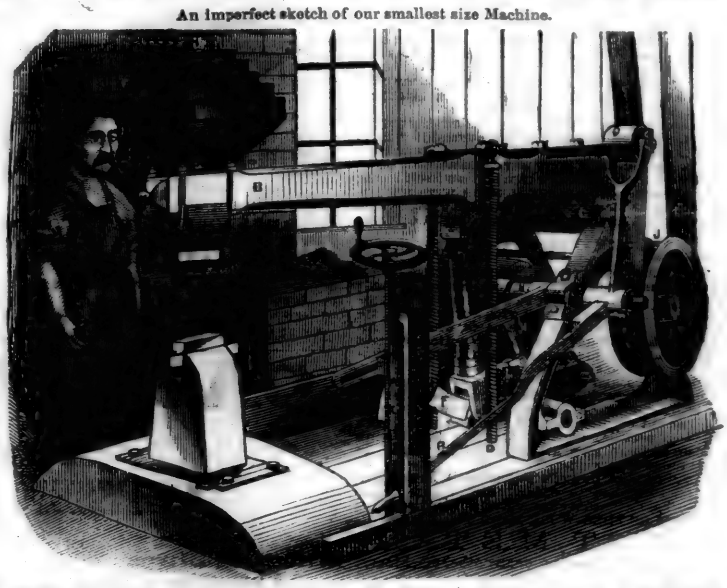
NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,

I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.



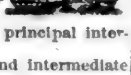
300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, **21 Nassau st.**, or by addressing

CHAS. W. WELSH,
Secretary.

AMES IRON WORKS,
OSWEGO, N. Y.,
SOLE AND EXCLUSIVE OWNERS AND MANUFACTURERS, UNDER PAYE'S PATENT.

An imperfect sketch of our smallest size Machine.



PAYE'S PATENT FORGE HAMMER, A HAMMER ADAPTED TO BOTH HEAVY AND LIGHT FORGINGS, with an adjustable stroke of from one inch to three feet. This hammer is adapted to both heavy and light forgings; the force of the blow being entirely at the will of the operator, and for all forgings under six inches, either round or square, is the best hammer now in use, and requires but one-half the power used by every other hammer to do the same work. For an engraving and description of this hammer, see page 1, Vol. V (new series) of the SCIENTIFIC AMERICAN; some valuable improvements have, however, been since made. All communications should be addressed to H. M. Ames, Box 422, New York, or Ames Iron Works, Oswego, N. Y.

These hammers may be seen in operation at the Allaire, Neptune, Secor, Delamater, Fletcher & Harrison, Duncan & Crampton, Anderson & McLaren, Duhurst & Emerson, Charles T. Porter, all in New York City; Joseph Colwell, Jersey City; Wm. White, Newark, N. J.; Providence (R. I.) Tool Co.; Whiting & Wilcox, Kaigh's Point, Phila.; Mallory & Cottrell, Mystic, Conn.; J. Dillion, Rondout; James Horner & Co., Sing Sing; Henry Esler & Co., Brooklyn; James B. Eads, St. Louis, Mo.; Central Railroad Shop, Albany; Burlington, Quincy & Chicago Railroad Shop, Ames Iron Works, Oswego; M. Guinness, Albany; Sweet Brothers, Syracuse.

ERIE RAILWAY.

SPERM, WHALE, LARD AND OTHER OILS,
For Railroads, Steamers, Machinery and Burning.

FOX LATHES.

F. W. BACON & CO.,

No. 84 JOHN STREET,

NEW YORK,

RESPECTFULLY ask attention to their stock of Machinists' and Brassfinishers' tools from the establishment of Messrs. Geo. H. Fox & Co., of Boston.

Nason's Patent Screw Chasing Lathe manufactured solely by the above firm is without a rival or substitute for the manufacture of Cocks, Valves, Hose Couplings, Steam and Gas Fittings, and general Brass Finishing.

They have and are constantly receiving from the same celebrated manufacturers, Chucks, and Slide Rests, Shafting, Pullies, Hangers, etc.

The Hangers manufactured by them are of the most approved kind. The bearing being suspended by a universal joint; its advantages over the rigid Hanger will be at once seen and appreciated by any mechanic. It is every way calculated for economy, being fitted with a patent box, which adjusts itself to the shaft, and they guarantee it to run SIX MONTHS WITHOUT REOILING, thereby saving labor, friction, oil, and the disagreeable and sometimes destructive effects of the dripping of oil from above.

ELEVATORS

For warehouses, manufactories, hotels, mechanics' shops, stores, or any other use where power Elevators are required; they guarantee all the safety that can be combined in any machine that is made. They are arranged with an improved apparatus, to hold the load in case the rope parts, which is unerring; also an invention of their own, to automatically arrest the descent of the load, if by any cause it should move downwards beyond the prescribed speed.

They also manufacture and are the exclusive licensees of Otis Tuft's Patent Elevator. The distinctive features are: the winding drum is driven by an endless screw—two or more ropes are used instead of one, thereby insuring more than double the safety—a peculiar mode of shipping the driving Belts, which insures it to stop at the required point. It operates without noise or jarring.

Belting, Belt Lacing, and Pickett's Patent Belt Fastenings kept on hand and furnished to order. Steam and Water Gauges, Gauge Cocks, Packard's Patent Ratchet Drills.

ALL DESCRIPTIONS OF MILL WORK MADE TO ORDER.

BABBITT METAL.

Parties wanting Shafting, Elevators, or any other machinery, will be waited on by an experienced Engineer, their premises surveyed, plans and estimates made, machinery located, and the erection superintended when desired.

Having made this branch of Engineering a SPECIALITY the past ten years, with uniform success, they confidently offer their services to those requiring such aid.

DELAFIELD & BAXTER'S,

Late OGDEN & DELAFIELD,

ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

PACIFIC RAILWAY.

THE undersigned will receive proposals to furnish four thousand (4,000) tons of railway iron (or any part thereof) for the track of the first section of the Union Pacific Railway, Eastern Division. The iron to be of American manufacture, of the best quality, and to be delivered either at Leavenworth or Kansas City. Communications for further information to be addressed to the undersigned or to SAMUEL HALLETT & Co., 58 Beaver st., New York. Terms, cash on delivery.

J. C. FREMONT,
Pres't Union Pacific Railway, E. D.

NEW YORK, June 9, 1863.

SAFES.

FIRE AND BURGLAR-PROOF SAFES.

M. MOSSMAN,
24 West Broadway.

SUBSTITUTE FOR

CAR DUCK.

Kingman's Car Covering.

THIS is a kind of Elastic Mastic, a thick coating of which is applied to the top of the Car, and into it a heavy Burlap or Bagging is imbedded and thoroughly painted, thus making a covering VERY MUCH LIKE **CAR DUCK**, but at this time at half the cost. It is now successfully used by several New England Roads and Car builders. Directions and particulars sent when requested. This Mastic and Burlaps for sale by

WILLIAMS & PAGE,
67 Water street,
Boston.

March, 1863.

Semi-Steel Locomotive Tires, Fire-box & Tube Sheets,

AND BOILER PLATES.

TIRES—ROLLED, BLOCKED AND WELDED TO FIT ANY GIVEN DIAMETER OF CENTRE
PLATES—ROLLED AND CUT TO ANY PATTERN AND SIZE ORDERED.
ROLLED AND HAMMERED BARS, AXLES AND FORGINGS OF SAME METAL.

American Railroad Journal.

New York, Saturday, July 18, 1863.

The New French Railway in South America.

The occupation of Mexico by France, under the pretence of a friendly intervention in behalf of law and order, is a step, the consequences of which are likely to be of great importance to the United States. When Mr. Monroe laid down the memorable American doctrine that we could suffer no foreign powers to intrude upon this continent, he had no presentiment that such a danger was near at hand; but the rebellion has furnished the aristocracy and thrones of Europe an opportunity they have long coveted of damaging this republic, and if possible of bringing its name, its power, and its unity to a close. That they desire to inter-meddle is no longer doubtful.

Among those foreign powers so disinterestedly anxious to stop the effusion of blood in this country, France, as now represented by the Emperor, has been most conspicuous. The man who himself rose to power by shedding the blood of Paris in torrents, who climbed over barricades of corpses to a throne, who has cared neither for Russian, nor Austrian, nor Chinese blood when he had a purpose to serve of his own, has now taken the initiative on this continent, and it is an appropriate subject for comment by this JOURNAL, when a policy is proposed by him which is to affect all our American interests of a national character, threatening the existence of a great American Railway Company across the Isthmus and our present communications with the Pacific and California. By the latest arrivals from Europe, where the news of the French successes in Mexico were producing the utmost attention, we learn that the Emperor has announced the following as a leading feature in his projects, viz., to construct a railway between the Atlantic and Pacific Oceans through the territory of Mexico exclusively, and afterwards to take possession of the Isthmus of Panama, and destroy the present railway of the American Company, so as to prevent all competition with his own. This proposition is communicated to a London journal as authentic by its well informed Paris correspondent, and is naturally exciting great attention. Nor is it so improbable after all. If we consider the antecedents, and the present of Louis Napoleon, we find them in no way inconsistent with such a future as he is charged with proposing for himself on this continent.

The subject of inter-oceanic communication by canals and railways has long been a favorite study with him.

He has written favorably on it, he has patronized all those adventurers who have entertained similar opinions, and with a singular pertinacity of character which has been one element of his success, he has gained thus far every advantage in life or power which were his dreams in exile or in prison; of course he will never stop until he is compelled to do so.

The possession of Mexico offers to his grasp one of his earliest idols, a French route between the Atlantic and Pacific, the possession of the gold and silver mines in Sonora, and an influence on the Western continent equivalent to that which he possesses on the Eastern. This will make him, he hopes, more illustrious than Charlemagne, and win him a renown greater than that of the first Napoleon.

Nor is the Mexican railway, the only scheme of which he is the friend if not projector. A French Company has recently obtained the grant of a right to make a ship canal, by the route of Lake Nicaraugua, a project which has been discussed for more than forty years, and even then pronounced perfectly practicable. By improving the river San Juan, and the small river which connects Lake Nicaraugua with the small lake Leon, and cutting a short canal thence to the Pacific, the problem will be solved, of a ship navigation between the two Oceans. It is somewhat singular that this plan was strongly urged on the British Government, by the celebrated Bryan Edwards, the Historian of the West Indies, more than sixty years ago, who then urged it to seize the Isthmus of Costa Rica by conquest in war, or obtain it by negotiation for the purpose of executing and controlling this work of a ship canal. In this, as in the Isthmus of Suez, French policy and enterprise have finally supplanted British interests, and by these routes therefore East and West, under French auspices, the Emperor really expects to control the commerce of the world, and to be the greatest Monarch of his times.

It is not generally known that his influence on this continent has been extending itself for years past. The state of Equador has been under French protection as it is called since 1859. President Morena proposed it himself, as the only security for his country, against to use his own words, the "devastating torrents of Anglo-Americanism." Mexico, Equador, Sonora, a railway and a canal between the Oceans, exclusively French, and to be made of exclusive advantage to those interests by the destruction of the Panama Railway, may therefore be considered a part of the policy, which is to establish a great foreign power on this continent. Even more than this which concerns ourselves. The destruction of the Panama Railroad involves, as a matter of course, the overthrow of the republic of Colombia, and a war with the United States which guaranteed to New Granada, now Colombia, the security of that route. It also involves the loss of our trade and commerce with California by that route, and the endangering of our possessions on the Pacific, by the French power which is to have its head and front at Guaymas.

We believe most honestly this is what Louis Napoleon proposes to execute. Our civil war gives him just the opportunity he desires. The Monroe doctrine at present is dead; the Confederates on the promise of recognition and support from the Emperor will become his allies in every scheme which can humble and break down this country. The truth is the democratic principle of Liberty and equality is really at this moment in the greatest danger. If the Union is destroyed, the principle and foundation of this government

are destroyed. A despotism will rise up of a military character, which if it subjugates the North will permit of but two classes, master and slave, and in this last term we mean to imply white men, not negroes merely. The many are to be sacrificed to the few. Families of wealth are to be masters of toiling millions, and the poor are here to be a doomed race as they have been and still are in Europe. This is what we are to expect if we do not re-establish the United States in all their former strength, and this can now only be done by a successful close of the war. The men who do not see this truth, are committing political suicide and will live to become hewers of wood and drawers of water for an aristocratic class, such as is now the sole idea of southern politicians. The policy of occupation, intervention, railways and ship canals is that which now fills the mind of a monarch who has been called in his own country both an usurper and a despot. We certainly have great cause to distrust his movements on this continent, though they are ostensibly for the benefit of the world. If therefore we would protect and preserve our material interests in and on the Pacific and the Isthmus, and above all our former right to enjoy life, liberty and the pursuit of happiness, we must lay aside every feeling of party, of politics, and selfishness, to secure the one great and final success—the preservation of the Union. If we do this, the world will be safe for another century; otherwise we must prepare for a return of the dark ages, and the subjugation of humanity and freedom by a fresh race of tyrants ruling and destroying in the name of GOD.

Cleveland and Toledo Railroad.

The earnings and expenses of this road for the fiscal years ending April 30, 1862 and 1863, have been as follows:

Earnings:	1862.	1863.
From passengers	$427,285 25	$564,536 82
" freight and mail.	576,352 07	797,000 44
	$1,003,637 32	$1,361,537 26
Expenses, viz:		
Repairs of road	$107,588 83	$128,044 60
" bridges	9,014 06	2,159 32
" buildings	15,434 41	12,574 81
" locomotives.	29,241 11	44,197 85
" cars	45,964 25	59,644 52
" machinery	2,704 54	2,865 66
Fuel	37,823 89	43,456 16
Oil and waste	7,263 28	9,269 78
Train hands	51,953 92	56,579 24
Watchmen	8,280 21	7,199 97
Agents, clerks, and expenses at stations	68,769 36	76,228 57
Taxes	16,126 54	33,010 37
Gen'l Superintendence.	30,265 02	36,398 73
Loss and damage.	3,793 48	7,624 82
U. S. mail	652 00	671 00
Contingencies	25,278 32	24,557 09
	$460,149 22	$544,482 49
Earnings less exp.	$543,488 10	$817,054 77
Interest, profit and loss, etc.	360,490 77	372,203 11
Net income	$182,997 33	$444,851 66

The net earnings of 1862-'63 have been applied as follows:

Dividend, 4 per cent. April 22	$133,752 00
Floating debt, entirely paid off	148,660 37
Contribution to sinking fund	35,000 00
Balance, being in cash on hand	127,439 29
	$444,851 66

—equal to nearly four per cent. on the capital stock of the company, applicable to future dividends, or to the improvement of the company's property.

The earnings for the year ending April 30, 1862, show an increase over those of 1860-'61 of $83,-666 24; with an increase in expenses of $34,133 82—making the increase in net earnings $49,532 42.

The earnings for the year ending April 30, 1863, show an increase over those of 1861-'62 of $357,-889 94; with an increase in expenses of only $84,333 27—making the increase in net earnings, $273,566 67.

The income account shows a balance of $522,-417 37 as the undivided net earnings since the closing of construction account to May 1, 1863.

The following is a comparative statement of the bonded indebtedness of the company as given in their reports for the last and preceding years:

	1862.	1863.
Junction income bonds.....due June 1, 1862	$22,500	$.....
" Lloyds " .....due Oct. 1, 1862	5,000	.....
" 2d mort. " .....due Nov. 1, 1862	221,000	.....
T., N. & C. 1st mort. bonds..due Aug. 1, 1863	521,000	439,000
Do. 2d mortgage bonds.....due Aug. 1, 1863	298,200	176,500
C. & T., income bonds of 1853.due Sept. 1, 1863	104,400	66,150
Do. income bonds of July '54.due July 1, 1864	174,000	119,000
Do. do. Sept. 1854 .....due July 1, 1864	256,000	169,000
Do. dividend bonds.....due Apr. 1, 1865	147,885	126,410
Do. certificates.....due Apr. 1, 1865	3,610	2,805
Junction 1st m. 1st div. b'ds..due Apr. 1, 1867	299,000	284,000
C. & T., income bonds of 1857.due Sept. 1, 1870	39,000	25,000
Junction 1st m. 2d div. b'ds..due Dec. 1, 1872	219,000	164,000
C. & T. sink fund bonds.....due July 1, 1885	1,545,000	2,677,000
Total Bonded Debt June 1, 1863	$3,850,595	$4,248,865
Less amount of Redemption Fund, derived from sales of S. F. bonds, to pay bonds due in 1863	581,270	
	$3,667,595	

—a reduction of $183,000, by conversions into capital stock of $20,000 Junction 1st mort. 2d division bonds; $15,000 T., N. & C. mort. bonds; $1,000 C. & T. income bonds of Sept., 1854; and $147,000 C. & T. sinking fund bonds.

The sales of sinking fund bonds amounted to $894,000; with the proceeds of which there have been paid: Junction income bonds, $12,000; Junction 2d mort. bonds, $184,000; Junction, Lloyd's bonds, $5,000; T., N. & C. 1st mort. bonds, $42,000; do., 2d mort. bonds, $52,900; C. & T. income bonds of 1853, $15,750; and dividend bonds and certificates, $1,080—making a total of $312,730, and leaving applicable to redemptions, as above, $581,270.

Of the assets, the stocks and bonds of other companies owned by this company now amount to $55,025—a reduction by sales during the year of $40,653 94.

The bonds issued in exchange for other bonds, and cancelled, from June 1, 1862, to October 1, 1862—at which date the privilege of exchanging was terminated—amounted to $385,000. The bonds so returned and cancelled were: Junction 2d mort., $37,000; T., N. & C., 1st mort., $40,000; do., 2d mort., $48,800; C. & T. income of 1853, $22,500; do., of July, 1854, $55,000; do., of Sept., 1854, $86,000; do., of Sept., 1857, $14,000; do., dividend, $20,825; do., dividend certificates, $375; Junction 1st mort., 1st div., $15,000; do., do., 2d div., $35,000; do., income $10,500—total $385,000. The sinking fund bond account now stands as follows:

Bonds outstanding, June 1, 1862	$1,545,000
Bonds sold, October, 1862	894,000
Bonds issued in exchange for other b'ds	385,000
	$2,824,000
Bonds converted into stock	147,000
Sinking fund bonds now outstanding	$2,677,000

It will be observed that while the bonded indebtedness of the company has been reduced $183,000 by the conversion of 183 bonds into stock, the capital stock of the company has been correspondingly increased.

Of the bonded debt, there falls due in August and September next, the sum of $681,650; and the company have on hand, arising from the sale of bonds, $581,270—leaving a balance to be provided for of $100,380. This amount could be paid from the current earnings of the road, without reducing its dividends, and thus retire so much of the bonded debt of the company. The report says:

The long pending suits against your company, to compel it to run the Northern Division west of Sandusky, have been decided, at the last term of the Supreme Court, in favor of the company—which not only releases the company from running so much unproductive road, but also from maintaining a very expensive line across the waters and marshes of Sandusky Bay, and enables the company to remove some thirty miles of iron rails. These rails are somewhat worn, but are still valuable for use in any new branch road which it may be contemplated by the company to construct.

The authority given to the Directors, at the last annual meeting of the stockholders, in reference to connecting the two divisions of the company's road between Oberlin and Elyria, has not yet been exercised any further than to make overtures to the citizens of Elyria to furnish the company with the right of way—which, to a certain extent, they have acquiesced in, and but for the other necessary work on the main line of the company's road, and the difficulty in procuring men, the work would now be in progress. We are in hopes to be able to make some progress with the work this season, or at least to prepare the road bed.

The question now arises, since the termination of the suits against the company as to the Northern Division, what is to be the future policy of the company in reference to this line of the company's road. Overtures have been made to the company, by the citizens of Sandusky, to furnish the right of way between Sandusky and Fremont to the company free of expense, conditional that the company will connect their lines of road between these points, a distance of about twenty-five miles. This connection, to some extent, would give the company two lines a distance of about sixty miles—uniting at Elyria on the East, and at Fremont on the West—and would be some advantage to the company in running its freight trains during the winter months; and by constructing this line it would, unquestionably, bring considerable freight from the Fremont & Indiana road to Sandusky, for shipment, and add, in some extent, to the business of the road—though the expense of maintaining and running it would increase the expenses of the company. Should the stockholders deem it expedient to make a connection by constructing this twenty-five miles of road, it will be advisable for them to give the Directors discretionary authority.

The road is now in good condition, having been very much improved since the Spring rains ceased; and the engines and cars are in their usual good order. It is necessary, with the large increasing business of the company, to add to the equipment of engines and freight cars, to meet the wants of the company for the coming winter. Under a resolution of the Directors, we have now under contract three freight locomotives, to be delivered the first of December next, and two more building at the shops of the company, and in considerable state of forwardness; and it is contemplated to convert one of the passenger engines of the company into a freight locomotive, which, when completed, will be equal to any new engines which can be purchased, and which will add six new freight locomotives to the power of the company. It is also necessary to add to the freight cars of the company as many new cars as can be conveniently built at the company's shops during the season—and which will be about one hundred—and if we can add more, by purchase or contract, it will be, unquestionably, for the interest of the company to do so.

We submit for your approval a contract entered into with the Atlantic & Great Western Railroad Company, to bring their road to the city of Cleveland, as a terminus for its Northwestern business, either over the road of the Cleveland & Mahoning Company, or as an independent line. This contract contemplates an arrangement for an interchange of business between the two companies, both of freight and passengers, on just and equitable terms. It binds the Atlantic & Great Western Company not to extend its line to the city of Toledo, and is to continue for a term of ten years. This arrangement, if carried out, will add largely to the traffic of your road, and will, in fact, be extending the broad gauge in an unbroken line from New York to the City of Cleveland, and in close connection with your road. This is a connection which has been needed for several years, to relieve your company of its accumulation of freight at Toledo during the winter months, and we trust that the stockholders of this company will give it their unanimous approval.

We also submit for your approval, or disapproval, an agreement or contract, bearing date of the 8th day of May, between this company the Cleveland, Columbus & Cincinnati R. R. Co., the Cleveland, Painesville & Ashtabula R. R. Co., and the Buffalo & Erie Company, for a consolidation of the earnings of the four roads, which agreement, if entered into, is to run for the term of twenty-five years, and gives the different companies the following per cent. of the gross earnings after deducting 50 per cent. for running expenses, viz:

	Per ct.
Cleveland, Columbus & Cincinnati R. R. Co.	28.00
Cleveland, Painesville & Ashtabula R. R. Co.	26.93
Buffalo & Erie R. R. Co.	23.57
Cleveland & Toledo R. R. Co.	21.50

This per centage is based on the earnings of the companies for the past seven years, which gives about the foregoing results, and if the relative positions of the roads is to continue, is a just and fair basis. The advantages to be derived from this arrangement are a stronger alliance of the roads for their mutual protection against rival lines, and greater harmony in their working for the benefit of each other, all being interested in each other's earnings. Whether your road has got a sufficient per cent., considering its rapidly increasing traffic, and the length of each, the present and probable future of the four lines, and with the prospective large traffic which will be added by the arrangement with the Atlantic & Great Western road, is submitted for your consideration.

The equipment of the road consists of 32 locomotives; 32 coaches; 8 second class passenger, 12 baggage, 4 mail, 313 box and stock, 46 rack stock, 120 platform and 3 boarding cars.

The number of miles run have been as follows:

	1861-'2.	1862-'3.
Locomotives	610,292	663,371
Passenger cars	1,034,044	1,139,259
Freight cars	5,520,775	6,145,262

The total number of tons of freight carried was 383,803, against 311,252 in 1861-'2—being an increase of 72,561. The price per ton per mile was 2.24 cents; and the amount received for each ton $2 07.65. The live stock traffic formed a very large part of the freight business. During the year there were transported over the road 6,249 cars of cattle, 329 cars of horses and mules, 5,214 cars of hogs, and 147 cars of sheep—in all 11,949 cars, which is an average of 38¼ cars per day. The total number of passengers carried was 323,859—an increase of 66,429, or 25¾ per cent. over last year.

Of the amount expended for road repairs, $33,120 59 was for the line from Cleveland to Grafton, on the C., C. & C. R. R., leaving $94,924 as strictly chargeable to this company. There have been placed in the track during the year, 34,704 crossties, 1,400 tons new iron, 7,727 new chairs, 21 tons spike, and 15,145 mended rails, also a large amount of timber, plank, lumber, etc. The bridges are all in good order, and considered in every way safe.

The following statement will show the financial condition of the company, May 1, 1862 and 1863.

	1862.	1863.
Cost of road to date	$6,699,373 33	$6,700,495 52

President—JOHN GARDINER.

Directors—John Gardiner, James Mason, Jos. Lyman, H. B. Hurlbut, Samuel M. Young, William M. Vernilye, Amasa Stone, Jr., A. G. Jerome, A. N. Ramsdell.

Superintendent—L. D. RUCKER.

Treasurer—H. C. LUCE.

☞ The New Jersey Railroad and Transp. Co., invite proposals until the 20th of July, for $450,000 of six per cent. bonds, interest payable semi-annually, and the principal reimbursable August 1, 1878.

Amendments to Railroad Charters.

THE ACT CHANGING THE NAME OF THE FOX RIVER VALLEY RAILROAD COMPANY TO THE MILWAUKEE NORTHERN ILLINOIS RAILROAD COMPANY CONSTRUED. THE LEGISLATURE AMENDED THE CHARTER, BUT DID NOT CREATE A NEW CORPORATION.

This action was brought by the "Fox River Valley Railroad Company," for money due on a subscription to its capital stock. It appears that the defendant, Field, subscribed for ten shares of the company's stock, at $100 each, payable in instalments, with a stipulation that the amount paid thereon should bear ten per cent. interest from the time of payment until twelve miles of the company's road should be completed. There was written on the fly-leaf of the subscription book an agreement, signed by the president of the company, as follows:

"*Fox River Valley Railroad Stock Subscription.* It is understood by and between the Fox River Valley Railroad Company, and the subscribers to the capital stock of said company whose names appear on the following pages, that the amount due on such stock, and liable to be called for by the terms of subscription, is not to be considered due or liable to be called for, until the same shall be necessary for the construction of, or procuring the right of way on that portion of the line of road of said company extending from the village of Rochester to the city of Milwaukee, and also not until a sufficient amount of stock has been subscribed, or other means obtained to warrant in the judgment of the board of directors of said company, the commencement of the construction of that portion of the line above-named, and that all sums received from said subscribers shall be applied only to the construction of said part of said road."

The complaint contained the necessary allegations to show that according to the terms of the defendant's subscription, the sum sued for had become due. It also averred that by an act of the legislature, approved March 11, 1859, the name of the plaintiff was changed to "The Milwaukee and Northern Illinois Railroad Company."

On the trial the plaintiff offered in evidence the charter of the Fox River Valley Railroad Company, and the act amendatory of its charter approved March 11, 1859. The former act by its ninth section, gave the company power to construct a railroad from the southern line of Wisconsin, at a point designated; "thence in a northerly course to the village of Waukesha, with power to construct a branch of said road from some point on said road north of the village of Rochester to the city of Milwaukee." The tenth section was as follows: "If said corporation shall not within two years from the passage of this act, commence the construction of said railroad, and within ten years complete the same, then the rights, privileges, and powers of said corporation under this act shall be void." The act of 1859, declared that the name of the Fox River Valley Railroad Company, was thereby changed to the Milwaukee and Northern Illinois Railroad Company and enacted that nothing therein should be construed to release any stockholder from his subscription to the capital stock of the company theretofore made, but all money which should thereafter be paid on subscriptions made to said Fox River Valley Railroad Company, or which

should be realized on securities &c., should be received and receipted for in the name of the Milwaukee and Northern Illinois Railroad Company; and should be faithfully and exclusively applied by said Milwaukee and Northern Illinois Railroad Company, the same as under the old title to the construction of said company's line of road from Milwaukee to the state line at the point designated in the charter to which said act was amendatory. The 4th section of this act repealed the 10th section of the act of 1853.

The plaintiff then produced a witness and offered to prove by him the other matters alleged in the complaint. Thereupon the defendant's counsel objected to the introduction of any testimony, because the plaintiff was a new corporation created in 1859, and the suit was commenced prior to that time; because the plaintiff had no right to maintain its action in its present form, and because the act of March 11, 1859, repealed and took away the right to build a railroad from Rochester to Waukesha; this objection was sustained by the Court and the plaintiff excepted.

The trial was had before the Milwaukee County Court, which entered judgment in favor of the defendant. The plaintiff then appealed to the Supreme Court of Wisconsin. The following opinion was rendered by the appellate tribunal, which now reverses the judgment of the County Court, and holds that the act of 1859 changed the name of the company and made some amendments to its charter, but did not create a new corporation.

Dixon, C. J.—It is very evident from the provisions of the act of March 11, 1859, that no new corporation was contemplated. It purports to be, and is, in fact, only an act changing the name of the old corporation, and making some slight amendments of its charter. If the name had not been changed, we doubt whether the counsel would ever have insisted that its provisions amounted to the creation of a new company. If the legislature had merely changed its name, by declaring that the Fox River Valley Railroad Company should thereafter be known and called the Milwaukee and Northern Illinois Railroad Company, and thereafter should sue and be sued by that name, &c., there can be little doubt that it would in law have been quite as effectual for the purposes intended, and that the company known by this new name would have succeeded to, or rather continued in all the rights which it formerly possessed. It certainly cannot alter the question that the legislature have expressly declared that such shall be the effect of the act. Nor does this declaration afford any reason for saying that a new corporation was created. Neither do we think that the act made, or authorized the company to make, any change in the line of its route between the city of Milwaukee and the State line. After having changed its name, the act provides that nothing in it shall be construed to release any stockholder from his or her subscription theretofore made to the capital stock of the company; and that all money which shall thereafter be paid on subscriptions made to the Fox River Valley Railroad Company, or which shall be realized on securities given or to be given, shall be received and receipted for in the name of the Milwaukee and Northern Illinois Railroad Company, and shall be faithfully and exclusively applied by it, *the same as under the old title, to the construction of said company's line of road from Milwaukee to the State line;* that holders of stock under the old, shall be entitled to receive in exchange certificates of stock under the new title; and *that the company under its new title shall be authorized to use all the rights, privileges and immunities contained in its charter as the Fox River Valley Railroad Company.* Whether called by the old or the new name, it is spoken of throughout as one and the same company; and where the act declares that "the moneys realized shall be faithfully and exclusively applied as under the old title to the construction of the company's line of road from Milwaukee to the State line," it must be understood as the line which was established by the charter.

The repeal of section 10 of the original charter can by no means be said to deprive the company of the power to build the road from Rochester to Waukesha. Its authority to do this is conferred by section nine, the provisions of which are left unimpaired. Its repeal operates generally to remove the restrictions, as to the time of the commencement and completion of the road, which were imposed by it. Nor can we say that the declaration that the moneys realized shall be applied faithfully and exclusively to the building of the road from Milwaukee to the State line, operates to prevent the construction of that portion of it which extends from Rochester to Waukesha. When construed in connection with section nine and other parts of the charter, which remain in full force, it amounts merely to a legislative postponement of the construction of the latter part of the road, until the former shall be completed. This view of the statute of 1859, disposes of most of the objections raised by the respondent's counsel. There is certainly no room for saying that the stipulation for the application of the moneys subscribed, to the construction of that portion extending from the village of Rochester to the city of Milwaukee is against public policy. The argument of the appellant's counsel is a complete answer to this objection.

The powers conferred on the board of directors by the sixth section, are ample for the purpose of enabling them to agree to pay interest on the stock subscribed and paid for, until twelve miles of the road should be completed and in operation. In respect to all contracts, covenants and agreements touching their corporate affairs and business, the power conferred upon the directors of this company is of that enlarged and plenary character usually found in the charters of railroad corporations in this State; and it is not the province of this Court, by violating the rules of plain grammatical analysis, to restrain or abridge this power, simply because it has been improvidently exercised by the managing officers, or exerted in a manner seriously detrimental to the best interests of the corporation or its stockholders. This court is no more the guardian of the interests of corporations than of private individuals; and can no more protect them from the effects of hasty and ill-advised bargains or agreements, provided they have the authority to make them, than it can individuals. We know of no authority of law for drawing any such distinction. The question of what powers the company should possess, was a matter of legislative discretion in the first instance, and the legislature having exercised it, it is not for this Court to say that they were improperly granted. As to past transactions, the evils whatever they may be, must be endured. As to the future, the power of correction, if its exercise be needed lies with the legislature.

The objection that a new suit should have been commenced after the change of name, we do not understand to be insisted upon. If it were, it is too technical to be countenanced in these days of liberality in all matters of amendment.

The judgment of the County Court must be reversed, and a new trial awarded.

Railroad Earnings--Weekly.

The earnings of the Chicago and Alton Railroad for the 1st week of July, 1863, were:

Passengers	$13,307 31
Freight	20,988 06
Sundries	1,024 33
Total	$35,319 69
Same week last year	22,859 72
Increase	$12,459 97

The earnings of the Chicago and Northwestern Railway for the 1st week in July, 1863,

were	$25,186 72
Do., 1862	18,487 40
Increase	$6,699 32

The earnings of the Toledo and Wabash Railroad Company for the 1st week of July, 1863,

were	$28,035 25
Same week, 1862	27,985 87
Increase	$49 38

The earnings of the Cleveland and Toledo Railroad for the 1st week of July, 1863,

were	$22,440 00
Same week, 1862	14,096 00
Increase	$8,344 00

The traffic of the Great Western Railroad for the week ending July 3, 1863, was as follows:

Passengers	$20,838 19
Freight and live stock	22,320 41
Mails and sundries	1,226 58
Total	$44,385 18
Corresponding week of 1862	40,667 31
Increase	$3,717 87

The earnings of the Galena and Chicago Union Railroad for the 1st week of July, 1863, were:

Freight	$30,624 32
Passengers	12,787 48
Mails	1,300 00
Total	$44,711 80
Same week, 1862	48,144 77
Decrease	$3,432 97

The earnings of the Grand Trunk Railway for the week ending June 27, 1863, were:

Passengers	$27,157 46
Freight and live stock	3,300 00
Mails and sundries	50,129 62
Total	$80,587 08
Corresponding week, 1862	66,213 30
Increase	$14,373 78

☞ The earnings of the Rome, Watertown and Ogdensburg Railroad Company for the past six months, since the new road to Ogdensburg has been in use, show an increase of $95,977 63 over the same period of the previous year.

American Railroad Journal

Saturday, July 18, 1863.

Stock Exchange and Money Market.

The events of the last week have been, at least, for us at New York, of intense interest. On Monday morning gatherings of discontented people, principally from the large workshops, began to assemble in the upper parts of the city, along the railways and in the avenues, and after a short time several of the enrolling stations were attacked and destroyed. The police and the small military force were everywhere overpowered by the rioters when they came in collision; and we may truly say the city was pretty much in possession of a mob, who excused themselves for their violence by the alledged unconstitutionality of the acts of the general Government and its discrimination between the rich and the poor. Some lives were lost, many valuable buildings were sacked and destroyed, and among these, several private residences of unoffending individuals, and a benevolent institution, entirely sustained by the charitable ladies of the city. Whatever sins of omission or commission may be chargeable to those in power at Washington, there is no excuse for the commission of arson, robbery and murder, which were unchecked on Monday either by the civil or military authorities of the city. New York, for so large a place, has hitherto been remarkably free from these outbreaks. We have but three instances of much note; the Doctor's mob in its early history, the flour mob, and that of the Astor Place Opera House. Baltimore and

Philadelphia have not been more exempt. British history is full of examples. Thirty or forty great riots are recorded with painful minuteness. Among the most remarkable of these was the Lord George Gordon mob in London in 1780, when 40,000 persons were engaged in the affair, when Catholic chapels and private residences belonging to people of that persuasion were destroyed, prisons broken open, the Bank of England endangered, thirty-six fires in full blaze at the same time, and the mob held for six days almost undisputed possession of the city. In the end they came off badly, two hundred and ten were killed, two hundred and forty-eight wounded, of whom seventy-five died in the hospitals, and a large number were tried, convicted and executed.

Mobs are entirely without excuse in this country. We have laws, which, if enforced are ample to redress all grievances, and therefore disgrace ourselves when we appeal to violence. We can make allowances for the repelling of great grievances, and the outbursts of outraged humanity, but none for violations of the institutions of which we ourselves are the founders, and under which we have prospered. The "sober second thought" may always be depended on to put everything right.

The Money Market and Stock Exchange was very naturally affected by this condition of things. Capitalists, the most sensitive of all classes, were feverish and excited. Business was unquestionably greatly disturbed, and the well-known operators in the street looked blue and seemed alarmed. Lenders met borrowers with anxiety and unwillingness, and holders of currency began to calculate the possibilities of a sudden collapse. The amount of business done on Monday and Tuesday was therefore light, and on Wednesday the same feeling continued. Yet strange to say while there was a marked falling off in some securities, others actually rose under the pressure. Gold was feverish, and under a rumor of General Lee's defeat, at one time fell to 120. Pacific mail went up to 209. Harlem, Erie, and Pittsburg advanced, and Governments were without change. Our tables this week will show the final condition of the market as we go to press.

We hope we shall next week have to record the complete restoration of order and resumption of business.

The following table gives a comparative view of the debt of the United States at different periods since the beginning of the war.

	Dec., 1861.	July, 1862.
Fives	$30,595,092	$30,095,092
Sixes	89,929,856	90,620,555

The following table compares the financial condition of France for the year 1862 with that of Great Britain and Ireland for the year ending March 31, 1862, with their respective burdens upon the people per capita:

ANNUAL INTEREST ON PUBLIC DEBT.

Great Britain:	
On account of permanent debt	£23,703,738
On terminable annuities	1,837,968
On interest on exchequer bonds	122,500
On do. do. do. bills.	478,400
Total interest on public debt	£26,142,606
In dollars	$127,131,492
Annual expense per capita, $4.34.	
France:	
Interest of public debt	£23,773,019
In dollars	$115,608,191
Annual expense per capita, $3.09.	

TOTAL ANNUAL EXPENDITURE.

Great Britain:	
On account of public debt	$26,142,606
On army and navy	29,452,342
On cost of collection	4,836,723
On civil expenditure	11,791,956
Total annual expenditure	£72,223,627
" " in dollars	$351,223,498
Population, 29,293,319—$12.00.	
France:	
On account of public debt	£23,773,019
On army and navy	26,804,984
On cost of collection	8,471,007
On civil expenditure	27,746,406
Total annual expenditure	£86,795,416
" " in dollars	$422,086,108
Population, 37,382,225—$11 29.	

The interest on the stocks of New York city payable on the 1st of August will be paid by the City Chamberlain, at the Broadway Bank.

The coupons on the first and second mortgage bonds of the Pittsburgh, Fort Wayne and Chicago Railroad, maturing Aug. 1, and Sept. 1, will be paid, less the interest for the unexpired time, at the office of Winslow, Lanier & Co.

The Little Schuylkill Navigation Railroad and Coal company has declared a dividend of 3½ per cent. clear of State and National taxes.

The Frankford and Southwark City Passenger Railroad, Fifth and Sixth street, announce a semi-annual dividend of 3 per cent., payable on the 15th instant.

The Cleveland, Columbus and Cincinnati Railroad will pay, Aug. 1, at the office of the United States Trust Company, a dividend of 6 per cent., free of tax.

The Brooklyn City Railroad Company will pay, on the 1st of August, a dividend of 5 per cent.

The Lehigh Valley Railroad Company have declared a quarterly dividend of two and a half per cent., clear of all taxes, payable on the 15th inst.

The Philadelphia and Grays' Ferry Passenger Railway Company, Spruce and Pine, announce a dividend of three per cent. on the par of the stock, payable on the 20th inst.

The interest on the bonds of the Wyoming Canal Company, due 15th July, 1863, will be paid at the Bank of North America.

The Philadelphia City Passenger Railway Company have declared a dividend of $2 per share payable on the 16th inst.

The Minehill and Schuylkill Haven Railroad Company have declared a semi-annual dividend of four per cent., payable on and after the 23d inst., free of taxes.

The principal and unpaid coupons of the unextended 1st mortgage bonds issued by the Galena and Chicago U. Railroad Company, due 1st August, will be paid upon presentation at the office of H. F. Morgan & Co., 35 William street.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Jersey City Water Loan, 109½; Illinois Central full stock, 98; do., cancelled bonds scrip, 86; Miss. and Mo., 25¾; do., L. G., 59; Canton Co., 28; Cumberland Coal pref., 22; Central American Transit Co., 32; Quicksilver, 39¼; American Coal Co., 56.

Boston.—Northern (Ogdensburg) 1st mort., 102; do., 2d mort., 23½; Rutland 1st mort., 68½; do., do., 2d mort., 14½; do., 3d mort., 4; Vermont Central 1st mort., 75; do., 2d mort., 17; South Shore 6s, 1880, 100½; Hartford 6s, R. Seat of War in Maryland and Pennsylvania.

This is a large well arranged and handsomely lithographed map of the seat of war in Maryland and Pennsylvania, published by the well-known Chartographer J. Disturnel, 337 Broadway. It is the most complete of any we have seen and should be in the hands of all those who are interested in the present great struggle going on in the States it represents.

Troy and Cohoes Railroad.

The work of constructing this enterprise is now being prosecuted in earnest. Ground has been broken for the laying of the track from the eastern terminus of the railroad bridge to the Lansingburgh track in River street, near Federal street. A large force of men are employed, and before many days the track will be completed as far as the island.

Commerce of Nova Scotia.

From the official returns made to the Legislature of Nova Scotia by the Secretary of Finance, we learn that the value of goods imported into the Province during the year 1862 amounted to $8,445,042, being an increase of $831,815 over the imports of 1861. The exports for 1862 amounted to $5,646,961, against $5,774,334 in 1861, thus showing a decrease in 1862, of $127,373, and a discrepancy between the value of the imports and exports of the Province of $2,796,080. But the Financial Secretary considers it would be absurd to take for granted that such a discrepancy really exists. He adopts the conclusions Mr. Galt has arrived at, that the exports which go abroad without finding their way into the Trade returns amount to 12½ per cent. on the whole, which amount is to be added to the value of our imports. Then, again, there were built in the Province during the past year, no less than 201 vessels, the aggregate tonnage of which amounted to 39,833 tons, the market value of which was $1,566,168; and the greater number of these vessels were sold out of the Province, and in the course of business, there are bills of exchange and ready money drawn out of the country which should also be taken into consideration in contrasting the exports with the imports. The exports of gold, which are estimated at not less than $200,000, do not appear in the customs returns. These items, it is assumed, would swell the exports to at least $8,000,000.

The exports of fish for 1862 amounted in value to $2,108,797, a slight decrease from the exports of 1861. In coal, there was an increase of $22,524; the value of coal exported during the past year amounting to $624,904. In the exportation of potatoes and other vegetables, there was also an increase, showing that the farmers have not been idle. The exports of potatoes and vegetables from the Province during 1861, amounted to $196,442, while the exports for 1862 reach $269,751—an increase over the former year of $78,309. During 1861 the value of fruit imported from Nova Scotia was $8,071, while last year the amount was $19,316, leaving an increase of $11,245. The gypsum trade has suffered most, the war limiting the exports, which amounted to but $20,425 in 1862, or about one third of the sum realized from this commodity some ten years ago.

The total Customs revenue collected in the Province amounted to $830,126 57; of this sum $691,607 76 was collected at the port of Halifax, and the returns from the outports footed up to $133,658 67; the balance, $4,860 14, was realized from excise duty on the produce of breweries and tobacco manufactories. Upon comparing the returns of 1861 with 1862, the gratifying fact is apparent that during the past year the revenue has increased $241,775, which is more than 40 per cent. over any year previous, (with the sole exception of 1860, when the amount was $671,421), or nearly 24 per cent. over the best Customs revenue of Nova Scotia. In the Province there are 70 ports of entry and clearance, and in 46 of this number there has been an increase of receipts over last year amounting to $245,472 14. In Halifax alone the increase amounted to $210,904 19. In 24 out of the 70, there has been a decrease, as compared with 1861, of $3,696 57, which being deducted from the increase in the 46 ports, leaves a sum of $241,775 57 as the total increase in the proceeds of all the ports, as compared with 1861. The amount collected from light duty for the year 1862, amounted to $31,164 50, showing a decrease of $900 60 as compared with the previous year. Upon analyzation it would appear that $426,047 31 of the entire revenue was derived from *specific* duties, while the *ad valorem* realized $399,219 12; and breweries and tobacco factories, $4,860 14—in the aggregate amounting to $830,126 57. The greater part of the amount produced by the specific duties was realized from five articles. Spirits of all kinds, produced $169,808 73; wine $20,873 71; brown sugar, $60,612 50; molasses, $54,450 77, and black tea, $65,934.53; so it will be seen that these five commodities afforded a revenue of $371,680 32, or nearly nine-tenths of the whole amount realized from the articles subject to specific duty.

Rutland and Burlington Railroad.

The receipts of this road for the year ending August 31, 1862, have been as follows:

From passengers	$115,777 35
" freight	179,356 42
" mails	15,500 00
" expresses	6,999 96
" rents	4,316 30
" miscellaneous	329 77
" interest	649 13
	$322,928 93

And the expenses were:

Repairs of road	$41,872 69	
" bridges	4,192 32	
" locomotives	20,124 87	
" cars	33,513 55	
" stations, etc	11,238 28	
Fuel	39,816 55	
Oil and waste	9,374 96	
Renewals of rails	17,247 81	
Passenger expenses	22,222 95	
Freight expenses	30,637 25	
Salaries, etc	10,988 71	
Gratuities and damages	4,475 17	
All other expenses	19,941 29	
		261,649 40
Net earnings		$61,279 53

Compared with the preceding twelve months, the gross earnings show an increase of $11,745 53, with a decrease in expenses of $11,342 96—making the increase of net earnings, $23,088 49.

The following is a statement of the account of the trustees of the road from November 20, 1853, to September 1, 1862:

Total net earnings from November 20, 1853 to August 31, 1858	$284,961 26
Net earnings in 1858–'59	81,561 00
" " 1859–'60	54,478 00
" " 1860–'61	38,191 00
" " 1861–'62	61,279 53
	$520,470 79
Paid coupons due Feb. 1, 1854	$63,000 00
" " Aug. 1, 1854	61,904 50
" " Feb. 1, 1855	62,083 00
" " Aug. 1, 1855	60,872 00
Fuel and materials on hand	71,599 03
Real estate	34,057 96
Rolling stock, tools, etc	75,668 05
Cash	37,949 26
Due from connecting roads, agents, etc.	53,336 99
	$520,470 79

During the past year "sufficient new cars have been built in the company's shops, and such renewals and repairs put upon the tracks, bridges and locomotives and other equipments of the road as to maintain them in full value and supply and thorough repair for the advantageous transaction of business; and the entire trust property is in all respects in good condition, and has not been suffered to become depreciated in value."

The trustees has put in the track, and charged the amount to operating expenses up to the date of this report. 500 tons of new rails. There have also been re-rolled, 3,142 tons. Repaired in the company's shops, 17,387 tons. Making the total of new, re-rolled and repaired rails put in the track by the trustees, 21,029 tons. There has also been used in track renewals during the same time, 275,558 new cross ties.

Since the close of the last financial year, the trustees have ordered the payment of coupon No. 10; and the treasurer was in Boston for that purpose on the 26th, 27th, 28th, and 29th of September last. Since October 1, they have been paid by check on Boston; and for those still unpaid, if sent to the Treasurer, at Rutland, Vt., a check on Boston will be remitted for the amount.

The equipment of the road consists of 20 locomotives; 16 first class and 2 second class passenger cars; 5 baggage, 2 mail, 360 box, 101 platform and 80 cattle cars.

The number of miles run by passenger trains has been 169,457; by freight trains, 181,185; by other trains, 43,751—total, 294,393.

The financial condition of the company August 31, 1862, is exhibited in the annexed—

BALANCE SHEET.

Capital stock—common		$1,242,500 00
" preferred 8 per cent.		382,700 00

The office of the company is at Rutland, Vt.

The officers are:

President—THOMAS THACHER.

Treasurer—GEORGE B. GIBBONS.

Superintendent—E. A. CHAPIN.

Trustees—SAMUEL HENSHAW. THOMAS THACHER.

Railroad Police.

AN ACT empowering railroad companies to employ police force. Passed April 29, 1863.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:—

SEC. 1. Any railroad corporation on which road steam is used as the motive power, may apply to the Governor to commission such persons as the said corporation may designate to act as a police for said corporation.

SEC. 2. The Governor, upon such application, may appoint such persons or so many of them as he may deem proper to be such policemen, and shall issue to such person, or persons so appointed a commission to act as such policemen.

SEC. 3. Every policeman so appointed shall, before entering upon the duties of his office, take and subscribe the oath prescribed in the twelfth article of the constitution. Such oath with a copy of the commission, shall be filed with the Secretary of State, and a certificate thereof by said Secretary be filed with the clerk of each county, through or into which the railroad for which such policemen is appointed may run and in which it is intended the said policeman shall act; and such policemen shall severally possess all the powers of policemen in the several towns, cities and villages in which they shall so be authorized to act as aforesaid.

SEC. 4. Such railroad police shall, when on duty, severally wear a metallic shield with the words "Railway Police," and the name of the corporation for which appointed, inscribed thereon; and said shield shall always be worn in plain view, except when employed as detectives.

SEC. 5. The compensation of such shall be paid by the companies for which the policemen are respectively appointed, as may be agreed upon between them.

SEC. 6. Whenever any company shall no longer require the services of any policemen so appointed as aforesaid, they may file a notice to that effect in the several offices in which notice of such appointment was originally filed, and thereupon the power of such officer shall cease and be determined.

Spain--Its Material Progress.

The material revival of Spain, of which we have had vague accounts from various sources, is established beyond question by recent official publications. It appears that not only the population of the country rapidly increased (in 1857 it was 15,464,000) but agricultural industry and the railway interests have been enormously developed within a few years.

The increase of railway facilities, by affording ready access to market, has greatly stimulated the agriculture of the kingdom, while the revenue from the land tax has kept pace with the progress of rural industry and the increase of population. In 1861 fifteen hundred miles of railway were in operation, whereas, in 1848, there were but twenty-five. The common roads, too, which were formerly neglected by the government, have been extended and improved in similar proportion; two hundred and fifty-four leagues having been made between 1840 and 1855, at a cost of sixty-three millions of reals, and the whole length now amounting to eleven thousand miles. The natural result of this liberal system of communication is the opening of new districts for tillage, the creation of new centres of trade, and the increase of markets for agricultural produce.

According to the latest official returns, agriculture is the occupation of seventy-five Spaniards in every hundred, and the proportion is increasing; while the land tax, which in the year 1846 produced but 238,000,000 reals, now brings to the national treasury an average annual income of 400,000,000 reals. The yearly production of grain is 66,000,000 hectolitres; the yield of the iron mines has risen from nine million kilogrammes in 1797 to 41,000,000 in 1861; copper yields 2,704,000 kilogrammes, and zinc 1,853,000. The consumption of coal has increased so rapidly that the mines of the country are incapable of supplying the demand, so that the imports of this article have quadrupled in twelve years. The importation of cotton has trebled in twelve years, and the silk trade has revived in nearly equal proportion.

Spain has also developed her commerce and her mercantile navy with remarkable rapidity. From 1843 to 1860 the exports and imports together increased 350 per cent.; and in 1860 her mercantile marine had risen to an aggregate of 19,224 vessels, measuring 2,526,508 tons—against 9,800 ships of 1,050,000 tons in 1843.

The Gold Product of the World.

From reliable data it appears that the production of gold and silver throughout the world has quadrupled since the first discovery of gold in California, (1848-'9.) The production annually, in the years 1846–1848, was estimated at sixty-one millions of dollars, of which Russia and Mexico were the principal sources. Now the product is estimated at over two hundred and seventy millions; the amount produced in each country in the different periods being estimated as follows:

	Year 1846.	Year 1863.
California	.....	$ 70,000,000
Other portions of the U.S.	$1,300,000	30,000,000
British Columbia	.....	6,000,000
Mexico	18,500,000	25,000,000
South America	13,000,000	13,000,009
Total, N. & S. America	$32,800,000	$144,000,000
Russia	18,000,000	22,000,000
Other parts of Europe	6,600,000	6,800,000
Asia and Africa	4,600,000	5,775,000
Australia	.....	75,000,000
New-Zealand & British Colonies	.....	12,000,000
All other countries	.....	6,000,000
Totals, 1846 and 1863	$62,000,000	$271,575,000

The old States of the Union have furnished domestic gold to the extent of $19,214,635
And silver 41,888

$19,256,523

Up to June 30, 1862, viz:

North Carolina	$9,113,994
Georgia	6,903,128
Virginia, (with silver)	1,660,693
South Carolina	1,352,970
Alabama	198,231
Tennessee	81,407
A total of	$19,256,523

The new territories have furnished, up to the same time, within a few years, $535,291,368 in gold, and $5,184,573 in silver, a total of $540,475,941, from the following States:

California	$528,153,890
Colorado	4,753,050
Oregon	963,458
Nevada	1,127,254
Utah	80,067
Arizona	47,222
New Mexico	56,929
Nebraska	1,402
All others	190,319
	$535,373,591
Gold parted from silver, and silver from gold	5,102,350
	$540,475,941

The total number of acres contained in these Western territories including California and Oregon, is 905,694,880
Of which have been sold 54,199,676

Leaving, unsold 851,495,204

Acres, to be disposed of hereafter, either in fee or on lease, by the United States.

The importance of this vast territory cannot be over-estimated, as a gold and silver producing region, and in view of the existing debt of the country, and of the necessity of establishing a sinking fund for the extinction of this debt, and the establishment of a more thorough system of schools for the masses.

Nevada, one of the smallest of the Pacific slope, is thirty per cent. larger than Virginia, which is the largest of the States east of the Mississippi. Oregon, ninety-five thousand square miles, would make two such States as New York or Pennsylvania.

Colorado, with her 104,000 square miles, would make two such States as Wisconsin, or three of Indiana—product of gold estimated at five millions.

Utah, where gold has been known for years, and hoarded by the Mormons, has 106,000 square miles, equal in extent to Kentucky, Indiana and Maine combined.

New Mexico, with an area of 121,000 square miles, is equal in extent to three such States as Ohio.

Arizona, still larger, having 126,000 square miles, covers an area double that of all the New England States combined.

Dakotah, yet larger, having 148,000 square miles, would make six such States as South Carolina, and has now a more loyal spirit within it than six of the latter put together.

California was, in the last census report, stated to have 188,000 square miles of territory, but recent investigations show that her limits are actually 158,687 square miles; and with this reduced limit, she is equal to four of Tennessee.

Idaho, the recent creation of the thirty-seventh Congress, (made up from the recent territories of Washington and Nebraska,) is the largest of the whole, having 326,000 square miles, which would make seven such States as New York; and the product of gold here in the year 1863 is estimated at ten or twelve millions.

A careful scrutiny of the whole subject as to sources of supply of the precious metals at this time, serves to show that North and South America produce about $96,350,000 in gold and $47,650,000 in silver; a total of $144,000,000.

Australia, Russia and other portions of the world produce annually $108,230,000 in gold, and $19,345,000 in silver; a total of $127,575,000. Making the annual product throughout the world (Japan and few other sources of which we have no details excepted) at this time to be—

In gold, (75.34 per cent.,)	$204,580,000
In silver, (24.66 per cent.,)	66,995,000
Total year 1863	$271,575,000
Whereas the total annual supply in the year 1847, estimated at	62,000,000
The additional supply in 1863 is	$209,565,000

Our preceding table shows the estimated production of gold throughout the world in the years 1846 and 1863. The former is taken from the eighth edition of the *Encyclopedia Britannica*, (article *Precious Metals*). The estimate for the current year is based upon the best information we can obtain at present. We have put down the production of California at seventy millions of dollars, which, by some persons, is considered too large an estimate. The shipments, it is true, for the past three years, have averaged only forty-two millions annually, but is known that the export has reached fifty-seven millions in one year, (1853,) and there is no reason to suppose that the production is less than at that time. The opinion of California bankers and merchants lead to the conviction, that the amount retained in the State, added to that exported in private hands, without being reported at the custom house, will swell the production to 25 or 28 per cent. more than the official export.

Thus, the export officially reported for ten years, 1853–1862, both inclusive, was	$470,666,000
Add retained in the country, and exported in private hands	131,786,000
Total product, ten years	$602,452,000

Or an annual average of over sixty millions of dollars.

STATISTICS OF COINAGE AND SHIPMENTS OF GOLD AT SAN FRANCISCO.

Period.	*Total Value Minted.*	*Value Shipped.*
1849	....	$4,921,250
1850	....	27,676,346
1851	....	45,582,095
1852	....	46,586,134
1853	....	57,331,024
1854*	$9,731,574	51,328,655

1859	2,280,525	43,329,975
1860	2,130,755	40,484,345
1861	2,072,360	39,374,840
1862	2,019,840	38,379,960
Total 12 years	25,963,223	$493,301,237

Idaho.—An editorial article in the Nebraska *Republican*, published at Omaha City, April 24, 1863, says, that Gallatin City is situated at the junction of the Three Forks of the Missouri River, in the midst of a good agricultural country—well supplied with pine and cotton-wood timber. It is at the head of navigation on the tributaries of the Missouri, and is about 250 miles (by river) from Fort Benton. The land route from Fort Benton is only about 125 miles. This city, from its location and advatages of navigation, is destined to become the supply point for the rich mining region of the head-waters of the Missouri, which embrace a district of country, so far as already prospected, of about 150 miles north and south, by about 160 miles east and west. This place was first laid out in February last, and 60 buildings had been constructed since. It is thought by the proprietors that as it is likely to be the centre of population for the new territory of Idaho, it will probably be selected as the capital.

The portage or land travel, between the foot of the rapids on the Missouri River, to a point above the falls, where navigation by light-draught steamers may be resumed, is only about 12 miles by a good wagon road. From the last named point to Gallatin City, (only 120 miles from Bannach City,) goods may be shipped by water as soon as arrangements, now in progress for putting a small steamer in the trade, shall be perfected.

There can be no question that the mines above spoken of are among the richest, if not *the* richest on this continent. Their extent, when fully developed, must embrace the entire region from a point near the South Pass to the north line of Washington Territory, and a belt of country along the eastern slope of the Rocky Mountain range at least 200 miles in breadth. The distance from Omaha to these mines is certainly not more than 1,100 miles, and the route is practicable for emigrant trains at all seasons.

The gold and silver mines of California have without doubt increased at least ten millions annually since 1855–1860, making the product at present about $70,000,000. The other gold producing territories, enumerated on page 905 of our May number, and comprising over twelve hundred million acres, may be said to produce at present at the rate of thirty millions annually. Mexico, it is reliably stated, produces twenty-three millions of silver annually, which is more than any other country now yields, and about ten per cent. in gold. The States of South America produce about as much as in the years 1840–1850.

We come now to consider the supply of gold and silver in foreign countries. Russia has been, prior to 1849, the principal source of gold, and Mexico that of silver. Since then other and large sources of supply have come to light. These are:

I. Australia, with an annual supply of $75,000,000.
II. New-Zealand,
III. Nova Scotia,
IV. British Columbia, } ..... 12,000,000.

The production of gold in Russia has increased from an annual supply of $17,911,000 to about $22,000,000. It is known that five British colonies are producing largely in gold and silver. New South Wales, New Zealand, Van Diemen's Land, and other portions of Australia, are also undergoing an exploration under favorable auspices. These new examinations and surveys will be productive of good in various ways, even if they result in no further developments in the precious metals. In the January number of the Edinburgh Review we find an elaborate article on the subject, (reprinted in the June number of the *Bankers' Magazine*, pp. 953–979,) to which the reader is referred. The information conveyed there is scarcely less surprising than that gleaned from recent facts reported to the government of the United States, as contained in the May number of this work. The *Edinburgh Review* says, with truth:

"The series of gold discoveries which commenced with 1847 has, within these last two years, assumed gigantic proportions. Already no less five British colonies are found to possess extensive and rich gold deposits. The Californian gold-miner has tapped reservoirs which are now found to be spread downwards through Mexico, upwards through the great Oregon and Washington territories. The British Columbian gold-miner, great as are the attractions of British Columbia, has already crossed the Rocky Mountains, and is following the banks of the rivers which expand into the lake system of Canada. Nay, he is already on the banks of the rivers which branch, on one side, to the Arctic Ocean, on the other to the Russian settlements around Behring Strait. The backwoodsman, advancing from the east, is met by legions of gold-miners coming from the west. The vast forests which seemed to await his more slow axe, are felled for the hut and camp-fire of the gold-miner. The trapper, already driven from the shores of the Pacific, is again retiring to more quiet regions. The wonderful changes of the North Pole are repeated at the South. As the American gold-miner is advancing on eternal snows, so already the Australasian gold-miner is exploring the bounds of the great Antartic Ocean. Armies of gold-miners are pouring into New-Zealand. The gold-fields of New South Wales and Victoria are spreading downwards into Van Diemen's Land upwards towards the new colony of Queensland. Explorers are discovering auriferous quartz reefs in the heart of Australia. How all this will affect our Atlantic world, is a question which concerns us most deeply."

The vast accumulations of gold of the last fourteen years enure largely to the benefit of the United States and Great Britain, by giving an impulse to commerce and to manufactures. Remote nations are indirectly benefited, because the course of trade is such that gold will flow to those countries where labor is cheapest, and where the bullion and coin are the most valued, or realize the largest results. This is fully demonstrated in the fact, that notwithstanding the additional accumulations of the precious metals within the past fourteen years, amounting to over one thousand millions of dollars, there is really but little more on hand in the United States and in Western Europe than in 1850–1853. In the year 1851, the Bank of France held 486 millions of francs in silver, and 82 millions in gold; whereas now, after a period of twelve years, it holds 394 millions in both metals.

In the year 1852, the Bank of England held £22,000,000 in bullion and coin, which was, in fact, for the country at large—the joint-stock banks, the country banks and private bankers maintaining but small specie reserves. This year the bullion and coin of the Bank of England ranges from 14½ to 15½ millions sterling, and the Scotch and Irish banks £4,270,000, from which we deduce the following comparative table:

	1852.	1863.
Bank of England	$110,000,000	$ 75,000,000
Bank of France	113,000,000	80,000,000
Banks in United States	84,000,000	118,000,000
Totals	$307,000,000	$273,000,000

—*Bankers' Magazine, July.*

Philadelphia and Erie Railroad.

The McKean *Mirror* says, the work on the eastern end of the unfinished portion of the Philadelphia and Erie road is being pushed vigorously forward. There seems to be a determination on the part of the company to have the cars run to Shippen some time in August next. The bridge at Grindstone is nearly completed, and the track will soon be laid to Sterling Run, as the work between that place and Second Fork is far advanced towards completion.

Description of Jenkins and Jumelle's Governors for Steam Engines.

This invention by C. C. Jenkins and F. Jumelle of Philadelphia, consists in combining with a governor or spindle, a spring and rods arranged to form a knee joint, in the manner hereafter described, so that the force applied to overcome the rigidity of the spring, may be transmitted through a leverage constantly increasing as the resistance of the spring increases, thereby equalizing the action of the spring.

The weighted arms of the governor are hung to the top of the spindle in the usual manner. To the weights of the arms are jointed the upper ends of rods, the lower ends of the latter being connected to a sleeve which is fitted snugly to, but arranged to slide freely on, the spindle. A spring is connected at a point midway between its opposite ends, to the spindle by means of nuts, which are adapted to the screwed portion of the said spindle. To one end of the spring is jointed a rod, and to the opposite end a similar rod, one rod being connected to a lug on one side, and the other to a lug on the opposite side of the upper end of the sleeve. The lower end of the latter has a recess for receiving the end of the usual governor lever through which the movement of the sleeve is communicated to the throttle valve of the steam engine. This recess formed by two collars, one of which is fast to the sleeve, the other being screwed on to the same, as is also a nut, the striking of which against a nut screwed on to the spindle, limits the downward movement of the sleeve, and consequently, the inward movement of the weights.

As the governor revolves the weighted arms will fly out, and the sleeve will rise to an extent regulated by the speed of the governor, and the rigidity of the spring. Now supposing this spring acted directly on the sleeve without the intervention of the rods, it will be evident that the higher the sleeve rises through the centrifugal force of the weights, the greater will be the opposing force presented by the increased rigidity of the spring as the opposite ends of the latter are raised, consequently the governor will be irregular in its movement, the irregularity being in proportion to the difference of the rigidity of the spring as the ends of the latter are raised. By connecting the

spring to the sleeve by means of the rods, however, the case is different, as they form with the sleeve and spring the well known knee-joint, so that, as the sleeve is raised, it acts on the spring through a leverage, gradually increasing as the sleeve rises, and as the rigidity of the spring increases. Thus when the sleeve is depressed to the limit of its downward movement, the force exerted by the revolving balls tending to raise the ends of the spring, will be applied, as it were, through a lever of which the fulcrum is at a point near the centre, while as the spring rises, this fulcrum gradually approaches the farther end of the lever giving an increased leverage as the rigidity of their spring increases.

It will be evident that by transmitting the force imparted to the sleeve by the action of the revolving weights, to the spring through the medium of a knee-joint; the increasing rigidity of the spring as its opposite ends are raised, is counteracted by an increase in the force applied to raise the said ends, and consequently, that the action of the governor is uniform throughout.—*Journal of the Franklin Institute.*

Railways in Minnesota.

The following statement in reference to the progress of the railroad system in this State is from the last Annual Message of the Governor to the Legislature:

On the St. Paul and Pacific Railway the track is laid and in running order from St. Paul three miles beyond St. Anthony, and it is under contract from St. Paul all the way to Watab, and will be finished to that point by January 1st, 1864. All this portion of the line is along the valley of the Mississippi, Watab being at the mouth of the Sauk river, and at the point where the road crosses the Mississippi and turns off northwest to reach the valley of the Upper Missouri. This St. Paul and Pacific road is the main line of the Great Northern route to the Pacific, traced by Governor Stevens, and the commencement of the work on it so vigorously seems most auspicious. It will be a great trunk line for Minnesota, and no doubt branches tributary to it will be built in all directions. As the breadth of the State is not great, this road can easily be finished to the State boundary at Bois des Sioux river in two years, but there it must stop, as beyond lie the unpeopled wastes of Dacotah.

Meantime, however, various projects for roads to Crow Wing, Lake Superior, etc., tributary to this line have been started, though as yet none are in shape. The second railroad begun in fact is in Southern Minnesota, from St. Peter, at the great bend of the St. Peter's or Minnesota river, to Winona on the Mississippi. This will be a useful road, and doubtless will ultimately be extended up the valley of the St. Peter's river, and, with the progress of settlement, go on westward into Dacotah.

☞ The Directors of the Michigan Southern Railroad have formally resolved that it is "inexpedient for them to rebuild the Three Rivers Branch Road, or to construct any additional branch road north of Three Rivers." They, however, declare that they "are prepared to make arrangements with any other parties who may build such road for such business as may be brought by the same." Report says that Mr. Witt of Cleveland, may build the branch as a private enterprise, but there is nothing definite or certain about it.—*Adrian Expositor.*

Oil Creek Railroad.

This road is doing an immense business for one of its length. It brings out to Corry not less than 2,200 bbls. of oil daily, and its mixed freight going south will average nearly half that amount of bulk. The completion of the road from Titusville to Oil City is being pushed forward as rapidly as the scarcity of laborers will permit. Four miles of the route beyond Titusville is ready for the iron and the remainder will be graded and the track laid down by the 1st of September.—*Erie Dispatch.*

Incrustation of Steam Boilers.

The formation of scale is the chief disadvantage wherever *salt* or *hard* water is used for the feed of Steam Boilers, thus preventing the conducting the heat to the water, and causing the burning out of the boiler plates, and is a great cause of repair and expense. Many remedies have from time to time been introduced, but they have either been found inefficient or injurious. But a new article has recently claimed our special attention, called "Baird's Preparation for the Protection of Steam Boilers from Incrustation." This article has been examined by Dr. Jackson, State Assayer of Massachusetts, who has made careful chemical tests of it and given his certificate that, being made exclusively of *vegetable matters*, it can in no way act injuriously on iron. Practical steamship engineers, owners of boilers, and Master Machinists of railways have all given their testimony both to its efficacy and safety, and found it worthy the attention of all who are interested in the economical use of steam power. Many testimonials to its efficiency are in the possession of JAS. F. LEVIN, Central Wharf, Boston, the agent for this valuable article, and they all agree that it has no action on iron, that it holds the salts in solution, prevents oxidation, destroys scale and effectually prevents its formation in either salt or fresh water. John K. Simpson, Engineer of the Cooper Union, states that with its use and a judicious use of the blow-off, an engineer need have no trouble about scale. —*Am. Railway Times.*

Syracuse and Geddes Railroad.

The following gentlemen have been elected directors of this company: R. Nelson Gere, Harvey Stewart, Charles H. Andrews, Jas. Noxon, L. C. Redfield, D. Bookstaver, Dennis McCarty, Horace K. White, J. Forman Wilkinson, J. M. Ellis, Alfred H. Hovey, J. W. Barker, C. Tallman. D. Bookstaver was chosen temporary Secretary and Treasurer, and $6,500 was subscribed on the spot, and ten per cent. paid in. The road is going to be built immediately we understand, and from the business energy and character of the directors, the people of Syracuse may soon expect a ride on the Syracuse & Geddes Railway.—*Syracuse Courier.*

Dayton and Michigan Railroad.

The annual meeting of the stockholders of this company was held at Dayton on the 7th instant. The following persons were elected Directors: S. S. L'Hommedieu, John W. Hartwell, Geo. H. Hill, John Young, Daniel McLaren, of Cincinnati; R. M. Shoemaker, of Glendale; P. Smith, of Dayton; H. S. Conklin, of Sidney; M. R. Waite, of Toledo.

At a meeting of the Directors, same day, S. S. L'Hommedieu was elected President; R. M. Shoemaker, Vice President; Daniel Mc Laren, General Superintendent; F. H. Short, Secretary and Treasurer.

☞ Mr. A. W. Myers, formerly editor of the Meadville *Republican*, has received the appointment of Route Agent on the A. & G. W. Railway between Meadville and Akron,

STEEL BOILER FLUES
AND
STEEL
FIRE BOX PLATES.

RUSSELL & HOWELL'S
HOMOGENEOUS METAL
BOILER TUBES,

1¼ to 6 inches outside diameter cut to any given length. One half the thickness, and much stronger and more durable than Iron or Copper.

WITH GREAT SAVING IN FUEL.

Imported and for sale by

T. M. TYNG,
61 Cedar st.,
New York.

SUBSTITUTE FOR
CAR DUCK.

Kingman's Car Covering.

THIS is a heavy Canvass imbedded in a coat of Elastic Mastic or Paste which is applied directly to the boarding of the top of the car, and then thoroughly painted with three or four coats of paint, thus making a covering VERY MUCH LIKE CAR DUCK, but at this time at half the cost. It is now successfully used by many Railroads and Car Builders. Directions and particulars sent when requested. This Mastic and Canvass for sale by

WILLIAMS & PAGE,
67 Water street,
March 1863. Boston.

PACIFIC RAILWAY.

THE undersigned will receive proposals to furnish four thousand (4,000) tons of railway iron (or any part thereof) for the track of the first section of the Union Pacific Railway, Eastern Division. The iron to be of American manufacture, of the best quality, and to be delivered either at Leavenworth or Kansas City. Communications for further information to be addressed to the undersigned or to SAMUEL HALLETT & Co., 58 Beaver st., New York. Terms, cash on delivery.

J. C. FREMONT,
Pres't Union Pacific Railway, E. D.
NEW YORK, June 9, 1863.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, July 1, 1863.

THE Board of Directors of the ILLINOIS CENTRAL RAILROAD COMPANY have THIS DAY declared a DIVIDEND of TWO (2) PER CENT. free from Government tax, upon all the shares and canceled Bonds. Scrip standing in the name of holders on the books of the Company at the close of business on the 20th day of July instant, payable on and after the 1st day of August upon all shares the calls upon which shall have been duly paid; and that the dividend upon the full paid stock shall be a discharge of the interest payable thereon on the 1st day of January next, and payable upon surrender of the coupons issued therefor. The transfer books of the Company will be closed from the afternoon of the 20th to the morning of the 30th July.

4127 THOMAS E. WALKER, Treasurer.

I. KENDRICK,
No. 125 WALNUT ST., PHILADELPHIA,
AGENT OF THE
UNION COAL & OIL CO.
OF MAYSVILLE, KY.,
FOR THE SALE OF THEIR
Paraffine Lubricating Oil,
FOR ALL CLASSES OF
STATIONARY MACHINERY, LOCOMOTIVE ENGINES,
RAILROAD CARS, COTTON SPINDLES,
SEWING MACHINES AND WOOLEN FACTORIES.
ALSO,
MAYSVILLE COAL OIL
FOR BURNING,
PARAFFINE WAX,
PARAFFINE WAX CANDLES, AND
ROLLING MILL GREASE,
FROM PURE CANNEL COAL.

P. S.—All Oils warranted to answer the purpose represented.

☞ Particular attention given to orders for shipment in cans or barrels.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We warrant it equal in every respect to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a superior article for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well papered, on application at their office, by DELAFIELD & BAXTER, 104 Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

NEW YORK, HARLEM & ALBANY R. R.

CHANGE OF TIME.

SUMMER ARRANGEMENT, commencing MONDAY, May 18, 1863, Trains will leave Twenty-sixth street Depot:

For Albany—10.30 A. M., stopping at Williamsbridge, White Plains, Bedford, Croton Falls, and all stations north to Chatham, Chatham Centre, Kinderhook, and Schodack, connecting with New York Central R. R. for all points west, and with the Northern R. R. for Saratoga and all points north.

For Croton Falls—8.15 A. M., stopping at all stations.

For White Plains—8.15, 10 A. M., 2.30, 4.10, 5 P. M., stopping at all stations.

For White Plains, 6.15 P. M., from White Street Depot.

For Dover Plains—4 P. M., stopping at White Plains and stations north to Dover.

For Williamsbridge—8.15, 10 A. M. 2.30, 4.10, 5, 6.15 and 8.30 P. M., stopping at all stations.

RETURNING WILL LEAVE

Albany—9.10 A. M. on arrival of Northern and Western Trains, stopping at all stations from Chatham to Croton Falls, also Bedford, at White Plains, and Williamsbridge.

Dover Plains—5.45 A. M., stopping at all stations north of and at White Plains.

Croton Falls—6 P. M., stopping at all stations.

White Plains—6.10, 7, 8.20 A. M., and 12.30, 4.15 P. M., stopping at all stations.

Williamsbridge—6.30 A. M. stopping at all stations.

JOHN BURCHILL, Superintendent.

SMITH'S
Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of **SMITH'S AIR LIGHT FOR RAILROADS,** and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks, chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.
In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.
You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,

I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75

AMES IRON WORKS,
OSWEGO, N. Y.,

SOLE AND EXCLUSIVE OWNERS AND MANUFACTURERS, UNDER PAYE'S PATENT.

An imperfect sketch of our smallest size Machine.

PAYE'S PATENT FORGE HAMMER. A HAMMER ADAPTED TO BOTH HEAVY AND LIGHT FORGINGS, with an adjustable stroke of from one inch to three feet. This hammer is adapted to both heavy and light forgings; the force of the blow being entirely at the will of the operator, and for all forgings under six inches, either round or square, is the best hammer now in use, and requires but one-half the power used by every other hammer to do the same work. For an engraving and description of this hammer, see page 1, Vol. V (new series) of the SCIENTIFIC AMERICAN; some valuable improvements have, however, been since made. All communications should be addressed to H. M. Ames, Box 422, New York or Ames Iron Works, Oswego, N. Y.

These hammers may be seen in operation at the Allaire, Neptune, Secor, Delamater, Fletcher & Harrison, Duncan & Cramnton, Anderson & McLaren, Duhurst & Emerson, Charles T. Porter, all in New York City; Joseph Colwell, Jersey City; Wm. White, Newark, N. J.; Providence (R. I.) Tool Co.; Whiting & Wilcox, Kaigh's Point, Phila.; Mallory & Cottrell, Mystic, Conn.; J. Dillion, Rondout; James Horner & Co., Sing Sing; Henry Esler & Co., Brooklyn; James B. Eads, St. Louis, Mo.; Central Railroad Shop, Albany; Burlington, Quincy & Chicago Railroad Shop, Ames Iron Works, Oswego; M. Guinness, Albany; Sweet Brothers, Syracuse.

ERIE RAILWAY.

PASSENGER TRAINS leave, via Pavonia Ferry, from foot of Chambers st., as follows, viz.

7.00 A. M., EXPRESS, for Buffalo, and principal intermediate Stations.

8.30 A. M., MILK, *daily*, for Otisville, and intermediate Stations.

10.00 A. M., MAIL, for Buffalo and intermediate Stations.

4.00 P. M., WAY, for Otisville, Newburgh, Warwick, and intermediate Stations.

5.00 P. M., NIGHT EXPRESS, *daily*, for Dunkirk, Buffalo, Rochester, Canandaigua, and principal Stations. The Train of Saturday, runs through to Buffalo, but does not run to Dunkirk.

7.00 P. M., EMIGRANT, for Dunkirk, and principal Stations.

CHA'S MINOT, *Gen. Sup't*

American Railroad Journal.

New York, Saturday, July 25, 1863.

The Nicaragua Ship Canal.

We are indebted to David Hoadley, Esq., President of the Panama Railroad Company, for a perusal of the Prospectus of the Atlantic and Pacific International Ship Canal Company, limited, with a capital of £2,500,000, in 75,000 shares of £20 each, and 10,000 debentures of £100 each The Board of directors consists of three English and four French gentlemen of great respectability, and the engineers are James Samuel and Edwin Clark, both Englishmen. The objects of the company are set forth as the establishment of a navigable route or canal for the transport of ships and their cargoes between the Atlantic and Pacific Oceans, through Nicaragua and Costa Rica the levying of tolls on all vessels, goods and passengers *in transitu*, and the selling, holding or leasing of certain lands granted to its constructors by the Governments of the above named countries. The exclusive privilege of making this canal with power to levy tolls has been obtained by this company, including a free use of all lands required in its construction, and likewise a grant in perpetuity of the Government and unoccupied land to the extent of 2½ miles on either side of the canal throughout its entire course, together with about 750,000 acres, with power to sell, lease or otherwise dispose of them. Six years time, with an extension to nine years, is accorded for the completion of the work.

During a term of ninety-nine years from the date of its opening to commerce, it will remain the property of the company; it will then revert to the Governments of Nicaragua and Costa Rica. The ports of the canal are to be free forever, and all ships, goods, or persons in transit of any nation whatsoever, are liable only for the payment of the company's tariffs. The local Governments are to afford all aid and protection to the company during the whole term of its occupation, and at their own cost to erect lighthouses of the first class, at both the terminal ports. Perfect neutrality and immunity from risks of war, or political causes are also guaranteed by the local Governments, and are also claimed to be secured by the Clayton-Bulwer treaty of 1850, the British and Nicaraguan treaty 1859, the United States and Nicaraguan treaty 1859, and the French and Nicaraguan treaty of the same year. In return for the franchise so granted to the company an annual payment of 8 per cent. on the gross receipts is to be made jointly to Nicaragua and Costa Rica, which it is estimated will be about $350,000 yearly. The landed estate and properties of all other kinds of the company are to be exempted from taxation for twenty years. From the net proceeds of the work, after payment of the interest and sinking fund, on the debenture capital, a dividend of 6 per cent., and 1 per cent. sinking fund, will be paid the shareholders; the surplus remaining will be divided into two equal parts, one to be distributed as a bonus to the shareholders, the other to be paid over to the *late holder of the grant* for constructing the canal, in consideration of the transfer to the company of his exclusive privilege, and the works, plans, &c., on which £60,000 have been expended. The dues which the company is authorized to levy are fixed at a maximum of 8s. sterling per ton for goods, and 48s. sterling per passenger.

The estimate of annual receipts is based on official returns of the *Board of Trade* and the *Annales du Commerce* for the year 1856, as follows:

Traffic round Cape Horn, say 5,000,000 tons.

Number of vessels, 9 to 10,000.

Daily transit each way, 6 vessels of 500 tons, 3,000 tons.

Dues on freights, £876,000.

RECEIPTS.

Gross receipts	£876,000

EXPENDITURES.

8 per cent. paid Nicaragua and Costa Rica	£70,080
Working expenses	100,000
Interest on debentures and sinking fund.	100,000
7 per cent. on £1,500,000 (shares)	105,000
	£375,080
Surplus	£500,000

The bonus of half the surplus to be distributed to the shareholders would thus with the above 7 per cent. represent a dividend of 22½ per cent. per annum.

The prospectus also states that the Government of Peru has engaged with that of Nicaragua, to furnish a large subscription, doubtless for the purpose of facilitating the transportation of guano. The French Government has also agreed by a convention signed in Paris 1862, that the shareholders can exercise all their rights throughout the French dominions.

ENGINEERS' REPORT.

It appears that the greater part of the years 1859–'60, was occupied in preliminary surveys and studies, under the immediate guidance of Durocher, Chief Mining Engineer of France.

TOPOGRAPHY.

The River San Juan commencing at the east end of the Lake Nicaragua at Fort Carlos, is 114 to 116 miles in length, and empties by two mouths into the Atlantic. The mouth at Greytown is 116 miles from the source at the lake. That of the Colorado branch is two miles nearer, the San Juan making the difference by a curve northwardly. The average width of the river is 150 yards, the depth, except at the several rapids, 16 feet and upwards. The entire fall is 115 feet and is accumulated at the rapids of Toro, Castello and Machucha. To render this river navigable in its entirety, will require four dams and locks of 10 feet lift, and dredging in some other places.

Lake Nicaragua commencing at Fort Carlos is 100 miles long and of great depth.

The River Tipitapa is 11 miles long with a mean depth of 15 feet, and connects Lake Nicaragua with Lake Managua, through the straits of

the former name. Here a canal will be necessary two miles long, with two locks of 10 feet lift each. Lake Managua is 54½ miles in length in the line of the proposed route, and has ample depth.

From this to the Pacific at Port Tamarindo, an artificial work will be necessary, with a cutting of a maximum depth of 33 feet, through alluvium, calcareous earth and slaty rock, about six miles in extent and a continuation from near Pueblo Nuevo of 3¾ miles; the whole number of locks required being 14, with a lift of 11 feet each.

Instead, however, of tugging ships or steamers through on their own bottoms, the engineers propose to use pontoons with a very light draught of water for all vessels drawing between 15 and 22 feet, a method alleged to be in use at the Victoria docks in England, simple, efficient and requiring but little time for the operation.

The estimate of construction is stated as follows:

Works from Tamarindo to Lake Managua	£913,195 00
Works on the Tipitapa	419,655 00
Works on the San Juan dams, locks and bar	366,550 00
Working plant, large and small pontoons, steam tugs, telegraph, harbor works, workshops and machinery	296,000 00
Contingencies	100,000 00
Royalty on hits and pontoons	7,980 00
Engineering and superintendence	99,770 10
Total	£2,203,160 10

Minute and careful surveys are declared necessary before entering on the definitive contracts, which are promised to be forthcoming in the ensuing month of August. Two fine general maps are appended to the prospectus; a general map of the two continents and the neighboring oceans, and the present routes used by navigators; another showing the route of the canal and a profile of the elevations.

All this looks practicable, but we have seen a letter from a gentleman of great experience and high commercial standing in that part of the world, which states some interesting facts not so favorable to the project, viz., that the engineers after seeing the size and construction of the California steamers, already propose a change in the size of the locks, originally estimated for, at 250 feet by 50, so as to make them 400 feet by 100. This will materially increase the cost of construction. So also in the depth of water on the Toro rapids, which instead of being 15 feet as laid down in the plans of the engineers, is only about 36 inches, and that for half a mile distance. Again the soil between Lake Managua and Port Tamarindo, instead of being what it is represented, is actually a deposit of pumice stone and volcanic ashes, which would be no better bottom for a canal than so much quicksand, and this will also require an additional outlay to give it security. The principal engineer on the spot, Mr. Samuel, has even begun to consider whether a railway 135 miles long, from the Colorado to the Bay of Salinas, situated on the southern shore of the Pacific and opposite the island of Tortugas in Lake Nicaragua, would not after all be the most desirable undertaking. We express no decided opinion on this subject, further than to say we have some doubts as to whether the scheme will immediately succeed. On the map it looks well, but we must remember that the politics and power of Louis Napoleon may not be permanent; the Central American Governments are totally unreliable, and the construction of the Union Pacific Railroad will render a great proportion of the contemplated traffic through this canal entirely inexpedient.

Housatonic Railroad.

The receipts and expenses of this road for the years ending December 31, 1861 and 1862, have been as follows:

Receipts:	1861.	1862.
From freight	$125,285 84	$165,023 20
" passengers	79,851 23	90,313 41

Passenger expenses	14,282 72	14,199 91
Freight expenses	22,198 33	22,156 45
General expenses	7,138 01	6,708 60
Miscellaneous	3,986 57	3,474 39
Telegraph	.....	2,984 92
	$124,833 68	$119,218 34
Balance	$100,958 32	$165,266 35

Disbursed in 1862 as follows:

National State and other taxes	$4,415 47	
Rent of Stockbridge and Pittsfield Railroad	31,409 00	
Rent of Berkshire Railroad	42,000 00	
Rent of West Stockbridge Railroad	521 54	
Interest and exchange	911 70	
Coupon interest	15,540 00	
Sundry items charged profit and loss	281 25	
		95,078 96
Net gain		$70,187 39
Dividend on preferred stock, August 25, 1862		47,200 00
Leaving		$22,987 39
To which add balance Dec. 31, 1861		300,357 17
Total amount at credit of profit and loss December 31, 1862		$323,344 56

Compared with 1861, the gross earnings of 1862 show an increase of $59,192 69, with a decrease in expenses of $5,115 34—making the increase in net earnings $64,308 03. The report says:

It will be seen that our expectations have been more than realized in our receipts and expenditures. The operating expenses of our road 124 miles, being only 41.90 per cent. of our gross receipts.

Of the $200,000 bonds, $191,000 have been negotiated at from par to 8 per cent. premium, and the balance ($9,000) have been cancelled. Notwithstanding the reduction in our expenses, the excellent condition of our roadway and equipment have been fully maintained. The embarrassments which have heretofore prevented the stockholders from receiving an adequate remuneration on their investment in this road, having now been removed, solely by its earnings, and the road having been put in complete condition, and well stocked with the best description of locomotives and cars, adequate to its entire business, we confidently expect and believe that hereafter we shall be enabled to make regular semi-annual dividends to the preferred stockholders.

Our trains have been run the past year with great regularity, and the number of miles run has been 189,132.

The equipment of the road consists of 6 passenger and 5 freight locomotives; 15 eight-wheeled and 2 four wheel passenger cars; and 256 cars for freight, etc.

Condensed Balance Sheet.

" U. S. mail	11,550 00	11,550 00
Total earnings	$307,496 02	$391,981 27
Expenses, viz:		
Repairs of road	$45,928 35	$51,871 18
" machinery	32,393 47	54,327 47
Cost of running	45,655 92	50,158 99
Station expenses	14,926 19	22,717 34
General "	14,196 31	18,413 63
Miscellaneous expenses	13,349 35	18,523 51
General office "	10,887 40	11,622 54
Total expenses	$177,346 99	$227,634 66
Net profit	$130,149 03	$164,346 61
Applied as follows, viz:		
Coupons on mortgage bonds		$70,000 00
One year's rent of chattles		20,834 00
Interest on Elmira Basin mortgage		3,500 00
Interest account, including interest on balance of old debt		8,057 16
Purchase of telegraph line and patents		6,000 00
Reduction of debt of the company		55,955 45
Total, as above		$164,346 61

A comparison of the earnings of the past with those of the preceding year, shows an increase of $84,485 25, with an increase in expenses of $50,287 67—making the increase in net earnings, $34,197 58. The report says:

The surplus revenue of the year has been applied, in accordance with our act of incorporation, to the payment of that portion of the old indebtedness transferred to this company on its reconstruction in 1860. By the Treasurer's balance sheet it will be seen that this debt was almost entirely discharged at the close of the fiscal year; there being but $1,209 12 of the scrip outstanding

on the 1st of April last, and but $886 28 of the labor and material debt unpaid; and at the date of this report, May 4th, the scrip has been paid off in full with interest, and but $107 63 remain of the labor and material debt, for which the funds are in bank awaiting the presentation of the company's obligations therefor.

The managers are happy in also being able to state that by arrangements with our lessees, they have provided the means of discharging the entire balance of the indebtedness of the company, including all vouchers for labor of our employees in the month just closed, and for materials on hand on May 1st, 1863.

So that the road may be considered to stand to the stock and bondholders free from floating debt of any description whatever; and with a net revenue equal to the payment of seven per cent. on the preferred stock and five per cent. on the common stock of the company, after providing for the interest on the mortgage debt and the amounts due on the chattle lease.

There was every reason to believe that the revenues of the company from all sources would have continued to increase; and that in October of the present year, the first semi-annual payment of three and a half per cent. on the preferred stock, and on the 1st of January a payment of at least two and a half per cent. on the common stock, would have been made; with a certain prospect of their continuance, and a fair probability of their gradual increase thereafter.

In the meantime, however, events of a most important character have occurred, which have modified entirely the position and the interests of this company; and have materially affected the present and prospective value of its securities on the market.

It had always been a cherished idea of the president and managers of this company, that were it possible, by any method of negotiation, to consolidate the interests of the roads north of Elmira with those of our own road, and so to perfect a chain of communication between the great northern Lakes and the cities of Philadelphia and Baltimore, not only would the prosperity of the whole line be permanently secured, but the commercial interests of those cities would be greatly served.

Several efforts had been made in past years to accomplish this result with the Canandaigua and Elmira and the Canandaigua and Niagara Falls Roads, but they were defeated by the failure of those companies and the absorption of their property into other roads, by purchase under foreclosure of their mortgages.

When at length an unique line was definitely formed from Buffalo to Elmira, as described in our last report, under the title of the Buffalo, New York and Erie Railroad Company, negotiations were opened so soon as practicable, with the President of that company, to endeavor to effect this important object.

For a long time, of course, these negotiations were confidential, and they were more than once imperilled by the efforts of several influential New York parties to secure the Buffalo and Corning line for purposes of their own.

Finally, however, we obtained from President Miller a definite offer, for thirty days, of the permanent lease of the Buffalo, New York and Erie line, at a fixed annual payment for the whole property.

The original proposition was made to our company, provided we furnished a satisfactory guarantor for the fulfillment of the obligations of the lease; it being understood that either the Philadelphia and Reading, the Northern Central, or the Pennsylvania Railroad Companies, would be accepted as sufficient endorsers.

Our intention had, from the first, been to tender the proposition to the Philadelphia and Reading Company; knowing that the laws of trade would naturally cause the Baltimore and Washington traffic and travel to flow by the Northern Central road, except in cases of extreme pressure, when the Southern line could be kept open by way of Philadelphia.

The Philadelphia and Reading Railroad Company, in former years, had been most friendly to our road, and had incurred considerable outlay and even loss in the effort to build up and foster the lake trade by our line. We felt sure that although small at present, comparatively to their other business, yet it was impossible that the vast commerce of the lakes and the trade of Buffalo and Western New York, if properly fostered and developed, were unworthy the attention of even so vast a corporation as their's had grown to be.

Accordingly, we placed Mr. Miller's offer confidentially at the disposal of the President of the Philadelphia and Reading Railroad Company. We asked no lease of our own road whatever, and tendered the whole management of the business beyond Elmira to that company; they having the power to place their own agents at Buffalo and control the destination of the freights to and from the Buffalo and Corning road.

We believe that had they appreciated and accepted this offer, the lake trade would at no distant day have required the exclusive use of an additional track on their road.

We received, however, a prompt reply, stating that "it was not deemed prudent by the President to undertake any thing in connection with the proposition."

Every obligation of duty having been thus fully discharged towards our old allies of the Reading Railroad Company, the President of this company then laid the whole matter before the officers and managers of the Pennsylvania Railroad Company, and formally tendered to that great corporation the control of the business of the Northern Lakes and the Canadas.

Although President Thomson was at the time absent in Europe, yet Mr. Scott, their Vice-president, at once recognized the importance of the subject, and requested a refusal of the proposition to their company, until the time of their President's return.

Meanwhile, however, he entered upon a thorough examination of the whole matter, in its broadest scope and in its minutest details.

Not only the receipts of our own road but those of the Buffalo line, for years past, were rigidly looked into by Mr. Scott, who gave a careful consideration to our evidence in regard to causes which had kept back the Northern Lake trade, and to the direct and indirect advantages that would result from its control by the Pennsylvania Railroad Company.

Whilst we do not propose to recite these various considerations in detail at this time, yet it is necessary to an intelligent understanding of the whole negotiation, that we should here touch upon a few of the more prominent reasons why the officers and managers of that company were inclined to entertain favorably our propositions, and ultimately to unite in the important decision to accept them.

In the first place, the Pennsylvania Railroad Company really controlled, by an ownership of a majority of its stock, the Northern Central Railway. Hence they could so regulate their trains to and from Baltimore and Philadelphia as to unite them at Harrisburg, both for freight and passenger traffic; and they could, therefore, draw on one hundred and ten miles of their main line between Harrisburg and Philadelphia, the whole of our trade to and from the city. Moreover, they would reap a profit, to the extent of their interest in the Northern Central road, on all of its receipts for such traffic on the fifty-five miles between Harrisburg and Sunbury.

Add to this their interest in the lease of forty miles of the Philadelphia and Erie Railroad from Sunbury to Williamsport, and it will be easy to perceive the direct advantages to the Pennsylvania Railroad Company from their control of this Northern trade.

The indirect advantages of such control, however, were of even greater importance to them. During eight or nine months of the year the great lakes are covered with thousands of schooners and propellers, transferring to Buffalo, at an almost inappreciable cost, the grain and produce of Chicago and Milwaukee, for shipment to the Eastern markets.

Although, for want of the facilities above alluded to and for other causes, our line from Buffalo had hardly been able to take out of Chicago one-tenth of the current business to Philadelphia and Baltimore, while the more direct channels, of the Fort Wayne and Chicago and the Pennsylvania Railroad Companies, were overflowing with the remaining nine-tenths, yet it is manifest that, owing to the cheapness of water carriage, the Elmira and Buffalo route possessed, in seasons of lake navigation, the power to control the rates between those points; and, by any concession on a tithe of the trade, to compel a reduction on the entire shipments; and at times of a close competition for business, this power caused serious annoyance to the all rail line.

Frequent complaints in regard to this interference, were made to this company by the general freight agent of the Pennsylvania Railroad; and to avoid reprisals on our Baltimore trade, we often felt it prudent to forego a legitimate competition for Philadelphia business.

Yet while the Pennsylvania railroad Company, through their influence in the Northern Central management, were always thus able to place a certain limit on our interference with the established rates of Chicago freights over their own lines to Philadelphia and Baltimore, yet it was a power that could be used only in extreme cases and must be always unpleasant in its exercise; so that their officers were, from the first, glad to listen to a proposition for the more direct and complete control of this trade.

Even had it been necessary for them to have purchased at a large price this monopoly, it would have been well worth their while to have paid it, by an annual rental of the Buffalo and Corning road greater than its net receipts.

When, however, Mr. Scott, and on his return from Europe, Mr. Thomson, and their board, perceived that the guaranteed revenue demanded by Mr. Miller for that road, was considerably less than its current net income, the whole question simply turned upon the point, whether the intermediate link, from Elmira to Williamsport, could also be obtained by them at a fair annual rental; since of course they felt unwilling to be separated, by the property of a foreign corporation, from a large vested interest north of Elmira.

In this manner the responsibility was forced upon the managers of this company, of deciding the destinies of our road; and of placing final limits upon the values of its various securities.

Of course there could be no doubt that the stipulated deposits for the seven per cent. mortgage bonds of the company, must be regularly made by the lessees; and it was equally apparent that, for the protection of the interests of the stockholders, a satisfactory engagement must be entered into, for the punctual payment of the principal of that mortgage ($1,000,000,) and also of the principal and interest of a purchase money mortgage of $50,000 on the Elmira basin property, when the same should respectively become due.

Neither was there any doubt that, by the obligations of our charter and by the priority of their claims, the holders of the preferred stock of this company were entitled to be secure beyond any contingency, throughout the entire term of the lease, of an income of seven per cent. on the par value of their stock.

Next came a consideration of the claims of the chattle bondholders and scripholders of the old company, whose property was leased to us for years at an improving rental, netting to the bondholders 3½ per cent. the first year, and increasing in a regular ratio to 6 per cent. the last year of the lease, and to the scripholders 5 per cent increasing to 6 per cent., on the par value of their securities respectively.

By an agreement of the majority of these holders, who by the terms of the mortgage, control the action of the trustees of the chattles, an equitable arrangement was effected, by which in case the chattle bondholders could receive 5 per cent. on the par of their bonds, and the scrip-

holders 6 per cent. on their certificates, the old lease might be cancelled and a perpetual lease entered into, on the above terms.

There remained only the common stock to be provided for; and although the managers confidently believed the revenues of the road would so increase that, in prosperous seasons of business, 7 per cent. could be paid to the holders of this stock, yet inasmuch as the Buffalo and Corning road had been leased for less than its current net income, Mr. Scott declined to entertain for the Pennsylvania Railroad Company, any proposition which contemplated an absolute guaranty to our company, of any material advance over our present clear revenue from the business of the road.

Many future contingencies were necessarily considered by our board, most carefully, in the course of the negotiation; among which not the least important were the effect on our business, of the proximate opening of the Philadelphia and Erie road to the lakes, and the sudden announcement of the failure of the negotiations between the Shamokin Valley and Pottsville Company, and the Reading Railroad Company, and the conclusion, by a masterly stroke of policy, on the part of the Northern Central Railway Company, of a permanent lease of the Shamokin Valley road; thus securing a monopoly, both for the Southern and Northwestern markets, of the vast produce of the open collieries of that region, on which we had depended for years for a large portion of our Northern coal trade; and which would thus be undoubtedly withdrawn from our road, in the event of a rival competition at Erie for the Northwestern market.

This company might possibly have effected an arrangement by which, while securing the above revenues to the other interests, a sliding scale of payment, contingent on the trade, would be made on the common stock.

On consultation, however, with the largest holders, we found it to be their unanimous opinion, that their interests would be best promoted by securing to them a fixed revenue of five per cent. on the par value of their common stock.

This was also our own judgment, in which we were confirmed by the opinion of a number of our leading capitalists, that with the prospective inflation of the currency, and the great abundance of money consequent upon the disbursements of the Government during the war, the rates of interest would be permanently lowered, and an absolute five per cent. security would hereafter probably rule at par, in this country.

We came therefore to the final conclusion to tender a permanent lease of our road for $165,000 per annum to the Pennsylvania Railroad Company, or to the Northern Central Railway Company, provided the Pennsylvania Railroad Company would guarantee the various payments, under the lease, directly to all the holders of our securities.

This latter form was preferred, in order to avoid complications with their Western alliances, and in that form the whole negotiation has been finally closed.

In the mean time we were engaged in a negotiation with the Northern Central Railway Company, to be endorsed in like manner by the Pennsylvania Railroad Company, and with the Erie Railway Company of New York, for the joint lease, on a guaranteed payment, of the Buffalo and Corning, and Avon and Rochester roads; which was simultaneously concluded, and the papers duly executed on the date of the execution and mutual delivery of the documents in regard to our own road.

By this latter arrangement the Erie Railway Company and the Northern Central, and Pennsylvania Railroad Companies, bind themselves to maintain in good condition, as a through line, the Buffalo and Corning road, and so to regulate the trains on that road that close connections and adequate provision in every way for the trade and travel, shall be regularly made between Buffalo, Rochester, Philadelphia and Baltimore; a result which has been impossible to attain, notwithstanding every effort hitherto, so long as the New York interest solely regulated those branch roads.

The whole Philadelphia and Baltimore traffic and travel, as well as the large coal and iron trade of the interior of Pennsylvania, are now under the complete regulation of the Northern Central Railway Company, who also control the prices on the Buffalo and Corning road of all coal and iron brought to it from other sources.

The result of all these negotiations may be briefly summed up as follows:

The Pennsylvania Railroad Company have now forever secured to themselves, and to our city, the trade of the Northern Lakes and the Canadas, as well as the absolute control of every possible avenue to Chicago, Milwaukee and the Northwest.

With their right arm resting on Lake Ontario, and their left hand grasping the commerce of the Ohio, the Mississippi and the South west, their position is impregnable, and their prospects magnificent, for controlling the vast commerce of the interior of our country.

This last acquisition was in fact the keystone of the arch, which consolidated and completed all their previous arrangements.

To the owners of our property, the result has been a payment as heretofore, during the term of the mortgage, of 7 per cent. interest to the bondholders, and of the principal sum in about 17 years.

To the holders of our preferred stock, an absolute and unconditional payment by the Treasurer of the Pennsylvania Railroad Company directly, of 7 per cent. for 999 years; payable semi-annually, the first payment to be 2½ per cent. on the first of January next.

To the holders of our chattle-bonds, a payment equally free from any contingency, of 5 per cent., and to the chattle scripholders of 6 per cent. on the par value of their certificates, payable at the office of the Pennsylvania Railroad Company, semi-annually; commencing on April 1st, next; with intermediate payments under the old lease on 1st July and August, as heretofore.

To the holders of our common stock, also an annual revenue of 5 per cent., payable semi-annually, at the office of the Pennsylvania Railroad Company, commencing May 1st, next.

As in the case of the Buffalo, New York and Erie road, the lessees reserve the right of protecting themselves out of the payments to the common stock, from any suits for indebtedness of the company, or deficiencies in its rights of way. No such indebtedness or defects of title are known to exist; and an ample fund will be placed in a trust company on interest, to guard against any possible claims of this kind. So that the managers feel at liberty to assure the stockholders and the public, that in their judgment the common stock of this company is a safe and secure 5 per cent. investment for 999 years.

Whilst in this community, perhaps no further assurance is needed to place these payments beyond any question, than the announcement that the Pennsylvania Railroad Company have guaranteed them, and undertaken directly to make them to the owners of our securities, yet it may not be amiss to state that with characteristic caution and wisdom, the managers of that great corporation have guarded in the most careful manner, their own liability, by a special convention with the Northern Central Company.

By the terms of this contract, it is covenanted by the Northern Central Company, that they will first pledge and place with the Treasurer of the Pennsylvania Railroad, for the purposes of these payments, all the net revenues of the Elmira and Williamsport road monthly; in themselves sufficient to protect the endorsers from loss.

They further engage to set aside for that purpose, their share of any surplus profits over the guaranteed payments, accruing to them under the lease of the Buffalo and Corning road. And should these not prove sufficient to cover such monthly instalments, then to pledge, before any dividends on their own stock, the whole net revenue of the Northern Central road, from Baltimore to Sunbury, to make good such monthly deposits.

When it is known that that company have no floating debt, and last year had a net revenue of over $900,000, and to all this is added the Pennsylvania Railroad guaranty, it is difficult to imagine a more thoroughly first class security than the guaranteed bonds and stock of the Elmira and Williamsport Railroad Company.

The equipment of the road consists of 16 locomotives, 8 first class passenger cars, 3 baggage, mail and express cars, 96 freight and 700 coal cars. Miles run by engines, 287,121. Miles run by passenger trains, 97,156; by freight trains, 64,663; by coal trains, 69,553—total 231,852. Miles run by engines hauling trains, 235,480. Miles run by passenger cars, 237,900; by baggage and express cars, 165,348; by freight cars, 677,369; do., empty, 214,844; by coal cars, 1,084,965; do., empty, 1,030,303—total, 3,410,729. Number of passengers carried, 96,385, of which 71,775 were through and 24,610 way; of the through passengers, 43,404 went south, and 28,371 north; of the way passengers, 13,299 went south, and 11,309 north. Miles traveled by passengers, 6,345,374. Tons of freight carried north, 22,738; do., south, 50,171—total, 72,909. Tons carried one mile, 4,638,915. Tons of coal carried, 78,017; do., carried one mile, 5,969,265.

GENERAL ACCOUNT, APRIL 1, 1863.

Construction account		$2,027,651 90
Elmira basin		50,000 00
Cash on hand		3,474 34
Cash items		11,999 70
Freight and total bills due		4,531 17
U. S. Government	$26,138 25	
Less due to connecting roads	15,832 42	
		10,305 83
Debts due to the company		8,535 55
Materials on hand		17,726 99
		$2,134,225 48
7 per cent. mortgage bonds		$1,000,000 00
Preferred stock		500,000 00
Common stock		500,000 00
Mortgage, Elmira basin		50,000 00
Scrip		1,209 12
Labor and material debt of Elmira and Williamsport R. R. Co.		886 28
Due for wages and material bills		31,607 65
Debts due by the company		37,288 43
Coupons due July 1st, 1863		10,000 00
Rent of chattles (to April 1st, 1863,) due July, 1863		3,234 00
		$2,134,225 48

At the annual meeting of the company held in Philadelphia on the 4th of May, the following ticket was unanimously elected:

President.—THOMAS KIMBER, JR.

Managers.—Ellis Lewis, Charles Macalester, William D. Lewis, Robert J. Mercer, Alexander S. Diven, Wm. C. Longstreth.

Treasurer.—WM. C. LONGSTRETH.

Secretary.—LEWIS P. GEIGER.

Canal Tolls at the Albany Office.

The following is a comparative statement of tolls received at the Collector's Office in this city during the months of May and June, in 1862 and 1863:

	1862.	1863.
Record May	$9,674 49	$7,699 93
Record June	7,729 94	9,136 34
Total	$17,404 43	$16,836 28

West Troy has drawn off a large share of business from the Albany Office, in consequence of the superior facilities found there for towing. But few other than those known as "wild" boats come down the canal from Troy to Albany. All that tow in the Line enter the river at Troy.

Warren Railroad Company.

Subjoined is the Annual Report of the Warren Railroad Company for 1862, showing the operations of the road for that year, and the condition of the company at date January 1, 1862:

Capital stock issued and actually paid in	$1,307 750 00
First mortgage bonds sold, due 1875	600,000 00
	$1,907,750 00

Which is the total cost of the Warren railroad thus far, including lands for right of way, depot buildings, temporary tracks, and expenditures on the Van Ness Gap tunnel up to the time of its completion.

The earnings of the road from January 1st to December 31, 1862, were:

Freight on coal	$166,685 25
Freight on merchandise	56 375 22
Freight on express	1,635 16
Passenger fares	13,492 17
Transportation of mails	1,575 00
Telegraph earnings	126 29
	$239,889 09
The running expenses of the road, including depot agents, telegraphs, new rails and ties to replace those worn out, and other repairs, estimated at 52 per cent.	115,146 77
	$124,742 32
Interest paid on $600,000 first mortgage bonds	$42,000 00
Amount applicable to paying a dividend on the capital stock ($1,307,750) of 6¼ per cent.	81,734 37
	123,734 37
Balance	$1,007 95

—applicable to debts and to paying the Government tax on passengers.

The company owe no debt except some unadjusted fencing and some four cases of unsettled right of way, with a small balance for the use of a portion of the temporary line.

No injury has occurred to any persons on the trains during the year. The Van Ness Gap tunnel was completed on the 8th day of September last, upon which day the first train passed through the same, and since that time the new line has been in use and the circuitous temporary line abandoned. This tunnel was commenced in the year 1854, since which time, or during a period of eight years, the work has been prosecuted with untiring industry with night and day forces.

It is constructed for a double track, and is over 3,000 feet long. The rock is of the hardest kind. By its completion the length of the road is shortened about three miles, which will reduce the current expenses, and dispense with the relieving engines used to assist heavy trains over high grades.

The Warren road commences at a point on the west or Pennsylvania bank of the Delaware river, about five miles below the Delaware Water Gap, at the eastern terminus of the Delaware, Lackawanna and Western Railroad, and, running from that point in nearly an easterly direction across the county of Warren, connects with the Central Railroad of New Jersey at New Hampton Summit, a distance now of 18½ miles.

The total cost of the road, as above stated, is $1,907,750, which is more than $100,000 to the mile, making it one of the most, if not the most expensive road, in proportion to its length, in the country.

The mountains of Warren, as well as her streams and valleys, run north and south, while the road runs east and west, thus making it necessary, in order to bring the grade to 21 feet to the mile, in conformity to those of the New Jersey Central and the Delaware, Lackawanna and Western Railroads, its eastern and western connections, to construct two tunnels—the Vass Gap Tunnel, 1,000 feet long, three miles east of the crossing of the Delaware, and the Van Ness Gap tunnel, 3,000 feet in length, through the Oxford Mountain, about ten miles east of the Delaware—in all over three-fourths of a mile of tunnelling; to bridge the Delaware river, as well as to bridge every stream and fill every valley and ravine from the Delaware and New Hampton Summit.

Delaware & Raritan Canal Co., and Camden and Amboy Railroad and Transp. Co.

Below we give the report of the directors of these companies for the year ending December 31, 1862:

In compliance with the act of the Legislature of New Jersey, approved February 24th, 1852, and a supplement approved March 11th, 1853, the Delaware and Raritan Canal Company, and the Camden and Amboy Railroad and Transportation Co., report:

The capital stock paid in of the Delaware and Raritan Canal Co. was	$1,500.000
Added by authority of the Legislature.	798,400
	$2,298,400
The capital stock paid in of the Camden and Amboy Railroad and Transportation Company was	$1,500.000
Added by authority of the Legislature.	1,210,800
	$2,710,800

The funded debts of the joint companies are:

1st.	An English debt, including three separate loans, now merged, to be extinguished by a sinking fund; extinction complete 1880. Interest 6 per cent. Outstanding, £453,093 6s. 8d., stlg., at $4 84	$2,192,923
2d.	A converted sterling loan, due 1863, now being redeemed, originally for £185.500; five hundred pounds not converted; interest five per cent. Outstanding	798,200
3d.	American loan, due 1864; interest six per cent.; originally $800,000. Outstanding	762,000
4th.	Extra dividend loan, due 1864; interest six per cent.; originally $367,000. Outstanding	334,458
5th.	A loan of $500,000, due 1867; interest six per cent. Outstanding.	500,000
6th.	Loan of 1870, for $800,000; interest 6 per cent. Outstanding.	790,600
7th.	Loan of 1875, for $675,000; interest six per cent. Outstanding	675,000
8th.	Loan of 1883, for $1,700,000; interest six per cent. Outstanding.	1,700,000
9th.	Loan of 1889, $2,500,000; interest six per cent. What has not been issued, burnt by a committee of the Joint Board. Outstanding	867,000
	Outstanding debt	$8,620,181

The Joint Companies have authorized and intend to issue a consolidated mortgage loan for five millions of dollars, to take the place of part of the above loans as they become due, and have arranged for the redemption of the bonds of 1863, and a large proportion of the bonds of 1864, by the delivery of the bonds of the consolidated loan, for which the companies receive a premium.

On the 28th day of January, 1863, in the presence of the trustees of the consolidated loan, a committee of the Joint Board of Directors burned all the bonds unissued: and also those purchased by the companies, which were then on hand at par, amounting to $1,930.143 00.

The Camden and Amboy Railroad and Transportation Company is still under obligations to pay small annuities to persons who have been injured on the road.

The cost of the Delaware and Raritan Canal and appurtenances is $3,971,080 05.

The cost of the Camden and Amboy Railroad and equipments is $6,070,232 83.

The receipts of the Delaware and Raritan Canal Company for twelve months, ending December 31, 1862

	$517.655 63
Expenses	172,091 80
Current net	$345,563 83
The receipts of the Camden and Amboy Railroad and Transportation Company for the twelve months ending Dec. 31, 1862	$2,523.492 72
Expenses	1 140,508 28
Current net	$1,382,984 44

Dividends of ten per cent. on the capital stock of the Joint Companies have been paid in cash during the year.

Commerce of the Port of New York.

We publish to day a tabulated statement of the imports and exports at the port of New York for the last year. They present the most unanswerable proof of its growing greatness, of its unrivalled character as a mart of trade, and its superiority over not only all the ports on the continent, but most of those in the oldest and most commercial countries abroad. The growth of its trade has been unparalleled, and is without rivalship in this particular. It appears from the last official reports within our reach at this moment, that the largest revenue ever derived here from the custom's duties were $64,022.863 while for the Treasury year ending 30th of June last, it was $51,-033,806, and for twelve months ending the 1st of August next it is computed it will be over $68,-000,000. During the six months from the 1st of January last, the total of our exports from this city to foreign ports was $87,793,180; greater by more than twenty-five millions, than it was in 1861 for the same period, and twenty-eight millions more than in 1862. So that in spite of the war our industrial products for export have actually increased in value and amount, so far as the business of this port is the indication of its increase. It will be found to be the same thing we imagine with regard to all the Northern loyal ports. And we have continued to receive and pay for, at this port during the Treasury year ending 30th June last, foreign goods to the value of $180,900,000, being largely in excess of 1862. This ability to consume and pay for foreign goods in time of the greatest war ever carried on in modern times, has very naturally astonished foreign merchants and statesmen, who like the barbarians of old when seeing a venemous reptile fastening on the hand of the distressed and exile Apostle at Melita, and expecting him to fall a victim to its poison, were astounded to see him, unharmed, shake it into the fire. We have also during the fiscal year ending June 30 last, parted with $52,000,000 in specie and bullion against $20,000,000 in 1862, and yet its price has rapidly declined to a comparatively low figure, and it is estimated that we have actually among us in the Banks and in private hands, more than five hundred millions, which on the resumption of specie payments will come into sight and enter into circulation. Certainly no other country on the globe presents such a spectacle of intrinsic power, internal resources, untiring energy, unchecked enterprise and such financial ability. New York stands like a Pharos on the Atlantic coast, and throws a bright and dazzling light over the disturbed waters.

☞ The stock has been all taken up in the Halifax, N. S., Horse Railroad Company, and the construction of the line is soon to be proceeded with.

Railroad Fences.--Obligations of Railroad Lessees.

THE LEGISLATIVE ENACTMENT REQUIRING THE LA CROSSE AND MILWAUKEE RAILROAD COMPANY TO FENCE ITS ROAD. THE LESSEE OF A ROAD IS SUBJECT TO ALL DUTIES IMPOSED UPON THE COMPANY.

The defendant was the lessee of the La Crosse and Milwaukee Railroad. The plaintiff, one McCall, brought this action to recover damages for the alleged killing by the cars, of three mares and a colt. Sec. 15, chap. 122, of the General Laws of 1856, required the La Crosse and Milwaukee Railroad Company to fence its road in parcels, each to be fenced within one year after it was put in operation. The horses were killed while upon the track, and upon a portion of it which had been in operation more than one year, and was not fenced. The suit was brought against the lessee of the road who was operating it at the time of the accident.

The case was appealed from the Circuit Court of Milwaukee County to the Supreme Court of the state, which court now held, that the object of the statute passed by the Wisconsin Legislature in 1856, was not merely to regulate the division fences, as between the company and the adjoining land owners but was to protect the public generally. That if the company neglected to make such fence, beyond the year limited, it would be liable for all damages to animals straying on the track through the want of such fence, without reference to the question whether there was negligence or want of skill in managing the cars at the time of the injury, or to the question whether such animals were rightfully or wrongfully on the adjoining land from which they escaped on to the track. That the lessee of a road, operating it for his own benefit, takes it subject to all duties imposed upon the company for the benefit of the public, and incurs the same liability for damages occasioned by the want of fences, that the company would.

The following is the opinion, in full, rendered by the Supreme Court of the State of Wisconsin, at the decision of the case.

PAINE, J.—This action was brought to recover of the defendant, as lessee of the La Crosse and Milwaukee Railroad, damages for the alleged killing, by the cars, of three mares and a colt belonging to the plaintiff. After the plaintiff's evidence was closed the defendant moved for a non-suit, which was granted.

The evidence upon the fact of the horses having been killed by the cars was circumstantial, but it was clearly sufficient to have been submitted to the jury. Still if the plaintiff's right of action depended upon showing negligence or unskilfulness in the management of the train at the time of the killing, perhaps there was not sufficient evidence upon that point to warrant the court in submitting the question to the jury. But even assuming that there was no negligence or want of skill in managing the cars at that time, we are still of the opinion that the non-suit was improperly granted.

The law made it the duty of the company to fence every part of the road within one year after it should commence operating such part. It was admitted that the part where the horses, if killed at all, had been in operation more than a year, and was not fenced. That being so we think that the company would have been liable for any animals killed on that part of the track, without reference to the question whether there was negligence in managing the cars at the time of the killing, or to the question whether such animals were rightfully or wrongfully on the adjoining land from which they had passed upon the track. That they would be liable to the owner of the adjoining land for injuries to his animals escaping on the track from a defect of fences which the company was bound to make, there can be no question. The case of Corwin *vs.* Railroad Company 3 Kem, 42, goes to the full extent of holding the company liable, not only to the owner of the adjoining land, but to the owner of cattle which were trespassers on such adjoining lands. The counsel for the defendant contended that this decision was based upon the positive provision of the statute in New York, which after requiring companies to fence their roads, enacted that until such fences were erected, they should be liable for all damages done to animals on the track. Our statute does not contain this provision, and hence it is said that decision was inapplicable. But we do not think the decision in New York was placed upon the provision as to the liabilities of the companies. It is true the court mentions the positive provisions of the statute as was very natural where the statute contained those provisions. But we think the result would have been the same, if it had simply imposed the duty to fence, and said nothing about its liability for not doing it. For we understand it to be a general principle that where the law imposes upon any person a specific duty for the protection or benefit of others, if he neglects to perform that duty he is liable to those for who's benefit it was imposed, for any damages sustained by reason of such neglect. It is upon this principle that those cases proceed, which have held the company liable to the owner of adjoining lands who's animals escaped therefrom on to the track, for want of fences which the company was bound to make. In most of that class of cases there was no positive provision that the company should be liable, but the liability was left to result from an application of the general principle before stated. And there being no room for doubt that the company was found to fence for the protection of the adjoining land owners, whenever their cattle had been injured for want of such fence, the companies have been held liable whether the statutes contained an express provision that they should be so or not.

The only question upon which it would seem there could be any room for doubt, is whether the statute requiring the company to fence, was intended merely to regulate the division fences between the company and the adjoining land owners, for the convenience of the latter only, leaving the liability of the company, with respect to all others, as it would have been at the common law, or whether it was designed for the protection of the public generally who's animals were liable to get upon the track. This question is suggested in the case in 3 Kernan, and the court come to the conclusion that the latter was the object of the statute. That conclusion seems to us more especially true in this state, many parts of which are thinly settled, and where it is almost the invariable custom for the settlers to allow their animals to run at large, fencing only their plowed lands. The rule of the common law requiring every one to fence in his own animals, under pain of their being considered trespassers if they entered even on the unenclosed lands of another, if strictly enforced, is often productive of hardships in a new country like ours. For this reason it has never been adopted in some of the states. It has been held to be the law in this state, though it is generally disregarded by common consent, in the newly settled parts of the State. And this fact, which was undoubtedly well-known to the legislature, as well as the frequent hardships resulting from the strict enforcement of the common law rule, leads our minds to the conclusion that it was the intention of the statute, in requiring the railroad company to fence its road, to repeal the common law rule, and to protect not only the adjoining land owners, but the public generally. This conclusion being arrived at, the liability of the company for damages to animals not belonging to owners of adjoining lands, is as clear as its liability to the owner of such lands. The protection of both being equally within the scope and object of the statute, they are equally entitled to an action for damages occasioned by a neglect of the duty imposed. And it is as unnecessary in the one case as in the other, for the statute to say expressly that the liability should exist. Having imposed the duty, the liability for damages occasioned by the neglect of that duty is implied though not expressed. The case of Fawcett *vs.* Railroad Company 71 E. C. L. 609, fully sustains our conclusion, and is a complete answer to the objection, that the plaintiff's horses were trespassers on the lands adjoining the railroad. We think the opinions in that case entirely applicable to the questions presented here.

And we have no doubt that a lessee in possession of the road incurs the same liability as the company. He takes the road, if at all, subject to the duty imposed on the company for the benefit and protection of the public. There would be no safety in any other rule.

The judgment is reversed and a new trial ordered.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending July 10, 1863, was as follows:

Passengers	$18,902 21
Freight and live stock	19,521 77
Mails and sundries	1,494 32
Total	$39,918 31
Corresponding week of 1862	40,894 82
Decrease	$976 51

The earnings of the Grand Trunk Railway for the week ending July 4, 1863, were:

Passengers	$31,324 97
Freight and live stock	4,300 00
Mails and sundries	41,109 45
Total	$76,734 42
Corresponding week, 1862	63,094 12
Increase	$13,640 30

The earnings of the Milwaukee and Prairie du Chien Railroad for the 1st week in July have been $18,358 56
Same week, 1862 24,897 24
Decrease $6,538 68

The earnings of the Michigan Southern Railroad for the 2d week of July, 1863, were $41,644 80
Do., 1862 41,150 39
Increase $493 41

The earnings of the Chicago and Alton Railroad for the 2d week of July, 1863, were:

Passengers	$12,831 08
Freight	26,362 50
Sundries	1,085 33
Total	$40,278 91
Same week last year	24,048 40
Increase	$16,230 51

The earnings of the Milwaukee and Prairie du Chien Railroad for the 2d week of July, 1863, have been $17,814 70
Do., 1862 26,959 78
Decrease $9,145 08

The earnings of the Chicago and Northwestern Railway for the 2d week in July, 1863, were $24,226 72
Do., 1862 22,009 03
Increase $2,217 69

The earnings of the Cleveland and Toledo Railroad for the 2d week of July, 1863, were $20,608 00
Same week, 1862 16,534 00
Increase $4,074 00

The earnings of the Galena and Chicago Union Railroad for the 1st week of July, 1863, were:

Freight	$24,922 21
Passengers	8,524 21
Mails	1,300 00
Total	$34,746 42
Same week, 1862	54,547 38
Decrease	$19,800 96

Railroad Earnings--Monthly.

The receipts of the New York and Harlem Railroad for June, 1863, were $116,898 92
June, 1862. 97,337 23
Increase $19,561 69

The earnings of the Erie Railway for June, 1863, were $760.868 05
June, 1862. 528,841 65
Increase $232,026 40

The earnings of the St. Louis, Alton and Terre Haute Railroad for June, 1863, were:

Passengers	$42,902 04
Freight	75,763 56
Mail	1,782 00
Miscellaneous	3,331 16
Total	$123,778 76
June, 1862	68,194 04
Increase	$55,584 72

The earnings of the Chicago and Alton Railroad for June, 1863, were:

American Railroad Journal

Saturday, July 25, 1863.

Stock Exchange and Money Market.

A visible change has taken place within a few days past in the aspect of our public affairs. We speak with profound convictions and perfect candor, and would not disguise the truth from any considerations of expediency, if we could. Our military progress is onward; Vicksburgh, Port Hudson, Yazoo city and Jackson have fallen. Morgan's guerilla invasion in the North West has ended in the capture of nearly his entire force; Charleston is likely to fall before the scientific and courageous assaults of the ablest officers we have either in the Engineer or Ordinance departments, and throughout the Confederacy is heard the cry of despondency. In support of these views we have the recent work of Col. Estvan, a foreign officer of ability, but fairness, who has been serving in the Southern armies, which he entitles "War pictures from the South," and which convey a complete idea of its condition. We are forced to the conclusion, by his own statements that the

Confederacy has never been anything more than a shell, and he asserts that only from the feebleness of the men in power at Washington, and their political discussions is it, that peace was not conquered long ago. We also learn from this interesting work, that a love for the Union still largely permeates the South, and that the unity represented to have existed there, in favor of its independence, has really never existed.

The question then presents itself to the consideration of men of business, what is to be the result of an early pacification, on their present pursuits; how will it affect our national and state finances, the quotations of shares, stocks and securities, the operations of the Banks old and new, and the general interests of the country. Many persons grounding their opinions on experience and past history, suppose that a crash of some kind is sure to take place, and that great financial embarrassments will inevitably ensue. Such has been the past, say they, under similar circumstances, and such must be the future. We think these predictions should be received with many grains of allowance. For example. If the price of gold had fallen suddenly from 175 to 125, we could easily see that enormous losses would have suddenly fallen on the holders of this commodity, and in the prices of the articles which sympathise with it. But it so happens that the fall has been gradual, and the loss been distributed among a great many through a large space of time, so that no one class has been compelled to suffer by the decline. There has been a general distribution of this loss, and it is probable the blow has been so divided in its force and effects, that no body is hurt to any great or ruinous extent. Singularly enough, the inflation of the paper currency has not been followed by a general inflation of the prices of numerous leading and necessary articles of domestic origin. At this very moment when it is in large excess of former amounts, and beyond all former experience, we find our own peculiar staples not much if any above the prices of the years of peace. Notwithstanding the supplies needed for our army and navy, most of the necessaries of life are held at only a reasonable advance, while many others rule at about the same as heretofore. So we perceive the difference between value as represented in paper and gold is not so great as to cause any serious derangement, even on a return to specie payments. Indeed production in most of them has been going on *pari passu* with expansion. The cereals especially show an enormous increase everywhere, and so of many other products.

With regard to the Railway interests, we think they can meet any change of the nature supposed, with perfect ease. They have earned enormously beyond the aggregate of former years, are generally out of debt, and what have they to fear? If their receipts are to be estimated hereafter at a specie valuation, their dividends will have a corresponding value. They will comparatively and practically stand as well as they did. The philosophical doctrine of compensation will strictly apply to their affairs; what they lose in one way they will gain in another. A seven per cent dividend will keep them up to the grade of par stocks, throughout all changes, while the natural and constant increase of business with the increase of population, will be a sure basis of future stability.

Those merchants who have large stocks of certain kinds of goods on hand, may lose by the the competition of cheaper ones on the return of peace, and the opening of new consignments, but it must be remembered, that the National debt, the tariff and internal taxation will for years to come have their effect on prices and prevent any such contingency as a free and untaxed market; so that the merchants trading even in the most capricious of articles are in no danger of any instantaneous decline. It will turn out that the margin of profit now insisted on by thousands of dealers, may be nominally but not really affected by a peace.

In Government stocks there is a steady absorption and a constant demand. How can they fall where the interest is payable in gold? Peace could do no more than is now done to give them favor in the eyes of capitalists and *rentiers*. We are not surprised then to learn, that half a million a day and more, is the average of the last few days. No such investments as these are to be picked up in any other Bourse in the world.

Nor is this payment of interest in gold by the Government, fictitious, or effected by new borrowing, a practice well understood among embarrassed or insolvent nations. The receipts of the New York Custom House for the last year are published at sixty-eight millions of dollars, an amount which will itself meet the interest on over a thousand millions of national debt, while the proceeds of the internal revenue may be set down at more than twice that sum; so that a large balance remains for a sinking fund and the expense of the civil and military list. As regards the legal tender notes, now received and circulated in preference to all others, both because of their being everywhere at par and available for all purposes, and of their being the only issues which have not been counterfeited, and require no examination as they pass from hand to hand, these are likely to remain out as long as the Government chooses, or else will be paid into the Treasury for its loans, to become the foundation of the new National Banks. The whole of this circulation is very likely to be absorbed in this way, at no distant period. We see then no formidable obstacles to a recurrence to our old condition, even with an early return to it. And above all, let us not forget that a thousand millions of debt or more will be found but a slight weight on the resources, the energy, the enterprises, the earnings, and the inexhaustible material of this great country, which at the close of this century, which most of our readers will live to see, will have a population of one hundred millions of souls. The reproduction of capital will go on in a still greater degree, for it is not for six or seven per cent. per annum, the American toils, but the doubling and trebling of his capital every few years, a consequence as sure as the investment, wherever it is made in our thriving cities, on our fertile plains and our great river and lake ports, or in the culture of new lands.

It has been said that our City Banks have been thinking of resuming specie payments. That it might be done we have no doubt, but the advantage is very uncertain. That they now are able to redeem their bills is beyond question for they have few out. If they resumed, they would in fact become bullion banks and be compelled practically to transact their business in gold and silver. Many think this would be advantageous to the country, while in the meantime the Government and the people would reciprocally be benefitted by the exclusive circulation of the greenbacks, so called.

On the whole then we see that out of the nettle, danger, we are plucking the flower, safety. We hope to see very soon the whole industrial and commercial interests of the country largely successful; when our swords and bayonets will be turned into ploughshares and pruning hooks, and the dreadful bolts shot from the mouths of our cannon, will be converted into rails, over which we may glide on our way in peace, security and friendship.

The directors of the Erie Railway Company have declared a dividend of 3½ per cent. free of Government tax, on both the preferred and common stock, both payable at the Treasurer's office in this city on the 10th of August. The transfer books will be closed on the 25th inst., and re-open on the 11th of August.

The New York Central Railroad Company have declared a dividend of 3½ per cent., the same as in February, on $24,000,000 capital stock. The official notice has not yet appeared, but we presume the books will close as usual on 31st July, and the dividend paid on 20th August.

Coupons on the bonds of the Atlantic and Great Western R. R. Co. will be paid on presentation by McAndrew & Wann, 12 Pine st., New York.

The New York and New Haven Railroad Company has declared a quarterly dividend of $3 per share, free of tax, payable August 1.

The Connecticut River Railroad Company has declared a semi-annual dividend of 3 per cent. free of Government tax, payable August 1, to stockholders of the 18th inst.

The New Jersey Railroad and Transportation Company have declared a semi-annual dividend of 5 per cent. free of tax, payable Aug. 1.

The Delaware and Raritan Canal and Camden and Amboy Railroad Companies have declared a semi-annual dividend of 5 per cent., free of Government tax, payable on the 21st inst. at their offices in Philadelphia and New York.

The Philadelphia and Trenton Railroad Company have declared a dividend of 5 per cent. free of tax, payable July 21st.

The West Philadelphia Passenger Railway Co. have declared a semi-annual dividend of 5 per cent. payable on the 24th inst. clear of all taxes.

The Green and Coates Street Railway Company have declared a semi-annual dividend of $1 40 per share of $15, equal to 9 per cent.

The Girard College Railway Company have declared a semi-annual dividend of 50 cents per share of $16, equal to 3 per cent.

The Arch Street Railway Company have declared a semi-annual dividend of 60 cents per share of $20, equal to 3 per cent.

The Thirteenth and Fifteenth Street Railroad Company have declared a dividend of 75 cents per share of $15, equal to 5 per cent.

The Second and Third Street Passenger Railway Company have declared a semi-annual dividend of 5 per ct. payable on the 25th inst. clear of tax.

Interest on the first mortgage bonds of the Hudson River Railroad Company, due August 1st, will be paid at the office of the treasurer of the company.

The Pittsburg and Boston Mining Company (Cliff Mine), have declared a dividend of $5 per share payable on August 3rd.

The American Coal Company have declared a dividend from the earnings of the company for six months ending 30th June ult., of three per cent., free of the U. S. income tax, payable on the 10th of August.

The Quincy Mining Company have declared a semi-annual dividend of $6 per share from the earnings of the past six months, payable on the 5th of August, at No. 51 Exchange Place. Massachusetts holders will be paid at the office of T. Henry Perkins, No. 19 State st., Boston, until September 1.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Atlantic and Great Western Railroad.

We learn from the Urbana *Gazette* that Mr. Ellis, one of the engineers on the Atlantic and Great Western Railroad, has arrived there, to enter upon the work of constructing the road between Galion and Urbana. Mr. Ellis says that four thousand hands are at work on the road, and that it is the intention of those having charge of the matter, to have it in running order by the first day of January next.

Cape Cod Central Railroad.

The Directors of the Cape Cod Central Railroad have agreed upon a location for their line, and have employed Mr. Thomas Doane of Boston to make a survey of the route. He commenced operations on the 15th inst. The proposed road will run from the terminus of the Cape Cod line at Hyannis to Orleans, and for the present will end there, although it is intended, ultimately, to build it to the extreme end of the Cape at Provincetown.

Marietta and Cincinnati Railroad.

The receipts of the Marietta and Cincinnati Railroad for six months were:

	1863.	1862.
January	$38,202 72	$33,904 04
February	53,778 25	26,252 04
March	60,450 03	25,891 25
April	64,805 82	38,579 40
May	35,825 66	32,667 54
June	40,706 50	29,383 48
Total	$292,859 03	$186,667 75
Increase for six months		106,181 28

Eastern Railroad in New Hampshire.

The annual meeting of this corporation was held at Portsmouth, N. H., on the 14th inst., Hon. B. T. Reed of Boston, President, in the chair. The old board of directors, consisting of Messrs. B. T. Reed, Robert W. Hooper, W. H. Y. Hackett, W. M. Shackford and E. P. Bancroft were unanimously re-elected. Mr. Hackett, a committee appointed to procure authority from the Legislature of New Hampshire, reported that the legislature of that State had passed an act authorizing the union of the Eastern Railroad with this corporation, after which the meeting dissolved.

New York and Harlem Railroad.

The New York and Harlem Railroad Company have made arrangements for the consolidation of their whole debt, by the execution to the Farmers' Loan and Trust Company, of a mortgage on their entire road, including the city track, and by the creation of a sinking fund providing for its gradual extinguishment and ultimate payment. This consolidated and sinking fund mortgage is payable thirty years from 1st day of February last, with interest at six per cent per annum, payable semi-annually.

Holders of the Second Mortgage Bonds of this Company, due August 1, 1864, or other mortgage bonds, may, on or before the 1st day of August 1863, exchange their bonds for the Consolidated and Sinking Fund Mortgage Bonds.

The company will, on the 1st day of August ensuing, pay off their unsecured Bonds as follows: Bonds due August 1, 1859; Bonds due February 1, 1861; Dover Extension 6 per cent Bonds due 1857 and 1861; Redemption Bonds due 1861 and 1863. Interest will cease on and after August 1, 1863.

Commerce of New York.

The Foreign Trade and Gold Table at the port of New York for the commercial year recently closed are now made complete by the Custom-house figures of the trade of the last month of June. The results are given below. The comparison with the previous commercial or fiscal year is highly favorable for the season just ended. The increase in the general Export movement from the port of New York is over *seventy-six millions of dollars*: two-thirds of which increase is derived from the Domestic Produce of the Atlantic States, and twenty-three millions from the Bullion of California. At the same time the increased Import movement into this port (being three-fourths of the Import trade of the whole country) is *forty-six and a half millions*, leaving nearly thirty millions in favor of the Export line to make up for the difference of Exchange.

The import entries of Foreign Goods at New York for the month of June, 1863, were:

In dutiable goods consumption direct	$6,328,581
Dutiable goods warehoused	5,377,885
Free goods	1,122,092
Total entries	$12,828,558
Against June, 1862	12,275,174
Increased importation	$553,384

There was also entered during the month, Foreign Specie of the value of $61,023, against $61,023 same month last year. The value of Foreign Goods of the previous importation, withdrawn from bonded warehouse during the month, is $3,830,337 or $1,547,548 less than went into bond of the fresh importation.

The export clearances from New York, in June, 1863, were:

In domestic produce	$14,780,072
Foreign goods re-exported	347,447
Gold and silver	1,367,774
Total clearances	$16,495,293
Against June, 1862:	
In produce	$10,048,832
Foreign goods	415,929
Specie	9,867,614
	20,332,375
Decreased exportation	$3,837,082

We annex a summary by months of the trade of the Treasury year, ending June 30, comparing the corresponding months of the previous Treasury year:

IMPORT OF FOREIGN GOODS AT NEW YORK.

	1862–'3. From July 1.	*vs.*	1861–'2. From July 1.
July	$20,134,000		$7,942,000
August	14,212,000		7,836,000
September	18,027,000		6,074,000
October	13,157,000		7,884,000
November	10,200,000		8,740,000
December	12,994,000		9,263,000
January	15,638,000		12,457,000
February	11,814,000		13,810,000
March	18,807,000		18,631,000
April	17,278,000		13,827,000
May	14,128,000		14,138,000
June	12,829,000		12,275,000
Total year	$179,218,000		$132,877,000
Foreign specie	1,683,000		11,691,000

EXPORT OF DOMESTIC PRODUCE FROM NEW YORK.

	1862–'3. From July 1.	*vs.*	1861–'2. From July 1.
July	$14,030,000		$9,553,000
August	13,046,000		9,652,000
September	14,735,000		9,878,000
October	19,477,000		12,906,000
November	14,060,000		14,110,000
December	14,805,000		13,660,000
January	14,329,000		12,053,000
February	17,781,000		10,078,000
March	16,138,000		8,985,000
April	11,582,000		8,002,000
May	13,184,000		9,838,000
June	14,780,000		10,049,000
Total year	$177,967,000		$128,764,000
Total re-exported	8,755,000		5,103,000
Together	$186,722,000		$133,867,000

Value of imports at New York from foreign ports for the month of January:

	1861.	1862.	1863.
Entered for consumption	$3,178,837	$6,763,396	$8,741,227
Withdrawn from warehouse	2,513,278	4,356,252	2,881,531
Free goods	2,825,665	2,552,050	2,413,649
Specie and bullion	7,262,229	163,658	101,906
Total entered at the port	$20,780,009	$13,835,356	$14,138,313
Entered for warehouse	8,560,680	3,141,725	4,482,794

Value of imports at New York from foreign ports for seven months ending January 31st:

	1861.	1862.	1863.
Entered for consumption	$82,893,646	$29,026,370	$65,579,632
Withdrawn from warehouse	19,331,540	24,599,415	20,442,377
Free goods	14,661,464	15,620,057	11,495,247
Specie and bullion	15,427,722	11,342,403	979,628
Total entered at the port	$132,314,372	$80,588,245	$98,496,934
Entered for warehouse	34,386,963	15,541,913	26,286,903

Duties received at New York for seven months ending with January:

	1861.	1862.	1863.
6 mos. ending Dec. 31	$17,637,802.21	$11,129,646.35	$27,190,728.64

Mississippi and Missouri Railroad.

Another link has been added to the steadily lengthening chain yet to unite the western banks of the Mississippi with the eastern slopes of the Missouri. Yesterday the mail and passenger trains on the Mississippi and Missouri Railroad commenced their regular trips to Grinnell, Poweshiek county, the largest and most important town on this road west of Iowa City. This extension will be hailed with satisfaction throughout the central portion of Iowa, as an additional assurance that the long looked-for boon of a direct railroad communication with the East is rapidly approaching realization. In reaching Grinnell, the Mississippi and Missouri Railroad has not only obtained access to a thriving Iowa town, peopled by an intelligent and enterprising citizenship, and the seat of Iowa College, an honored institution of learning, but has also reached the heart of what is certain yet to be the great sheep raising and wool growing region of the State. Not that sheep and wool will be the sole products of the fruitful area of which Grinnell is the centre; since Poweshiek and Jasper and adjoining counties are destined to be rich in all that constitutes prosperous agriculture.

Newton, twenty miles beyond, is the next point to be reached, and if the directors of the road fully comprehend the inviting field for commercial enterprise offered by this prosperous county seat, they would spare neither effort nor money to hasten the extension, which, when completed, must so largely increase the business of the road. No similar length of road will yield so large an income as will that from Grinnell to Newton. It should be completed at the earliest possible period.—*Davenport Gazette, June 20th.*

The Franklin Railroad.

The Franklin branch of the Atlantic and Great Western Railway is complete and a regular business will soon be under full motion. It is proposed, we understand, to extend the road to Oil City, and by this means open another direct railroad communication with the oil region. The Jamestown and Franklin Railroad is also nearly completed. The iron is now being received at points along the line and the track will soon be laid. The latter road, in connection with the Erie and Pittsburg Railroad at Jamestown, forms a short route between the oil regions and the Ohio river, and the three roads together open a direct line of communication with the rich iron and coal deposit of Western Pennsylvania, both in the direction of Pittsburg and this city. The Jamestown and the Erie and Pittsburgh, the parties composing which company have purchased some ten thousand acres of coal land, which is underlaid with

three veins of mineral coal, measuring in depth fourteen and a half feet in the aggregate, which land comprises all that is accessible or valuable along their line of road. It is the intention of the company to supply Buffalo, Cleveland and intermediate points with a superior quality of coal for shipping, manufacturing and commercial purposes. —*Erie Dispatch, July* 11.

Atlantic and Great Western Railway.

The annual election of Directors in the A. & G. W. R. R. Co. of Ohio, was held at Franklin Mills, Portage Co., on the 14th inst., and the following directors were elected: Marvin Kent, Franklin Mills; Wm. H. Upson, John H. B. Rose, Akron; Gaylory Church, Wm. Reynolds, Meadville; Joel W. Tyler, Warren; Jacob Crall, Ashland; Thos. W. Kennard, Alexander McAndrew, Samuel Wann, Chas. Seaton, J. H. Chamberlain, Samuel L. M. Barrow, New York City.

The Board of Directors immediately organized by electing the following officers, viz: President, Marvin Kent; Vice President, T. W. Kennard; Secretary, Joel W. Tyler; Treasurer, E. P. Brainard; Assistant Secretary, William H. Grout; Executive Committee, Marvin Kent, T. W. Kennard, Wm. Reynolds, Wm. H. Upson, Samuel Wann.

The lease of the Cleveland and Mahoning Road was ratified by the stockholders. The reports presented show the work of extending the road west of Akron to be progressing rapidly. Two thousand men are now employed, and more will be added. The line will soon be open to Bridgeport, Wayne Co. One hundred locomotives have been contracted for with the Jersey City Locomotive and Tyre Works, and fifty of them are to be finished as early as possible.—*Cleveland Herald.*

The Hempfield Railroad.

The Legislature of West Virginia is now considering a bill proposing the grant of power to sell the Hempfield Railroad to the Pennsylvania Railroad Company, with a view to having it completed to Greensburg, and thus made a feeder to the Pennsylvania road. The bill has passed the lower house, but is objected to in the Senate, on the ground that the Constitution of the new State of West Virginia prohibits the grant of additional corporate privileges until the notice is given under regulations to be established by a law not yet passed.

Utica and Black River Railroad.

A conference between the Directors of the Utica and Black River Railroad, and the Lewis County Railroad Committee, was held in Utica, on the 10th inst., at which John Thorn, of Utica, was Chairman, and J. L. Leonard of Lowville, Secretary. The report of the engineer and estimates of the different routes, show the cost of the river line from Boonville to Lowville, to be $450,000—the Rome line to Turin on the old Utica line to Lowville, $442,000—and the Rome line to Martinsburg and thence to the Utica line, $430,000. During a recess, the Directors of the Railroad Company adopted the following resolution:

Resolved, That the Directors of the Utica and Black River Railroad Company do hereby locate the extension of said railroad from Boonville to Lowville, by the river route; provided that the inhabitants of Lewis county donate the right of way, and execute a good and valid obligation agreeing to pay to the Utica and Black River Railroad Company fifty thousand dollars, then this Company will take measures for building and extending the road from Boonville to some point near Lyon's Falls, and on like condition of donation of right of way and the further sum of fifty thousand dollars, said Company will take measures to extend the road from Lyon's Falls to Lowville, the money to be paid by installments, as the work progresses, and on call by the Directors.

The people of Lewis county have now a definite proposition from the Railroad Company, and it now remains to be seen whether they will raise the amount required and secure the road. The amount is small compared with the benefits to be derived, and ought to be raised in a short time.—*Lowville Journal.*

Cities Liable for Property Destroyed by Mobs.

It is well enough to understand that all municipalities are liable for all property destroyed by mobs. The provision is as follows:

"Whenever any building, or other real or personal property shall be destroyed or injured in consequence of any mob or riot, the city or county in which such property was situated, shall be liable to an action by or in behalf of the party whose property was thus injured or destroyed, for the damage sustained thereof. * * * And whenever any final judgment shall be recovered against any such city or county. * * the treasurer * * shall pay the amount of such judgment, to the party or parties entitled thereto, and charge the amount thus paid to said city or county."

Three Rivers Branch Railroad.

The Directors of the M. S. & N. I. R. R., have decided not to rebuild the road from Constantine to Three Rivers, Mich., allowing other parties to take possession and put the road in repair. The following is the resolution of the Board:

Resolved, That this Board considers it inexpedient for this company to rebuild the Three Rivers Branch Road, or to construct any additional branch road north of Three Rivers. But this company is prepared to make arrangements with any other parties who may be brought to us by the same.

It is quite probable the citizens of Three Rivers and adjacent country will raise the necessary means and put the road in a state of complete repair; in which case the M. S. Company will undoubtedly furnish the rolling stock.—*Toledo Blade.*

☞ The wires of the American Telegraph Line have been extended to the White Mountains, (N. H.) An office has been opened at the Profile House, in the Franconia Range, and another at the Crawford House, in the Notch.

THE ERIE RAILWAY COMPANY,
No. 184 West st., New York, July 17, 1863.

DIVIDEND.—The Directors of this Company have declared a DIVIDEND, from the earnings of the road for six months ending 30th of June, ultimo, of THREE AND ONE HALF PER CENT. on the PREFERRED STOCK, the Company assuming and paying the Government Tax out of the undivided earnings belonging to the Preferred Stock Account for the year ending 30th of June, 1862.

Also, a DIVIDEND of THREE AND ONE-HALF PER CENT. on the COMMON CAPITAL STOCK, free of the United States Income Tax.

Both payable at the Treasurer's office, Erie Place, on the 10th day of August next, to the registered holders of stock at the closing of the books.

The Transfer Books of both Preferred and Common Stock will be closed at the close of business on SATURDAY, the 25th day of July, and be re-opened on the morning of TUESDAY, the 11th day of August.

3t30 HORATIO N. OTIS, Secretary.

New York.

SUBSTITUTE FOR
CAR DUCK.

Kingman's Car Covering.

THIS is a heavy Canvass imbedded in a coat of Elastic Mastic or Paste which is applied directly to the boards of the top of the car, and then thoroughly painted with three or four coats of paint, thus making a covering VERY MUCH LIKE CAR DUCK, but at this time at half the cost. It is now successfully used by many Railroads and Car Builders. Directions and particulars sent when requested. This Mastic and Canvass for sale by

WILLIAMS & PAGE,
67 Water street,
March 1863. Boston.

PACIFIC RAILWAY.

THE undersigned will receive proposals to furnish four thousand (4,000) tons of railway iron (or any part thereof) for the track of the first section of the Union Pacific Railway, Eastern Division. The iron to be of American manufacture, of the best quality, and to be delivered either at Leavenworth or Kansas City. Communications for further information to be addressed to the undersigned or to SAMUEL HALLETT & Co., 58 Beaver st., New York. Terms, cash on delivery.

J. C. FREMONT,
Pres't Union Pacific Railway, E. D.

NEW YORK, June 9, 1863.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, July 1, 1863.

THE Board of Directors of the ILLINOIS CENTRAL RAILROAD COMPANY have THIS DAY declared a DIVIDEND of TWO (2) PER CENT. free from Government tax, upon all the shares and canceled Bonds. Scrip standing in the name of holders on the books of the Company at the close of business on the 20th day of July instant, payable on and after the 1st day of August upon all shares the calls upon which shall have been duly paid; and that the dividend upon the full paid stock shall be a discharge of the interest payable thereon on the 1st day of January next, and payable upon surrender of the coupons issued therefor. The transfer books of the Company will be closed from the afternoon of the 20th to the morning of the 30th July.

4t27 THOMAS E. WALKER, Treasurer.

I. KENDRICK,

STATIONARY MACHINERY, LOCOMOTIVE ENGINES
RAILROAD CARS, COTTON SPINDLES,
SEWING MACHINES AND WOOLEN FACTORIES.
ALSO,
MAYSVILLE COAL OIL
FOR BURNING,
PARAFFINE WAX,
PARAFFINE WAX CANDLES, AND
ROLLING MILL GREASE,
FROM PURE CANNEL COAL.

P. S.—All Oils warranted to answer the purpose represented.

☞ Particular attention given to orders for shipment in cans or barrels.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We warrant it equal in every respect to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a superior article for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by DELAFIELD & BAXTER, 104 Wall st.

The above CEMENT is used in most of the fortifications building by government. 6

NEW YORK, HARLEM & ALBANY R. R.

CHANGE OF TIME.

SUMMER ARRANGEMENT, commencing MONDAY, May 18, 1863, Trains will leave Twenty-sixth street Depot:

For Albany—10.30 A. M., stopping at Williamsbridge, White Plains, Bedford, Croton Falls, and all stations north to Chatham, Chatham Centre, Kinderhook, and Schodack, connecting with New York Central R. R. for all points west, and with the Northern R. R. for Saratoga and all points north.

For Croton Falls—8.15 A. M., stopping at all stations.

For White Plains—8.15, 10 A. M., 2.30, 4.10, 5 P. M., stopping at all stations.

For White Plains, 6.15 P. M., from White Street Depot.

For Dover Plains—4 P. M., stopping at White Plains and stations north to Dover.

For Williamsbridge—8.15, 10 A. M. 2.30, 4.10, 5, 6.15 and 8.30 P. M., stopping at all stations.

RETURNING WILL LEAVE

Albany—9.10 A. M. on arrival of Northern and Western Trains, stopping at all stations from Chatham to Croton Falls, also Bedford, at White Plains, and Williamsbridge.

Dover Plains—5.45 A. M., stopping at all stations north of and at White Plains.

Croton Falls—5 P. M., stopping at all stations.

White Plains—6.10, 7, 8.20 A. M., and 12.30, 4.15 P. M., stopping at all stations.

Williamsbridge—5.30 A. M. stopping at all stations.

JOHN BURCHILL, Superintendent.

SMITH'S
Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of **SMITH'S AIR LIGHT FOR RAILROADS,** and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1.57 per gallon.

Cost per hour, 5 cents.

Cost of wicks, chimneys, per year, $4 80.

Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.

In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.

You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

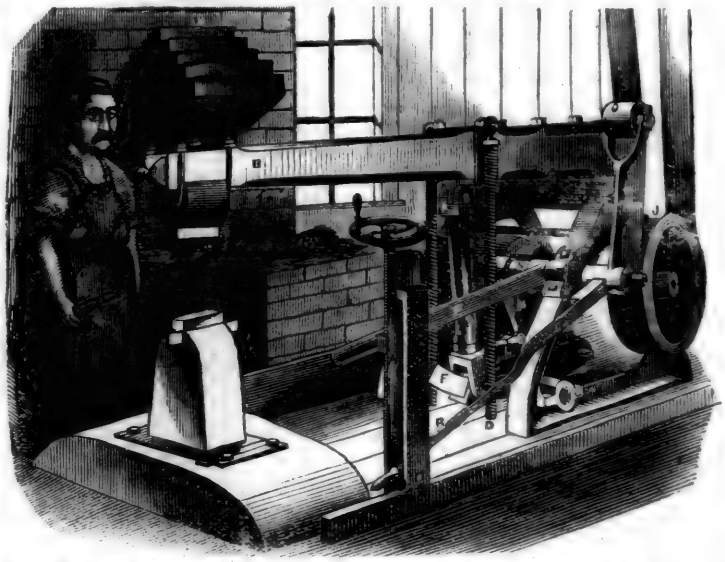
DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,

I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

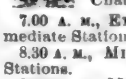


Further information may be obtained at the office of the Company, **21 Nassau st.,** or by addressing

CHAS. W. WELSH,
Secretary.

AMES IRON WORKS,
OSWEGO, N. Y.,

SOLE AND EXCLUSIVE OWNERS AND MANUFACTURERS, UNDER PAYE'S PATENT.



An imperfect sketch of our smallest size Machine.

PAYE'S PATENT FORGE HAMMER. A HAMMER ADAPTED TO BOTH HEAVY AND LIGHT FORGINGS, with an adjustable stroke of from one inch to three feet. This hammer is adapted to both heavy and light forgings; the force of the blow being entirely at the will of the operator, and for all forgings under six inches, either round or square, is the best hammer now in use, and requires but one-half the power used by every other hammer to do the same work. For an engraving and description of this hammer, see page 1, Vol. V (new series) of the SCIENTIFIC AMERICAN; some valuable improvements have, however, been since made. All communications should be addressed to H. M. Ames, Box 422, New York, or Ames Iron Works, Oswego, N. Y.

These hammers may be seen in operation at the Allaire, Neptune, Secor, Delamater, Fletcher & Harrison, Dunca & Crampton, Anderson & McLaren, Duhurst & Emerson, Charles T. Porter, all in New York City; Joseph Colwell, Jersey City; Wm. White, Newark, N. J.; Providence (R. I.) Tool Co.; Whiting & Wilcox, Kaigh's Point, Phila.; Mallory & Cottrell, Mystic, Conn.; J. Dillion, Rondout; James Horner & Co., Sing Sing; Henry Esler & Co., Brooklyn; James B. Eads, St. Louis, Mo.; Central Railroad Shop, Albany; Burlington, Quincy & Chicago Railroad Shop, Ames Iron Works, Oswego; M. Guinness, Albany; Sweet Brothers, Syracuse.

ERIE RAILWAY.

PASSENGER TRAINS leave, via Pavonia Ferry, from foot of Chambers st, as follows, viz:

New York, Saturday, August 1, 1863.

Krupp-Steel Wheels and Axles for City Cars.

The celebrated Krupp Steel Works, represented by Messrs. THOS. PROSSER & SON, of this city, seem possessed of a multifarious genius, for the production of novelties and improvements in steel. In addition to heavy ordnance, of which they are manufacturing large quantities for several European nations; together with the celebrated breech loading apparatus, so largely patronized by Russia, Italy and Prussia; and besides their other improvements in heavy shafting for steamers as well as in locomotive tires and axles, they now present to the world a new article adapted for use on city railroads. It is a combination of the single flange wheel and axle, made of the Krupp steel. It is much lighter than the wheel now in use, and of course subserves a greater economy in draftage. The great resistance offered by the Krupp steel to friction, by its properties of homogeneousness, toughness and resilience, would seem to render is a *sine qua non*, where there is such a maximum of friction as is presented by all city railroads. The constant application of the brakes and the great atmospheric changes to which the wheels are subjected make an enormous item in wear and tear. The spectacle presented by city railroad shops, of worn, broken and fractured wheels, is a grave commentary on the existing condition of things. The Krupp city car wheels and axles are offered to supply this defect; and if the steel of which they are made, will act as well in this application as it does in locomotive tires, axles and shafting, an important end will be gained. As the reputation of the Krupp steel is unimpeachable, as far as we know, it is reasonable to expect that its serviceable character will be equal, however applied. The specimens of the wheels under notice have recently arrived and may be seen at the works, 28 Platt street.

Colorado.—Its Mines, Climate and Resources.

We have, on many occasions, brought to the notice of our readers the immense resources which the United States possess in the gold territories. There is no other country in the world which has such possessions; or if they had, could develop them so rapidly. It is ours which has poured from its horn of plenty not only illimitable and incalculable supplies of the cereals, but of the precious metals; and of the latter, as has been truly said, notwithstanding the large amount we have thrown into circulation all over the world, we have yet had but the "dust and the croppings." The largest mountains, the most extensive ranges of them on the globe, are with us not only monuments of the great works of the Almighty, but the Treasury from which He is to supply the human family with coin, and to keep up the supply fully, for their use, convenience and consumption. Colorado is especially to occupy the front rank in this wondrous region of the precious metals; and the latest travellers, as well as the earliest settlers unite in their expressions of astonishment at what they have witnessed.

This territory, comprising 100,000 square miles, was organized on the 2d of March, 1861, and soon afterwards the well-known and accomplished Col. WILLIAM GILPIN, of Philadelphia, distinguished by his bravery in the expedition of Col. Doniphan during the Mexican war, his frequent explorations across the western plains and mountains, and his valuable contributions to their geography, hydrography and mineralogy, was appointed Governor of the territory. He had scarcely reached Denver, the seat of Government, before an invasion of the rebels of Texas commenced, who rushing into New Mexico threatened to take possession of the whole eastern slope of the Sierra Madre, and of the gold bearing regions. By rapidly organising a force of three regiments, about three thousand men, not only was Colorado preserved, but New Mexico saved, when there was scarce a Union force there large enough to make a respectable picket. These services were requited by a removal, on charges which were acted on before Col. Gilpin ever knew of their existence, and which he has since scattered to the winds.

The population of the territory is now estimated at over 70,000, and is rapidly increasing. The capital, Denver City, is situated on the South Fork of the Platte river, near the border of the great American desert, so called, in the Northern Central portion of the territory; Central City is near the base of Pike's Peak, a thriving town of 10,000 inhabitants. Colorado City is situated on an affluent of the Arkansas river, and Nevada City, as well as the last named, is in the vicinity of Pike's Peak. There are also considerable settlements on the western slope of the Snowy Mountains in the region of the silver mines. Seven rivers rise in or pass through the territory flowing in various directions for hundreds of miles, contributing to the floods of mightier streams.

The first discoveries of gold were made as early as 1858, by two companies of explorers from Georgia and Kansas; but the valuable locations were not made until May, 1859, on the head waters of the Clear Creek, an affluent of the South Fork of the Platte, near the site of Denver. Here it was found after a time, that what was called fool's gold, or sulphuret of iron, (iron pyrites,) and at first utterly disregarded, was actually rich in gold, and so it deserved its name, though given for a different reason; because the fools did not know its value. It was also discovered that the quartz lodes grew richer as they deepened, and a vast impulse was given to the mining business. The Gregory diggings alone produced five millions of dollars in the year 1862.

The product of the past year is estimated at twelve millions of dollars, and for the ensuing one at twenty-five millions. The product of silver is also extensive on the western slope, and recently immense beds of coal have been discovered near Denver City, having a two-fold importance, in furnishing supplies of fuel for the steam engines of the crushing mills, and for the locomotives of the Pacific Railroad, which will undoubtedly either with its main line or a short branch, reach Denver.

Within a few days past an elegant and graphic description of Colorado has appeared, from the facile pen of Mr. Fitz-Hugh Ludlow, of this city, who, in company with the artist Mr. Bierstadt, has been making an exploration of the territory. From this we learn that the Flora of Colorado is one of the most remarkable in the world; the plants are of numberless variety, their bloom, beauty and fragrance unsurpassable, and their varieties quite new to the botanists. We are happy to learn that we are to have valuable contributions to this department of knowledge, from a skilful and learned collector. The birds of this region are equally rare and new, and a description of these with well preserved specimens is also forthcoming. It has been for years asserted by Col. Gilpin, that we shall find in this region large supplies of precious stones. Mr. Ludlow describes whole forests of stumps of trees, petrified into jasper and agate which he himself saw, of the most beautiful shades and structure, enough in a single place he visited, to make watch seals for all the sons of men. Other travellers find a species of opal; vitrified quartz or semi opal.

Gypsum beds also exist, and mineral springs which surpass Vichy and Pyrmont, alkaline, sulphurous, chalybeate, and most of them so strongly charged with carbonic acid, that they are known as the boiling springs. The scenery is sublime. The buttes or sand rock isolations are found assuming the most remarkable forms, like columns, urns, palaces, pillars, caves, arches and fortifications, rising some of them five hundred feet above the plains. In Amory's notes we have some good lithographic plates of such curious objects. We give the following description of what Mr. Ludlow poetically styles "the Garden of the Gods."

"As we turned into the great gorge between the foot-hills and the main range, one of the most glorious spectacles in all mountain scenery burst full upon us. Three miles below us, and borrowing for its logs and adobe all possible enchantment from distance, Colorado City basked soft and yellow in the slanting afternoon sun; its back ground the mighty dome of the Cheyenne, falling away into clear distance through marvellous purple gradations, its bold relief overawing our eyes as its subtle alternations of light and shade soothed them. In the very hollow of the sky, upon our western hand, and too ethereal to be thought of as belonging to geography, the blue pinnacle of Pike's floated pure and cool under its snows—like a good mountain that had died and gone to heaven. As we whirled down the splendid floor of the valley (for, like all the roads in Colorado, it is rather floor than highway) we were closely walled upon the right and left by successive tablets of red and creamy rock, thin strata of gorgeously colored schist, which the molten outburst of the granite sierra had up-ended from their original planes to an absolute perpendicular. We have nothing like these in the East. Metaphor alone describes them. They are not sandstone. They are a strange porcelain from the pottery of the gnomes—a composite rock, part clay, part lime, part flint-sand—the white a paste of grit mixed with calcareous powder fine as gypsum dust, and, indeed, running into beautiful gypsum beds close by; the red still further complicated by mixtures of iron oxides and smoothly ground aluminum. Fancy rock strata thus composed, rising abruptly from the flat plain to a height of five hundred feet, precipitous on both their broad sides, and no thicker in proportion to their altitude than the plain tablets of a graveyard; fancy them still further polished by the whirling sands of this wind-swept territory, until their surfaces shine like white marble or pure blood-red jasper, and their edges weathered into all manner of curious profiles, here simulating a griffin, there a Goddess of Liberty, here an eagle and a dolphin supporting a shield after the old heraldic style, and everywhere some strange likeness which needs no vivid imagination to decipher its meaning; fancy two of the loftiest red tablets set *vis-a-vis* to make a gate-way whose lintels tower four hundred feet against the sky, framing a distant view of Pike's blue forehead between them, and in one of these vast portal butments, channel out a cavern with painful access, but expanding to a hall one hundred feet in length—then, if you *can* have fancied it, you will have the best idea which I can give you of "The Garden of the Gods." For this is the befitting name of the valley through which we passed down to Colorado City."

Passing by the agricultural resources of the territory, which are found in portions of it adequate to the support of a large population, and the climate healthful and delicious, so much so that physicians as a class find but small chance of success in their profession in Colorado, we return to the consideration of its resources in gold and silver, which are its most remarkable features. Col. Gilpin as well as Gov. Evans is of the opinion that it will be found the richest metalliferous region on this continent. What it wants is railway connection with the East, and this the East even from purely selfish considerations, should establish without delay. And for this reason if no other. All the gold will be exclusively sent in our direction, and New York may if it chooses, become its principal consignee. At San Francisco, the gold products are within the reach of all who carry on an ocean traffic with California. All ships, all men may take it from thence and carry it away in return for their merchandise. But Colorado being a territory with no outlet to the sea, no ocean coast, will inevitably be under the necessity of sending over the Pacific Railway and consigning to American correspondents all that it gathers from its mines. So that we shall have the exclusive pre-emption, if we may so call it, of its gold. This is an important advantage to our commerce and to the national resources.

A private mint was established not long since in Colorado, and it was of immense service to the people of the territory and especially the miners, who were sure of obtaining the value of their gold dust. An act was passed by Congress to purchase the establishment, and we believe an appropriation of $75,000 was made for the purchase. Those to whom the business was entrusted have practically done nothing. There is no mint at all, public or private. The miners are now at the mercy of speculators, gamblers and traffickers and are cheated out of their earnings without mercy. The whole thing looks very much like a job, and the Secretary of the Treasury should correct this without delay.

Mining will always be attractive. Simple tools can execute a large work. The miner pays his own wages every night. He has not to wait for seed time or harvests, nor for the returns of his crops, or the advance of prices. This idea prevails among large bodies of laboring men, and our gold mines will never want laborers.

Colorado is at this moment offering to this class, as well as to capitalists, the largest inducements.

Michigan Central Railroad.

The earning and expenses of this road for the years ending May 31, 1862 and 1863, have been as follows:

Earnings:	1862.	1863.
From freight.....	$1,559,060 98	$1,982,757 35
" passengers....	724,915 48	889,682 28
" miscellaneous.	77,264 92	73,120 92
	$2,361,241 42	$2,946,560 55
Expenses, viz:

" buildings.	51,907 96	100,923 24
" locomoti's	97,528 94	107,096 09
" cars.....	116,682 23	122,107 28
Locomotive service.	54,095 78	62,099 04
Train " .	42,733 76	47,176 71
Station " .	259,777 33	276,741 57
Fuel " .	111,592 16	110,239 42
Oil and waste.....	19,050 39	24,126 78
Stationary, etc....	11,908 44	15,594 27
Local taxes.....	82,837 81	82,386 20
Telegraph.....	12,489 45	12,025 80
Miscellaneous.....	25,842 78	38,084 15
	$1,149,152 94	$1,272,359 72
Net earnings...	$1,212,088 48	$1,674,200 83

Compared with the previous year, the gross earnings of 1862-'3 show an increase of $585,319 13; with an increase in expenses, including taxes, of $123,206 78—making the increase in net earnings $462,112 35.

The expenses properly chargeable to operating the road (not including taxes), are $1,189,973 52, or about 40.4 per cent of the gross earnings. In 1862 they were 45.1. In 1861, 51. In 1860, 53.7. In 1859, 53.4. In 1858, 59.6. In 1857, 64.6.

The increase in the earnings of the past over those of the preceding year is equal to 24.79 per cent. The increase in expenses (less taxes) 11.60 per cent.

The earnings from passengers, which had fallen off for five successive years, now show an increase of $164,766 80, or 22.73 per cent over last year. The local passenger earnings having increased 34 per cent, and the through 10 per cent.

The increase in earnings from freight was $424,693 37, or 27.24 per cent.

With the rates remaining almost precisely the same, an increase of $585,319 13 has been earned with an increased expenditure, exclusive of taxes, of only $123,658 39—leaving of the former sum $461,660 74 as net increase. The report says:

The proportion of the gross earnings consumed in operating expenses has again been reduced, and in a much greater ratio, than that of the increase in rates. The average rate per passenger per mile has fallen from 2.51 cents to 2.49 cents, a reduction of about one per cent. The rates per ton per mile have been increased from 1.91 cents to 1.99 cents, a rise of about four per cent., while the proportion of operating expenses has fallen from 45.1 to 40.4, or 11.6 per cent.

The earnings from the transportation of wheat and flour have fallen off $47,595 40, or about 9 per cent., while the total local freight earnings have increased 20 per cent., showing a largely increased development of the miscellaneous way traffic and a better promise for the future than could result from a greater reliance upon what was once regarded as the main staple of the State.

Since the present number of trunk lines to the West have been in use, the business of the country drained by them has so largely increased, that all can command a fair traffic without resorting to that fierce competition, which is always more potent to degrade the rates and destroy the profits than to change the course of the traffic, and we trust the large volume of business destined to pass over these various lines may be hereafter conducted upon more legitimate business principles than governed it when all were in strife over the smaller quantity of past years. No well informed authority regards the magnitude of the business as other than fully sufficient, if properly conducted, to be largely remunerative to all the capital employed, and no sound reason exists why they should not hereafter be permanently prosperous.

With the average rates for freight per ton per mile below two cents, and the average rates for passengers, including emigrants, below two-and-a-half cents, and three-fourths of the freight in one direction, the line has been worked for 40.4 per cent. of its gross earnings, and this, while through all of the year the expenses have been somewhat, and a portion of the year very much increased by the higher prices of all kinds of materials and labor.

The road and property of the company have been well kept up, its machinery and rolling stock in quite as good order as at any previous period, and, as will be seen by the Superintendent's report, a full share of renewal expenditures have been made during the year, and some increase of property with no charge except to revenue account.

The total number of tons of freight moved has been 564,827. Average number of tons carried per train per mile, 130.43. Average distance freight is carried, 176 miles. Freight earnings per mile, 1.99 cents. Tons carried one mile eastward, 73,826,089, do., westward, 25,678,889—total tons carried one mile, 99,504,978. The proportion of tonnage carried eastward is 74,193 per cent, do., westward, 25,807 per cent.

The total number of passengers carried was 447,361, of which 387,672 were way and 59,689 through. Of the way passengers, 196,726 went east, and 190,946 west. Of the through passengers, 26,930 went east, and 24,762 west. Number of emigrants, 7,997. Arerage number of miles traveled by each passenger, 80.31. Passenger earnings per passenger per mile, 2.49 cents. Passengers carried one mile, 35,928,072.

INCOME ACCOUNT.

Balance from previous year.....		$312,193 78
Receipts from freight.	$1,986,114 88	
" pass...	890,690 70	
" miscel..	71,112 16	
		2,947,917 74
Total		$3,260,111 52
Expenses, as above.....		$1,272,359 72
Dividend 3 per cent July 1, 1862...		181,713 00
" 5 " Jan. 1, 1863...		302,860 00
U. S. tax on dividend and passengers		28,385 03
Annual payment to sinking fund...		84,500 00
Interest and exchange account.....		617,657 24
Balance to new account.....		772,636 53
Total.....		$3,260,111 52

The receipts as stated above, are $1,357 19 more than the earnings, showing that amount less of earnings to be outstanding at the close of the year.

From which it appears that after paying two dividends, one of three per cent and one of five per cent, and making the annual payment to the sinking funds, and deducting the usual disbursements for operating, local taxes and interest, there stands to the credit of income account the sum of $772,636 53. The balance of this account at the same period of last year was $312,193 78—showing a net increase of $460,442 75.

There has not been any change in the bonded debt during the year, nor has any floating debt been incurred. The capital stock has been reduced $274, by the purchase of fractional scrip to that amount. Sundry items properly belonging to construction, amounting to $958,337 99, have been transferred to that account, which now stands at $13,805,576 16. The bonded debt amounts to $7,999,488 89; capital stock $6,057,436—total, $14,056,924 89.

The track, buildings, bridges and rolling stock of the line are in every respect in as good a condition as at the commencement of the year.

The equipment of the road consists of 98 locomotives; 85 passenger, 23 baggage, 1,297 freight, and 262 gravel and other cars.

The number of miles run by locomotives with passenger trains has been 511,226; with freight trains, 762,877; with working trains, 80,979; with training trains, 93,476—total 1,448,558.

The relations between this road and the Louisville, New Albany and Chicago railroad remain the same, the North division of that road, 91 miles, being stocked and operated by the Michigan Central, and to the satisfaction of both parties it is believed. This contract expires on the 30th of September next.

The general business of the road was never in a more healthy condition than now, and along the entire line, and country tributary to it, the promise of full crops was never more flattering than at the present time.

American Iron Bridges.

This interesting topic was introduced to a meeting of the Institution of Civil Engineers, London, on the 5th of June, in a paper read by Mr. Zerah Colburn:

The great number of timber bridges in America might be accounted for from the fact that the first cost of the truss, or superstructure, of a timber bridge of any given span, was generally less than one-half that of an iron bridge of the same strength. Iron had been occasionally employed since 1835, but only within the last ten or twelve years to any extent.

Cast-iron tubular arches, including one of 80 feet span, were erected from the design of Major Delafield, about the time when similar arches were adopted, by the late M. Poloncean, in the construction of the Pont du Carrousel, over the Seine. Major Delafield's arched ribs were elliptical in section, the transverse vertical axis being about four times the length of the conjugate axis. In 1858 an aqueduct bridge was erected at Washington, by Captain Meigs, in which the two arched ribs were formed of water-pipes, through which the water flowed. The span of this bridge was 200 feet, the rise being 20 feet. The pipes were circular in section, 4 feet in diameter inside, and 1½ inch thick. This bridge was 28 feet wide over all, and the roadway was of timber, supported on wrought-iron spandrils. The bridge was tested with the arched ribs filled with water, and with a load of 125lb. per square foot upon the roadway, making the total weight on each rib about 350 tons. The thrust of one-half of this weight upon each abutment would be about 470 tons, corresponding to a strain of two tons per square inch of sectional area of iron in the pipes. This strain did not include the pressure of the water in the pipes, which were proved to 300lb. per square inch. These examples were, so far as the author was aware, the only iron arches yet completed in the United States; and with the exception of a few pivot bridges, and one or two ornamental bridges, in the Central Park at New York, they comprised nearly all the cast-iron bridges in that country.

There were a small number of plate, or boiler iron bridges. The first was erected in 1847, in place of a timber bridge, by Mr. Millholland, on the Baltimore and Susquehanna (now the Northern Central) railroad. This was 50 feet span, and the two girders were each 6 feet deep, the two sides of each being formed of plates ¼ inch thick. Between the sides at the top a timber 12 inches square was bolted as a compression member, and the top was further strengthened by two wrought-iron bars, 5 inches deep by ¾ inch thick, while four similar bars were riveted along the bottom of each girder. The sides were stiffened by stay-bolts, enclosed in cast-iron distance pieces, 12 inches apart from centre to centre. The centre of each girder was placed exactly under the rails, which were spiked to the timber forming the compression member. The breaking strain of the pair of girders was equal to 250 tons of distributed load, and the weight of the bridge was 14 tons. When completed, this bridge was coupled at each end to a railway waggon; and was slung by chains to a temporary timber truss. It was then taken 19 miles by railway, run exactly over the place it was intended to occupy, the existing timber bridge was cut away, and the girder bridge lowered with the permanent way ready for traffic, the whole

operation not having caused an interruption of more than two hours.

Having been long accustomed to trussed timber bridges, American engineers, in adopting iron naturally employed it in trusses also. But, before describing the various forms of iron truss bridges, the strength of American iron was referred to. It appeared, from a vast number of experiments made by the United States Ordinance board, that there was but little iron in any American cast guns of a less tensile strength than 11 tons per square inch; and in 1851, the author had himself seen portions cut from 11-inch guns, weighing 6 tons 15 cwt., tested up to 16.14 tons. The transverse breaking strength of a large number of samples of re-melted iron, when reduced to the English standard of a bar 2 inches deep and 1 inch wide, resting on supports 3 feet apart, varied from 27¾ cwt. to 48.1 cwt., the general strength being 34 cwt. The minimum crushing strength of the irons experimented upon was 37¾ tons, and the maximum 77¾ tons. Experiments made by the Franklin Institute, twenty-five years ago, showed the mean tensile strength of cast iron at the first melting to be 9⅓ tons; and the iron now employed by engineers in Philadelphia bore from 7.14 tons to 10.2 tons. In 1858 Mr. Albert Fink tested the iron used in the construction of a large bridge on the Louisville and Nashville railroad. When the results were reduced to bars 2 inches deep by 1 inch wide, on supports 3 feet apart, the minimum breaking weight was 29½ cwt., mean 32.68 cwt., maximum 39 cwt. This iron was a mixture of two-fifths cold blast, two-fifths hot blast, and one-fifth scrap. With regard to wrought iron, the experiments made by the United States Board of Ordinance gave a tensile strength varying from 17 tons to 33.3 tons per square inch; and those of the Franklin Institute a mean strength of 26 tons for plate iron. At the present time 27 tons was generally expected of American boiler plate. Other experiments were also quoted to the same effect; and it was remarked that, from what had been stated, American engineers might work up to rather higher strains than were commonly allowed in this country. The high qualities of the best American iron were due to the purity of the ore and of the fuel employed in the manufacture. In bridges of less than 150 feet span, even when loaded with a weight of 1.34 iron per lineal foot of single line, the strains did not exceed 3.57 tons per square inch on wrought iron in tension, and 4.46 tons per square inch on cast iron in compression.

Of the iron truss bridges that were described, all had certain peculiarities in common, distinguishing them from the trussed structures adopted in this country. In almost every case the compression members of American iron trussed bridges were of cast iron cylindrical or octagonal pipes. These simply abuted, end to end, against each other; and although means were employed to prevent lateral motion of the ends, flanges and bolts were never introduced for that purpose. Another, and one of the most important peculiarities was the depth of truss, a depth exceeding that employed by English engineers, except in rare instance, as at Chepstow and at Londonderry. American engineers considered a depth of one-eighth for spans of 200 feet as only moderate; for shorter spans depths one-seventh and one-sixth were common; and in the case of one bridge of 120 feet clear span the depth was 23 feet, or nearly one-fifth of the span. It should, however, be observed that, in some of the American trusses, the arrangement of the tension members was such that, if the depth of the truss were not considerable, the diagonals would be inclined at hardly more than 8 deg. or 10 deg. from the horizontal; in which case a very large quantity of material would be employed in proportion to the supporting power obtained. No American iron or timber bridges were ballasted; nor had they any floor, only a footpath of planks. In bridges having the rails at or above the level of the top chords, known in the States as "deck bridges," parapets were seldom employed; and the trusses were often so short a distance apart, that a passenger, on looking out of a carriage window, was unable to discover any support beneath the train. In no bridges of two or more spans were the trusses made continuous over a pier; each span being always treated as a bridge by itself.

One of the earliest iron trusses adopted in the States was a trellis, known as Rider's Bridge. Cast iron T, or angle irons, were employed in compression, and wrought-iron bars in tension. These bridges were so slightly proportioned that they occasionally broke down, and the author was not aware that the plan was now adopted in new structures.

A detailed description was then given of a Murphy-Whipple bridge, having a span of 125 feet, with the railway supported on the lower chords. It was for a double line, and there were trusses 14 feet apart, from centre to centre, the strength of the middle being about one-half greater than that of either of the others. The trusses were 23 feet deep, or 0.184 of the span. The top chord was formed of cylindrical cast-iron pipes, and the bottom chord of a chain of square bars, 10 feet 5 inches in length between the centres of the eyes. Upright cast-iron posts, placed at the same distances apart, divided the truss into panels, and as the posts were in two lengths, they were each trussed by four round rods, to prevent lateral failure. The diagonals were in pairs of square rods, and were formed also as eye-bars, grasping pins 2½ inches diameter in the top chord, where the pipes abutted upon each other, and pins 3½ inches diameter in the bottom chord, thus connecting the links, or bars, of which it was composed. The diagonal tension bars only crossed each other in two panels on each side of the centre of the truss. The top and bottom chords were braced horizontally, with transverse and diagonal bars. The railway bars were supported upon longitudinal timbers, which rested upon transverse wrought-iron rolled beams. The total weight of the superstructure complete was 102½ tons, or 8 cwt. per foot of single line. With an additional distributed load of 3,000 lb. per lineal foot on each line, the tensils strain at the middle tension rods would be 4.27 tons per square inch in the middle truss, and 3.12 tons per square inch in the outer trusses; but, with a train on a single line only, the ordinary working strains did not exceed 2½ tons per square inch in tension, nor 3 tons in compression.

In 1861 an iron bridge was erected on the line of the Pennsylvania railroad, across the Schuylkill at Philadelphia. It had two clear spans of 192 feet each, and one pivot span, or turning bridge, 192 feet long. The construction was similar to that just described, but the truss was only 19 feet deep. The upright posts, or struts, were of wrought iron, so rolled that when two bars were put together they formed an octagonal tube. The top and bottom chords of the turning bridge were of wrought iron rolled beams, so that either might resist extension or compression. The three spans for a single line contained an average of 5 cwt. of wrought iron, and 7½ cwt. of cast iron per lineal foot. The net cost of the bridge, exclusive of masonry, was 8,144*l.* 10s. or 14*l.* 4s. per lineal foot; the wrought iron costing 22*l.* 15s. 6d., and the cast iron 6*l.* 11s. 3d. per ton.

The pivot was of a kind extensively employed for turntables. It consisted of a fixed and of a moveable cast-iron disc, both grooved to receive a number of steel rollers, each turned to the frustra of a double cone. A circular railway was laid around the pivot, but the wheels only bore upon it when the bridge was not truly balanced on the rollers. With a load of 14 tons balanced upon one of these bearings, the whole was revolved by a weight of 3¼lb. hung over a pulley, and connected by a cord to the periphery of the turntable.

The form of truss introduced by Mr. Wendel Bollman was next noticed. In it the load upon each panel was transferred directly to the ends of the truss, through a pair of straight suspension bars, doing duty only to that panel. With the exception of one pair of suspension bars, supporting the centre of the bridge, the bars in each pair were of unequalled length, and their lower ends were attached to the upper extremity of a compensating link, in order to allow for contraction and expansion. This bridge could not alter its form under unequal loading. A bridge upon this plan at Harper's Ferry, on the Baltimore and Ohio, had four parallel trusses for a double line, and a clear span of 124 feet. The span was divided into eight panels, and the depth of the truss was 17 feet 6 inches. The top chords were each formed of a single line of octagonal cast-iron pipes, and the vertical posts were also of cast iron. The strains upon the various parts of the truss, caused by the weight of the bridge and of a load of 1¼ ton per lineal foot, were 2.8 tons per square inch in compression in the top chord, and varied from 4.46 tons per square inch in tension in the longer suspension bars to 7.14 tons in the shorter bars. Mr. Bollman had stated that this bridge was tested with a moving weight of 122 tons of locomotives on one span of single line, or nearly 1 ton per lineal foot, and that the deflection at a speed of 8 miles an hour was 1⅜ inch at the centre.

The iron bridge designed by Mr. Albert Fink had been more extensively adopted than any other on the railways of the United States. In this bridge a pair of diagonal tension bars connected the foot of the principal strut or king-post in each truss, with the ends of the top chord. This pair of diagonal bars supported one-half of the whole weight of the truss and its load. Each half span was sub-divided by a strut, and two diagonal tension bars extended, one to the nearest end of the top chord, and the other to the top of the centre post. Each quarter span was again sub-divided into eighths, and these again, for spans greater than 100 feet, into sixteenths. Under the direction of Mr. B. H. Latrobe, then engineer of the Balti-

more and Ohio, in 1852 Mr. Fink erected an iron bridge of three spans, each of 205 feet, where that line crossed the Monongahela river. The depth of the truss was about one-ninth of the span, and the railway was carried at a little above the level of the bottom of the truss. The weight of the bridge, including the permanent way, was only half a ton per foot of single line, and with an additional load of 1 ton per lineal foot, the tensile strains upon the wrought iron did not exceed 5.15 tons per square inch, and the compression on the cast iron 4.25 tons. The Green River and the Barren River bridges were then alluded to, as being nearly identical in construction to that last described.

The Bollman and the Fink trusses for a single line, and in spans of from 160 feet to 200 feet, cost 14*l.* per lineal foot, or nearly 28*l.* per ton; while timber bridges of the same span only cost from 5*l.* to 7*l.* per foot. Still, iron bridges now met with an amount of favor which appeared certain to ensure their ultimate substitution for timber bridges. A gradual preference was being shown to the plate girder, as the great annual range of temperature, from 20 deg. below zero to a reflected heat of 130 deg. in the summer sun, was not favorable to the use of cast iron in structures of such importance as railway bridges.

Bonds of Municipal Corporations--Illegal Issue.

AUTHORITY CONFERRED BY THE LEGISLATURE OF WISCONSIN UPON THE CITY OF JANESVILLE TO SUBSCRIBE FOR RAILROAD STOCK. ILLEGAL ACTION OF THE COMMON COUNCIL. THE BONDS VOID.

The charter of the city of Janesville, Wis., provided that the Common Council might submit to a vote of the people of that city the question, whether the city should subscribe to the stock of certain railroad companies; and in case of an affirmative vote of the people on that question, empowered the council to make such subscription and issue bonds of the city to the amount that might be subscribed. The constitution of the State of Wisconsin provides that no "general law shall be enforced until published." Previous to the *publication* of this charter the Common Council of Janesville submitted the question of subscribing to certain railroad stock to the people, and the people voted affirmatively thereon. The question now came before the Supreme Court of Wisconsin in the case of Clarke *et al vs.* the city of Janesville, whether the bonds issued under these circumstances were valid. An amended complaint alleged that after issuing the bonds, the city at sundry times ratified, approved and adopted the subscription to the stock of the railroad. The Court now held that after the charter took effect, or was published, the council was not authorized either to make such a subscription and issue bonds thereon, without again submitting the question to the people in accordance with the charter, or to ratify and confirm the subscription previously made and the bonds previously issued.

The following is the opinion in full rendered by the Wisconsin Supreme Court at the decision of the case:

COLE, J.—At a former term when this case was before us, it was decided that the charter of the city of Janesville was a general law, and was not in force until published. As a matter of course, all the proceedings of the Common Council in submitting to the legal voters of the city, according to the provisions of the charter, the question whether said city should take stock in any railroad running to or through it, as well as the election, the subscription to the stock of the company, and the issuing of the bonds for the same, were totally unauthorized and void acts. The action of the city authorities and of the people in that regard, must have the same legal effect as though no charter had ever been passed, and no more. The bonds and coupons were therefore held to have been issued without any authority of law, and consequently to be invalid in the hands of appellants. The case then went back to the Circuit, where the appellants obtained leave and amended their complaint in certain particulars. The material allegation in the amended complaint was, substantially, that after issuing the bonds, the city of Janesville did, at sundry times, between the 4th day of October, 1853, the day the charter was published and went into operation—and the commencement of the action, ratify, affirm, recognize, confirm, approve and adopt the subscription to the stock of the railroad, and did ratify, affirm, recognize, approve and adopt the bonds issued by the city to pay for the stock thus subscribed. It is also alleged that the city ever since the subscription to the stock of the railroad company, has owned and held the stock for which the bonds were given. And the sole question arising upon the demurrer is, whether these allegations in respect to the ratification of the subscription to the stock of the company, and of the bonds and coupons which were issued in payment of the same, are sufficient to establish the liability of the city upon them. We are of the opinion that they do not show that the subscription and bonds have been ratified in such a manner as to render them binding and valid against the city.

The general rule that an unauthorized act of an agent may, by subsequent ratification, become binding upon the principal is not denied. Were the contracts such as the city authorities might make by virtue of either the express or implied powers conferred upon municipal corporations, then it might be said that the case came within the above rule. But the Common Council could not make the subscription to the capital stock of the railroad company, or issue the bonds in payment therefor, by virtue of the general powers conferred upon the municipal corporation. The power to subscribe the stock must be expressly conferred upon the corporation by the legislature. Nor did the Common Council, even under the charter, have the original authority to make the subscription at its pleasure. The charter provides that the Common Council of said city shall have power to submit to the legal voters thereof, the question whether said city shall take stock in any railroad running to or passing through said city, by giving notice in a given way and for a given time. And if a majority of the votes cast on such a question be in favor of taking stock, then the Common Council by resolution, may authorize the Mayor to subscribe for the city the amount of stock so voted to be taken. Thus it will be seen that the Common Council had in the first place the power of submitting to the legal voters of the city the question of taking stock in any railroad. In substance and reality the Common Council submit the proposition to the people. The legal voters of the city affirm or reject the proposition by a general vote. If the vote is in favor of the subscription, the Common Council could then authorize the Mayor to make it. If adverse, the Common Council had not power to authorize the Mayor to make it. So after all, the power of determining whether the subscription should be made, rested with the voters of the city rather than with the Common Council. For although the power of making the subscription was conferred upon the corporation, this power could only be exerted at the will of the electors. The Common Council could not originally issue the bonds and make the subscription. It could not contract the indebtedness except upon a condition never fulfilled. If the city authorities had subscribed the stock without an affirmative vote of a majority of the electors, their action would have been unauthorized, and would not have bound the city. How then can they be said to have ratified and rendered valid these bonds, which they could not have issued upon their own motion? We confess we cannot understand how the Common Council could by subsequent ratification render a contract valid which they could not originally make. And this shows the marked and fundamental distinction which exists between this case and that of Mills *vs.* Gleason. In that case the city authorities would have been authorized by virtue of the general powers of municipal corporations, to contract the indebtedness and issue the bonds had the charter been published. After the charter was published they could render valid by ratification an act which they could do. Here it is otherwise. The Common Council could not, originally do the act, they could not make the subscription and issue the bonds; with what propriety, then, can it be said that they could by subsequent ratification render them valid. The very notion of ratification presupposes that the party ratifying might have originally done the act or made the contract. This would seem to be a very obvious deduction.

But it is said that the object sought by the legislature in requiring the question of taking stock to be submitted to the people, was to ascertain the wishes of the people who were to bear the burden of taxation, and that this object was attained by the submission actually made. This, however, does not reach the difficulty. For if the charter was not in force until published, the acts of submission and the election were mere idle acts, wholly unauthorized and of no importance whatever. The legal votes were to determine at an election held under the charter and in conformity to its requirements, whether the power of subscribing to the stock should be exercised by the city authorities. This was a question precedent to making the subscription. We must therefore hold, that as the Common Council could not in the first instance subscribe the stock and issue the bonds, without being authorized so to do by an affirmative vote of the electors, they cannot by any subsequent act render them binding and obligatory upon the city. The allegations of the complaint seem to bring the case strictly within the principle laid down in Delafield *vs.* the State of Illinois, where it was held than an unauthorized contract entered into by State agents, acting under limited powers conferred by statute, could not be ratified by any acts of the governor or

other officer, but only by the State itself. If the public officers could not originally make the contracts, it was said they could not ratify them. This doctrine so reasonable and just, governs the case under review. We think therefore the demurrer was properly sustained.

Order affirmed.

Agricultural College Land Grants.

The following is a list of States which have accepted the Agricultural College Grant of Congress of July 2, 1862:

States.	Quantity to which they are entitled under the Agricultur'l College Grant.	Date of acceptance of Grant.	Number of pieces of Scrip to be issued.
†Rhode Island	120,000	Jan. 27, 1863	750
†Illinois	*480,000	Mch. 5, 1863	3,000
†Kentucky	330,000	Mch. 6, 1863	2,062
†Vermont	150,000	Mch. 26, 1863	937
†New York	990,000	Apr. 4, 1863	6,187
†Pennsylvania	780,000	Apr. 15, 1863	4,875
†New Jersey	210,000	May 15, 1863	1,312
†Massachusetts	360,000	May 28, 1863	2,250
‡Iowa	240,000	Nov. 7, 1862	1,500
‡Kansas	90,000	Feb. 4, 1863	562
‡Minnesota	120,000	Feb. 6, 1863	750
‡Wisconsin	240,000	Apr. 9, 1863	1,500
‡Michigan	240,000	May 11, 1863	1,500

* Should part of this be selected of the very small residue of public lands within the bounds of the State, such part will, to the extent of its area, lessen the number of pieces of scrip to be issued.

† States to which scrip is to be issued in parcels of one quarter section.

‡ Special certificates issued June 18, 1863, to these States to enable them to select the quantities to which they are entitled out of public lands within their own limits.

NOTE.—Each piece of scrip for one quarter section is made out of the State. The certificate has a transfer or assignment upon the back, to be filled out to the individual taking the same who then locates in the customary manner.

Lehigh and Delaware Water Gap Railroad.

In the Select Branch of the Philadelphia City Councils on the 26th ult., Mr. Wetherill offered a communication from the Lehigh and Delaware Water Gap Railroad Company, submitting a proposition looking to the extension of the North Pennsylvania Railroad to Easton. The following is the report:—

To the Honorable the Select and Common Councils of the City of Philadelphia.

The memorial of the Lehigh and Delaware Water Gap Railroad Company, by their President, A. H. Reeder, respectfully represents:—That the city of Philadelphia is the owner of twenty-eight thousand shares of the capital stock of the North Pennsylvania Railroad Company, of the par value of one million four hundred thousand dollars, and although the said road has been in operation many years, no dividend has yet been earned or declared upon the capital stock, and the city is an annual loser of interest on their stock (at 6 per cent.) of eighty-four thousand dollars. That your honorable bodies, as guardians of the interests of the city, would gladly embrace any means of making this vast and stagnant investment a productive one, and of rescuing it from its present most unpromising condition may, we presume, be taken for granted.

One of the principal objects of said road, at the time of its inception, was to secure, as well for its own profit as for the benefit of your city, the trade and travel from Easton and its vicinity, which the city had enjoyed for a long series of years, and which was known to be large and profitable. The then recent construction of a railroad from Easton to the city of New York had made the loss of that trade to Philadelphia highly probable, and the failure to carry out the original plan of constructing the North Pennsylvania Railroad to Easton has reduced that probability to a certainty.

The large and valuable trade from that locality has been almost entirely diverted to New York. The small portion which is not thus lost passes to Philadelphia by a circuitous route through the State of New Jersey, while from one-third to one-half of the diminished Philadelphia travel also passes over the same route.

It cannot well be denied that were the North Pennsylvania Railroad completed to Easton, the present trade and travel would not only be largely increased, but the whole of each would be carried over that road, which at the time carries no Easton freight at all, and only from one-half to two-thirds of the diminished travel.

Disclaiming all intention to comment or criticise upon the fact, we simply state that this is the necessary and inevitable result of the absence of any harmonious arrangement between the North Pennsylvania Railroad and the Lehigh Valley Railroad Companies for trains between Easton and Philadelphia.

As respects freight trains there is no pretence of co-operation or connection. As respects the two daily passenger trains each way, one involves a delay of two hours, another of three hours and a half, and the other two start at unseasonable and inconvenient hours for the Easton travel. Under these circumstances it is matter of wonder that the North Pennsylvania Railroad Company should earn from this source even the small amount which they do, although it amounts to the mere pittance of $252 per mile.

This state of things, so ruinous to the best interests of the North Pennsylvania Railroad Company, and so deleterious to the business interests of the city of Philadelphia, is irksome to the citizens and business men of Easton and the vicinity, who feel that in sustaining your great commercial metropolis they are gratifying their own State pride and advancing the interests of Pennsylvania. The Lehigh and Delaware Water Gap Railroad Company intend to construct their road from Easton, on the north bank of the Lehigh, and crossing at Freemansburg, to connect with the long disused branch of the North Pennsylvania Railroad at Shimersville, and thus to make a continuous route to Philadelphia of only sixty-two miles, to be run under the most perfect and harmonious understanding with the North Pennsylvania Railroad Company, with an eye single to the best possible arrangements for an Easton and Philadelphia route. The latter road, sensible of the vast advantages to them of so desirable a result, have by a unanimous vote of their Board agreed to place in good running order their Shimersville branch, and lease it to us at a nominal rent for twenty-two years, accompanied by mutual stipulations for *pro rata* fares and freights, and looking to the running of our road by themselves for a compensation of one-half the gross receipts.

As the North Pennsylvania Railroad Company has, after years of struggling, become able now to pay the interest on their debt, and any increase of their receipts would at once become a fund for dividends, we propose to submit for your consideration a statement of the financial result of the construction of our road, and its important bearing upon the value and productiveness of your 28,000 shares of stock.

The North Pennsylvania Railroad carries at this time not less than 12,000 through passengers to and from Easton, in connection with the Lehigh Valley Railroad, and are compelled by circumstances to carry them at $1.15, a small fraction over 2 cents per mile, the Lehigh Valley Railroad receiving 35 cents (or 3 cents per mile.) Under the contemplated arrangement with us, the North Pennsylvania Railroad Company will receive $1.25 as their *pro rata* share, making a gain of $1,200 per annum on their present travel, even should the present low rate of fare be continued. But the present fare, though sufficient for the present unsatisfactory arrangements, need not be continued, when proper trains are run in two hours and a half, without change of cars; and the public will pay, and ought to pay, the usual fare of 3 cents per mile, giving to the North Pennsylvania Railroad Company $1.50, instead of $1.15, and yielding them an annual increase of $4,200 in fares alone, without the carrying of one additional passenger.

But the Belvidere Delaware Railroad Company, at this time, by reason of their better arrangement of trains and connections, are carrying, in spite of their length of road (82 miles) and other inconveniences, not less than 5,000 through passengers between Easton and Philadelphia, all of whom, with twenty miles less of distance, we may reasonably expect will be carried on our road. Estimating these at three cents per mile, or $1.50 each, they will yield to the North Pennsylvania Railroad Company, an annual increase of $9,000.

Reasoning from the well-known increase of travel by increase of facilities, and looking to the passengers by the Delaware and Lackawanna road and the road from Belvidere, who now pass Easton upon the Belvidere road for want of connections and facilities upon our side of the Delaware, we might largely increase this amount, but we pass by these contingencies, because not susceptible of accurate calculation.

The contemplated running of our road by the North Pennsylvania Railroad Company, for one-half the gross receipts, will also be another source of profit. Estimating our entire gross receipts as low as $4,000 a mile, they would receive for the eleven and a half miles $23,000.

Thus we have shown, by reasoning which we do not believe can be refuted, and by statements in a high degree plain and obvious, an annual financial gain to the North Pennsylvania Railroad Company of $36,200, subject only to a deduction for the small expense of running our road, without, as we suppose, any material addition to their equipment.

But it will be observed that we have not as yet made any account of the increased trade which we shall throw upon the North Pennsylvania Railroad, excepting as passengers. As it is arranged that we shall in all cases pro-rate our receipts with the North Pennsylvania Railroad Company, whatever we shall make per mile, will also be received by them. Estimating that we shall earn per mile $4,000, deducting from this $500 for passenger fares, already taken into account, and $500 for way trade, which shall not pass to the North Pennsylvania Railroad, we shall receive from general trade $3,000 per mile, and as the North Pennsylvania Railroad Company, carrying the same trade, would necessarily receive the same amount, this would yield to the latter upon their fifty miles $150,000 per annum, which, added to the former amounts, would make $182,200, or enough to pay a six per cent. dividend upon their entire stock.

The fact that our charter authorizes us to pass up the Delaware to connect, at only twenty miles from Easton, with the Delaware and Lackawanna road, and thus open up a route to a new and extensive coal and iron region, is exceedingly suggestive, but we do not discuss it, because we propose now to deal with nothing remote or contingent.

With great confidence in the truth of our figures and the soundness of our conclusions we think we have demonstrated that the completion of our road from Easton to the North Pennsylvania Railroad will insure to the city of Philadelphia, in common with other stockholders, a respectable dividend upon their stock, and we respectfully ask your assistance in the construction of this feeder to a road so largely owned by those whom you represent. The mode of doing this we would not even appear to dictate, but would suggest for your consideration that inasmuch as it is the fixed purpose to construct the road for cash, and that to promote that object it is necessary to realize at par our first mortgage bonds of $200,000, the security of the loan should be of such a first class character as to induce capital to invest in it; and that this result can be secured by means of apply-

ing a portion of the city stock in the North Pennsylvania Railroad Company in such mode, and with such adequate security and guarantees against loss to the city, as while no risk would be incurred, the entire stock held by the city would be made productive.

The undersigned proposes to offer, on behalf of the company, security to be approved by Councils:—

First. That the proceeds of the mortgage bonds of the company shall be faithfully applied to the construction of the road.

Second. That the road shall be finished, and in running order within one year.

Third. That interest on the bonds shall be guaranteed by individuals until after the road shall be finished, and running and productive.

Fourth. That the first proceeds of the road shall be applied to the interest on the bonds in preference to the salaries of officers.

These guaranties, with such or any other reasonable guards against the possibility of loss by the city are respectfully proposed as sufficient to exclude all doubt that the city can incur any risk, while securing the great objects of making the city stock actually productive and of attracting to the city the trade and travel of the Lehigh Valley.

The arrangement is one which the Supreme Court, in a similar case, have sanctioned as a prudential and justifiable engagement to save a decaying investment, and the result we are convinced would be a beneficial one to your constituents, as stockholders in the present road and as citizens interested in the trade of Philadelphia.

(Signed) A. H. REEDER, President.

Railroad Earnings--Weekly.

The earnings of the Grand Trunk Railway for the week ending July 11, 1863, were:

Passengers	$29,461 96
Freight and live stock	42,755 16
Mails and sundries	2,800 00
Total	$75,017 12
Corresponding week, 1862	67,538 43
Increase	$7,478 69

The earnings of the Terre Haute and Alton R. R. for the 3d week of July, were | $27,386 74
Same week, 1862 | 14,169 76
Increase | $13,216 98

The earnings of the Milwaukee and Prairie du Chien Railroad for the 3d week in July have been | $16,242 48
Same week, 1862 | 22,030 60
Decrease | $5,788 12
Total for the first 3 weeks in July, 1863 | $52,415 74
" " " " 1862 | 73,837 62
Decrease | $21,471 88

The earnings of the Chicago and Alton Railroad for the 3d week of July, 1863, were:

Passengers	$14,134 31
Freight	27,914 82
Sundries	1,135 34
Total	$43,184 47
Same week last year	24,686 26
Increase	$18,498 21

The earnings of the Michigan Central Railroad for the 3d week of July, 1863, were | $40,893 00
Same period, 1862 | 35,023 72
Increase | $5,869 28

The earnings of the Chicago and Northwestern Railway for the 3d week in July, 1863, were | $24,926 70
Do., 1862 | 20,930 81
Increase | $3,995 89

The traffic of the Great Western Railroad for the week ending July 17, 1863, was as follows:

Passengers	$21,579 82
Freight and live stock	18,271 66
Mails and sundries	1,701 71
Total	$41,553 19
Corresponding week of 1862	£40,324 81
Increase	$1,228 38

The earnings of the Galena and Chicago Union Railroad for the 3d week of July, 1863, were:

Freight	$19,898 15
Passengers	8,190 97
Mails	1,300 00
Total	$29,389 12
Same week, 1862	36,980 46
Decrease	$7,591 34

Railroad Earnings--Monthly.

The business of the Philadelphia and Reading Railroad Company for the month of June, 1862 and 1863, has been as follows:

	1863.	1862.
Received from coal.	$351,619 12	$174,221 78
Do. merchandise.	56,619 93	39,216 96
Do. travel, etc. ..	56,570 28	40,846 13
	$464,809 33	$254,284 87
Transport'tion, roadway, dumpage, renewal fund, and all charges	322,051 72	153,559 48
Net profit for the m'th	$142,757 61	$100,725 39
Do. previous 6 mos..	1,217,993 23	725,846 75
Total net profit for 7 months.	$1,360,750 84	$826,572 14

The earnings of the Michigan Central Railroad for June, 1863, were | $206,221 37
1862 | 174,001 69
Increase | $32,219 68

The earnings and expenses of the Rome, Watertown and Ogdensburg Railroad for June, 1862 and 1863, are as follows:

EARNINGS.	1862.	1863.
From Passengers	$12,437 93	$24,603 26
" Freight	17,218 06	22,365 92
" Mails and rents	3,316 07	1,912 80
Total	$33,002 06	$48,911 98
EXPENSES.		
Maintaining road	$4,841 36	$10,984 61
Repairs to machinery	4,885 40	3,828 08
Operating road	9,025 77	11,158 04
Overcharges refunded	.....	17 75
Total	$18,752 53	$25,988 48
Net	$14,249 53	23,523 50

Increase of net earnings over June 1862, 51½ per cent.; the gross passenger earnings are almost double those of June, 1862.

Madison and Portage Railroad.

The Madison and Portage road is basking in another ray of sunshine, and again the prospects of an early completion of the road are excellent. From Mr. Craig, one of the directors, we learn that the much talked of lease of the road between this place and Madison to the Chicago and Galena Company, has been consummated. The latter company is to guarantee bonds to the amount of $350,000. This will furnish the iron and equip the road. The citizens along the line will be required to finish the grading. Some $15,000 will be required for this purpose, and the amount must be raised. The Board has elected Samuel Marshall, Esq., of Madison, President.—*Portage City Register.*

Railroad to Northville.

The people of Plymouth and Northville, two rich and flourishing villages in the Northwestern part of this county, are agitating the subject of connecting themselves with this city by a railroad. It is designed to be a branch of the Michigan Central, and will leave that road at Wayne and pass in a northward direction through Plymouth to Northville, a distance of twelve miles. Meetings are being held and people are becoming stirred up to the importance of the enterprise. The route has been surveyed by Col. Berrien, Chief Engineer of the Michigan Central Railroad, and it is found that for eight miles of the way there would be no grading, while the remaining four miles are somewhat hilly. The road will probably cost $130,000. The Michigan Central Company are not willing to undertake any part of the expense of building it, but will agree to run it after it is built. It would seem that so wealthy a district as this road will open could easily afford the expense of building it. The people of those towns are enterprising, and when once they make up their minds that the road is needed, they will see it through.—*Detroit Free Press.*

Syracuse and Geddes Railroad.

AN ACT authorizing the construction of a Railroad from Geddes to Syracuse, in the county of Onondaga. Passed May 4, 1863.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. It shall be lawful for Alfred H. Hovey, Edward B. Wicks, William D. Stewart, Harvey Stewart, John W. Barker, Daniel P. Wood, Archibald C. Powell, Daniel Bookstayer, and Gershon P. Kenyon and those who may be now or hereafter associated with them, to lay a railroad track, with the necessary turnouts in and through certain streets in the city of Syracuse and the town of Geddes, commencing in the village of Geddes at the intersection of Furnace street with Bridge street; thence southerly on Furnace street to Hemlock and Syracuse street to Fayette street in the city of Syracuse; thence on Fayette street to Salina street.

SEC. 2 The track of said road shall be laid of such rails as shall least obstruct the free passage of vehicles and carriages over the same, and the same shall be laid flush with the surface of the street and shall conform to the grade as it now is, or as it shall be from time to time established or altered; and the said grantees shall keep the surface of the street inside the rails and for one foot outside thereof, in good and proper order and repair.

SEC. 3. The cars to be used on said railroad shall be drawn by horses or dummy engines, and shall be run as often as the public interest shall require.

SEC. 4. Said road shall be completed within three years from the passage of this act, and the powers and privileges hereby granted are limited to the period of fifty years.

SEC. 5. No greater amount than six cents each shall be charged passengers for riding any distance over said road.

SEC. 6. It shall be lawful for said grantees and their associates to organize under an act of the Legislature entitled "An act to authorize the formation of railroad companies and to regulate the same," passed April second, eighteen hundred and fifty, and in the event of such organization all of the provisions of said last mentioned act, except the number of persons designated in the first section thereof, and except the number of directors which may be five instead of thirteen, shall apply to said grantees and their associates; also except the provisions of section twenty-seven, thirty-one, thirty-two, thirty-eight, thirty-nine, forty, forty-one and forty-four of said act.

SEC. 7. The said grantees and their associates shall not be authorized to lay the said track without first obtaining the consent of the Common Council of the city of Syracuse, and also the consent of the Trustees of the village of Geddes.

SEC. 8. This act shall take effect immediately.

American Railroad Journal.

Saturday, August 1, 1863.

Stock Exchange and Money Market.

The condition of the money market is one of the most extraordinary of the circumstances attending the present civil war. According to all experience it was to have been expected, that the Government would have been greatly embarrassed to raise the necessary funds; that its stocks would have gone down 50 per cent, that the currency would have been completely deranged, and that the taxes would have been collected with difficulty. It might also have been predicted with much show of wisdom, that our railway shares would have depreciated, and most of the companies become insolvent; that our commerce would have been without value, and our tariff unproductive. And that the timid among ourselves, as well as the bold among our enemies in the South hoped for nothing else, is unquestionably true. But the reverse of all this has taken place. Nothing of

the kind has occurred. On the contrary, the Government was more embarrassed for money, and paid a larger interest for it during the close of Mr. Buchanan's administration, than it has since, by a very large difference. Its stocks have not gone down but risen, though the public debt is over one thousand millions of dollars; the currency is more uniform and popular than it has ever been before, and has suffered no derangement whatever. The taxes are cheerfully and promptly paid and the amount raised exceeds the estimates of the most sanguine calculators. Our railways have had an unexampled success, they are nearly all out of debt, their earnings are enormously large, dividends are paid, which were never paid before; the quotations keep up and are advancing; our commerce in spite of the loss of the Southern trade, is nearly as large as ever, and the revenue collected at the port of New York alone for the past year, is over sixty eight millions of dollars. The internal revenue is equally promising, assuring the Government of a large surplus, adequate to a sinking fund which will discharge the whole National Debt in 30 years, during which period, the Scrips which represent it, will receive dividends in gold, and enter into the financial transactions of the country as so much capital, and thus used, will create large profits in a thousand ways, actually increasing its wealth and permanent resources. The war therefore has disappointed both friends and enemies in its financial bearings, and has only in this sense served to illustrate the force, energy and confidence of the American character. Nor is this all. We have practically and utterly refuted all the opinions entertained abroad of our pecuniary circumstances, and foreign capitalists when they shut up their vaults and refused their loans, though we have never asked for any, have by this time perceived, that their conduct has only injured themselves. We are not surprised therefore that they are beginning to acknowledge their mistake, or that recent offers of assistance in the shape of subscriptions at par, have been made to the Secretary of the Treasury in large amounts.

The favorable view we have taken of our Home Money Market and Stock Exchange, may still be entertained without fear of a reaction. Beyond all question the end of the war is near at hand. Not many months more can elapse without its definite conclusion. Common sense, not partizan ship dictates this opinion. When the paper currency of the confederacy has depreciated to such an extent, that eleven dollars of it will only purchase one dollar of gold, when of its large area at the outbreak, it is reduced to but a patch of seven states; when the captured private letters of Mr. Davis to his favorite General assure him that his power of reinforements is utterly gone, and that he has not force enough to protect his own seat of Government against a threatened attack of a small column of 15,000 men; when all the States on the West side of the Mississippi are severed from their Atlantic Associates, and those which lie on the east of that river can no longer be held by the Confederates, and when not a single state Government is there carried on by the Confederate executives with the least pretence of authority, when North Carolina in her Legislature boldly proposes reconstruction, we confess we do not see how any sane man can doubt what the result is to be. Of course then, our financial success is equally secured and certain, and this opinion must prevail pretty generally, or we should not witness such enormous voluntary subscriptions to the Government loans. And here as faithful journalists we have to record the fact, that considerable complaint has arisen as to the management of those loans in their detail.

Why is it that certain parties are obliged to wait week after week for their Bonds, their deposits having been duly made at the sub-treasurer's office in this city, when other parties, say at Philadelphia, have no difficulty in obtaining theirs from the department at Washington, almost as soon as they make their deposits? And why is it that Mr. Chase can listen to the advice of interested agents, to interfere with the patriotic executions of Mr. Cisco to obtain conversions, for which service he nobly refuses any payment or commission. Mr. Chase is said to be the most vigilant and careful Secretary of the Treasury we ever had, yet it seems, he is imposed upon occasionally by those in whom he confides. He can safely listen to Mr. Cisco above all other men in the details of these negotiations. The subscriptions to the 5-20's on Tuesday, amounted to $1,743,250 and the balance in the Sub-Treasury was $25,458,983.

There is great ease in the money market, and loans are granted at 5@6 per cent, without difficulty. Gold is without activity at 127¾, though immediately after the late riots, a considerable sum went forward, which is said to have been principally for account of scared parties, whose motto seems to be, not where liberty dwells there is my country, but where my gold is, there is my Country. The Railway advance continues, as will be seen by our regular and carefully corrected quotations. Harlem continues strong and is advancing. The largest part of the stock of this company is held by very solid capitalists, able to speculate and hold on. The small shareholders follow the lead of the large ones, and so all are content and hold on together. We hope to see it making its connections North and East of which their line is capable, and putting it in the class of the great Trunk roads.

Our foreign exports of domestic products for the last week were of the value of $3,986,390, against $4,134,314 the same week last year, and $2,083,966 in the year 1861. We notice that cotton has been sought after at 62 to 63, with sales. The occupation of the Mississippi, and next of the Alabama river, must necessarily bring large amounts of this article into market. In flour we notice that Superfine State and Western is quoted at $4.10 to $4.60. Extra round hoop Ohio, $5.55 to $5.70. Extra Genesee $7. We notice these articles because their price has much to do with exchange, which is now selling at 140, first class bills.

We learn from the official reports of the Department of Agriculture at Washington, embracing returns for the months of May and June, the following interesting facts:

That winter wheat is ⅓ and 1-10th below the average, but to make up for this, there is a 10th more land sown than in 1862. Spring wheat is ¾ths below an average crop. The barley crop is excellent, being 1-10th more than an average in the amount sown. Corn is small owing to the drought, the entire injury is but 1½-10th. Oats have suffered, but if the crop is not rusted, it will be better than the crop of last year. Tobacco is largely cultivated to the extent of 75 per cent. over the quantity raised last year in the loyal States.

Grass has suffered from the drought also, but comes up to the standard very nearly. Flax has increased 120 per cent. over last year, no doubt the result of the condition of the cotton market. The wool clip is estimated at 79,405,215 lbs., and the number of sheep is increased 20 per cent. Sorghum has increased 27 per cent., and is quite a favorite crop in the West.

The new banking system is beginning to be developed to a considerable extent. The following organizations are reported:

	Capital.
First National Bank of New York	$200,000
First National Bank of Philadelphia	150,000
First National Bank of Chicago, Illinois	100,000
First National Bank of Syracuse, N. Y.	100,000
First National Bank of Cleveland, Ohio	100,000
Second National Bank of Cleveland, Ohio	600,000
First National Bank of Dayton, Ohio	112,500
Second National Bank of Dayton, Ohio	100,000
First National Bank of Fremont, Ohio	100,000
First National Bank of Fort Wayne, Ind.	100,000
First National Bank of Youngstown, O.	156,000
First National Bank of Ann Arbor, Mich.	75,000
First National Bank of Erie, Pennsyvania	100,000
First National Bank of Stamford, Conn.	200,000
First National Bank of Springfield, Mass.	150,000
First National Bank of N. Haven, Conn.	300,000
First National Bank of Davenport, Iowa.	100,000
First National Bank of Lafayette, Indiana	250,000
First National Bank of Sandusky, Ohio	100,000
First National Bank of Carlisle, Pa.	50,000
First National Bank of Richmond, Ind.	110,000
First National Bank of Iowa City, Iowa.	50,000
First National Bank of Portsmouth, N. H.	100,000
Third National Bank of Cincinnati, Ohio.	300,000
First National Bank of Aurora, Illinois	50,000
First National Bank of Towanda, Pa	65,000

The Morris and Essex Railroad Company have declared a semi-annual dividend of three per cent., payable on the 1st of August.

The American Coal Company, N. Y., have declared a dividend of 8 per cent. on their capital of $1,500,000, out of the net profits of the past six months, payable on the 10th of August.

The six per cent. coupon bonds of the Lawrence County Coal and Oil Company, due August 1st, will be paid on that day.

The bonds of the New York, Providence and Boston (Stonington) Railroad, due August 1, (from which time the interest thereon will cease), will be paid at the office of M. Morgan's Sons, No. 37 William st.

Interest on bonds of the Pennsylvania Coal Company due August 1, will be paid at the Company's office in New York.

The Chicago and Alton Railroad Company have declared dividends of 3½ per cent. on the Preferred and 2½ per cent. on the Common Stock of the road, out of the net profits of the past six months.

The coupons of the Marietta and Cincinnati Railroad Company, due the 1st of August, will be paid at their maturity as follows, viz: On the sterling bonds at the "London Joint Stock Bank," in the city of London. On the dollar bonds at the office of Messrs. Winslow, Lanier & Co., in New York City. The above are secured by the first and only mortgage of the Company.

Coupons of the second mortgage bonds of the New York and Harlem R. R. Co., due Aug. 1, will be paid at the Treasurer's office.

The Chicago and Northwestern Railway Company will pay at their New York office the coupons due August 1, from the Preferred Sinking Fund, Appleton Extension and Green Bay Extension bonds.

The Morris Canal and Banking Company have declared a semi-annual dividend from the earnings of the Canal, of 5 per cent. upon the preferred stock, payable on and after the 4th of August, at the office of the company, at Jersey City, or to the stockholders residing in or near Philadelphia at the office of E. W. Clark & Co., there.

The Fairmount and Arch Street City Passenger Railway Company, Philadelphia, have declared a dividend of fifty cents per share on the capital stock exclusive of the National Tax, payable July 31.

The Peoria and Bureau Valley Railroad Company will pay a dividend of four per cent. (less the United States Government Tax) on the 10th of August, at the office of the Company, No. 13 William st., New York.

The Philadelphia, Wilmington and Baltimore Railroad Stock Dividend of nine per cent. is payable August 10.

The coupons from the first mortgage bonds of the McGregor Western Railroad Company will be paid at the office of the Company, No. 8 Wall st., New York.

The first and second mortgage bonds of the Toledo, Norwalk and Cleveland Railroad Company, due August 1, will be paid on presentation at the Corn Exchange Bank in New York. Interest on said bonds will cease on said first day of August.

The New York Central Railroad Company have declared a semi-annual dividend of 3½ per cent. on the capital stock thereof, free of the United States Income Tax, payable on the 20th day of August next, on stock registered at New York, Boston and Albany, respectively, and on the 20th day of September next on stock registered at London. Dividends in New York will be paid at the office of Duncan, Sherman & Co.; in Boston, at the office of J. E. Thayer & Brother; in Albany, at the Albany City Bank; and London, at the Union Bank of London, pursuant to circular and notice of December 10th, 1862, from the transfer office in that city.

The Bank of America will pay, on presentation, the past due coupons on bonds of the City of Covington, issued to the Covington and Lexington Railroad Company.

Coupons on the mortgage bonds and income bonds of the Burlington and Missouri River Railroad Company falling due August 1, will be paid upon presentation to the Treasurer, No. 48 City Exchange, Devonshire st., Boston; or they may be sent to him by mail, and a check on New York will be returned. The National War Tax of three per cent. will be deducted according to requirement of law.

The first mortgage bondholders of the Cincinnati, Wilmington and Zanesville Railroad Company are requested to deposit their bonds with Chas. Moran, No. 10 Wall st., for the purchase of the road.

The Shamokin Valley and Pottsville Railroad Company have delared a dividend of 1½ per cent., payable on the 1st of August, free of State tax. The interest on the bonds of the company will be paid at the same time.

The bonds of the New York, Providence and Boston Railroad Company, due August 1st, 1863, will be paid on presentation at the office of M. Morgan's Sons, No. 37 William st., New York. Interest will cease from August 1st.

The Jeffersonville Railroad Company will redeem, at the Banking House of Messrs. Gilman, Son & Co., No. 47 Exchange Place, New York, on the 1st of August, all of the $105 capitalized Interest bonds issued by said company to the holders of the second mortgage bonds, for October coupons of 1858, and April and October, 1859, and that from and after the 1st of August, interest on said bonds will cease.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—New York State 6s, 1874, 115; do., City 6s, 1876, 110; Illinois Central full stock, 100½@106; do., cancelled bonds scrip, 90@95; do., Optional Right bonds, 115; Chicago and Milwaukee, 70; Ohio and Miss. certificates, 31@34; Canton Co., 28¾@33½; Cumberland Coal pref., 24@29½; Quicksilver, 33½@38; Central American Transit Co., 32; American Coal Co., 74½; Miss. and Mo. L. G., 58.

Philadelphia.—Allegheny Co., 6s, 81; Reading 6s, 1871, 100; North Penn. mort. scrip, 85; Huntington and Broad Top 1st mort., 100; 5th and 6th streets, 56@57; 10th and 11th streets, 41¼. The latest quotations are: City 6s int. off, 101@102; do., new, do., 107@107½; State 5s, 101@101½; Reading, 54⅝@54⅞; do., 6s, 1843–'80, 109; do., 1870, 105; do., 1886, 110@111; Camden and Amboy, 165@165½; Pennsylvania R. R. div. off, 63@64; do., 1st mort., 110½; do., 2d mort., 106@108; Little Schuylkill R. R., 47½; Morris Canal, 65@68; do., pref., 130; Susquehanna Canal, 13⅜@13½; do., 6s, 60; Sch. Nav., 12½@12¾; do., pref., 24¼@24½; do., 6s, 1882, 81@82; Union Canal bonds, 21@25; Delaware Div. Canal, 43@44: do., bonds, 102½; Elmira and Williamsport, 35@36; do., pref., 51@52¼; do., 7s, 1873, 110; Beaver Meadow, 70¼; Harrisburg, 64; Long Island R. R., 38; do., bonds, 102; Lehigh Coal and Navigation, 55@56; do., scrip, 42¼@44; North Pennsylvania, 17@17¼; do., 6s, 92@93½; do., 10s, 115; Philadelphia and Erie, 23¼@24¼; do., 6s, 104; Minehill, 61½@62; Catawissa, 7¼@7¾ do., pref., 22½@22¾; Lehigh Valley bonds, 112; Frankfort and Southwark (horse,) 54@57; Second and Third, 77@79; Race and Vine, 10½@11; West Philadelphia, 65; Spruce and Pine, 15@15¼; Green and Coates, 35; Chestnut and Walnut, 54; Arch, 25; Thirteenth and Fifteenth, 30; Seventeenth and Nineteenth, 10; Girard College, 20@24; Tenth and Eleventh, 41@42; Philadelphia, Germantown and Norristown, 60¼@61.

Boston.—Northern (Ogdensburg) 2d mort., 23½@24; Rutland and Burlington 1st mort., 70¼; do., endorsed, 66; do., 2d mort., 19¼@20; do., 3d mort., 5; Vermont Central, 1st mort., 75; do., 2d mort., 20; South Shore, 13; do., 6s, 1880, 100; Rhode Island 6s, 1882, 109; Connecticut 6s, 1882, 110¼; Maine 6s, 1883, 110; Malden and Melrose (horse,) 80; Dorchester and Roxbury, 49½; Chelsea, 53; Acton Mining Co., 4⅜; Black River, 50c.; Bay State, 4¾; Copper Falls 12; Huron, 16¾; Mesnard, 10⅞; Phœnix, 20½; Petherick, 4¼; Pontiac, 6; Wickam, 62¾c.; Winthrop, 2¼; Hancock, 8½; Superior, 6½; North Cliff, 2¾; Toltec, 2⅛; Albany and Boston, 11¾; South Side, 2½; Star, 3¾.

Baltimore.—Western Md. bonds, 82½. Va., 9½@10; do., 1st mort., 100@103; do., 2d mort., 100; do., 3d mort., 18; Central Ohio 2d mort., 100¼@100½; do., 4th mort., 42½; do., income 1857–'60, 30; Western Md., bonds, 84; do., guar., 103; Maryland 6s, coupon, 1870, 113½; do., Ins., 112@115; do., 1890, 112; Baltimore 6s, 1875, 108; do., 1886, 104; do., 1890, new, 108; do., coupon, 106¾@108; do., 5s, 1838–'70, 90.

Hudson's Bay Company.

This ancient Company chartered in the time of Charles II., has been long engaged in trading in furs, and is the owner of large possessions in British America. It is about to be reorganized on a new basis; a company is to be formed with a capital of $10,000,000, in $100 shares, of which the well known and clever Sir Edmund Head, an author of reputation with Canadian experiences, is to be Governor. The British government approves of the proceeding, and the old company has sold out their entire interest for $7,500,000, though its capital was but $2,500,000. Six directors and a Deputy Governor are to manage its affairs. The property purchased, consists of all its stores, ships, stations, and a territory nearly half as large as Europe, and a portion of which connecting Canada West with British Columbia is represented as very fertile and with large interior water communications. Among the first efforts of the new company will be to establish a telegraph line 2,500 miles long, to aid which the Provincial governments have offered a liberal subvention. The next will be to work the mineral deposits with which it abounds; and settlers are to be invited to the territory by liberal arrangements. In the purchase are included some valuable estates in Vancouver's island. Certainly, the European powers are making directly and indirectly, great exertions to obtain and maintain a footing on this continent. To compete with them in the progress of civilization, and to secure the greatest permanence to our own system commercial and political, we should lose no time in constructing the Pacific Railway.

Tax on Express Company Stocks.

An important decision has recently been made in the U. S. Circuit Court of Maryland which affects the stockholders in Express Companies. From the arguments of counsel and the opinion of Judge Giles, we learn the following facts. Certain parties owning stock in the Adams' Express Company, applied for an injunction against the collector, assessor and assistant assessor of their district, to restrain them from laying 3 per cent. tax on their stock under the revenue act in relation to incomes. It was contended by them among other things, that these companies finding a 3 per cent. tax on their income very onerous applied to Congress for relief, which changed the previous act affecting them so that they were only to pay 2 per cent. The judge held that the injunction could not be granted; and the statute relied on, only changed the basis of taxation and did not relieve the applicants from liability on their income derived from their shares. In other words the 2 per cent. is a tax on the business merely, and does not exempt the stockholders from paying a tax on their income from that business.

Railroad Progress in Spain.

So long since as 1858, a main line was completed from Madrid to Alicante, and now another great communication has been carried through from Madrid to Saragossa, from which place it has been extended to the industrial centre of Barcelona on the one hand, and the Pyrenneean town of Pampeluna on the other. This last point is a place of no great importance *per se*, but it will become valuable as a means of communication with Bayonne, Bordeaux and Paris. While the Madrid, Saragossa, and Alicante Company has been establishing its system in a north and southeasterly direction, the Northern of Spain has been supplying the requirements of the districts indicated by its name: but it also converges towards Bayonne, and from thence to Paris and France generally. The Alicante line—which has led, *inter alia*, to the establishment of a line of Spanish Clyde-built ocean steamers to the Havana—will also prove a valuable accommodation to the southern provinces of Granada and Andalusia, a branch having been constructed to Ciudad Real, from which town further communications are being carried, either actually or prospectively, to Badajoz on the Portuguese frontier in one direction, and Cordova (and thence to Seville and Cadiz by already existing lines) in the others. Lines from Merida to Tocina, near Seville, and from Cordova to Belnies, another important coal centre, will also be shortly adjudicated. It is easy to enter into all this on paper, but indomitable energy and courage have been required to bring about a practical result. Spain is not a very attractive country to the railway engineer who requires to do his work promptly and cheaply. Besides the formidable chain of the Pyrennees in the northeast, there are the Santillanos mountains in the northwest, while Madrid is surrounded by the Castilian mountains on the north and the Sierra de Toledo on the south, and Andalusia and Granada are hemmed in by the Sagra Sierra, the Sierra Morena and the Sierra Nevada. Nevertheless, the promoters of the northern of Spain system have not hesitated to courageously carry their main line through the great Castilian range; and it is expected by their engineers that the locomotive will make its way through this difficult obstacle. The passage of the Guadaramma on this range has for months and months employed an industrial army of from twelve to fifteen thousand men; but the mountains once pierced, the traffic service will be conducted regularly and without break of continuity from Madrid to the frontiers of Navarre. At the same period, or within a few days, the section from Beasain to St. Sebastian, will be terminated; six weeks or two months later, the same state of things will be brought about between St. Sebastian and Irun, and the works from Irun to Bayonne, which are on French territory, are also being actively pushed forward and will be completed by the end of the year. The passage of the Pyrennees has presented great difficulties and has required the most serious efforts and the most sustained perseverance on the part of the powerful company which has undertaken the task of bringing to a satisfactory conclusion the national work to which Spain justly attaches so much importance. These difficulties were, indeed, for some time of such a nature that fears were entertained that the company would find itself under the necessity of modifying the route which had been approved by the Government, and on which great works had been executed. Under these circumstances, the company had recourse to the experience of one of the most eminent French engineers, M. Jullien, Inspector-General of bridges and roads, who was charged with the task of making a new examination of the locality. M. Jullien recommended fresh surveys for a modification of the route adopted, and the execution of these extended over nearly a year. Meanwhile, however, drainage operations which had been prosecuted on the works previously undertaken, having been attended with full success, the undertaking was resumed as originally prescribed, and has been carried on with such activity that only a very slight delay will after all arise. The passage of the Pyrennees now employs seven thousand men, and this number is being continually increased as the successive completion of various sections of the Guadaramma works leaves free more and more of the men hitherto engaged there. In a few months, then, the Northern of Spain Railway will present throughout its whole course but a small gap of rather more than sixteen miles, which will be the only break in the connection with the Southern of France and Paris and Orleans systems, and which will be promptly filled up. Uninterrupted communication once established here, it would be possible on an emergency to rush from Madrid to St. Petersburg in a hundred hours!—*London Colliery Guardian.*

The Public Debt.

The following is a statement of the public debt July 1, 1863, derived from an official source:

INTEREST-BEARING DEBT.

4 per cent. temporary loan—coin	$5,036,037 30	
4 per cent. temporary loan	23,023,258 19	
		$28,059,295 49
5 per cent. temporary loan	$70,308,188 91	
5 per cent. temporary loan—coin	6,450 00	
5 per cent. bonds due 1865	3,461,000 00	
1871	7,022,000 00	
1874	20,000,000 00	
		101,297,638 91
6 per cent. bonds due 1868	$18,323,591 80	
1881	69,547,800 00	
1882	185,684,141 26	
6 per cent. Treasury Notes	717,100 00	
6 per cent. Certificates of Indebtedness	157,093,241 65	
		431,275,874 71
7.30 per cent. bonds due Aug. 19, 1864	$52,931,000 00	
due Oct. 1, 1864	86,989,500 00	
		139,920,500 00
Total		$700,553,309 11

DEBT NOT BEARING INTEREST.

Treasury Notes past due		$39,100 00
U. S. Notes	$387,646,589 00	
Less amount in Treasury	11,157,088 12	
		376,489,500 88
Fractional currency		20,192,456 00
Total		$396,721,056 88
Total debt July 1, 1863, as exhibited by the books of the Treasury Department		$1,097,274,365 99
Total debt July 1, 1863, as estimated by the Secretary in report of December, 1862		1,122,297,403 24
Actual debt less than estimated debt by		$25,023,037 25

RECAPITULATION.

Aggregate debt at 4 per ct. interest	$28,059,295 49
" " 5 " "	101,297,638 91
" " 6 " "	431,275,874 71
" " 7.30 " "	139,920,500 00
" " without interest	396,721,056 88
Total debt July 1, 1863, as exhibited by the books of the Treasury Department	$1,097,274,365 99
Total debt July 1, 1863, as estimated by the Secretary in report of December, 1862	1,122,297,403 24
Actual debt less than the estimated debt by	$25,023,037 25

The interest required to be paid *in Gold Coin* on the Public Debt of the United States, as it stood on the 1st of July, 1863, and the interest stipulated to be paid *in Currency*, stand as follows for the current fiscal year:

INTEREST PAYABLE IN GOLD COIN.

On 4 per cent. deposits	$5,036,000	$201,440
On 5 per cent. deposits	35,000,000	1,750,000
On 5 per ct. Funded D't.	30,490,000	1,524,500
On 6 per ct. " "	274,183,000	16,450,980
On 7.30 per ct. Treasury Bonds	139,920,000	10,214,160
Total interest payable in gold		$30,141,080

INTEREST PAYABLE IN CURRENCY.

On 4 per cent. deposits	$23,028,000	$920,920
On 5 per cent. "	35,808,000	1,440,400
On 6 per ct. Certificates	157,093,000	9,425,580
Total interest in currency		$11,786,900
Principal of gold bearing debt		$484,629,000
" " currency debt		215,924,000
" " United States circulation		396,721,000
Total public debt		$1,097,274,000
Interest in gold	$30,141,080	
" currency	11,786,900	$41,927,980

Average rate of interest, 3.89 per cent.

The Customs Revenue for the current year, receivable exclusively in gold, is estimated at *seventy millions*, while the interest on the Funded and other Public Debt stipulated to be paid in gold, is, thus far, only *thirty millions* per annum, and the entire interest on the Public Debt of all classes, $41,927,980.

An Important Railroad Enterprise.

A meeting of merchants and others was held this morning in the rooms of the Board of Trade to hear some statements from Hon. A. T. Galt of Canada and other gentlemen, members of the Provincial Parliament, relative to the construction of a railroad from the present terminus of the Connecticut and Passumpsic Rivers Railroad, at the Canada line, to the Grand Trunk Railway, a distance of twenty-seven miles, and its bearing upon the interests of Boston.

James C. Converse, President of the Board of Trade, was chosen to preside. He introduced Hon. A. T. Galt of Sherbrooke, Canada. Mr. Galt stated that he merely desired to submit some views for their consideration, in the belief that they would lead to a favorable opinion hereafter and a support of the proposed railway. The intention of the construction of this railroad was to give direct communication for traffic via the Passumpsic, Concord and Montreal railroads from the west to Boston instead of around by Portland.

There is no antagonism between Portland and Boston in this matter, but the important object is to draw western trade down the St. Lawrence instead of the route by the Erie Canal and New York, the great rival to Boston in this trade. Up to this time, all efforts to take the trade from New York have been failures. The trade of that city has steadily progressed, increasing over fifty per cent. annually for the last five years, while that of Boston has fallen off nearly fifty per cent. If produce arrives at Albany by the Erie canal, it will go down the Hudson as a cheaper route. It can be delivered in Montreal at a less rate than at Albany. The policy of Canada to improve the navigation of the St. Lawrence has had an important bearing on the prosperity of our sea-port cities Coincident with the increasing export trade from New York, there has been an increase from Montreal. In contending for this trade, the object should be to make the granary from which you draw your supplies as near as possible.

Our merchants should look to Montreal as a centre. This idea exists in the West, where the impression is that the St. Lawrence is the natural route. The interests of Canada are identical with our own in this respect. If produce is brought to

Montreal it can have a market on the spot—be shipped to England, or brought here. The manufactures of Boston can also be more advantageously sent West by this route. Mr. Galt believed that the turning of the channel of trade north by this route could be done cheaper and better in this way than by any other. The importance of this line was urged from local considerations. A great deal of capital has lately been invested in the mineral districts of Canada, and by this route ores can be forwarded in the cheapest and most expeditious manner. Timber for ship-building, coarse grains, horses, &c., are largely obtained in the district where it is proposed to run this line.

Mr. Galt urged that the traffic of that section of country which will be traversed by the Mississippi Valley Railway, will equal that of any similar section on the line of the Connecticut and Passumpsic Railroad. Preliminary surveys established the fact that the cost of the road would not exceed $20,000 a mile, and that the maximum grade would not be more than fifty-two feet to the mile. Sharing the benefit of the Victoria Bridge, the difficulties of the Ogdensburg route in winter would not be experienced.

Hon. Walter Shanly, an eminent railroad engineer of Montreal, was next introduced. He urged the practicability of the route, the immense local traffic, and the cheapness with which the line could be built. It would shorten the distance from Boston to the West fifty miles. Freight on coarse grain, &c., would be reduced ninety cents a ton.

Hon. Albert Knight of Stanstead made some statements of the importance of the road in view of the fertility of that section of the country. He was followed by Mr. Converse in a strong argument in favor of bringing back to Boston the trade that was being taken to New York by means of branch houses, and of aiding every enterprise that promised so beneficial results to Boston.

The subject was further favorably commented upon by Emmons Raymond, who was convinced of the success of the road from a knowledge of that of the Connecticut and Passumpsic, and by Joseph B. Brigham and A. C. Hersey. On motion of the last named gentleman a vote of thanks was unanimously passed to the gentlemen from Canada for their addresses on the subject of increased communication with the West.—*Boston Journal, July* 23.

The Enterprise of Chicago.

The merchants of Chicago for many years have been noted for their enterprise and success. They never let an opportunity slip, of turning to account every advantage of position which they possess, and every channel of commerce that they can command. This has been the prominent characteristic, the rule of life of the Chicago merchants for more than twenty years. The result of their comprehensive policy, untiring perseverance, and liberal enterprise, has been to build up an inland commercial city that in point of wealth, population and influence, bids fair to rival the most distinguished marts of the new world. They are not contented to rely upon the natural avenues of trade which are open to them, in common with the rest of the country, but like true and sagacious merchants, they turn to account every minor advantage that can be monopolized and made available. Not satisfied with the vast trade which centres around them, and which brings them into close commercial relations with half the world abroad, they must penetrate the unexplored regions of country about them far and near, for the purpose of opening auxiliary channels. They have for many years, not only made all the country between Lake Michigan and the Mississippi river, and far beyond, in the West and Northwest, tributary to them, but also Southern Illinois and Indiana are dependent upon their enterprise for many of their advantages and facilities for transacting business.

Not satisfied with all this domain of commerce, they cast a lecherous eye towards Michigan, and, having obtained a fair moiety of the trade of the western portion of the Lower Peninsula, are now seeking to absorb the rich traffic of the mineral regions of Lake Superior. Their enterprise seems to have no bounds. You go into any of the western interior towns, even as far east as Jackson, and you find Chicago merchants soliciting orders for merchandise. You visit Marquette or Ontonagon, Saginaw or Thunder Bay, and you find them opening negotiations for trade. You see at the hotels and public places profuse displays of advertisements and business cards, and the newspapers are filled with their advertisements, which are scattered around like the leaves of the forest. Their names have become familiar as household words with our country traders, who have lent a willing ear to their seductive arts. With such indomitable energy, determination and perseverance, is it at all surprising that Chicago should become what she now is, a great commercial town, outstripping all its rivals in western trade, and progressing in its onward march to wealth and greatness, beyond any parallel in the history of mercantile enterprise?

Nor is it commerce alone that gives Chicago its overshadowing greatness. Those who are interested in its general prosperity, made the discovery long since, that manufacturing enterprise could be made an essential element of wealth and importance. They have taken good care that the laws of Illinois shall favor every description of labor. There is no specific tax upon capital employed in manufacturing there. The holders of real estate extend to every manufacturer who goes there, a friendly hand. Lots for manufacturing purposes are either given away or sold at nominal prices. If capital is required, there are men there who have sufficient confidence in manufacturing enterprises to come forward to aid those who ask it. In short the destinies of Chicago are in the hands of far seeing, enterprising liberal men, who, having already profited by wholesome experience, and reaped a rich reward, will be likely in the future to put forth still greater efforts in the same direction.—*Detroit Commerc. Advertiser.*

Decision in the Maine Railroad Cases.

In the Superior Court, on the 17th ult., the following decision was rendered:

Commonwealth *vs.* Boston and Maine Railroad Company. By statute of this Commonwealth, when a railroad corporation, by negligence or carelessness, causes the death of any person who at the time was in the exercise of due diligence, it shall be punished by a fine not exceeding $5,000, to be recovered by indictment and paid to the executor or administrator of the deceased for the benefit of the widow and children.

At the time when the engine and cars of this corporation were precipitated into the dock five persons were killed, and five indictments were found against the defendants. At the last term a hearing on each was had before Judge Putnam, who took the matter under advisement. It appeared some of the widows had been paid for funeral expenses, &c., which have been deducted. The court to-day have decided the cases and affixed the damages against the defendants as follows:—Wm. Fitzer, $4,868; John Rafferty, $4,935; H. C. Taylor, $4,955; J. E. Holt, $5,000, and R. T. Hyatt, $4,948, to be paid to the Sheriff and by him paid to the widow and children in moieties according to statute. Costs in each case.

☞ The Brookfield branch of the Cleveland and Mahoning R. R. is now located from Youngstown to the Pennsylvania State line, distant about one mile from Sharon, to which point it will be extended when the necessary legislature is had. The road, as now located, is twelve miles in length, ten miles of which will be completed during the present season, affording an outlet to the immense coal fields of Hubbard and Brookfield, now being extensively opened up. A large part of the grading of the road is already completed, and several miles of track from Youngstown northward have been laid.

Cape Cod Railroad.

The annual meeting of the Cape Cod Railroad was held at Sandwich on the 17th ult. The old Board of Directors was re-elected.

A resolution to subscribe in aid of constructing the Cape Cod Central Railroad was discussed, and it was unanimously voted to recommend to the directors that they extend all proper facilities to the Central road, and on the most liberal terms consistent with the interests of the corporation.

New Patent Law in Canada.

The Canadian government is about introducing a new patent law, which will be found of great importance to American inventors. Under the present system, patents are granted only to resident Canadians; under the new, it is proposed to extend the protection to inventors of all nations, without distinction in favor of natives.

Connecticut River Railroad.

The business of the Connecticut River Railroad for six months ending June, 1862 and 1863, have been as follows:

	1862.	1863.
Gross receipts.....	$108,534 75	$144,554 17
Operating Expenses...	50,079 03	62,523 70
Net Earnings.....	$49,455 62	$82,030 47
Net gain in six months.....		$32,574 86

Expenses 43 per cent. of gross receipts for same period.

Railroad Connections with the West.

We understand that the negotiations which have been for sometime in progress to effect a practical consolidation of the five lines of railroad, viz: The Lowell, Concord, Northern, Vermont Central and Ogdensburgh, with the East Boston Freight Railroad and thus with tide water at East Boston, was consumated on the first of the present month and the line is now in practical operation. The steamer St. Lawrence which was launched at Ogdensburg some weeks since, commenced her trips between Ogdensburg and Prescott on the 29th of June, thus connecting the lines of road specified above with the Grand Trunk railway and transporting freight cars and passengers. At the same time an express passenger train was put upon the line leaving Boston at 6 A. M., arriving at Ogdensburg the same evening, and going through to Chicago in 49 hours.

The roads forming this line are making every effort by providing the best accomodations at low fares, to increase the business connections of Boston with the West. Nearly every day since the arrangements were completed, quantities of flour, oats and other merchandise have arrived at Lombard's wharves, and been discharged direct from the cars into warehouses, thus saving the expense of teaming, extra handling, &c. We believe that this consolidated line is to have important bearing upon the business interests of Boston, particularly if our merchants by the establishment of lines of steamers and packets to Europe will furnish an outlet for the flour, grain and other produce which will find its way here.—*Boston Journal.*

Rutland and Burlington Railroad.

The following is a report of the action in the Chancellor's Court upon the case of the Rutland and Burlington Railroad:

State of Vermont: Windham County. In matter of Rutland and Burlington Railroad Company.

At a hearing before Chancellor Barrett at Bellows Falls, on Thursday, the twenty-third day of July, James Cheever and William T. Hart of Boston were confirmed as Trustees of the first mortgage upon this road. Immediately afterward the bill to foreclose the first mortgage pending before Chancellor Kellogg in Rutland county was discontinued, and a new bill filed in Windham county before Chancellor Barrett for the same purpose.

Upon this bill a motion was made to place the railroad in the hands of the Trustees of the first mortgage and for an injunction against any use of the funds by the Trustees of the second mortgage except for the ordinary running expenses of the road.

A temporary injunction was granted, and an order of notice issued to Messrs. Birchard and Stewart, Trustees of the second mortgage, for a hearing on Wednesday August 5, at two o'clock in the afternoon, at Bellows Falls, upon the application of the first mortgage Trustees for possession of the road.

Schenectady and Catskill Railroad.

The Directors of this company held a meeting in this city on the 20th inst., and organized by electing, Col. D. D. Campbell, President; Hon. Sherwood Day, of Catskill, Vice President; and Hon. Peter Rowe, Treasurer and Secretary.

Measures were adopted to immediately open the books in various places for subscriptions to the capital stock of the road, and the intention is to push everything connected with the building of the road forward with the utmost vigor. The enterprise is one worthy the attention of capitalists at home or abroad, and if properly conducted, there can be no doubt of its success or its proving a remunerative investment to the subscribers. The officers of the company are men of capital and energy, and will use their best efforts to secure the construction of the road at the earliest possible period—*Schenectady Democrat.*

The Pacific Railroad.

The Pacific Railroad Company expect to have trains running to Knob Noster in Johnson county, Missouri, by November, and to Warrensburg in the same county, before spring. The rails for this section are already purchased, and as soon as the road bed shall be completed they will be laid down without further delay. At the same time the road is being pushed forward from Kansas City to Independence, and the rails for that portion purchased; and it will not be many months before that section also will be in operation. This will leave only the gap between Warrensburg and Independence, a distance of fifty-two miles, to be filled; when the great road will be completed.

Oshkosh and Wausau Railroad.

The contract for grading the first section (sixteen miles) of the Oshkosh and Wausau Railroad between Fremont in Waupacca county, and Neenah, where it intersects with the Chicago and Northwestern Railroad, has been let to responsible parties. According to the terms of the contract the work is to be completed by the 1st of October next. We learn that it is the determination of the managers of this enterprise to iron the road upon the completion of the grading. The work upon the road is being rapidly pushed forward. The largest part of the grading has been done between Waupacca and Fremont; and the balance will be finished after harvest. No doubt the cars will be running to the village of Waupacca before snow falls.—*Plover Times, 18th.*

Intercolonial Railway.

We understand from a source considered reliable that the new Canadian Ministry have not by any means abandoned the Interconial Railway, and that it is their intention to take up the subject at an early day with a vigor and an earnestness which they have not heretofore manifested. This piece of intelligence is not a little gratifying at the present time, and will induce many to overlook much that in their past conduct has appeared wrong and indefensible. There seems to be a greater probability now of a measure to secure the construction of the Railway receiving the assent of the Canadian Legislature than formerly. The prospect of easy and rapid communication being opened up with the far West, and the almost certain probability of railroad communication being eventually extended thereto, will have a tendency to induce many of the Representatives of Western Canada to give their support to the Intercolonial Railway scheme. The opposition of these men, as is well known, has arisen mainly from a desire to secure for their portion of the Province an equivalent for the direct advantages which Lower Canada will derive from the road. At a time when we regarded the speedy success of the great railway project as almost hopeless, it is indeed pleasing to receive assurance that the prospects are so bright, hopeful and cheering.—*St. John News.*

Fox and Wisconsin Improvement Company.

The following gentlemen have been elected directors of the company: Isaac Seymour, A. B. Clark, New York; Erastus Corning, Albany, N. Y.; H. S. Baird, Green Bay; Hiram More, Brandon; Horatio Seymour, Albany, N. Y.; J. F. Seymour, Utica, N. Y.; Samuel Marsh, New York; Otto Tank, Howard; J. Bardon, Portage; Wm. M. Taylor, Packwaukee.

☞ The Connecticut River Railroad Bridge over the Deerfield River, at Deerfield, Ct., which was destroyed by fire on the morning of the 25th inst., was 760 feet long, very high above the water and was one of the most costly bridges on the road, having originally cost about $75,000; but as the piers remain standing the loss will not exceed $20,000, of which $15,000 is covered by insurance in the Fire and Marine office in Springfield, Mass., and the Hartford office at Hartford. President Harris and Superintendent Brinsmade, officers of the company, at once proceeded to the spot, made arrangements for the transportation of the passengers, mails, express and baggage across the river, and put the machinery in motion for an immediate reconstruction of the bridge. It is expected that a new bridge will be built and trains running regularly within four weeks.

☞ The Taunton *Gazette* says two locomotives were despatched from establishments in that town on Tuesday—one for the Terre Haute and Richmond (Ind.) Railroad, and the other for the Toledo and Wabash road. Each of these establishments now turn out about three locomotives a month.

☞ The Railroad from Newport to Fall River is approaching completion. Gravel trains are running on the upper part of the island, and soon all will be in readiness for business.

☞ The Baltimore and Ohio Railroad Company, contemplate the laying of a track from Monocacy to Hagerstown and thence to the Potomac at Williamsport, thus avoiding Harper's Ferry and the inland Virginia route, that has been so frequently interrupted by the raids of the rebels.

☞ Joshua Longley, of Belchertown, Mass., has become the sole lessee of the Amherst, Belchertown and Palmer Railroad; his original partner, Mr. Smith, having retired. His lease has four years to run from June 1, and is likely to prove profitable for him, as well as remunerative to the stockholders.

☞ There is a prospect that ground will soon be broken on the Fort Edward, Sandy Hill and Glen's Falls Horse Railroad. Responsible gentlemen in Jersey City have agreed to build the road and take in part payment $10,000 stock, which in addition to $40,000 subscribed, is deemed sufficient.

Lehigh and Delaware Water Gap Railroad.

The merchants, and business men generally, feeling the great importance of having direct communication with Easton, *via* the North Pennsylvania Railroad, have circulated petitions, which have been very extensively signed, asking the City Councils to adopt the ordinance now before them, entitled "An ordinance to increase the value, and make productive the investment of the city in the stock of the North Pennsylvania Railroad Company," which has been so long a time a stagnant and unproductive investment, and which will, by the measure proposed in the above ordinance, make the stock which the city owns in the North Pennsylvania Railroad a valuable and dividend paying investment.—*Philad. Inq.*

OFFICE OF THE AMERICAN COAL COMPANY,
No. 29 Trinity Building, No. 111 Broadway, N.Y.,
July 21, 1863.

DIVIDEND.—The Directors of this Company have declared a Dividend from the earnings of the Company for six months ending 30th June ult. of THREE PER CENT., free of the United States Income Tax, payable at the office of the Company, on and after the 10th day of August next, to the registered holders of Stock at the closing of the books.

The Transfer Books will be closed at the close of business on the 30th day of July, and be re-opened on Tuesday, the 11th day of August.

2t31 G. P. LLOYD, Sec'y.

THE NEW YORK CENTRAL R. R. CO.

TREASURER'S OFFICE,
ALBANY, July 23, 1863.

TWENTIETH SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a Semi-Annual Dividend of THREE AND ONE-HALF per cent. on the capital stock thereof, free of the United States income tax, payable on the twentieth day of August next, on stock registered at New York Boston and Albany, respectively, and on the twentieth day of September next on stock registered at London.

Dividends in New York will be paid at the office of DUNCAN, SHERMAN & Co.; in Boston, at the office of J. E. THAYER & BROTHER; in Albany, at the ALBANY CITY BANK; and in London, at the UNION BANK OF LONDON, pursuant to circular and notice of December tenth, 1862, from the Transfer Office in that city.

The Transfer Books at New York, Albany, and Boston will be closed at the close of business on Friday, the thirty-first day of July instant, and be re-opened on the morning of Monday, the twenty-fourth day of August next.

JOHN V. L. PRUYN,
6t31 Treasurer.

THE ERIE RAILWAY COMPANY,
No. 184 West st., New York, July 17, 1863.

DIVIDEND.—The Directors of this Company have declared a DIVIDEND, from the earnings of the road for six months ending 30th of June, ultimo, of THREE AND ONE HALF PER CENT. on the PREFERRED STOCK, the Company assuming and paying the Government Tax out of the undivided earnings belonging to the Preferred Stock Account for the year ending 30th of June, 1862.

Also, a DIVIDEND of THREE AND ONE-HALF PER CENT. on the COMMON CAPITAL STOCK, free of the United States Income Tax.

Both payable at the Treasurer's office, Erie Place, on the 10th day of August next, to the registered holders of stock at the closing of the books.

The Transfer Books of both Preferred and Common Stock will be closed at the close of business on SATURDAY, the 25th day of July, and be re-opened on the morning of TUESDAY, the 11th day of August.

SUBSTITUTE FOR

CAR DUCK.

Kingman's Car Covering.

THIS is a heavy Canvass imbedded in a coat of Elastic Mastic or Paste which is applied directly to the boarding of the top of the car, and then thoroughly painted with three or four coats of paint, thus making a covering VERY MUCH LIKE **CAR DUCK**, but at this time at half the cost. It is now successfully used by many Railroads and Car Builders. Directions and particulars sent when requested. This Mastic and Canvass for sale by

WILLIAMS & PAGE,
67 Water street,
Boston.

March 1863.

PACIFIC RAILWAY.

THE undersigned will receive proposals to furnish four thousand (4,000) tons of railway iron (or any part thereof) for the track of the first section of the Union Pacific Railway, Eastern Division. The iron to be of American manufacture, of the best quality, and to be delivered either at Leavenworth or Kansas City. Communications for further information to be addressed to the undersigned or to SAMUEL HALLETT & Co., 58 Beaver st., New York. Terms, cash on delivery.

J. C. FREMONT,
Pres't Union Pacific Railway, E. D.

NEW YORK, June 9, 1863.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, July 1, 1863.

THE Board of Directors of the ILLINOIS CENTRAL RAILROAD COMPANY have THIS DAY declared a DIVIDEND of TWO (2) PER CENT. free from Government tax, upon all the shares and canceled Bonds. Scrip standing in the name of holders on the books of the Company at the close of business on the 20th day of July instant, payable on and after the 1st day of August upon all shares the calls upon which shall have been duly paid; and that the dividend upon the full paid stock shall be a discharge of the interest payable thereon on the 1st day of January next, and payable upon surrender of the coupons issued therefor. The transfer books of the Company will be closed from the afternoon of the 20th to the morning of the 30th July.

4127 THOMAS E. WALKER, Treasurer.

I. KENDRICK,

No. 135 WALNUT ST., PHILADELPHIA,

AGENT OF THE

UNION COAL & OIL CO.

OF MAYSVILLE, KY.,

FOR THE SALE OF THEIR

Paraffine Lubricating Oil,

FOR ALL CLASSES OF

STATIONARY MACHINERY, LOCOMOTIVE ENGINES, RAILROAD CARS, COTTON SPINDLES,

SEWING MACHINES AND WOOLEN FACTORIES.

ALSO,

MAYSVILLE COAL OIL
FOR BURNING,
PARAFFINE WAX,
PARAFFINE WAX CANDLES, AND ROLLING MILL GREASE,
FROM PURE CANNEL COAL.

P. S.—All Oils **warranted** to answer the purpose represented.

☞ **Particular attention given to orders for shipment in cans or barrels.**

DELAFIELD & BAXTER'S,

Late OGDEN & DELAFIELD,

ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well papered, on application at their office, by **DELAFIELD & BAXTER, 104 Wall st.**

The above CEMENT is used in most of the fortifications building by government. 45

NEW YORK, HARLEM & ALBANY R. R.

CHANGE OF TIME.

TRAINS WILL LEAVE Twenty-sixth street Depot:

For Albany—10.30 A. M., stopping at Williamsbridge, White Plains, Bedford, Croton Falls, and stations north to Albany, connecting with Central and Northern R. R. for Saratoga and all points north and west.

For Croton Falls—8.15 A. M., and 5 P. M. (the 5 P. M. train will run Saturdays only, returning leave Croton Falls 5.50 A. M. Monday).

For White Plains—8.15, 10 A. M., 2.30, 4.10, 5 and 6.15 P. M., from White st. depot.

For Williamsbridge—8.15, 10 A. M., 2.30, 4.10, 5, 6, 6.15 and 8.30 P. M.

Croton Falls, White Plains and Williamsbridge trains stop at all stations.

For Dover Plains—4 P. M., stopping at White Plains and stations north to Dover.

RETURNING LEAVE

Albany—9.10 A. M. on arrival of Northern and Western Trains, stopping at all stations from Chatham to Croton Falls; also Bedford, White Plains, and Williamsbridge.

Dover Plains—5.45 A. M., stopping at all stations north of and at White Plains.

Croton Falls—5 P. M.

White Plains—6.10, 7, 8.20 A. M., and 12.30, 4.15 P. M.

Williamsbridge—5.30 A. M. and 7.05 P. M.

Croton Falls, White Plains and Williamsbridge trains stop at all stations.

JOHN BURCHILL, Superintendent.

SMITH'S
Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of **SMITH'S AIR LIGHT FOR RAILROADS**, and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.

Cost per hour, 5 cents.

Cost of wicks, chimneys, per year, $4 80.

Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.

In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.

You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2.½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,

I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, **31 Nassau st.**, or by addressing

CHAS. W. WELSH,
Secretary.

ERIE RAILWAY.

PASSENGER TRAINS leave, via Pavonia Ferry, from foot of Chambers st., as follows, viz:

7.00 A. M., EXPRESS, for Buffalo, and principal intermediate Stations.

8.30 A. M., MILK, *daily*, for Otisville, and intermediate Stations.

10.00 A. M., MAIL, for Buffalo and intermediate Stations.

4.00 P. M., WAY, for Otisville, Newburgh, Warwick, and intermediate Stations.

5.00 P. M., NIGHT EXPRESS, *daily*, for Dunkirk, Buffalo, Rochester, Canandaigua, and principal Stations. The Train of Saturday, runs through to Buffalo, but does not run to Dunkirk.

7.00 P. M., EMIGRANT, for Dunkirk, and principal Stations.

CHA'S MINOT, *Gen. Sup't*

RAILROAD IRON.

Hubbard's Railway Timekeepers.

As all our trains are run upon time, both to fulfil engagements to travellers, and avoid collisions, good timekeepers are indispensable; indeed, the more perfect the better, for the jarring of the cars, it is said, accelerates the motion of watches. We therefore recommend these chronometers of HUBBARD BROS., for such they may justly be called, as an improvement on ordinary time pieces and invaluable to railroad men.

New York and Harlem Railroad Injunction Dissolved.

At a special term of the Court of Common Pleas on the 29th of July, held by Justice Brady, the hearing of the motion for a continuance of the injunction granted against the Harlem Railway Company, on the complaint of John J. Phelps and others, restraining them from laying their track in Madison Avenue, in pursuance of the resolution of the Common Council permitting the extension of Harlem railroad through Broadway and Madison Avenue, was brought on for argument.

The plaintiffs who are owners of property in Madison Avenue, appeared by their counsel, who conceded to the argument of the defendant's counsel, that since the granting of the injunction, the Court of Appeals had decided, in the case of the People *ag.* Kerr, adversely to the right of the owners of property to maintain an injunction against the use of a street by a railroad.

It was suggested that, the whole case having been decided by the Court of Appeals adversely to the plaintiffs, there was no ground for the further prosecution of the suit, and that it was an act of injustice to the Harlem Railroad Company to restrain them any longer from the exercise of their valuable rights.

Plaintiff's counsel urged, that inasmuch as the decision of the Court of Appeals had been made since the commencement of this suit, and this suit had been commenced in good faith, the plaintiffs should be permitted to discontinue the action without costs.

In this view the Court concurred, and an order was made dissolving the injunction and discontinuing the suit, without costs.

The following order was entered:

"The defendans in this action having appeared in the order heretofore made herein, requiring them to show cause why they should not be restrained from laying their track in Madison Avenue, under the resolution of the Mayor, Aldermen and Commonalty of the City of New York, of April 21, 1863, and having moved that the argument of the motion be now brought on, and the plaintiffs having suggested that the decision of the Court of Appeals, in the case of the People *agt.* Kerr and others, has adjudged adversely to the rights of the plaintiffs to maintain an action for such injunction, and that the law of the State, as established by that decision, was not generally regarded as the existing law at the time of the granting of the injunction order, and that therefore the plaintiffs should have leave under the circumstances, to discontinue without costs.

After hearing counsel for the respective parties, it is adjudged by the court that the injunction order heretofore granted, restraining the defendants, the New York and Harlem River Railroad Company, from laying their track in Madison Avenue, be and the same is hereby dissolved, and that the plaintiffs have leave to discontinue the action, without costs, and without prejudice to any rights of the plaintiffs."

This decision will undoubtedly be repeated in the other cases of similar character, which yet remain in the courts. In the case of the People *vs.* Kerr the principle is settled against the right of property owners to obtain these injunctions. The principal case left to be heard, is that, where the stage proprietors claim a prior vested interest in the streets, with which the Harlem Co. will interfere by the construction of the railroad. We imagine this ground is untenable, and that the original power granted the Harlem Co. by statute, will prevail over any omnibus licenses granted by the city. In this case the confirmation of the charter of the Harlem Co. by a grant of the Common Council, and the actual construction of a part of the road under that permission, will be hard to avoid, and on the whole we may consider the question settled, and that we are to have a railway in Broadway. This once fashionable promenade, where our stateliest mansions were once erected, has practically become a street of business merely, and is crowded by those who go there for business purposes and not for pleasure. The upper avenues are now the favorite resort of pedestrians, and the Central Park for those who seek fresh air and a beautiful drive. In the city of London, more time is lost in traversing it, than is occupied in the transactions to be attended to, and so it would be here but for our city railways.

The Harlem Co. proposes to lay down a rail of a new pattern of wrought iron, with wide flanges: the rib, which is central and is to bear the wheels, projects but a little above this bearing and has square corners. By this arrangement, a horse's foot cannot be caught in the rail; there is a wide smooth bearing for ordinary carriage wheels to run upon, and it can be crossed easily, as the rail offers but a small obstructing point to the rim of a carriage wheel, the leverage of which lifts it over almost without a jolt.

Great improvements in the cars are to be made, and we will suggest one other, which will be highly acceptable to the public, and do away with the objections now existing among passengers. Frequently to make room for a single passenger, all the rest on the same side have to change their seats. If these were divided by a light brass rail, no such inconvenience would occur, and after a passenger took his seat he would not be disturbed. Something of this accommodation is due to the public. There is no propriety or justice in cramming the cars as is now done. In Paris, when an omnibus is full, no more are allowed to enter, and so it should be here.

We expect that cars will be running in Broadway before many months have elapsed, and hope the Harlem Co. will show themselves as liberal to the people, as the people have been to them.

The McGregor Western Railway.

We have received from Hon. George Greene, President of the McGregor Western Railway Co., Iowa, a copy of the report recently made in relation to this road, including plans and estimates, articles of association, forms of the securities, and the laws of the State pertaining to such organizations.

The line chosen is selected from various others, practicable but not advisable. It commences at North McGregor a flourishing town on the Mississippi, and thence passes up the valley of the Giard Creek, westerly 18 miles to a point 6½ miles, southeasterly from Postville; from thence to Calmer 23 miles, occupying the greater part of an old line laid down six years ago and partly graded. From this point, or rather 4 or 5 miles from it, the route to the State line where the Minneapolis and Cedar Valley crosses and terminates, and a connection is to be made, has not been fully settled, but there are no difficulties in the way whatever. The Minneapolis road is more than half graded and is being rapidly constructed. As between Chicago and St. Paul this route is 28 miles shorter than any other. The maximum grade will be about 53 feet to the mile, and the grading of the first 50 miles will be much heavier than on any other portion of the distance.

The first fifty miles of the road with five miles of turnouts, will cost about $900,000, the remainder will be constructed for about $22,000 per mile.

By the articles of incorporation under the general laws of Iowa, the capital stock is fixed at ten millions of dollars and may be increased by the Board of Directors. The shares are one hundred dollars each.

The charter is to continue for fifty years from the 19th January, 1863, and may be renewed. Its annual meetings after 1863, are to be held on the third Wednesday of January. The Board of Directors are not to be less than five or more than nine in number. The officers at present are George Greene, President, James L. Reynolds, Vice President, J. Ely, Treasurer, and H. B. Whitehorne, Secretary.

The aggregate indebtedness of the company is limited to six millions of dollars over and above certificates of stock, until the capital is increased. The private property of the stockholders is exempt from the payment of corporate debts. The general laws of Iowa in relation to incorporations are very stringent and effectually guard against frauds.

By authority of the Board of Directors, mortgage bonds have been issued, in the proportion of fifteen thousand dollars per mile, for the first 40 miles of the road from McGregor to Ossian, and the proceeds are to be exclusively applied to the construction and equipment of the said 40 miles. The principal being payable in 30 years at the agency in New York with interest at the rate of 7 per cent. Bonds of corresponding import have been issued, payable to S. J. Tilden and Wm. B. Ogden, or bearer, those gentlemen being trustees for the benefit of the holders. Coupons are attached for each half year's interest. For the security of the payment of the bonds, a trustee mortgage has been executed in the most approved form, and fully covers all the property of the company, and all the drawbacks they may obtain from connecting roads. Transfer books are to be kept in the city of New York. After the issue of $320,000 of the bonds, the residue shall not be issued until twenty miles are in good running order.

The whole cost of the line is estimated at $2,100,000, and the revenue is calculated as follows:

SUMMARY OF REVENUE.

Gross receipts per year for freight	$279,315 94
" " passengers	54,775 00
Gross earnings	$334,090 94
Running expenses, fifty per cent	167,045 47
Net earnings per year	$167,045 47
Add freight drawback, as above	46,241 20
Add passenger " "	4,225 50
Net revenue per year	$217,512 17

This would pay ten per cent. on the sum of $2,175,121 70, which exceeds the estimated cost of the whole line, built and equipped.

In this estimate, mail and express earnings, and the drawback from the Milwaukee and Chicago Railroads are not included, but are expected to be large.

The farmers and residents along the line have generally conceded the right of way, and made large donations to encourage a speedy completion of the work.

The business anticipated is not merely local. That of Northwestern Minnesota is confidently expected, as well as that of the rich regions of British North America on the great rivers Saskatchawan, Assiniboin and the Red River of the North. The business of McGregor is already large. It sent over the Milwaukee and Prairie du Chien road in 1862, 5,290 bbls. flour, 1,090,884 bushels of wheat, and 8,812,857 lbs. of sundries.

As the road passes through or adjoining the northeastern counties of Clayton, Alamakee, Fayette, Winneshiek, Mitchell, Chickasaw, Floyd, Howard, with a population in 1860 of upwards of 70,000, rapidly increasing, and there are fifteen other counties north and west of these also rapidly filling up, which in all probability will connect by branches with the main line, it appears that the local and way business will be large. It passes through the best wheat growing countries in the State, and at Monona, 14 miles from the river, it will supplant a present great thoroughfare, over which an average of four hundred loaded teams passes daily.

We are informed that a large body of men is now at work on the road; the rails for the first forty miles are on the way, and will be laid down during the months of August and September ensuing. This will complete it to Ossian, which is in the centre of a populous and productive region. Circumstances so much favor the operations of the company, so energetically is its business conducted, and so much confidence is felt in productiveness, it is now pretty certain that within twelve months it will be in connection with the Minneapolis, Fanbow and Cedar Valley line, thus making a direct line from Chicago and Milwaukee to St. Paul, by the routes of the Chicago and Northwestern, and the Milwaukee and Prairie du Chien.

Thus we find the railroad spirit in full activity in the great west, and we are happy to record the fact, that railway management has greatly improved the last few years, and system, economy and profit are beginning to be the marks of railway enterprises.

Central Railroad of New Jersey.

The following is a statement of receipts and expenses for the six months ending June 30th, compared with the corresponding six months of 1862; a similar comparison of the coal tonnage; and a condensed statement of the company's position on the 1st July instant.

	Passengers.	Merchandise.	Coal.	Mails, etc.	Total, 1863.
1863. January	$16,219 37	$55,008 17	$62,229 26	$2,048 37	$135,580 17
February	15,425 88	54,671 14	82,717 47	1,858 04	154,172 33
March	19,518 17	59,971 51	88,618 43	1,787 76	169,890 87

Dividends	67,859 66	
State taxes	12,288 12	
U. S. "	9,564 38	
	280,386 41	
		273,580 70
		$6,588,484 39

Extraordinary causes, which cannot always exist, have, in all branches of the Company's business—whether passenger, merchandise, iron or coal—produced a large increase in quantities transported, and in the amount of the receipts. The expenses show the enhanced cost of labor and materials by an advance of over 40 per cent.; but so large have been the gross receipts, being

not far from a million dollars for the six months, that notwithstanding this increase in expenses, the net earnings show a surplus of $273,580 70, after providing for interest on the bonded debt, two quarterly dividends of 2½ per cent. each, and the proportion of State and United States taxes. This sum will, however, not more than make good the increased cost of construction of the extension to Jersey City and of the South Branch Railroad, owing to the inflation of prices. Both these works, but especially the extension, are being pushed as rapidly as possible, and are under good headway; but much difficulty is found in securing what is required.

Worcester and Nashua Railroad.

The earning and expenses of this road for the years ending November 30, 1861 and 1862, have been as follows:

	1862.	1863.
Earnings:		
From passengers	$84,674 92	$91,221 96
" freight	103,117 64	101,798 87
" mails	4,225 00	4,625 00
" express	1,800 00	1,800 00
" rents	1,452 22	1,198 27
	$195,669 78	$200,744 10
Expenses:		
Repairs of road	$21,128 16	$25,348 57
" engines	9,962 96	8,233 91
" cars	7,642 85	6,567 05
" buildings, etc.	5,733 00	4,385 69
" bridges	2,545 71	270 70
Fuel	16,805 01	19,517 59
Freight expenses	15,046 25	13,783 81
Passenger "	13,622 43	13,547 91
Switchmen, watchmen, etc	2,266 11	2,360 89
Oil and waste	1,944 56	1,810 19
Removing snow and ice	4,145 40	1,458 29
Taxes and insurance	1,699 52	1,784 61
Gratuities and damages	100 00	.....
United States Tax	.....	1,796 76
General expenses	9,845 39	8,695 87
	$112,481 35	$109,561 84
Net earnings	$83,188 43	$91,182 26

From which deduct—		
Interest paid in 1862	$7,945 48	
Dividends " "	60,888 00	
		68,833 48
Balance of earnings for the year		$22,348 78
Surplus last year	$59,165 66	
Less bonds paid	8,500 00	
		50,665 66
Total surplus not divided		$73,014 44

The gross earnings have increased $5,074 32; with a decrease in operating expenses of $2,911 51—making the increase in net earnings $7,985 83. The net balance, after payment of interest and dividends, is $8,240 46 in excess of the previous year.

After paying the stockholders two dividends of two dollars each, amounting to $60,888, and the excise tax on passenger earnings, there remains of the earnings of the year, $22,348 78, which has been reserved for the payment of the bonds of the company.

If the policy should be continued of paying four dollars on a share annually to the stockholders, and holding the excess of earnings for the payment of the bonds of the company, the directors have great confidence that the whole indebtedness of the company can be paid off by the time the last bonds become due, May 1, 1866; after which the whole earnings of the road can be paid to the stockholders, giving them at least six dollars annually on a share.

The road bed, track, rolling stock, bridges, buildings, etc., have been kept in good repair during the year. About eight miles of track have been laid, using for the purpose 325 tons of new iron. 400 tons of repaired rails and 15,000 new cross-ties have been laid down. One locomotive, one passenger and eight freight cars have been built in the company's shops.

The following statement will show the financial condition of the company November 30, 1862:

Cost of road and equipment		$1,270,397 63
Cash		63,563 55
Bills receivable		169 00
Sundry accounts		5,643 14
Lumber		3,237 65
Materials for working the road		44,077 97
		$1,387,088 94
Capital stock		$1,141,000 00
Bonds payable May 1, 1863		10,000 00
" " " 1864		17,500 00
" " " 1865		39,000 00
" " " 1866		75,000 00
Unpaid dividends		1,130 50
Dividend due January 1, 1863		30,440 00
Reserved income		73,014 44
		$1,387,088 94

At the annual meeting of the company, held in Worcester, on the 22d of January, the following gentlemen were elected directors for the ensuing year:

President—Geo. T. Rice.

Directors—Stephen Salisbury, Alexander De Witt, Jacob Fisher, Thomas Chase, A. F. Lawrence F. H. Dewey, F. H. Kinnicutt, A. H. Bullock.

Treasurer—T. W. Hammond.

Superintendent—George W. Bentley.

Seventh Avenue Railroad Case.

OPINION OF THE COURT OF APPEALS.

Court of Appeals, Albany—Before a full Bench.

The People and others *vs.* John Kerr and others.

—Wright, J.—Having carefully examined the case, I shall content myself by stating, without elaboration, the conclusions reached:

1. The authority conferred on the defendants by the act of April 9, 1860, to construct, operate and use a railroad for the conveyance of passengers, for compensation, through, upon, and along certain streets and avenues in the city of New York, was not an invalid exercise of legislative power, in the absence of any constitutional inhibition or restraint. The Legislature has entire control of any public rights in the highways or streets, and what it authorizes, so that it may be constitutional, cannot be complained of by the Attorney-General or any one else.

2. The act referred to authorizes the defendants to construct and use a railroad track, but makes no provision for compensation to the corporation of the city of New York or to the owners of lots fronting on the streets to be traversed by the track. Because the act does not provide for compensation either to the corporation or the adjacent land owners, but the defendants are empowered to use the streets for the transportation of passengers in carriages run on iron rails, without making compensation to any one, it is insisted that the constitutional inhibition which forbids the taking of private property for public use, "without just compensation," applies to the case. Conceding, however, that the laying down of iron rails in the public streets, without any change of grade, and running carriages thereon by horse power, for the use and accommodation of city passengers, is a material enlargement and change of the nature of the peculiar easement, and a *taking* of the property of the owners of the soil of the street, within the meaning of the constitutional provision, it is necessary before the validity of the act can be questioned by the Attorney-General, or the other plaintiffs in this action, that the rights of the latter or of the municipal corporation should be those of absolute owners of the fee of the land embraced within the street. Indeed, if the city corporation owns the streets in the same manner and to the same extent as an individual does his lands and its property in them [is] of such a character as to be protected by the constitutional limitation upon the right of eminent domain, the action cannot be sustained. The corporation is made a defendant upon the allegation that it is about to consent to the construction of the railroad track by Kerr and his associates. If it owns the streets—if the absolute fee be in the corporation—and it assents to the additional burden, it removes any constitutional objection to the law. The Attorney-General certainly could not be heard to maintain that that was a public nuisance which is authorized by a constitutional act of the Legislature.

3. The plaintiffs, other than the people, have no property, estate, or interest in the land forming the bed of the streets in front of their respective premises, to be protected by the constitutional limitation upon the right of eminent domain. The streets in question were voluntarily or compulsorily, and upon due compensation made therefor, transferred from the individual proprietors to the corporation in fee, according to the 178th section of the act of 1813 relating to the city (2 R. L., 409 to 416.) It is found as a fact, and conceded, that under this act of 1813 all the lands in the several streets on which the plaintiffs are abutting land owners were either taken for streets, under section 178 of that act, under compulsory appraisal, or ceded by the lot owners upon an agreed valuation pursuant to such section. Unlike our highway acts, which condemned to public use a mere easement only, (2 R. L., 275,) this statute provided for the "relinquishment of the lands and premises" constituting such streets by the original proprietors, and that upon the final confirmation by the Supreme Court of the report of the Commissioners of Estimate and Assessment, the corporation should become and be seized in fee simple of said lands and premises. After such relinquishment and vesting of the fee in the city corporation, no property, estate or interest in the land, included in the streets opened under the act, remained in the adjacent proprietors. The possibility that the public use, for which the land was taken, might cease, is not, I think, to be deemed as leaving in the persons from whom it was taken a right to have the land again in that event (Heyward *vs.* the Mayor, &c., of New York, 3 Seld., 314.) An interest, though technically vested, so limited as to be subsequent in point of enjoyment to a prior present ownership that may last forever, is not to be regarded as property, or entitled as such, to immunity from destruction at the will of the Government. If, however, it were conceded that those from whom the land was

taken have some remote reversionary right, in case the street shall cease to be used as highways, the possibility of reverter is too remote and contingent to be of any appreciative value.

4. The streets in question are not owned by the corporation of New York. The corporation cannot sell or dispose of them, or even divert them to private use. Any and all title or interest which the city has in them is held for public use; is *public* property, and not private or municipal. By an exercise of State power they were taken or confiscated to public use, and compensation made for them not from any fund levied on the corporation or its corporate property, or on the city or its inhabitants generally, but by an exercise of the taxing power of the State. The Legislature acted under its taxing power in raising the fund or means of payment. It cannot be known that a single city corporator contributed any sum toward the purchase; and for anything that appears, the streets in question may have been wholly paid for by non-residents. By force of the statute of 1813, the corporation became seized in fee of the land embraced within the streets not absolutely as private or corporate property, but in trust for public use. The fee being vested in the corporation, the statutory command and authority followed to take possession and hold the streets "*in trust* that the same be appropriated and kept open as public forever, in like manner as the other public streets in said city are, and of right ought to be (2 R. L., p. 408, §§ 177, 178.) It would be strange, indeed, if these streets belonged to the city and [were] beyond public control, when they were acquired by the exercise of the right of eminent domain, [and] were confiscated to public use, when vested in the corporation, by the proceeding to open them. I am clearly of the opinion that the city corporation has no *property* in the streets of a character to be protected by the constitutional limitations upon the right of eminent domain. It is perhaps unnecessary in this case to consider the question whether in other streets of the city, not opened under the act of 1813, the corporation has a *property* in them to be thus protected; but if it were, my conclusions would be the same. Whether the fee or ownership of the bed of the ancient streets was originally vested in the Government or the land was taken, and condemned for public use, under colonial or State acts, upon paying to the proprietors a compensation for the soil or easement, or was voluntarily ceded to the public, it seems plain to me that the corporation has no property in the soil of the streets to be constitutionally protected against the acts of the State in regulating their use. It cannot be pretended that the absolute title and estate in the land embraced within the streets have ever been granted to the corporation from any source. Whatever estate or interest it holds, either conferred by the Dongan Charter, or by the State, is in trust for the public use. It is not a trustee for the inhabitants of the city alone, but for the whole people. The corporation may exercise this trust—it may have control over the public streets or the power of regulating their use, but that is not corporate property, nor has the corporation or any of its corporators, a private interest therein or a right to derive profit therefrom.

5. The effect and object of the act of 1813, in relation to the streets in question, were to establish a public trust for the benefit of the whole people. All public streets or highways are for the use of the people of the whole State, whether located in town or country. The interest in such use, or the ownership thereof, is *publici juris*. It is a prevalent notion that the inhabitants of the city have some distinct and peculiar right to the use of the streets, not pertaining to the whole people, and that the corporation having paid for them, they are in a sense, corporate property, and the right to govern and regulate their use a sort of corporate franchise. But this is an erroneous view; as has been seen in regard to the streets opened under the act of 1813, compensation was made not from the city treasury, or from corporate property, but the fund for payment was raised by an exercise of the taxing power of the State. So also as to other streets, no compensation has been paid by the municipality, whether they were originally vested in the Government, or under colonial or State acts, opened by the exercise of the right of eminent domain. The character which the corporation has uniformly sustained, has been that of trustee for the public. It was as such trustee that the State in 1793 conveyed to it all its title, estate and interest in such streets. (Greenleaf's Laws.)

The interest in the use of the streets bring *publici juris*, the power of governing and regulating such uses is vested in the legislature, as the representative of the whole people. It is a part of the governmental or political power of the State, in no way held in subordination to the municipal corporation. If the legislature could not authorize the use of the streets in the way prescribed in the act of April, 1860, the power exist *nowhere*. The permission of the municipal Government, the mere creature existing at the will of the State, would add nothing to the power. I know of no restraint upon legislative action unless it can be found in the constitution, and there is nothing there but the limitation on the exercise of the right of eminent domain. The city corporation, as freeholder of the streets in trust for public use as highways, is but an agent of the State. Any control which it exercises over them, or the power of regulating their use, is a mere police or governmental power delegated by the State, subject to its control and direction, and to be exercised in strict subordination to its will. The corporation, as such, has no franchise in connection with the use of the streets for the transportation of passengers. Whatever power or authority it possesses in respect to the carriage of persons for hire, was derived from acts of the State Legislature, which power may be resumed by the granter, at its pleasure. I am aware that what is called the franchise for carrying persons for hire over the streets of the city, and for receiving a pecuniary recompense for the enjoyment of this privilege by others, as claimed to have been enjoyed by the corporation from time immemorial, and to have been one of the privileges or franchises confirmed to it by the Montgomerie Charter. But this rests in mere claim. Neither of the ancient charters granted to the city corporation the office of carrier of persons, or any power of licensing, or receiving fees from others for the privilege. The Montgomerie Charter did indeed grant to the corporation "the office of cartage, carriage and postage of all goods, wares, merchandise, and other things to be carted or carried in or through said city, or any part thereof." (Mont. Charter, § 19.) But it has not been supposed that even this was an irrevocable grant of property.

I discover no obstacle, therefore, to State legislation in respect to the use as well of public streets and highways in the city as in the country. The power which the municipal corporation holds and exercises in controlling and regulating the use of the streets of New York has been delegated to it by the State. It is a grant of governmental power for local purposes, subject to the control of the supreme power in the State. The Legislature may at any time resume the power delegated.

It is not necessary that the courts should maintain or even approve of the policy and justice of that species of legislative interference with the local affairs of a great municipality which the act under consideration discloses. The question is simply one of *power*. I cannot doubt that the power exists with the State Legislature, without the consent or license of the municipal corporation to so control the use of the public streets of the city as to authorize the construction of a railroad track therein, on which city passengers may be transported for hire. It can make no difference with the question that the right granted is in the nature of a franchise, for it proceeds from the sovereign. The judgment of the Supreme Court should be affirmed.

All the judges concurred substantially in the foregoing opinion.

Railroad Earnings--Weekly.

The earnings of the Grand Trunk Railway for the week ending July 25, 1863, were:

Passengers	$33,131 92
Freight and live stock	38,392 18
Mails and sundries	2,850 00
Total	$74,374 10
Corresponding week, 1862	62,633 35
Increase	$11,740 75

The traffic of the Great Western Railroad for the week ending July 24, 1863, was as follows:

Passengers	$19,016 80
Freight and live stock	19,214 25
Mails and sundries	1,317 14
Total	$39,547 69
Corresponding week of 1862	40,389 91
Decrease	$842 22

The earnings of the Chicago and Alton Railroad for the 4th week of July, 1863, were:

Passengers	$14,103 15
Freight	28,204 09
Sundries	1,135 84
Total	$43,442 58
Same week last year	28,880 51
Increase	$14,562 07

The earnings of the Galena and Chicago Union Railroad for the 4th week of July, 1863, were:

Freight	$20,992 15
Passengers	10,111 77
Mails	1,300 00
Total	$32,403 92
Same week, 1862	50,783 68
Decrease	$18,379 76

American Railroad Journal.

Saturday, August 8, 1863.

Stock Exchange and Money Market.

The favorable opinion which this JOURNAL has frequently expressed as to the substantiality of American stocks, governmental and corporate has been justified fully by events. Our long familiarity with the enterprise and resources of the United States, has enabled us to form correct estimates of what the country is equal to. How could it be otherwise, We inhabit the best part of the continent. In three generations we have grown from a handful to more than twenty millions of people. We have magnificent lakes along which canoes alone coasted, and now we have three hundred thousand tons of shipping with a free navigation of more than a thousand miles, and friendly and populous ports welcoming every sail. On our rivers where the voyages were the work of weeks, we have splendid steamers traversing them in a few days or hours. Where the wig-

wam of the poor Indian was once pitched, are now great and thriving cities. Where there was but a trail, there are now railways, and men who in those days trudged wearily on foot, now shoot like the arrow over the most wonderful of roads. States, the products of centuries in Europe are here the growth of a day, and what it has cost ages of blood and treasure elsewhere to secure, the protection of life and liberty, and the unrestricted pursuit of happiness, has been effected by a very moderate outlay.

This splendid fabric of human structure has for well nigh a century been consolidating itself by the establishment of those political guarantees which give men assurance of permanence, and we were going on and culminating in the most perfect system of self government the world ever saw, until the same spirit which caused even angels to rebel, infected our habitation, and for a time threatened us with ruin. We believe that the noble persistence of the conservative and considerate in defence of our priceless institutions accompanied by a timely remorse and repentance on the part of those who sought to overthrow them, are likely to reinstate the institutions of the country as they were, with such guarantees as are due to the unjust disturbance of them, and that we are again to enjoy our nationality, and our former position among the nations of the earth.

If this be granted, we can say in the words of one of our most profound thinkers, "No man can now predict our future." We see no end to the efforts of enterprise, nor any bounds to its success. We are upon two oceans, one of which will be almost exclusively monopolized by us by means of the great Pacific Railroad. We have the greatest and most numerous gold regions on the face of the globe. We have hundreds of millions of acres of virgin soil, where no man has ever yet scattered the sweat of his brow. We have laws where a full equality of rights secures to the prudent and industrious all the advantages of life, and the strongest inducements to virtue and good conduct are here held out to those who wish to be happy.

Into this condition we are reverting by the operation of events, by the sober second thought of the people, and the repression of a rebellion for which there was never any just cause. Once more united, the recusants being left to seek other climes, or to acquiesce in the supremacy of the law, we may look forward to at least a hundred years of peace and prosperity. No such disturbances as those we have witnessed for the last two years and a half, can by any possibility occur again. The penalty is too dreadful to be incurred even by bad men during the next three or four generations.

We may then as a JOURNAL of finance offer our congratulations on the future stability of our financial and industrial enterprises. And first as to the national debt. It is yet but one quarter of that of England, one half that of France, and if we compare it with that of Holland, taking area and population into account, it is but fractional in amount. The interest on this debt has punctually, notwithstanding all our difficulties, been paid in gold. The revenue of the customs at a single port, that of New York, is not only adequate to the discharge of the interest, but would without any other aid, form a nucleus for a sinking fund to discharge the principal within the average of a life time. The resources from direct taxation are certainly twice, perhaps three times greater, thus assuring the creditors of the Government of punctual repayment in good season.

So much for a view of our home strength and credit.

The late arrivals bring us information of a striking reaction abroad. American securities rose rapidly with the late intelligence of our successes, and will continue to do so, when the calendar of July is read by foreign capitalists, recording more than twenty successful actions on the part of our forces. Those persons abroad then who really understood our affairs and invested in American securities, have reaped enormous profits, and are willing not only to go further and invest to a larger extent, but will be found unwilling to be reimbursed when the day of payment arrives. Indeed they already complain of being cheated out of their profits, or rather profits they might have secured, by the sinister and false predictions of that famous Journal, which assumes the control of public opinion, and of all financial measures. It is not to be wondered at therefore, that a fresh and very extensive demand for American securities has risen abroad, or that the orders which were lying unexecuted in this city have been rapidly filled. There are still however parties who believe that as our currency approaches the specie standard, stocks will fall. We do not think so, for the equalization of coin and currency is going on by such gradual steps, that there will be scarcely a ripple on the surface. The Government could do no more than pay its interest in gold under any circumstances; the Banks if they adopt the same course, fall into the same category. Every dollar of the currency will still be applicable at the par of gold as it is now, for the payment of debts, and who then will be in a position to demand and insist upon the supposed difference. We do not see where the creditors are to be found, who will not gladly receive all they are entitled to, and who then will be willing, to depreciate his own property, in order to conform to the theory of these bullionists?

The prices of the cereals have not been greater in paper, than they were in gold, who will be such compliant theorists as to sell them at the predicted prices. They have through this whole civil war produced in gold abroad, quite as much as they did before the war; for the prices paid by the consumers, were in conformity with the demand; and who ever heard of a hungry country getting a reduction to suit the currency of the exporting country.

An active movement among railway projectors is now taking place in the North West. New lines are being laid out over our fertile plains, up our teeming vallies, and towards our auriferous territories. Millions untold lie there for the taking. Idaho and Colorado especially invite labor and promise rich rewards.

The Treasury department evidently seems to take this cheerful view of our affairs. It finds it can obtain temporary loans, without paying the interest in gold as heretofore, thus showing that gold and paper are fast assimilating in commercial value, and we imagine there will be as many deposits under the new rule as the old.

The ease in the money market continues. Railway and other shares of active companies, are firm and advancing. It is believed that gold is destined still further to decline and exchange will go with it. The actual export of coin is small and not enough to create any disturbance.

It has been stated within a few days past by a Washington correspondent of one of our daily journals, that the Internal revenue will not be half as large as was anticipated. This must be an entire mistake. And we have the refutation before us in the fact, that the total receipts at the office of the Internal Revenue for July, exclusive of the tax on incomes, are nearly $5,299,000, considerably larger than for any previous month.

The Secretary of the Treasury was in town on Wednesday, but his system of finance is working so well, his visits to the city have become of little importance to the public.

The interest on the mortgage bonds of the Toledo, Logansport, and Burlington Railway Company, due 1st August will be paid at the office of M. K. Jesup & Co., No. 59 Exchange-place, New York, on presentation of the proper Coupons.

At a meeting of the Directors of the Chicago and Alton Railroad Company, held at Chicago on the 27th ult., it was—

Resolved, That a dividend of three and a half per cent (less Government tax) on the preferred stock and a dividend of two and a half per cent (free of Government tax) on the common stock of this Company, be paid to the registered stockholders of the Company, on and after August 25, at the office of Messrs. G. S. Robbins & Son, No. 54 William-st., New York.

The transfer books will be closed August 15, and re-opened August 25, 1863, and the dividend will be payable only to the stockholders registered at the United States Trust Company, New York August 15.

The St. Louis, Alton and Terre Haute Railroad Company will pay the coupons of their preferred second mortgage bonds due Aug. 1, at the Bank of North America, less the Government tax.

Interest due August 1 on the 1st mortgage bonds af the Cleveland and Mahoning Railroad Company will be paid by Ward, Campbell & Co., New York, on demand.

The trustees of the Chicago and Alton Sinking Fund bonds give notice that they have designated by lot fifteen Bonds, numbered as follows: 267, 177, 56, 428, 256, 485, 67, 307, 208, 555, 490, 480, 561, 358, and 129, for redemption, at the office of the Company, No. 59 Exchange-place, New York, where they will be paid at par, and interest, on presentation before Nov. 1, 1863, after which time interest will cease.

The trustees of the first mortgage bondholders of the Vermont Valley Railroad Company will pay the Coupons due October the 1st, 1857, of the first mortgage bonds, on and after August 10, 1863, at the office of the Treasury of the Company, in Bellows Falls. For the convenience of the bondholders in New York and elsewhere, coupons will be paid for the space of one month, viz: from 10th August to 10th September, at the office of Alexander Hamilton, Jr., No. 41 Wall street, Jauncey Court, and thereafter will only be paid at the office of the Treasurer, in Bellows Falls.

The Delaware Division Canal Company of Pennsylvania has declared a dividend of three per cent, clear of all tax, on the capital stock of the company, payable on the 15th inst. The transfer books will be closed until the 18th inst.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns :—

Chicago and Alton Railroad Company.

The gross receipts of this company from Jan'y 1st, to June 30th, 1863, amounted to $866,525 50, and the amount deducted for proportion due the Joliet and Chicago, Terre Haute, Alton & St. Louis, Alton Packet Co., etc., was $184,338 33—leaving the earnings of the Chicago and Alton Railroad $682,187 17.

The expenses for the same period amounted to to $370,535 31—leaving the sum of $311,651 86 to be added to credit of income account.

The amount at credit of income account on January 1st, 1863, was $143,137 77, which added to the profit of the half year to June 30th, 1863, makes a total at credit of income account on July 1st of $454,789 63.

The interest on the mortgage bonds up to June 30th takes an amount of $124,250, the dividend of 3½ per cent. on the preferred stock takes $86,-365 86, and the dividend of 2½ per cent. on the common stock $45,834 95, leaving an amount at the credit of income account on July 1st, after paying the interest on bonds and dividend on stocks, of $198,338 82.

Ottawa and Prescott Railway.

The General Meeting of the shareholders in this company was held at Ottawa, Canada, on the 30th ult. The report which was presented states that "in 1862 the traffic was $7,869 72 less than in 1861, which is attributed to the stoppage of the work on the parliament buildings, the bad harvest, and general depression in 1862. Owing to the resumption of the above work a permanent increase of the traffic henceforward is hoped for. The difficulty between this and the Ebbiw Company, which was in Chancery four years, was amicably settled in January, 1862. On the settlement, it was agreed to pay that company, against interest on the first mortgage bonds and other claims held by them, thirty per cent. of the gross earnings. This was paid from February till September, and amounted to $11,554 56. The decrease of traffic made it then apparent that this proportion could not be continued, and the fact being so represented to that company, they allowed the payments to stand over. An arrangement has been concluded with the Grand Trunk Railway Company for a communication between the junction at Prescott and the St. Lawrence River, over our track. On our part it is agreed to receive goods and passengers for them and move them in their cars between the wharf and the junction, and also to build an addition to the wharf at Prescott to afford the needful accommodation for the business. On their part it is agreed to advance $7,000 to construct the new works, and to pay to this company thirty-five cents per ton on their goods so received and moved, and also a fair allowance on passenger traffic. The arrangement will afford the company a fair profit on the work done, and at the same time be an advantage to them and to Prescott."

"For local traffic as well as for general business, the works at Prescott, to which we have referred, will afford important facilities, and enable us to reduce the cost of handling. All the materials are taken out for the construction of these works, and upon them the Grand Trunk Company have made advances according to agreement, and all things are in readiness to have the work proceeded with and completed. The railway is now in first rate order throughout. The engine power is in better order now than it ever has been heretofore. The trains have moved with punctuality, and free from accidents. The earnings from 7th November, 1862, to 30th June, 1863, amounted to $45,828 70, and that from 7th November, 1861, to 30th June, 1862, they amounted to $33,933 64, which shows an increase of $7,895 15 in favor of that portion of this year, as compared with the corresponding portion of the preceding year. The earnings for April 1863 amount to $7,561 90, and for April 1862 they show only $4,445 09; the earnings for 1863 exceed the earnings for April of any former year since the line was opened. In view of the fact of the seat of Government being permanently fixed in Ottawa, along with the increase of business and growth of this section of the country, we feel that the prospects of the company are now more favorable than they have been."

A new board of directors was appointed, Mr. Bell being re-elected president.

☞ The Pulaski *Democrat* says that about nine miles of the railroad, on the Oswego end of the route, has been located, and the terminus fixed at Richland Station, thus bringing it through the village of Pulaski. The surveyors have commenced running a new line, some two or three miles in length, to test the possibility of bringing it near the village of Mexico. After this has been done, the remainder of the road will be located, which will occupy, perhaps, two weeks. We presume that immediately after that the work of grading will commence.

The Union Pacific Railway.

What was once considered a very doubtful project, though all admitted its utility if practicable, is now considered not only a fixed fact, but known to be in an actual state of progress and construction. Both the Western and Eastern divisions are commenced, and a good portion of both will be completed and put into operation by the 1st of January next. There will remain but the central division to be constructed, and we do not doubt it will either be by a Company formed under the late act of Congress, or by those parties who are building the Eastern and Western divisions.

The importance of this great work is more and more realized every day, and especially since the disposition shown on the part of foreign Governments not only to make a lodgement on our Continent, but to construct great public works across it, which shall give them a control if possible of the easiest routes to the Pacific. Thus the French propose a railway across Mexico between the two oceans, and a French and English Company is formed to build a ship canal by the route of Lake Nicaragua. Not only this, but it is openly asserted abroad, that the Panama route is to be closed in order to favor the Mexican route. We thus perceive that American interests are in danger not only from competition but violence. It is the part of true wisdom then, to construct the Union Pacific Railway as soon as possible. To confirm public opinion on the subject, many eminent persons have recently published letters containing their own views of the vast utility of the railway. None of these however present more original and cogent

reasons in its favor, than are found in the following communication which we copy from the *Circular* of S. Hallett & Co., from the pen of a gentleman, who has long taken an active part in favor of this great work, personally, and through this JOURNAL, and other presses of this city:

NEW YORK, *July 20th*, 1863.

MESSRS. SAMUEL HALLETT & CO.,

Gentlemen:—I have had the honor to receive your request for a written statement of my views on the subject of the Union Pacific Railway, and cheerfully comply. I have already expressed them very fully on the occasion of the meeting of the corporators at Chicago, in September last; but I am convinced that there are other and most important reasons for the construction of this great work, which have not been sufficiently considered by even its warmest friends. The first view of the subject resembles a sudden glance at any grand and distant scenery. As we enter upon and penetrate it, we discover new and interesting features not before perceptible, and are astonished at the combinations which surround us, of the largest proportions and magnitude. We then find we are in the midst of the loftiest and most wonderful creations, and realise the magnificence, of which before we comprehended only the outlines.

So of the Pacific Railway. We all admit its immediate utility as a route of transportation, as a bond of Union, as a means of forming new and powerful States, as an outlet for the gold territories with their enormous products—of which we have yet but the dust and the croppings, and as a pathway for emigration which is soon to populate the Western plains, and to come in fresh columns from the coasts of Europe. But I think no one has yet entirely realized the fact, that the construction of this road, besides accomplishing all else predicted of it, is to give the United States the *complete control of the commerce of the Pacific Ocean, without competition.*

The port of New York is belived to be the only one on the globe where at any moment an assorted cargo can be disposed of or obtained. Strong as this language is, it is precisely what an eminent British banker uttered not long since, when on a visit to this city. A moment's reflection will convince us of its truth. Certainly, neither at Liverpool, or London, or Havre, or Bremen, is that endless variety of products, natural or artificial, foreign or domestic, to be purchased which is always to be found in New York. The railway gives to San Francisco precisely the same advantage, and it will be our commercial duplicate in this respect. In six days, all that may be purchased here, can be for sale in California. The termini will in this respect be identical. The great mart of the Pacific will therefore be found within the Golden Gate, and there, too, from the remarkable circumstance, that it is the producer of the universal equivalent—the measurer of value—of gold in inexhaustible resources—it will be, in truth, the clearing house of the exchanges of the two worlds; weights, balances, and scales adjusted in advance, and equal to every transaction. The trade of the Pacific must, therefore, make its way to this point in preference to all others.

The countries, also, which face the American coast, will at once observe, for the first time, the advance and presence of a great civilized, industrious and and commercial community, with the most liberal institutions, inviting and seeking their traffic and business. This will be a new and extraordinary spectacle, of which they will at once appreciate the wondrous originality. Our tried and consistent friend, the great empire of Russia, has in late years, in fact ever since the settlement of California, been pushing her settlements, her improvements, her occupation, to the Pacific coast, extending her southern line toward China by treaty, building up towns on the Amoor, and is now seeking a port lower down the coast, which will never be closed with ice, and thus admit of an uninterrupted navigation, as well as a constant means of intercourse with California. It is asserted in the latest works of the geographers, that Corea, with an area of 90,000 square miles, has been really added to the Russian territory, having a population of ten millions, with unlimited resources and natural aptitude for trade. On the Amoor, American merchants and the American flag are already welcomed, recognised, and protected. Our outposts are there fully established. Russia has hitherto had but a moderate intercourse with her Asiatic neighbors; most of it with China, overland by long and difficult routes, but of a character not tending to advance civilization or promote its material interests. It is not strange, then, that she hails the new comer from the East, of whom she has often heard—has always respected—and that the thunders of the train will be like music to the ears of her traders.

So, too, the very articles received in the Gulf of Bothnia, Finland, and the Baltic for distribution over her vast breadth of territory, to be transported, if they will bear transportation, may be better landed near many points of consumption from American bottoms, at greatly reduced prices, and taken up the Amoor by steamers already there in full activity under the new impulse of an American neighborhood, and a navigation of two thousand miles. With regard to our long existing and prosperous trade with China, round the Cape, and of our new and promising trade with Japan, it is unnecessary for me to say anything. It would be easy to show by the arguments of the statisticians, how valuable it is, though carried on at such immense disadvantage of time and distance. Yet it has long been, and always will be, an essential ingredient of American maritime prosperity. Of the great islands and groups of the Pacific, of even New Zealand and Australia, as growing American customers, I need also say nothing. Even now we have with these a large and valuable commerce, and, in some articles, a monopoly of the trade, as far as California can supply the demand. But thus far, it has been carried on, with only the same facilities enjoyed by other nations. All have to traverse the same ocean paths or cross the same isthmus. Distance intervenes for all, with the inevitable consequences of such long voyages—the sea risk, the insurance and interest, the uncertainty of markets, the exposure to climate, and the injury to cargo during months of tedious navigation, across one ocean vexing the mariner with storms, over another, retarding him with its airless calms. Thus, between

New York and San Francisco, a watery waste of 13,300 miles must be passed.

From New York to Jeddo	16,400	miles.
" " Canton	16,300	"
From London to San Francisco	16,300	"
" " Jeddo	17,830	"
" " Canton	19,380	"

I might extend this calculation to the principal European ports, but will merely mention one interesting fact, that, as from St. Petersburg to San Francisco, by the way of Cape Horn, the distance is 18,800 miles a direct trade between the Russian ports in Europe with her ports on the Pacific, will be easier, of less duration in time, and at less expense, if changed to New York and transferred to the Pacific Railway. So that our commercial relations even with European Russia are to become no less valuable than those with her Asiatic coasts. Now the population of the countries with which we are thus partially trading, limitedly in consequence of the length of the voyage, and the various considerations which affect and control distant enterprises, is many hundreds of millions, as the statistical tables show us, and these are to be our customers, among whom as yet, to use a familiar expression, we have only shown our samples. What nation, then, is to enjoy a supremacy in this trade? Certainly the one that is the nearest, and and can furnish the greatest variety of goods at the least cost and in the quickest time, and will purchase on the same principles. Everything that Europe can send into the Pacific, will be found at San Francisco or New York. The saving in time and transportation will essentially favor the American merchant. He will, for various obvious reasons, undersell all other dealers, with the advantage of having his warehouses on his own soil, and yet but a few days sail from his customers. As, for example, while the New York merchant may place his goods in Shanghae in 22 to 23 days, a computed distance of 7,500 miles, the London or Liverpool merchant will be, by the ordinary route, 25,500 miles distant. I certainly need not argue so plain a question as this. The truth is, that, except for very bulky articles, of not much intrinsic value, the old ocean route must be abandoned. Everything which can be packed in parts, a mechanical idea which has become popular and practical in our day to a remarkable degree, will take the short route, and we see no escape from the consequences of this change of direction, except that all Europe will be obliged to make New York its branch office, if it expects to keep up any permanent or profitable relations with the East. That it will do so, is pretty evident from the fact that England has at this moment thirty-three large steamers employed directly in her East India trade, carrying the mails, and performing long and expensive voyages. I have not the wish to tire your patience with any more remarks, which I offer merely as suggestive to those who choose to look carefully into the subject, nor will I allude to the great telegraph lines now in successful operation between the Atlantic and Pacific, soon to be connected with the Russian lines, as you well know, and which are to make this country the electric mail carrier for all European correspondents. I see, therefore, in the construction of the Union Pacific Railway, a solution of many of the problems which have puzzled the commercial world in past ages, which initiated the great European voyages of discovery, and expeditions for conquest; of proposed interoceanic communications, still agitated by both French and English; and a final demonstration that the United States is yet, in spite of foreign or domestic enemies, to be the greatest nation the globe has ever yet borne in its long career through "the firmament of heaven."

Your obedient servant,

S. DEWITT BLOODGOOD.

Illegal Corporate Subscriptions to Railroad Stock.—Innocent Holders.

CORPORATE SUBSCRIPTIONS TO THE FOX RIVER VALLEY RAILROAD COMPANY. PURCHASERS OF BONDS REQUIRED TO TAKE NOTICE OF THE ABSENCE OF ANY LAW AUTHORIZING THEIR ISSUE.

The Town of Rochester *vs.* The Alfred Bank *et. al.*, and Phelps *vs.* The Same, were two actions brought in the Supreme Court of Wisconsin, to restrain the collection of a tax levied to pay the interest on certain bonds which purported to have been issued by the boards of supervisors of the towns of Rochester and Burlington respectively, and to have the bonds declared void. Both cases depended upon the same state of facts. The finding of the Circuit Court as to the facts in the case first named, was, in substance as follows. The plaintiff and the Fox River Valley Railroad Company, and the Alfred Bank, one of the defendants, were all corporations as alleged in the complaint. The Legislature of Wisconsin, in 1856, passed an act entitled "an act authorizing certain towns to aid in the construction of the Fox River Valley Railroad." The town bonds mentioned in the complaint as held by the defendants, were issued under and in pursuance of said act of the Legislature, on the first day of November 1856. The act authorizing the town to issue the bonds was not in fact published at the time of the issuing of the bonds. The bonds were issued and delivered to the Fox River Valley Railroad Company, in payment of capital stock in said company. Certificates of stock were delivered to the plaintiff who accepted and now held the same; all the preliminary proceedings provided by the act were had. One of the defendants was a contractor on the

Railroad and received his bonds from the Company in payment of work on the road and without actual notice of any defects in or defenses to the bonds, and he delivered the same to the Alfred Bank, as collateral security for the payment of money loaned by the Bank to him. In the years 1857 and 1858 the Supervisors of the town of Rochester appointed commissioners to vote upon the stock received in payment for the bonds in the stockholders' meetings of the company."

The Circuit Court found as conclusions of law, that the bonds at the time they were issued, were null and void, and were void in the hands of the defendants, and that neither the town, or its officers or inhabitants, had done any act which had made the bonds valid and binding against the town in the hands of the defendants.

The Wisconsin Supreme Court now affirm the judgment of the court below, and hold that the bonds, being issued without authority of law, were void: that the Supervisors could not, by any subsequent act of theirs, ratify them so as to give them validity; and that the purchasers of the bonds were bound to take notice that there was no law authorizing their issue. The following is from the opinion of the court, rendered at the decision of the case:

DIXON C. J.—The validity of the bonds and the power to levy the taxes are denied upon the ground, that the act in pursuance of which the bonds are said to have been issued, was not published until after they were executed and put in circulation, and this is the only question to be decided. By the 5th section the supervisors possessed no power to issue the bonds, until a majority of the legal voters of the town, voting on the question, at an election to be called for that purpose, should vote in favor of the same. It is conceded that the act is a general law, within the cases of *The State vs. Lean and Clark vs. Janesville* (*reported in our last No.*) and that as such it could not, under the constitution take effect until published. It is likewise conceded that it was not published until after the elections were held and the bonds issued. It appears, also, that the bonds have gone into the hands of third parties, for value, without actual notice of defects, except such as the law implies, and that in the years 1857 and 1858, the supervisors appointed commissioners to vote upon the stock received in payment for the bonds.

* * * * *

In the first place it is to be observed that the power of the supervisors to take any step, or to consummate anything in the way of issuing the bonds, depended upon a previous vote of the majority of the voters of the town, in favor thereof. Unless authorized by the voters, they derived no authority from the act to issue them. They were made the agents of the voters who were the real parties in interest, for the purpose of making an agreement with the railroad company for stock, and paying for the same in the bonds of the town; and by the express terms of the act, they could do so only upon obtaining the assent of the voters in the manner therein required. The voters or inhabitants of the town being the contracting party on one side, and the railroad company upon the other, and the supervisors, the mere agents of the former, having no power to act without their assent, it follows that, if they did so act, that action was nugatory and void. But as the assent of the voters could only be obtained upon the authority of law, if there was no law then there was no authority, and consequently no assent; and the supposed election was wholly futile and useless. So that if the bonds had been issued after the law took effect, yet as the election was had before, there would still be this reason for holding them inoperative. Now as the voters were the principals, and the supervisors the agents, it would seem obvious, that any ratification of the previous unauthorized acts of the latter, after the power to do so became complete, must come from the voters and not from the supervisors. For it would be manifestly contrary to reason to say that the agent himself might justify and confirm his own unauthorized act. This proposition is so self evident, that argument upon it is unnecessary, if not impossible. Hence it is that the acts are wholly inefficacious to give validity to the bonds, except as they were directed or assented to by a majority of the voters after they had acquired the power to do so by the due publication of the law. The only acts, either on the part of the supervisors or the voters, which are claimed to have any tendency to show a ratification, are the appointment of commissioners in the years 1857 and 1858. These appointments were made by the supervisors alone, and it is not pretended that the voters had or took any part in making them. They were matters over which the voters had no control, and to which their assent cannot be presumed. There has therefore been no ratification of the bonds, and it remains to be determined whether the voters have otherwise concluded themselves from denying their validity.

On the part of the respondents, it is strenuously insisted that they have. It is urged that, by neglecting to interfere and assert their legal rights, and restrain the issuing of the bonds, at a time when they might have done so, so as to have saved innocent third parties, they ought now to be estopped from denying their legality, or the authority of the supervisors to issue them. It is said that their failure to act and to protest, when the opportunity was offered them, so as to protect not only themselves but the public, is a recognition of that authority, and that they should not now be permitted, as against innocent third persons, to escape from the fulfilment of obligations which have thus tacitly received their sanction. There can be no doubt of the general force and correctness of these principles, and that under ordinary circumstances such conduct would constitute a valid estoppel *in pais*. The authorities cited fully demonstrate that they are applicable to cases like the present, where no other principle interferes to prevent their operation. As applied to the cases cited, we yield our fullest assent to them. But they are inapplicable here, for the reason that the nature of the defects in the original execution and issue of the bonds, is such, that there can be in law, no innocent holders of them. The defect was in matter of law with a knowledge of which every person is chargeable. It was in matter of law unmixed with any particular matter of fact. It was that there was no law authorizing them, and of this all parties were bound to take notice, as well the purchasers as the sellers of the bonds. They were presumed to know the provisions of the constitution as well as the time when the statute became operative under them. In this respect neither party possessed advantages superior to those of the other. It was information which was alike open to all, and of which all were equally bound to avail themselves for the purpose of forming an opinion upon their legal rights. This is an old and well settled rule of the law, its maxim being that ignorance of it will not excuse; and although it may operate with some severity in the case before us it cannot be disregarded. By taking notice of the time when the law took effect, and examining the date of their issue, it appears upon the face of every bond that they were executed without legal authority. No stronger case of the rule that ignorance of the law will not excuse or protect, can be put. So long, therefore, as the bonds were void upon their face, and with the actual or presumed knowledge of all the world, it certainly cannot be contended that the voters were guilty of any *laches* or negligence in not restraining their sale or circulation. It would be idle for them to say that they must commence a series of law suits for the purpose of apprising third persons of that which they already knew; and it was clearly time enough for them to resist or deny when the validity of the bonds were seriously asserted and an effort made to collect them, which for aught they knew or might reasonably presume, would never be done.

Judgment of the circuit court affirmed.

Pacific Railroad, Western Division.

It is announced that forty miles of this road, between San Francisco and San Jose will be in complete running order by the 1st of October next.

Northwestern Virginia Railroad.

The following communication from the Mayor was received and read in both branches of the Baltimore City Council on the 28th ult.:

To the Honorable, the Members of the First and Second Branches of the City Council:

GENTLEMEN—At the close of your last session you adopted the following resolution:

"*Resolved by both Branches of the City Council of Baltimore*, That the Mayor be and he is hereby respectfully requested to communicate to this Council what better disposition of the city's interest in the Northwestern Virginia Railway Company can be made to which he refers in his said message of June 22, 1863."

My message of that date, after placing before you the views entertained by me as to the security and value of this first mortgage, covering as it does the road from Parkersburg to Grafton, a distance of ninety miles, including the town of Grafton and all its workshops, says: "I feel convinced that a better disposition can be made of our interest than the one provided in the ordinance herewith returned."

These remarks were not made expecting to be called upon to indicate the best mode of disposing of this interest, but they were made under the firm and solemn conviction that an interest so valuable could not fail to demand a fair equivalent, if each of the parties desiring to dispose of it would treat it as if it were a first mortgage held by himself on a valuable estate. This rule ought to govern each individual guardian of the city's interest; a strict adherence to it would present an undivided front, and cause the city to realize every dollar of her principal and interest in this and other investments.

The first and principal reason assigned by the Directors of the Baltimore and Ohio Railroad Company, in their preamble and resolution, to justify the paying of $1,500,000 for the first mortgage of the Ohio Central road, is to secure an indebtedness of $400,000 in a fourth mortgage.

The able counsel of the Company, in enforcing this view upon the mind of the Court, concen-

trates the force of his argument upon this one point, the securing of the $400,000 indebtedness.

The indebtedness of the Northwestern Virginia Road to the Baltimore and Ohio Road is $3,500,000. The amount of the first mortgage of the city of Baltimore on the Northwestern Virginia Road is $1,800,000. Does any member of your honorable body entertain for one moment the idea that a company would expend $1,500,000 to secure $3,500,000, advantages of route being equal?

The second final reason assigned by the directors of the Baltimore and Ohio Railroad, and argued by its counsel for the investment of $1,500,000 in the first mortgage of the Ohio Central Road, is the possibility of a diversion of the trade and travel from Baltimore if that interest should not be purchased.

The Northwestern Virginia Road possesses a very great advantage over every other road, it being fifty-six miles shorter to Cincinnati than any other route; and the Marietta Road, with which it connects, is now being placed in first rate order, and soon will be able to take care of itself.

In fact, the able counsel of the Baltimore and Ohio Road does not pretend to claim any advantage for the Wheeling route over the Parkersburg route but in an apt and very expressive illustration, admits it to possess at least equal advantages. I will give you his representation of the merits of both routes:

"The prominent vice of the complainants' bill is the narrowness of its views in the matter of Western communications. The complainants preferring the Parkersburg route to Cincinnati, are jealous of all other routes to the West regarding them all as antagonists necessarily. This is not so, however, by any means. The West is competent to fill to repletion all the avenues that seek to drain it of its teeming wealth.

The policy of the defendants is to tap it, so to speak, in as many places as possible, to drain its trade from the Southwest by the Parkersburg Road, from the Northwest by the Pittsburg and Connellsville Road (when that long-delayed work shall be completed), and from the broad intermediate region by the main stem of their road to Wheeling and its connections. The road east of Cumberland may then be likened to the spout of a funnel, concentrating at Baltimore all that falls within its run.

If the Ohio Central Road has been the first of the roads west of the Ohio brought into connection with Baltimore, it does not follow, by any means, that it will be the last."

In my message of January 8th, 1863, I had the honor of recommending a sale of this interest; and I am still impressed with the conviction that this disposition of it would produce more satisfactory results to all parties than any other. I also believe that a unity of action would have accomplished this object.

I respectfully recommend that a committee of your honorable body be appointed to confer with the directors of the Baltimore and Ohio Railroad, to ascertain if there is a disposition to purchase. If so, an amicable decree may be obtained and an early settlement effected.

If we find, after a determined and united action, we cannot accomplish this object, I would then advise that a committee be appointed to ascertain the cost of putting the Parkersburg Road in complete order, and to establish the working expenses at a fixed per centage.

When these amounts are all determined upon, let all parties interested agree to yield priority to this fixed amount for reconstruction, the party furnishing the funds taking the first mortgage, the city taking the second, the Baltimore and Ohio Road the third, and so on in succession. If an amicable adjustment cannot be obtained, I conceive it to be the duty of the Mayor and City Council to prosecute the claim of the city with the utmost vigor, and place our citizens in absolute ownership of the town of Grafton, the Northwestern Virginia Railroad and appurtenances. With great respect, etc.,

JOHN LEE CHAPMAN, Mayor.

Mexico.--Its Area and Population.

Mexico is made up of twenty-one States, three Territories and one federal district, the names, areas and populations of which were, in 1850, as follows:

	Area in square mile.	Population.
Chiapas	16,680	144,070
Chihuahua	97,015	147,600
Coahuila	56,571	75,340
Durango	48,489	162,218
Guanajuato	12,618	713,583
Guerrero	32,008	270,000
Jalisco	48,590	774,461
Mexico	19,535	973,697
Michoacan	22,993	491,679
Nuevo Leon	16,688	133,361
Oajaca	31,823	525,101
Puebla	13,048	580,000
Queretaro	2,445	184,161
San Luis Potosi	29,486	368,120
Sinaloa	33,721	160,000
Sonora	123,467	139,374
Tabasco	15,609	63,580
Tamaulipas	30,335	100,064
Vera Cruz	27,595	264,725
Yucatan	52,947	680,948
Zacatecas	30,507	356,024
Tlaxcala (Territory)	1,984	80,171
Colima (do.)	3,020	61,243
Lower California (do.)	60,662	12,000
Federal district	90	200,000
Total	829,916	7,661,520

The average population to the square mile was about nine and one-fifth. It has not materially changed for the last dozen years.

The population is classified thus:—Pure whites, about one million; Indians, about four millions. The remaining two and a-half millions are made up of negroes, mestizoes, zamboes, mulattoes, quadroons, quinteroons, etc. Of the whites there are two classes—the creoles, persons born in Mexico of white parents, and the gachupines, native Spaniards.

Mexico contains eighty-five cities and towns, 193 villages, 4,709 hamlets, and 119 religious communities and missions.

Chenango Canal.

AN ACT to provide for the extension of the Chenango canal from its present termination at or near the village of Binghamton, to the North Branch canal, at the State line. Passed April 9, 1863; three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The Canal Commissioners shall, from time to time, as funds shall be appropriated, extend the Chenango canal from its present termination at or near the village of Binghamton, down the Susquehanna valley, by the most advantageous route, to the State line near Athens, Pennsylvania, so as to connect the same with the North Branch canal of Pennsylvania; said extention shall be let by contract, at the lowest price, with adequate security for its performance, public notice being first given of the lettings, according to the provisions of law.

SEC. 2. Said extension shall be of the same width and depth and size of structures as the Chenango canal except so far as improvement in permanency, or otherwise may be obtained, without increasing the expense and without interfering with the usefulness and permanency of the work.

SEC. 3. But no expenditure shall be made nor allowed under this act, until the State of Pennsylvania, or a company of reliable responsibility, incorporated under its laws, shall satisfy the Canal Board of this State that ample and certain provisions have been made to complete a navigable canal from the said State line down to and form a connection with the North Branch canal, at or near the village of Athens in said State of Pennsylvania.

La Crosse and Milwaukee Railroad.

We learn from the Milwaukee *Wisconsin* that the two important cases regarding this road which have been under argument in the United States Circuit Court were decided on the 21st ult. The first being a motion to direct the marshal to report the sale of the western division of the road to the Circuit Court, which motion was denied, the Court having decided that the land grant is in the District Court.

The other case was an application of the Milwaukee and Minnesota Railroad Company, for possession of the eastern division, upon which the Court is divided in opinion.

The first decision renders void the order of the District Court, giving the eastern division to the Milwaukee and St. Paul Railroad Company, being so far as appeared a valid corporation and entitled to the possession at that division.

Atlantic and Great Western Railway.

Four hundred tons of railroad iron, for laying the broad gauge track on the Cleveland and Mahoning road from Leavittsburg to Cleveland, have arrived from Quebec and Montreal.

The completion of the work on "Section No. 1" on the Cleveland and Mahoning road, being that part from the Columbus street bridge to the old river bed, has been transferred to the Atlantic & Great Western Company, and the line will be completed to the old river bed by the beginning of the year.—*Cleveland Herald.*

☞ A meeting of the committee of the Rome, Watertown and Ogdensburg Railroad, with a corresponding committee of a new road projected between Rome and Oswego, was held on Friday last, when it was agreed that the latter road should be constructed immediately, and the former company run it in connection with their own. This forms an important link in the chain of roads in that portion of the State.

☞ The books for subscription to the capital stock of the Schenectady and Catskill Railroad Company were opened in Schenectady on the 27th ult., and $100,000 subscribed.

OFFICE OF THE AMERICAN COAL COMPANY,
No. 29 Trinity Building, No. 111 Broadway, N. Y.,
July 21, 1863.

DIVIDEND.—The Directors of this Company have declared a Dividend from the earnings of the Company for six months ending 30th June ult. of THREE PER CENT., free of the United States Income Tax, payable at the office of the Company, on and after the 10th day of August next, to the registered holders of Stock at the closing of the books.

The Transfer Books will be closed at the close of business on the 30th day of July, and be re-opened on Tuesday, the 11th day of August.

2t31 G. P. LLOYD, Sec'y.

THE ERIE RAILWAY COMPANY,
No. 184 West st., New York, July 17, 1863.

DIVIDEND.—The Directors of this Company have declared a DIVIDEND, from the earnings of the road for six months ending 30th of June, ultimo, of THREE AND ONE HALF PER CENT. on the PREFERRED STOCK, the Company assuming and paying the Government Tax out of the undivided earnings belonging to the Preferred Stock Account for the year ending 30th of June, 1862.

Also, a DIVIDEND of THREE AND ONE-HALF PER CENT. on the COMMON CAPITAL STOCK, free of the United States Income Tax.

Both payable at the Treasurer's office, Erie Place, on the 10th day of August next, to the registered holders of stock at the closing of the books.

The Transfer Books of both Preferred and Common Stock will be closed at the close of business on SATURDAY, the 25th day of July, and be re-opened on the morning of TUESDAY, the 11th day of August.

3t30 HORATIO N. OTIS, Secretary.

Railway Timekeepers,

WITH HEAVY STERLING SILVER CASES.

Frank Leslie's Illustrated Newspaper, of Feb. 21, 1863, says: "HUBBARD'S TIMEKEEPERS are becoming proverbial for their accuracy and reliability. They are particularly valuable for officers in the army and travelers."

The *Army and Navy Gazette*, of Philadelphia, in its number of May 9, reviewing this watch says:—"We are pleased to see that the importations of the HUBBARD BROS. are meeting the enormous sale that such extraordinary enterprise as theirs so richly merits. These watches are novelties produced by no other house, far exceeding other manufactures in point of accuracy and elegance. Fidelity and promptness to their patrons render the house a desirable medium for traders in the army."

The *New York Weekly*, of July 23, 1863, voluntarily says:—"We have been shown by the Messrs. HUBBARD BROS., who are the exclusive Importers of the article, what they most appropriately term, the RAILWAY TIMEKEEPER, being a superbly finished watch, which is warranted to keep the most accurate time in all climates. The beauty of these Timekeepers is only equalled by their cheapness."

The RAILWAY TIMEKEEPER has *heavy solid sterling silver cases*, beautiful white enamel dial, handsome gold hands, with superior regulated movement, *warranted to run and keep excellent time!* Price, per case of half dozen, $60, by mail $1 65 for postage. If registered, 20 cents additional. A safe delivery by mail guaranteed. *Sold only by the case.*

The RAILWAY TIMEKEEPER is also furnished in handsome silver-plated case, and in all other respects the same as the silver ones, while in appearance they are fully equal. Price $48 per case of six. Postage, $1 65. Registering 20 cents. *Sold only by the case.*

MAGIC TIME OBSERVERS!

THE PERFECTION OF MECHANISM!

Being a Hunting, or Open Face, or Lady's, or Gentleman's Watch Combined, with Patent Self-Winding Improvement!!!

The *N. Y. Illustrated News*, in its issue of Jan. 10, 1863, on page 147, voluntarily says:—We have been shown a most pleasing novelty, of which the HUBBARD BROS., of New York, are the sole importers. It is called the MAGIC TIME OBSERVER, and is a Hunting and Open Face Watch combined. One of the prettiest, most convenient, and decidedly the best and cheapest timepiece for general and reliable use ever offered. It has within it and connected with its machinery its own winding attachment, rendering a key entirely unnecessary. The cases of this Watch are composed of two metals, the outer one being fine 16 carat gold. It has the improved ruby action lever movement, and is warranted an accurate timepiece." Price, superbly engraved, per case of half dozen, $204. Sample Watches in neat morocco boxes, for those proposing to buy at wholesale, $35. If sent by mail the postage is 36 cents. Registering 20c.

☞ Watches sent by express to any part of the Loyal States with bill payable to Express agent upon delivery. Persons ordering in this manner must enclose $2 as a proof of their sincerity, the amount to be credited on the bill.

Conductors, Engineers, and all others in the disloyal States, or any parts thereof, must send payment in advance, as the Express Companies peremptorily refuse making collections in such precarious localities. Money can be sent by mail or express. If by express or mail in a registered letter, at our risk. Our patrons are requested to call in person, when it is convenient for them to do so.

HUBBARD BROS.,
IMPORTERS,
4t32 **169 Broadway, New York.**

SUBSTITUTE FOR
CAR DUCK.

Kingman's Car Covering.

THIS is a heavy Canvass imbedded in a coat of Elastic Mastic or Paste which is applied directly to the boarding of the top of the car, and then thoroughly painted with three or four coats of paint, thus making a covering VERY MUCH LIKE **CAR DUCK**, but at this time at half the cost. It is now successfully used by many Railroads and Car Builders. Directions and particulars sent when requested. This Mastic and Canvass for sale by

WILLIAMS & PAGE,
67 Water street,
March 1863. **Boston.**

JOSIAH S. LEVERETT & CO.,
SOLE AGENTS.

THIS Company also manufacture **RAILROAD, SHIP AND BOAT SPIKES** of a superior quality, which they are prepared to supply at the **shortest notice.**

PHŒNIX IRON COMPANY'S

SUPERIOR WROUGHT IRON
RAILWAY CHAIRS,

With continuous lips, made to fit exactly the flanges of the rails.

SAML. J. REEVES, V. Pres't,
410 Walnut st., Philadelphia.

PACIFIC RAILWAY.

THE undersigned will receive proposals to furnish four thousand (4,000) tons of railway iron (or any part thereof) for the track of the first section of the Union Pacific Railway, Eastern Division. The iron to be of American manufacture, of the best quality, and to be delivered either at Leavenworth or Kansas City. Communications for further information to be addressed to the undersigned or to SAMUEL HALLETT & Co., 58 Beaver st., New York. Terms, cash on delivery.

J. C. FREMONT,
Pres't Union Pacific Railway, E. D.
NEW YORK, June 9, 1863.

THE NEW YORK CENTRAL R. R. CO.

TREASURER'S OFFICE,
ALBANY, July 23, 1863.

TWENTIETH SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a Semi-Annual Dividend of THREE AND ONE-HALF per cent. on the capital stock thereof, free of the United States income tax, payable on the twentieth day of August next, on stock registered at New York Boston and Albany, respectively, and on the twentieth day of September next on stock registered at London.

Dividends in New York will be paid at the office of DUNCAN, SHERMAN & Co.; in Boston, at the office of J. E. THAYER & BROTHER; in Albany, at the ALBANY CITY BANK; and in London, at the UNION BANK OF LONDON, pursuant to circular and notice of December tenth, 1862, from the Transfer Office in that city.

The Transfer Books at New York, Albany, and Boston will be closed at the close of business on Friday, the thirty-first day of July instant, and be re-opened on the morning of Monday, the twenty-fourth day of August next.

JOHN V. L. PRUYN,
6t31 Treasurer.

ERIE RAILWAY.

PASSENGER TRAINS leave, via Pavonia Ferry, from foot of Chambers st., as follows, viz:

7.00 A. M., EXPRESS, for Buffalo, and principal intermediate Stations.

8.30 A. M., MILK, *daily*, for Otisville, and intermediate Stations.

10.00 A. M., MAIL, for Buffalo and intermediate Stations.

4.00 P. M., WAY, for Otisville, Newburgh, Warwick, and intermediate Stations.

5.00 P. M., NIGHT EXPRESS, *daily*, for Dunkirk, Buffalo, Rochester, Canandaigua, and principal Stations The Train of Saturday, runs through to Buffalo, but does not run to Dunkirk.

7.00 P. M., EMIGRANT, for Dunkirk, and principal Stations.

CHA'S MINOT, *Gen. Sup't*

RAILROAD IRON.

1,200 TONS RAILROAD IRON, 56 to 57 lbs. per yard,
500 " " " 50 " 52 " " "

American Railroad Journal.

New York, Saturday, August 15, 1863.

Chicago and Northwestern Railroad.

At a meeting of the directors and boudholders of the Chicago and Northwestern Railroad Company held in this city on the 25th ult., it was agreed to convert the second mortgage bonds into a preferred stock. For $1,000 six per cent. bond, with three over-due coupons attached, the holder receives $1,200 of seven per cent. preferred stock, funding at the same time three coupons in advance. This preferred stock is, we understand, secured by a mortgage upon the whole road, which is fifty miles more than was covered by the second mortgage bonds. The meeting likewise authorized the committee to consolidate with the Milwaukee and Prairie du Chien and Milwaukee and St. Paul railroads on satisfactory terms, and there seems a fair prospect that the consolidation will take place. There was also a strong feeling evinced in favor of building the road from Janesville to Winona on the Mississippi river, forming a line from the Upper Mississippi to Chicago, about fifty miles shorter than any other. There was no decision, however, on this point.

Peninsula Railroad.

We learn that this road to which allusion is made in the report of the Chicago and Northwestern Railroad Company, published in our present issue, extending from Little Bay de Noquet, at the head of Green Bay, across the upper peninsula of Michigan to Lake Superior, is being prosecuted with great vigor, with the intention of having the whole line in operation on the opening of lake navigation next spring. All the money needed for the construction and equipment of the road has been provided; the iron has been purchased, and a large part of it already shipped to Escanawba, the terminus of the road on Little Bay-de Noquet. The main design of this road is to transport the iron ore of the Lake Superior region—for which there is now a great demand in Pennsylvania and Ohio—to a point at which it can be readily shipped to ports on Lake Erie. The enterprise is in the hands of energetic and prudent men, and bids fair to become at once a very profitable and successful one.

Petroleum Trade.

The Pittsburg *Quarterly Trade Review*, says that the increase of consumption in the foreign market is shown by the figures for exportation. In the twelve months of 1862 the exportation was 111,802 barrels of 40 gallons. In the six months of 1863 ending July 1st, the amount was 454,990 barrels being an increase of 343,188 barrels in six months over the entire export of the previous year. The best estimates of the production of the Oil Creek region give the round figures of 5,000 barrels per day as the net product of the Alleghany Oil region, or about 1,800,000 barrels per annum, which will yield 1,450,000 barrels of refined.

Taking the export of the six months ending July, 1863, as the representation of that for the coming six months, and under no adverse circumstances, will they likely be much below the mark, we have a total of 909,980 barrels as the probable exportation of 1863; and with 1,450,000 of refined as the production, we have only 540,020 barrels as the supply of 1863 for home consumption. Or, in other words, the product for the coming six months will be 900,000 barrels crude, or 725,000 barrels of refined, while the exportation will be the same as last six months, 454,990 barrels, leaving but 270,000 barrels for the supply of the entire United States for the coming six months.

Re-opening of the Mississippi River.

The New Orleans *Picayune* notices with much satisfaction Admiral Porter's order re-opening the Mississippi to trade. By it all boats from points above will be convoyed to Vicksburg, whence a regular weekly convoy starts every Monday. This is one of the most important movements of a business character since the breaking out of the war in the Southwest. Of similar character and of much importance is the movement making to re-open the Memphis and Ohio railroad, extending from Memphis, through Western Tennessee, to Paris, where it connects with the Louisville road. Such a re-opening of communication would greatly facilitate all kinds of business and prove of vast benefit, especially to the military service, while the diffusion of information through the press along the line of the road would also produce, no doubt, desirable results. It is said that a public meeting will shortly be held at Memphis for the purpose of urging upon the Government the necessity of opening the road, at least as far as Humboldt, a distance of eighty-two miles from Memphis. It is also reported that the Mississippi and Tennessee railroad, extending from Memphis to Grenada, Miss., where it connects with the Mississippi Central railway, having connections with Jackson, New Orleans and other important points, is to be put in running order to facilitate communication between Memphis and Vicksburg. The people of the line are said to be warmly in favor of snch an undertaking, and, with Johnston's forces driven from the State, and the active co-operation of the Union people thus relieved, communication could probably be maintained with but little difficulty. The operations of the railways of the South by Northern enterprise would soon produce marked results in the improvement of lands and the augmentation of all the conveniences of living, and it could not be otherwise than that the people would be favorably affected by the appeal which would thus be made to their personal interests. These movements, important as they are to parties in their immediate vicinity, are not less so to the mercantile interests of the Atlantic cities, who are watching with much solicitude the revival of their old trade relations with the sections so long cut off by rebellion. As a means of restoring friendly relations, peace and union, unrestricted navigation and railroad intercourse are

most essential, and should be encouraged and expedited by all possible means.

The Pneumatic Despatch.

This invention has already come into practical operation in England. Within the iron tube, which is about two feet nine inches high and two feet six inches wide—its section being similar to that of a railway tunnel in miniature—are two small ledges, or rails, on which the wheels of the small cars bearing the packages run. These are propelled backwards and forwards, on the signal being given, by the exhaustion and pressure of the air in the tube. The disc or wheel, is twenty-one feet in diameter. It is composed of three sheets of wrought iron, the two which form the outside being each about an eighth of an inch in thickness, while the centre and smaller plate is about a quarter of an inch thick. These are screwed on to sixteen spokes, which radiate from the centre of the wheel, and thus form thirty-two cavities, there being a distance between the plates at the rim of nearly two inches. Air chambers pass beneath the disc, which are exhausted by its revolutions in the race chamber. The wheel is worked by a diagonal direct acting high pressure engine of about fifteen horse power. As regards the rate of speed, the stipulation is for a minimum of fifteen miles, but experiments show that a velocity of thirty-five miles can be obtained.

Baltimore and Ohio Railroad.

We learn by an advertisement in the *Baltimore American*, that the damages inflicted by the rebel forces upon the line of the Baltimore and Ohio Railroad, during their recent raid, have been repaired, and that the road is again open for through travel and traffic. During their last occupation of the line of the road, they destroyed twelve bridges between Harpers Ferry and Cumberland, tore down or burnt eight first-class water stations, and broke up or carried off most of their valuable machinery and fixtures. They stole over thirty miles of the best telegraph wire, and cut down a thousand supporting poles. They tore up from its solid bed of stone ballast over seven miles of heavy new iron track, but five months in use, and eighteen thousand of the largest oak and chestnut cross-ties on which the rails were laid, and burned every rail and every tie thus removed, utterly destroying the latter and rendering the iron unfit for use. The destruction embraced a range of eighty miles between Harper's Ferry and Cumberland.

And yet all these bridges, water stations, tracks, telegraphs, &c., in their massive magnitude, are magically *restored*, or rather *replaced*, and the line, supposed by the enemy to have been well nigh extinguished, is again (like another Phœnix risen from its ashes,) ready to bear upon its well watched and closely manned rails, the heaviest products of the Western field and mountain, or the delicate forms of the fairest travelers who may seek the seaboard or the air of Oakland for recreation. And *but thirteen days* has been occupied in this work of rebuilding, after the heavy preparatory labor of gathering and transporting the enormous bulk of material. This is computed at not less than four hundred ten-ton car loads, requiring twenty trains of engines and cars, whose aggregate length would largely exceed two miles. This material was carried by the company on its own road an average distance of more than one hundred and sixty miles, to the points where it was required, adding largely to the labor and cost of the rebuilding.

The road has been repaired, it is said, in the most substantial and thorough manner, and with the very best material, and the officers and men of the track and bridge department from master of track Wilson and his two able assistants, Quincy and Porter, to the humblest of their laborers, all seem to deserve an unlimited praise for their effectiveness and skill. It now behooves the transportation and machinery officers to put to the best use the great line thus restored to the company and the public, by developing a traffic heavier, perhaps, than ever before done in the history of the route. The coal and timber trades from the mountains, and the Western flour, live stock and produce business, all promise to be abundant at once, and it is gratifying to know that the company is ready for it with an increased stock of engines and cars, and a full organization of its *personnel*.

Chicago and Northwestern Railway.

The earnings and expenses of this road for the years ending April 1, 1862 and 1863, have been as follows:

Earnings:	1862.	1863.
From passengers	$309,309 46	$376,098 16
" freight	505,187 62	671,533 97
" express	9,740 39	11,159 04
" mail	19,837 86	21,362 46
" miscellaneous	1,349 21	2,199 38
" car mileage	4,294 73	701 04
Total	$838,719 27	$1,083,054 05
Expenses, viz:		
Repairs of track	$70,619 01	$118,734 44
" engines	37,274 24	50,610 64
" cars	46,031 91	43,469 73
" bridges	7,899 91	13,188 27
" build'gs, etc.	5,988 65	5,041 50
" mach'ry, etc.	6,968 65	8,578 55
Fuel	54,000 57	75,422 65
Oil and waste	12,063 34	14,073 54

Agents and clerks	24,257 66	27,924 53
Officers and clerks	26,536 05	30,159 94
All other expenses	35,595 24	48,167 84
Total	$434,891 25	$569,781 53
Net earnings	$414,828 02	$513,272 52

Disbursed in 1863, as follows:

Interest on Flag Trust bonds	$19,600 00	
Interest on preferred 1st mortgage bonds	87,500 00	
Interest on Appleton Extension bonds	12,880 00	
Interest on Green Bay Extension bonds	10,500 00	
Interest on Funded Coupon bonds	26,460 00	
Interest on unfunded debt	17,659 81	
Taxes	24,902 97	
Insurance	2,752 94	
Damages	3,892 27	
U. S. tax on passengers	7,373 49	
Expenses N. Y. office	6,260 44	
Sundries	1,927 14	
		221,709 06
Leaving a surplus of		$291,563 46

The balance to credit of income account April 1, 1862 was $562,615 35; to which add surplus earnings of the past year, as above, $291,563 46—leaving balance to credit of income account April 1, 1863, $854,178 81. The report says:

The Directors, in their last Annual Report, estimated the earnings for the past year at $900,000, and for the year, ending March 31, 1864, with the Green Bay Extension, at one million of dollars. The result shows an increase during the past year of $183,054 05 over the estimates. This gain arises in part from the general revival of business throughout the Northwest, from increased settlement and production, from extension of the road to Green Bay, and from the restoration of a parity of prices of wheat at Milwaukee and at our Northwestern elevator in Chicago, as predicted in our last Annual Report. But little of this increase of earnings for the past year can be attributed to the Green Bay Extension, which, owing to government demand for men, and consequent scarcity of labor, and to very wet weather, was not completed till November last, at the close of navigation.

A fine elevator has been erected, under lease, on the Company's depot grounds at Green Bay, and the earnings on that Extension are now satisfactory, and promise all anticipated for the future.

The earnings for the present year, with the Green Bay Extension and elevator, and with a good crop, of which there is now a very fair prospect, and with increased equipment of cars and locomotives, will probably show a decided increase over the last, if no extraordinary unfavorable circumstances intervene.

The earnings for the first two months (April and May) of this year exceed those of the same period last year $71,269 05, being 51 13-100 per cent. The earnings of June and July, which were large last year, are not likely to show large gains, as the crops of last year, owing to better prices, have been brought forward earlier this season.

The accompanying statements show the earnings for the past year from the transportation of lumber to amount to $159,274 14; an increase of $44,663 20 over last year. This traffic promises materially to increase, and is of a very desirable character, being chiefly furnished at Oshkosh, Fond du Lac, and points north, to Green Bay, whence large quantities are supplied to southern Wisconsin, northern Illinois, and even to Chicago to some extent. This branch of business is seriously limited now, and has been for the year past, for the want of cars on our road to move it. The demand on the Company for cars for the shipment of grain from points on the upper Mississippi to Chicago, is also greatly in excess of our ability to furnish, and bids fair to increase faster than we shall be able to supply. The business of the road has always increased faster than its means and provisions to meet such increase; and during the past season our supply of cars and engines would have little, if any, exceeded the demands of our local business, but for the almost total failure of the wheat crop on the first one hundred miles of our road, from Chicago to Janesville, and vicinity.

The present prospect of fine crops for the coming harvest along the entire line of our road and connections, is at least as good as ever before. Should this prospect be fairly realized, and prices remain as now, the earnings of the road for the present year will probably be from ten to twenty per cent. less than they would amount to with a full and liberal Equipment.

The Board have heretofore made repeated efforts to supply this constantly increasing demand for Equipment. The principal effort to this end was that of funding six Coupons from the first mortgage bonds, the happy effect of which is now markedly visible to all in the increased value of all our securities, and the reasonable certainty through increased earnings of prompt payment of interest on said Bonds, hereafter. Further to provide for this still growing deficiency in Equipment, the Board, in December last, authorized the purchase of additional cars and engines to the extent of $150,000, and made provision for a further additional purchase to the extent of $250,000 more, ($400,000 in all,) when found necessary. The Board provided for the payment of this additional machinery by the issue of seven per cent.

ten year "Equipment Bonds" of the Company, secured upon the machinery purchased, the same to be held by a Trustee, to secure said Bonds till paid. Twenty per cent. of the cost of said machinery is however to be paid immediately after the purchase by said Trustee, and Bonds issued for said purchase are to be retired and cancelled to that extent, and a sinking fund of ten per cent. is provided, and is to be paid annually thereafter to said Trustee for the redemption of the balance of said Bonds. Arrangements have been made for the purchase of nearly $100,000 of additional Equipment, half of which is already received and in use, and as much more is being provided as fast as it can be constructed, and as the means we have will admit of. Two hundred additional cars and six to eight locomotives are however all we shall probably be able to provide under this arrangement, for the coming autumn's business.

Within the past year the Peninsula Railroad Company has been organized, for the construction of a Railroad from Little Bay de Noquet, on Green Bay, across the Upper Peninsula of Michigan to the great Iron Mines of that region and to Lake Superior at Marquette, and looking in the future to an extension to the Copper regions, not far distant.

The Stock and Bonds necessary for the construction of this road, some seventy miles in length, including branch to Iron Mines, and to Marquette on Lake Superior, have been recently subscribed for. The iron has been purchased, and the work of construction has been contracted for with experienced and responsible parties, and is to be completed by the opening of navigation next spring; thereby securing the rapidly growing business trade and travel of that important region, possessing such immense mineral wealth, in its Copper and Iron Ores, for the latter of which there is already such urgent and extensive demand throughout the coal and iron region and manufactories of Ohio, Pennsylvania, and Western New York, and for which, upon the completion of the Peninsula Railroad, so large a demand will immediately spring up at the West generally, and to some considerable extent is anticipated on the line of the Chicago and Northwestern Railway.

Many of the parties interested in the Peninsula Railroad are also interested in the Chicago and Northwestern Railway, and the two roads are likely to co-operate in harmony and with a unity of interests.

Steamboats will carry the freight and passengers between the present terminus of the Chicago and Northwestern Railway at Green Bay and the Peninsula Railroad at Little Bay de Noquet. The passage by steamer through Green Bay being safer and less exposed than that through Long Island Sound.

The trip from Chicago to Lake Superior will be made within twenty-four hours. By rail to Green Bay, two hundred and forty-two miles, thence by steamer to Bay de Noquet one hundred and twenty miles, and by the Peninsula Railroad about fifty miles to Lake Superior at Marquette.

The completion of the Peninsula Railroad will, it is believed, add largely to the earnings of the Chicago and North Western Railway, in both passengers and freight.

Within the past year, laws have been obtained in Illinois and Wisconsin, authorizing this Company to issue preferred stock, on such conditions as it shall think proper, for the purpose of funding its Second Mortgage Bonds and Coupons, or such portion of either or both as may be agreed upon between the Company and its Second Mortgage Bondholders, with proper protections for securing such preferred stock as against subsequent liens. No definite action has as yet been taken by the Board, but will be as soon as the necessary interchange of views with Bondholders shall enable them to fix upon a plan likely to result in success, with the largest mutual advantage to all parties. Many bondholders have expressed the desire that bonds and coupons should all be funded.

The recent rapid advance in the price of the stock of this Company, based to some extent, it is presumed, on a still further anticipated increase of earnings, has brought in large amounts of stock and claims against the old Company for exchange for the stock of this Company, in accordance with the bondholder's plan of reorganization, swelling the amount of stock issues of this Company, on March 31st, 1863, to $3,731,316 15. It has been heretofore estimated and represented that the stock of the Company, on the plan of reorganization, would reach about four millions of dollars. It has already nearly reached that sum, and will very likely somewhat exceed it.

Within the past year or two, the Wisconsin Railroads leading from Milwaukee to the Mississippi River at Prairie du Chien and at La Crosse, and with which we have important connections, have been reorganizing and adjusting their affairs, and are now, or soon will be enabled to determine upon a course and policy for the future. It is no doubt wise for them and us to permanently establish liberal and mutually advantageous business relations and running arrangements, which we are and always have been disposed and anxious to do so soon as they and we were fully prepared. We have no reason, judging from the past, to doubt that those roads are also similarly disposed. Still, in case it should so happen that we could not think alike, or agree as to the details of such an arrangement; or if they should conclude, for any cause, that interests more important to them required them to pursue a different policy, then we should be prepared at once to extend an independent line of road to some desirable point on the upper Mississippi, in order to secure, independently and forever, to this Company its full share of the great and growing traffic of that region with Chicago and the east, by a railroad line some forty or fifty miles shorter than that of any existing road, or any at all likely to be built.

While it is believed that such an extension of our line to the Mississippi would at once increase the earnings of our road, and make it a permanent dividend-paying road on all its stock, as well as all its bonds, still the undertaking would be large and responsible, and could very well be postponed for years to come, and while existing roads are equal to the business offered, provided wise and equitable co-operation and action with them are meanwhile secured to us.

Last autumn, the Board caused a route to be surveyed from Janesville, *via* Madison, to the Mississippi at a point opposite Winona, some twenty six miles above La Crosse, and in a substantially direct line of extension of our present road from Chicago to Janesville, as is shown on the map accompanying this Report. The route was found to be an entirely feasible one, much of the way through a fine productive, settled country, and terminating at one of the most important towns for business, and especially for its receipts of produce on the Upper Mississippi.

The distance from Janesville on the route surveyed was found to be about 190 miles. The Engineer's estimate of cost, including Equipment, was $20,000 per mile, to which something might now have to be added to compensate for the rise in price of iron and labor.

This extension completed, secures to this road an independence of position it can never have without; and it is the opinion of those in the immediate management of the road, and others well advised on the subject, that if this extension to the Mississippi was built, the earnings upon it and upon our entire line of existing road, would be at once largely increased per mile; and many parties best advised and largely interested in the securities of our road, consider it the first and most important step to be taken by the Company, and that it ought to be done now while the means for its construction could probably be easily provided without in any way affecting the earnings of the present road, except to increase them.

The preliminary examinations already made will enable the Board of Directors to act with promptness, whenever the Stock and Bondholders shall deem it advisable.

The equipment of the road consists of 32 first class and 4 second class locomotives; 19 first class and 4 second class passenger cars; 8 baggage, 479 box freight, 206 platform freight, and 12 caboose cars.

CONDENSED BALANCE SHEET.

Cost of Chicago, St. Paul and Fond du Lac Railroad, in accordance with plan of re-organization of March, 1859	$10,849,938 99
Add amounts charged since	838,278 63
Appleton Extension	262,168 87
Green Bay Extension	375,502 97
New equipment account	510,982 60
Securities on hand	19,750 00
Materials on hand	100,743 24
Cash and cash items	189,771 25
	$13,147,136 55
Capital stock issued	$3,731,316 15
A. C. Flagg trust bonds	245,000 00
Preferred sinking fund bonds	1,250,000 00
Appleton Extension bonds	184,000 00
Green Bay Extension bonds	300,000 00
Funded coupon bonds	756,000 00
General 1st mortgage	3,600,000 00
Second mortgage bonds	2,000,000 00
Unfunded debt	226,641 59
Balance to credit of income account	854,178 81
	$13,147,136 55

The directors and officers, elected June 4th 1863, are as follows:

President—WM. B. OGDEN.

Vice-President—P. H. SMITH.

Directors—William B. Ogden, P. H. Smith, Geo. L. Dunlap, M. C. Darling, A. L. Pritchard, J. J. R. Pease, Joseph A. Wood, Wm. A. Booth, Lowell Holbrook, C. S. Seyton, H. H. Boody, J. D. Fish, Geo. M. Bartholomew.

Superintendent—GEO. L. DUNLAP.

Treasurer—GEO. P. LEE.

Secretary—JAMES R. YOUNG.

Transfer Agent in New York—H. H. BOODY.

Wisconsin Banking Associations--Implied Powers.

INCIDENTAL POWER TO CONTRACT DEBTS. NOTES REQUIRED TO BE MADE PAYABLE AT THE OFFICE OF THE BANK REFER TO CIRCULATING BILLS. METHOD PRESCRIBED FOR THE EXECUTION OF CONTRACTS.

The plaintiff sued the Elkhorn Bank as the maker, and Libley and Mills as endorsers of a note for $2,020 payable at the Elkhorn Bank with interest, at the rate of 12 per cent. per annum, and signed by the cashier of the bank. The note was endorsed by Libley and Mills before its delivery, and was given for a balance due to the plaintiff for money deposited in the bank, and for his salary as its president.

The defendants contended, and upon the trial at the circuit, asked the Court to instruct the jury that the note was void, because the Elkhorn Bank had no lawful authority to make and issue it, and because it was not executed in form or substance according to the requirements of chapter 71 of the revised statutes, and was not signed by the president of the bank; and that the plaintiff was not a *bona fide* holder, but took it with notice of its illegal character. These instructions were refused, and a verdict and judgment rendered for the plaintiff. The defendant appealed to the Supreme Court of the State, which now affirms the judgment of the Court below.

The following opinion was rendered in the case:

DIXON, C. J.—It is a universally accepted principle that corporations authorized generally to

engage in a particular business, have as an incident to such authority, the power to contract debts in the legitimate transaction of such business, unless they are restrained by their charters, or by statute from doing so. It is likewise an equally well acknowledged rule, that the right to contract debts carries with it the power to give negotiable notes or bills in payment or security for such debts, unless the corporations are in like manner prohibited. These propositions are abundantly sustained by the authorities cited by the respondent's counsel. That our banking associations are corporations possessing general powers in relation to the business which they are authorized to transact, is not questioned. The powers usually exercised by such institutions are expressly conferred by the 4th section, and in addition it is declared that they may exercise "such incidental powers as may be necessary to carry on such business." It is not contended that the act contains any express words by which they are prohibited from giving negotiable notes or bills; but on the authority of Safford *vs.* Wyckoff and Smith *vs.* Strong, it is insisted that they are restrained by the general frame and scope of the statute, and the policy which led to its enactment. It is said that if they are allowed to issue negotiable paper independently of the agents of the State, such paper will take the place of the currency which they are authorized to issue, and be circulated as money, and that thus the supervision of the State officers and the security of the bill-holders will be entirely thrown away. These cases, however, were expressly overruled by the Court of Errors in Safford *vs.* Wyckoff and that decision has since received the unqualified sanction of the Court of Appeals. Without entering into any discussion of matters which are there so fully explained, we may say that the reasoning of the Chancellor and Senator Hopkins in the Court of Errors, is far more conclusive and satisfactory to our minds than that of the Supreme Court. It clearly appears to us, that like other corporations these banking associations must, in the absence of express prohibition, be held to have the power to give negotiable notes and bills by a necessary implication from their power to contract debts in the regular course of their business. No one denies their power in the last respect. They may make agreements for the purchase or hire of their banking houses, for the payment of rent and the salaries of officers and employees, and for many other purposes necessarily connected with the lawful transaction of their business. And if they do so we perceive no reason which would prevent them giving negotiable notes and bills in security or payment of debts thus contracted, which would not operate with equal force to prevent other corporations and private individuals from doing the same thing, unless it should appear that the notes or bills were given under such circumstances and in such form as to make it evident, that they were designed as an evasion of the 10th section of the act, in which case they would, of course, be void. If executed in the ordinary form of such instruments and for legitimate purposes, we can perceive no possible detriment or wrong which is to result to the public from their use. Certainly there is no person so ignorant or stupid as to mistake them for the legitimate currency of the bank. If they are tranferred, they pass like other negotiable paper, upon the responsibility of the makers and endorsers if they have any. No one would take them believing them to be secured by a pledge of public stocks, and consequently no one would be deceived or imposed upon. Neither would they impair the protection afforded by the law to the holder of bills issued pursuant to its authority. Their security consists in the stocks deposited with the State treasurer, which cannot be reached except by the redemption of the circulation of the bank. We think, therefore, that such associations may give negotiable notes and bills in the ordinary course of their business, and that such notes and bills are valid.

By the 10th section of the act, the legislature manifestly intended to prescribe the form and tenor of bills or notes which are intended to be *put in circulation as money*. Such bills and notes must be payable at the office where the business of the association is conducted. They must be payable on demand and without interest. If not so made they are declared to be unlawful. But this section is, by express words confined in its operation to notes or bills issued for that purpose, and was not intended to affect or govern the execution of negotiable notes or bills of the ordinary character. These are left to such regulations as to time and place of payment and rate of interest as the wishes and convenience of the parties may dictate, subject to the general laws which govern such matters.

In the case before us it is not pretended that the note was given for any unlawful purpose, or in the transaction of any business which the bank might not lawfully do. It was given to secure to the respondent a balance due for moneys deposited, and for his salary as one of the officers of the association. The debt was honest and fair, and the law would have enforced its payment. How then were the interests of the public, or of third persons, affected by the mere change of its form? Clearly not at all. Neither is it claimed that the note was given for the purpose of being circulated as money. The good faith and honesty of the parties both in giving and receiving it are not called in question. It is therefore a valid security unless the objection that it is not executed in the manner required by section seven is well taken.

There can be no question as to the power of the legislature to prescribe the manner in which corporations shall contract; and when it has so done, the mode prescribed must be strictly pursued or the contract will be invalid. The seventh section declares that contracts made by such associations, and all notes and bills by them issued and put in circulation as money, shall be signed by the president or vice president, and cashier. A like provision in the banking law of New York has given rise to much debate and some contradictory decisions in that State. It is discussed in the three cases in Hill, in the last of which it was held to apply only to agreements where both parties became obligated and notes and bills issued for circulation as money. This decision was re-affirmed by the Court of Appeals in Barnes *vs.* Ontario Bank, 15 N. Y. 152, though not without reluctance on the part of some of the members of the Court, and it is now the settled law of that State that negotiable bills, notes, drafts and other instruments of that nature are good if executed by the cashier or other agent properly designated and authorized by the associates for that purpose. The reasoning in support of this restricted application of the word "contracts" is, that if the legislature had intended to apply it to *all* agreements according to its general sense, then notes and bills issued and put in circulation as money would not have been specifically named. The express mention of notes and bills of a particular kind shows that they were not embraced in the general term "contracts," and by implication that no other were intended so to be; and hence, that as to all others, the bank is at liberty to adopt such methods and appoint such agents for their execution as it may see fit. Those who oppose this construction understand the word "contracts" in its general sense. We have concluded to adopt the construction which was finally sanctioned by the Courts and has become the settled law of New York, and shall therefore hold that the notes was properly executed by the cashier alone.

Judgment affirmed.

Morris and Essex Railroad.

The receipts and expenses of this road for the years ending December 31, 1861 and 1862, have been as follows:

Receipts:	1861.	1862.
From passengers.....	$124,624 90	$132,446 54
" freight.....	78,595 05	84,023 62
" mails, etc.....	7,764 06	9,977 45
	$210,984 01	$226,447 61
Expenses, viz:		
Repairs of road, bridges, buildings, etc.	$31,645 62	$37,179 87
Repairs of engines and cars	20,478 48	20,435 19
Wood, oil and waste...	19,112 28	20,763 35
Operating the road and transporting passengers and freight.....	43,466 47	39,575 28
Salaries and insurance.	7,246 56	6,973 75
	$121,949 41	$124,927 44
Balance.....	$89,034 60	$101,520 17
Balance of interest acc't	$19,888 32	$23,680 55
Two dividends of 3½ per cent. each	$81,046 00	$81,046 00

By comparing the above statements, it will be seen that the gross earnings of 1862 have increased over those of 1861, $15,463 60, with an increase of expenses of only $2,978 03—making the net increase $12,485 57.

There have been transported over the road during the past year 478,205 passengers, an increase of more than 18,000 over the number carried in 1861. The report says:

The stockholders will be reminded, that an existing contract with the New Jersey Railroad and Transportation Company will expire on the 13th day of October next. The Directors have given the requisite notice for its discontinuance. The arrangement with Mr. Edwin A. Stevens will then place at our command a new and independent line, by which our trains will be forwarded without change of engines, or detention from any other cause. We cannot but anticipate a manifest improvement in the time to be made, as well as in the convenience and comfort of the passengers. The accommodations at Hoboken and New York will undoubtedly be of the most ample kind, and such as to give general satisfaction.

The extension of the road to Phillipsburg is a matter of the deepest interest to the Company,—on which depends the final and inevitable success of its operations. The Directors have given the subject their earnest and most anxious attention. They regret their inability to report the commencement of active operations. Certain arrangements between the different interests represented have been necessary; and difficulties of a techni-

cal nature have intervened. The almost certain advantages, which are promised by the extension, make it a matter of regret that any obstacles should exist to prevent its accomplishment. It is not necessary to go into a minute calculation to show the enhanced revenue and profits which would accrue. It is enough to say, that, in the view of the Directors, after a careful consideration of all the circumstances, there is nothing to be hazarded, and much, very much, to be gained, both as to profits and security, from competition, by a prompt completion of the work; and they would respectfully ask the stockholders for full power, without conditions or restrictions, to make such arrangements to that end as they may deem advisable.

The receipts of the road from January 1st to June 1st of the present year exceed those of the previous year more than twenty per cent. From these and other circumstances we learn that the business of the company is gradually, but surely, increasing.

The equipment of the road consists of 11 locomotives, 17 passenger, 5 baggage, 77 freight, and 15 gravel and hand cars.

The balance sheet of the company is as follows:

Capital stock	$1,157,800 00
Funded debt	340,000 00
Contingent fund	258,909 74
	$1,756,709 74
Cost of road and its appendages	$1,629,202 47
Capital stock of the Newark and Bloomfield R. R. Co.	55,000 00
Capital stock of Telegraph Company	2,000 00
Wood on hand, paid for	4,500 00
Cash and cash items	66,007 27
	$1,756,709 74

President—WILLIAM WRIGHT.

Directors—William Wright, Jeremiah C. Garthwaite, William N. Wood, Robert Hamilton, Beach Vanderpool, Daniel Babbit, Aaron Robertson, Joseph P. Bradley, Edwin A. Stevens.

Superintendent—J. B. BASSENGER.

Debt and Resources of the United States.

If there be any persons who are not convinced of the great wealth and resources of the United States, (we speak of the Loyal States,) by what they have witnessed during the progress of the war, we advise them to read the admirable pamphlet recently published by Dr. William Elder, who deservedly occupies a post of honor in the Treasury Department.

There were naturally enough at the beginning of our troubles a large class of timid persons, who as the country entered upon "an era of national debt" saw nothing before it but wide-spread ruin. This was precisely the feeling which actuated even such eminent persons in England as Adam Smith and David Hume, in 1776, when the former predicted the coming distress of the nation, when its debt was only one hundred and twenty-nine millions, and the latter its ruin. Yet England a hundred years later or nearly, has incurred a debt of four thousand three hundred millions and was never more prosperous than at this moment. It is the ability or non-ability to pay which makes all the difference. There are many Banking houses in this city who think but little of payments in cash of half a million of dollars a month, though, at the commencement of their business, fifty-thousand would have been deemed beyond their resources. The debt of England like our own, is due and owing almost entirely to the respective peoples of the two countries, and when men owe themselves, their indebtedness does not much trouble them.

Dr. Elder treats this part of his subject with great clearness and sound logic.

He next gives a complete analysis of the condition of our public debt on the 1st of May, 1868:

4 per cent. Temporary Loan	$28,672,518
4 " " " "	77,394,521
Post due Treasury Notes (old)	41,600
Old Public Debt, (average interest 5½ per cent.)	67,221,591
3 Year Bonds, (7.3 per cent.)	139,996,950
2 " " (6 " ")	1,925,300
U. S. Notes and Fractional Currency	394,920,956
20 Year Bonds, (6 per cent.)	50,000,000
Oregon War Debt, 20 year, (6 per ct.)	878,450
1 Year Certificates of Indebtedness, (6 per cent.)	142,761,441
5-20 Year Bonds (6 per cent.)	64,386,500
Total debt	$967,199,727
Less, in the Treasury	3,154,511
Amount of debt bearing interest	$572,237,169
" " without "	394,962,556
" of interest per annum, assuming that the items and aggregate remain unchanged	34,490,686
Average rate of interest on interest-bearing debt of May 1, 1863	6.009 per ct.
Average rate of interest on total debt	3.566 "
" " " on that part of the debt created since March 7, 1861	3.42 "
Average rate of interest on—	
Total debt in 1791	4.24 "
" " of 1816	6.14 "
Funded debt of March 7, 1861	5.5 "
Treasury Notes issued in the last quarter of Mr. Buchanan's administration—interest stopped by Mr. Chase, in February, 1862	11.0 "

The average rate of interest per annum upon the total debt is here given in comparison with the rates of the total debts of 1791 and 1816, to show how far the burden of our debt is lightened by the financial policy of the Treasury Department. The use of the United States Notes saves about twenty-four millions a year to the Government, and in effect reduces the rate of interest upon the whole debt from 6 per cent. to 3½ per cent. per annum.

The total receipts from 7th March, 1861, to the 1st May, 1863—784 days, from direct taxes, internal revenue, (excise, etc.,) customs, public lands, and miscellaneous sources, we put at $149,953,530

From loans, U. S. notes, fractional currency, and certificates of indebtedness—outstanding 899,058,084

Total receipts $1,049,011,614

The expenditures from 7th March, 1861, to 1st May, 1863, were:

Total civil expenditures, with estimated ordinary expenditures of Army and Navy in time of peace, expenses of the census, etc.	$105,607,129
Paid on principal and interest of old debt	27,405,594
Total estimated peace expenditures, and old debt	$133,012,723
Total rebellion expenses—784 days	$915,998,891
Average, per diem	$1,168,366

These statements present the debt, its annual charge, the immediate liabilities, the rates of interest, and dates of maturity—with the receipts and expenditures of the period of the rebellion till 1st May, 1863, as they stand in figures on the books of the Department.

A table is here given showing how the burden of this debt compares with that of Great Britain. This shows the astounding fact, that while in Great Britain in 1816, the public debt was $4,299,824,588, the total debt per capita, $222.79, the proportion of debt to property 41.14 per cent., and of interest $8.35 per capita, in our case, in 1863, it is but $967,199,727, $40.30, 7.22, and $1.44, respectively, and this, too, where production and profits are rapidly lessening even this amount.

He then asks the question which has disturbed many persons, no doubt, who have taken but a one-sided view of it:

CAN WE EVER PAY THE PRESENT DEBT?

The combined debts of the Revolution and the war of 1812, amounting in 1816 to $127,000,000, with $28,000,000 more, contracted and discharged in the meantime, were virtually extinguished in 1833—the revenues all derived from ordinary sources, except nine millions of direct taxes, levied under the Act of January 5, 1815, and March 5, 1816. The total amount required for the payment of this principal of 155 millions, was $265,295,873, or an average annual appropriation of $14,738,682, for a period of eighteen years. The total revenue of the period from all sources, except loans and Treasury Notes, was 458½ millions, or an average annual receipt and expenditure of 25½ millions, from all ordinary sources, and for all purposes.

The debt of 1816 apportioned to the total population, was $14 67 per capita, its proportion to the property of the people 7.07 per cent. and to their annual income 25¼ per cent. The debt of May 1, 1863, amounts to $40 30 per head of the people of the Loyal States, and 7.22 per cent. of their property, or less than one-fifth of one per cent. more than in 1816, and its proportion to our annual income or product of the year is 27.45 per cent., or less than 2½ per cent. more.

On the assumption that the ordinary expenses of the Government, and the ordinary taxes for the required length of time from May, 1863, shall hold the same ratio to the present debt and wealth of the country, as in the period from 1816 to 1833, the proportion of our present debt to the property of the Loyal States admits of its extinguishment on equal terms in eighteen years and four and a half months; or, if calculated by the per centage of the annual products of industry to the debt, in nineteen and a-half years—the increase of wealth and annual income for the period being taken at the same ratio as that of the eighteen years of the former debt-paying period.

The proportionate average revenue from all sources in the period assumed for the payment of the present debt would be $189,459,600 per annum. The proportionate amount applied to the extinguishment of the debt would be $129,655,794 per annum. But, if we allow only $95,000,000 for ordinary expenses, and $80,000,000 for the payment of the debt and interest—together $175,000,000, or 14½ millions less than an equal ratio to our present wealth—the debt would be extinguished in twelve years and eight months, if 700 millions of it be funded at 6 per cent., or if the total debt of 967,000,000 be put at the same rate of interest, in twenty-one years and eleven months.

CAN WE PAY THE DEBT IF THE WAR LASTS MUCH LONGER?

The debt is now, in round numbers, a thousand millions. Suppose it increases half as much more, (which seems a liberal estimate,) before the war is ended.

Fifteen hundred millions funded at 6 per cent., payable half-yearly, would be discharged in 39 years by the appropriation of 100 millions a year to that purpose; but if 300 millions of that amount were kept in circulating notes, without interest, the remaining 1,200 millions would be paid by the like appropriation in 21 years.

We see that if 700 millions of the present debt were funded, the whole would be paid in twelve years and eight months by an annual tax of a fraction less than six mills on the dollar of the people's property at its present valuation; while the actual annual payments made in discharge of the debt of 1816 were equal to eight and a fifth mills on the dollar of the valuation of that time.

The payment of 1,500 millions, all funded, in 39 years would be a tax of seven and a-half mills, or, if only 1,200 millions were funded, it would be discharged in 21 years, at the same rate of assessment. By statement No. 3. it appears that the *interest* alone of the British debt was a tax of above fifteen mills on the dollar, per annum, in 1816, and is even now quite four mills upon the enormously increased wealth of the nation, or more than half the annual charge that both principal and interest of ours carries while being paid off in the short periods proposed.

Connected with this is another question of much importance and already the subject of discussion, viz: "Can we resume specie payments without a terrible crash?"

Much has been said of the inflation of our currency by the issue of irredeemable Treasury notes, as well as of the fact that all business is now done upon an irredeemable paper basis, and all manner of evils have on this account been predicted. He gives the following tabular comparison between the inflation of our currency and that of Great Britain, at a similar period in her history:

	Am't in millions of dollars.	Per capita.	Millions of dollars.	Per capita.
Great Britain, in 1815, bank notes	504	$2 52		
Loyal U. S., May 1, '63, Treas. & B'k notes			563⅓	$23 47
Great Britain, 1815, Exchequer bills.	202	10 63		
Loyal U. S., May 1, '53, cert. indebt's			142¾	5 96
Totals	706	$37 15	706	$29 43
Total av. cir. of G't Britain, 1844-'51	260	$9 53		
Tot. av. cir. of loyal U. S., 1851-'59			146	$9 06
Wealth of England in 1815	10,400			
Wealth of loyal U. S. in 1863			13,395	

Thus it appears that our total circulation in 1863 is exactly equal to that of England in 1815—our wealth being three-tenths greater, and our per capita circulation more than one-fifth less. Moreover, their circulation quadruples their own average of a much later date; ours slightly more than trebles our average of a period three years gone.

To more fully appreciate the foregoing we quote the following statements in regard to our currency, as compared with that of Great Britain:

Closely connected with the federal debt and the expenditures of the civil war, is the United States currency, which represents so large a portion of the debt, and is used as the medium of payment by the Treasury in liquidating the extraordinary expenditure of the war.

As in the case of our national debt, we are best able to grasp and understand the question of our currency by comparing its present condition with that of the corresponding period of England's history—a history which worked itself into issues so well understood, that we may readily see the facts of our own case, and forecast the results, by the light thus afforded us.

The jeremiads rehearsed and wept over the English debt we have seen. More doleful, if that were possible, was the public feeling on the subject of their currency. The figures that did the service of reducing John Bull to despair in 1815 stood thus, according to the estimate of Mr. Lloyd, who is received as the best authority in this branch of statistics:

Bank of England Notes	27¼	millions of pounds.
Country Banks	45	" "
Scotland and Ireland	31¼	" "
	103¾	= $504,000,000.
Exchequer Bills	41¼	= 202,000,000.
Total circulation	145	= $706,000,000

This amount, in a population of 19 millions gives an average of $37.16 per capita.

In the 8 years from 1844 to 1851 the average circulation of all the banks and bankers of the three kingdoms was 172½ millions of dollars, and the average outstanding exchequer bills 87½ millions dollars. Total average circulation of those years, 260 millions of dollars, which in a population of 27¼ millions gives a circulation of $9.53 a head. Thus, when the wealth of England was but 10,400 millions of dollars, the circulation was four times greater than in 1844-'51, when the wealth was more than the double of 1815, or in relative amount full eight times greater.

Here was abundant opportunity and no slight apparent warrant for an outcry. England's gold was drained to exhaustion by her war expenses and subsidies paid abroad. Bonaparte held the opinion that she must succumb when reduced to an utterly redemptionless note currency. The opponents of the government, the bullion heads and the whole body of the alarmists and despondents, held the same doctrine.

The bank note circulation of the United States from 1852 to 1859, 8 years, averaged 146 millions, or $9.06 per capita. On the 1st of May, 1863, the bank circulation of the loyal States was $168,400,000, and the United States notes and fractional currency $394,920,956. To these add the one year certificates of indebtedness, corresponding somewhat with British exchequer bills and the statement is as follows:

	Amount in millions of dollars.	Per capita.
Great Britain 1815, bank notes	504	$26.52
Loyal U. S. May 1, 1863, Treasury and bank notes	563¾	23.47
Great Britain 1815, exchequer bills.	202	10.63
U. S. May 1, 1863, certificates of indebtedness	142¾	5.96
Total Great Britain	706	37.15
Total United States	706	29.43

Total average circulation of Great Britain, 1844 to 1851, $260,000,000, and average per capita $9.53.

Total average of loyal U. S. 1851 to 1859, $146,000,000, average per capita $09.06. Wealth of England in 1815, ten thousand four hundred millions, and now of the loyal U. S. thirteen thousand three hundred and ninety-five millions of dollars. The pertinency of these calculations will be seen as affecting the previous question, and Dr. Elder says:

Now if England's exchequer bills, and bank of England notes, making 335 millions of their circulation, were as good as gold three years after the time of their greatest "depreciation," the hackneyed comparison with the *assignats* failed terribly; and we may very properly call the attention of our committees of Congress, statesmen, editors, and their copyists, to the difference there has been, once before, between the *assignats*, as a figure of speech, and the currency they were employed to caricature.

Our "inflated currency," so far as the banks are concerned, does not exceed our average in specie-paying times, more than 22 millions, or 15 per cent. As to the greenbacks, the history of the 5-20 loan, in the month of May, shows that the Secretary can fund any surplus of them in circulation, at the rate of two millions a day; or, if he were in a hurry, by calling for bids he could do it, at twenty days notice, at once—which brings us to the conclusion, that the day on which the war closes will be just the day before the resumption of specie payments, to all intents and purposes.

The suspension of specie payments lasted twenty years in England. Her bullionists bravely, for all those twenty years, in the very teeth of the facts, declared that a purely credit circulation could not be maintained; and under favor of war prices and speculations in gold, kept up the cry of "depreciation" to the bitter end. Taking it for certain that this piece of history must get a rehearsal among us, we content ourselves with furnishing the materials for better opinions, to better men; and precedents and forms of despair to those who must needs see things the way they don't like them, and don't like to see things just the way they are.

THE RESOURCES OF THE LOYAL STATES.

Year.	Population.	Real and Personal Property.	Increased Value, per ct.	Products of the year.
U. S.—1840	17,049,463	$3,764,000,000	----	$1,068,135,000
U. S.—1850	23,191,876	6,174,349,828	64	1,985,831,000
L. S.—1850	15,924,122	4,728,247,586	----	1,513,039,227
U. S.—1860	31,429,891	14,188,215,628	129 7	3,736,000,000
L. S.—1860	22,328,133	10,716,109,961	126.6	2,818,336,919
L. S.—1863	24,000,000	13,395,187,451	25	3,522,921,184

(L. S. = Loyal States.)

The authority for the population and valuation of the property of the country and the rate per cent of increase for the years 1840, 1850 and 1860 is the official reports of these decades made by the Census office. The values of the products of the census years 1840 and 1850 are the estimates of Professor Tucker, based upon the census returns. The estimates of the products of 1860 are our own, following the same rule of computation. The population and valuation of 1863 are obtained by the same rule.

It will be observed that the products of the year 1850 are 32 per cent, and those of 1860 are 26.3 per cent of the valuation of the property.

These amounts are greatly below the truth. They do not yield a per capita production of annual values beyond the necessary consumption of the people, and, of course, can afford nothing to the constant accumulation of wealth.

The census returns take no account of the agricultural products and domestic manufactures of our farmers consumed by their families and their employees; who in 1840 were quite three-fourths of the population, and were nearly in as large proportion in 1850, and approaching it in 1860.

Again, the vast total of mechanical products which individually fall below the value of $500 per annum, is omitted.

Nor is there any notice taken of the labor employed in clearing and improving lands, in building and repairing railroads, canals, houses, manufactories, steamships and other vessels; nor of the labor in transportation on the ocean, lakes, rivers, canals, railroads, highways, &c.; nor, of the labor in the mines and forests. The labor thus overlooked gets expression only in the reports of such products as go into market, by the addition it makes to their value.

We regret that we have not space to give in full the unanswerable statements of Dr. Elder, to show that the loss of the Southern Exports is not near as great as supposed. The following will suffice. They show the increase of Northern exports, as follows:—animal products, (ag'l) 19½ millions of dollars, vegetable 60½ millions, of tobacco near 7 millions, and of other articles of domestic production, the balance of 89 millions. The decrease in the products of the sea and forest together, is less than two millions; of manufactures, 13½ millions; 10¼ millions of this decrease being in cotton goods and manufactured tobacco, for lack of the staple of the former, and by closure of the Southern ports against the export of the latter. The total decrease amounting to 15½ millions; which leaves a resulting total increase of 78½ millions of

exports of Northern products over their own total in 1859–60.

But the total exports, Northern and Southern, of 1859–60 exceeded the average of the preceding six years by 69 millions, and the highest of them, 1858–59, by 38 millions. To the average total exports of those six years the loyal States contributed 101 millions; in 1860, 108 millions; and in 1862, 181¾ millions; which makes the excess of 1862 full 80 millions above the average of the previous six years.

The amount of profit and loss in the export trade of the two years compared, therefore, stands thus:—a gain in the proprietary profits of 73 millions worth of exports, against the commissions and transportation profits upon that portion, about one-twelfth perhaps, of 208 millions of Southern products which would otherwise have found their way out into the world through Northern hands.

But more than this the North has been wonderfully active. The total of Northern manufactures in 1860, was $1,754,600,000. Our production has not lessened in this respect. The loss of our Southern customers has not actually exceeded 10 per cent, and in fact has scarcely touched these Northern interests. The same prosperous activity has prevaded the North in almost all branches of production.

PROSPECTIVE RESOURCES.

After Dr. Elder has shown conclusively that our resources commercial, industrial and agricultural are advancing at an enormous rate, that house, shop and factory buildings are largely increasing as compared with 1860, he refers to our mineral wealth, and our unsold public lands, the latter more than a thousand millions of acres, and the enormous increase in our territory, of 452 per cent in ten years in value of the soil, and 130 per cent in population, and to the prosperity of the older states, which in the same period have doubled the capital of their wealth and added 41½ per cent to their free population.

We have thus but imperfectly given our readers an idea of the principal points made by Dr. Elder in his admirable pamphlet, omitting several, which refer to the small rate of interest paid by our governmeht, the cost of redemptien of the debt, and the superior ability with which our financial affairs have been conducted. We may refer to them at another time.

☞ The Pennsylvania Railroad Company are completing arrangements for the construction of such improvements in the harbor as will be necessary for their use in the business of the Philadelphia and Erie Railroad. Parties have come forward who are to superintend the construction of the work. The harbor property of the road consists mainly of the lots situate between German street and Ash Lane, covering the ground from the bluff to the line of piers already erected from the entrance of the harbor to the Public Dock. The pier at the foot of German street is first to be extended out to the line just referred to, and this work is to be commenced immediately. It will be completed before the close of navigation. Upon this pier the proposed grain elevator is to be erected, which work will be accomplished during the coming winter, and upon the opening of navigation in the spring of '64 the road will have its harbor improvement so far advanced as to be prepared for all the demands of the road. This move is an important one and is but an index to the improvements in the harbor which will eventually be made by the Pennsylvania Railroad Company.—*Erie Dispatch.*

Schenectady and Catskill Railroad.

The Schenectady and Catskill Railroad was an idea of former years. It was then believed that its construction would greatly facilitate and economize the transportation not only of passengers, but particularly of freights and produce, by the canals. It was argued that when the numerous lines of road then in embryo, stretching far away towards the great West, and the completion of the enlarged Erie Canal, should bring their vast accumulations of products to the Hudson, this link would prove of the highest importance. Events have confirmed that impression. The Western canals and railroads have thrown upon the enlarged canals an amount of transportation under which they literally stagger, and the necessity of increasing its facility for entering the Hudson has become obvious to any one of reflection and observation. To this conviction we owe the recent organization of a company for the construction of the Schenectady and Catskill Railroad. This organization is under the general law, with a capital of one million of dollars, its articles of association filed, the required per centage paid in, and the stock books soon to be opened for subscriptions. A full board of directors are named in the articles of association, chiefly residents of Schenectady and Catskill, well known gentlemen of wealth and respectability—D. D. Campbell, of Schenectady, President, S. Sherwood Day, of Catskill, Vice President, and Peter Rowe, of Schenectady, Treasurer. The report of a competent civil engineer states that several years since "an examination was made of a route for a canal across the country from Schenectady to Catskill, when a very feasible one was found, leaving the valley of the Mohawk nearly opposite Schenectady, upon a level sixty feet above the level of the road at Schenectady; from thence to the tide waters of the Hudson at Catskill is a descent of two hundred and ninety-six feet. The distance from Schenectady to Catskill is about forty miles; the summit of the road will be about three miles from Schenectady, the necessary grade twenty feet per mile; from thence the average grade to Catskill is eight feet per mile. The route is very direct, and shorter than any traveled road between those places, and no grade need exceed twenty feet per mile. There is probably no route in the State, of the same extent, where a railroad can be graded with more facility and economy, nor is there any route, either occupied or in prospect, where a better or as good a reward will be offered for the investment necessary for its construction." The value and importance of this route will be understood by a comparison of distances and the difference between obstructed and free transportation. From Schenectady to Albany by rail is sixteen miles, and thence to Catskill thirty-six miles. By canal the difference of distance is still greater. From Schenectady to Albany twenty-two miles, to Catskill thirty-six miles, to which add the delays of twenty-nine locks and the detentions of the overslaugh, and the distance is fifty-eight miles of delayed and vexatious navigation, against forty rapid miles by rail.—*N. Y. Herald.*

Third Avenue Railroad Company.

The directors of the Third Avenue Railroad Company have sent to the Comptroller the following extract from the proceedings of a meeting held by them on the 5th inst.:—

The President stated that during the recent riot or mob in the city, which took place on the 13th, 14th and 15th of July last, this company had one horse killed by being shot, several cars injured, the receipts of the month impaired several thousand dollars and the mortality of the horses somewhat increased consequent by fright, disarrangement of feed, &c., and wished the opinion of the board as to any claim they might desire to make, when on motion, it was

Resolved, That this company deem it inexpedient to present any claim against the city for loss of horses or damage to cars, or any other consequent damage sustained by the late riot or mob on the 13th, 14th and 15th of July last.

New York Canals.

The quantity of flour, wheat, corn and barley left at tide water from the commencement of navigation to the 31st of July, inclusive, during the years 1862 and 1863, was as follows:

	Flour, bbls.	Wheat, bush.	Corn, bush.	Barley, bush.
1862	705,200	11,830,100	7,586,600	373,100
1863	573,100	8,044,400	10,746,800	66,200
Dec.	132,100	3,785,700	3,160,200	*306,900

* Decrease.

By reducing the wheat to flour, the quantity of the latter left at tide water this year, compared with the corresponding period of last year, shows a deficiency equal to 889,240 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide water from the commencement of navigation, to and including the 31st of July, in the years indicated:—

Canal open—	1861. May 1.	1862. May 1.	1863. May 1.
Flour, bbls	465,900	705,200	573,100
Wheat, bush	11,471,600	11,830,100	8,644,400
Corn	6,896,200	7,586,600	10,746,800
Barley	177,000	373,100	66,200
Oats	2,287,600	1,684,900	3,870,600
Rye	395,400	392,000	175,800
Beef, bbls	350	11,200	9,500
Pork	2,900	132,300	223,700
Bacon, lbs	380,900	5,161,900	3,316,000
Butter	109,000	417,100	64,400
Lard	296,900	5,937,100	17,731,000
Cheese	157,900	386,500	361,200
Wool	137,600	387,300	26,000

Railroad Earnings--Weekly.

The earnings of the Grand Trunk Railway for the week ending August 1, 1863, were:

Passengers	$30,942 76
Freight and live stock	47,838 93
Mails and sundries	2,850 00
Total	$75,631 69
Corresponding week, 1862	58,703 84
Increase	$16,927 85

The traffic of the Great Western Railroad for the week ending July 31, 1863, was as follows:

Passengers	$19,585 15
Freight and live stock	21,960 68
Mails and sundries	1,826 09
Total	$43,371 93
Corresponding week of 1862	37,775 81
Decrease	$5,596 11

The earnings of the Chicago and Alton Railroad for the 1st week of August, 1863, were:

Passengers	$12,095 70
Freight	23,688 85
Sundries	1,074 34
Total	$36,858 89
Same week last year	24,597 51
Increase	$12,261 38

The earnings of the Michigan Southern Railroad for the 1st week of August, 1863, were $39,782 00
Do., 1862 41,396 00
Decrease $1,614 00

The earnings of the Chicago and Rock Island Railroad for the 1st week of August, 1863, were $31,807 00
Same week, 1862 24,024 42
Increase $7,782 58

American Railroad Journal.

Saturday, August 15, 1863.

Stock Exchange and Money Market.

The continued warm weather for the last fifteen days, has had its full effect on the Money Market, at least in our latitude, and as the mercury rose, speculation has drooped. The crowd which usually fills up William street considerably lessened, and money was plentiful, for this among other reasons, that the large borrowers had disappeared during the late tropical heats. Those who have observed the effect of the weather on the New York operators, have long been sensible that it plays an important part not only on the health but the pockets of our monied men. It is well-known that in very stormy weather stocks are sure to fall off, and money grows tighter. On a bad day, men who are looking about to meet 3 o'clock with credit, always have to pay more for what they need, than at any other time. The reason is, that the heavy monied men, or even the

merely well-to-do operators do not go out in bad weather. They send down word to their offices or counting-rooms that they are not "coming down to-day," and the consequence is there is a general blueness among their borrowing customers, a corresponding shortness, and an additional flurry among the accommodating brokers. Many persons who invest to hold, are known to wait for a succession of bad weather before they enter the market. It is as good to them as from one to two per cent. on anything they desire to purchase. Our reports from the street are therefore quite in accordance with these facts. Everything is drooping, gold inanimate, exchange dull. One or two stocks however, rise above all atmospheric disturbances, and maintain their places on the list with astonishing self-possession; the Harlem particularly, which on Monday reached 149½, and still stands about 148½. The mystery of this rise is no mystery at all. We have explained it again and again. The present managers of this road are determined to develope its dormant powers, and make it a first class property. Under the management of its late President, it was fully decided upon to make a connection with the Housatonic between Dover and Kent, a distance of about six miles. This will give the Harlem not only a large share of our Northern traffic and travel, but even of that of Canada. The Harlem would in this case be a powerful competitor of the Hudson River road. The construction of the Broadway track, and that to the Central Park, may under the late decisions be considered as certain soon to take place. These three advantages within the immediate grasp of the Harlem Company are to be realized; they were pointed out in this JOURNAL months ago, and as a natural consequence, the present holders of the stock who bought it in very low, and have made fortunes by the rise, now see a further gain to them in prospective from a first class road, and they are determined to proceed and make it such. It is therefore whispered about in various official parlors, that the stock is sure to rise to 200. We believe no other railway property is held at any such price, except perhaps, some of the city railways, as the Third avenue, for example. Hudson River and Erie, as it will be seen by our quotations continue strong, and some of the Northwestern roads begin to recover from the effects of former competition among themselves by new and advantageous combinations.

We notice that books are about to be opened for the construction of a railway forty miles in length, between Schenectady and Catskill, with a capital of one million of dollars. The grades are very easy which is contrary to the received opinions, and the saving of time and distance between these two points as compared with the old routes will be considerable. This is an old scheme revived under the general law, and has more importance than ever. It is a direct discounting of the business of the Central, Hudson River and Harlem roads, so far as a saving of time influences business. We should not be surprised if there was quite a rush for the stock, and that the road would prove a respectably paying road, and certainly one of much accommodation to travelers. It would have been made long ago, but for the influence exerted against it by parties interested in other roads, and the danger now is, that the stock may fall into the hands of these very parties, who will do enough to secure the route, and then let it sleep. The road, however, will cost more than is calculated by several hundred thousand dollars.

It is understood that under the influence of the news lately received abroad from this country, large orders for investments in Government securities are coming in at the rate of a million a week. At the same time we learn that the confederate loan has rapidly declined, and is reaching the same point to which the repudiated bonds of Mississippi went, under the same financial lead which inspired the confederate loan. When it is also known abroad that as our victorious troops approach the gulf, the very cotton relied on to pay this confederate loan is being destroyed in large quantities in Mississippi and Alabama, by order of this same Jefferson Davis, the whole heavens being darkened with the repudiating smoke, the security is lessening every day.

On the contrary our public securities have rapidly advanced abroad, and some of our foreign correspondents, particularly in the Fatherland, steady and unflinching friends of our Government and believers in its stability, have gone on and made large profits by acting up to their own convictions, and investing in our stocks regardless of the opinions of the London Bourse. The Bankers in Holland have shown their good sense in their American transactions. Their gains will continue to be large, and a handsome premium over the par value is certain to accrue to them as soon as the war is over.

Of the approaching conclusion of our great domestic tragedy, we may now speak with more confidence than ever. We do so without the least feeling of pride or partizanship. We certainly might invoke the Nemesis of nations to avenge our wrongs against those men, who made war on the best of Governments, forced their own followers into the field with them by domestic violence, against their will, and have with bloody ambition deluged the earth with the best and gentlest blood of the North. But they have been punished for their misconduct: if they have greatly suffered, the sting came from the scorpion which projected it.

As the prospects of a restoration of the Union are brightening every day, both from our successes in arms, and the returning good sense of some of the principal Southern States, we may all rejoice that the price we are once more paying for the preservation of free institutions is not beyond our means. The following interesting indeed startling facts are condensed from the report of Mr. Kennedy, the Superintendent of the last census.

In the ten years between 1850 and 1863, the population increased 35 per cent.; more than 50,000,000 acres of fresh land were brought into cultivation; the produce of manufactories increased from $1,000,000,000 to $1,900,000,000; the banking capital from $228,000,000 to $421,000,000; insurance to $311,000,000. Railroads increased in ten years 22,000 miles, and the capital from $296,000,000 to $1,150,000,000; telegraphic lines spreading a complete net-work over the whole country; and an army of emigrants from Europe within the last ten years have marched mainly into the Northwest, numbering 2,500,000 souls. Agricultural implements increased from $6,000,000 to $17,000,000; iron produced $41,000,000; machinery from $27,000,000 to $47,000,000; coal from $7,000,005 to $19,000,000; printing from $11,000,000 to $39,000,000; lumber from $58,000,000 to $95,000,000; flour and grist mills increased product from $65,000,000 to $113,000,000; woollen manufactures from $45,000,000 to $68,000,000; leather $37,000,000 in 1850 to $63,000,000 in 1860; manufactures of boots and shoes $54,000,000; india rubber $5,500,000; gas $13,000,000; wheat in 1850, 100,000,000 bushels; in 1860, 171,000,000 bushels; Indian corn in 1850, 592,000,000 bushels; in 1860, 830,000,000 bushels; cotton in 1850, 2,445,000 bales; in 1860, 5,196,000 bales; butter 480,000,000 lbs.; cheese 105,000,000 lbs.; (5,000,000 exported); slaughtered animals in 1850, $111,000,000; in 1860, $212,000,000; tobacco in 1850, 199,000,000 lbs.; in 1860, 429,000,000 lbs; of which was produced 3,500,000 lbs. Ohio, 25,500,000 lbs. New York, 5,500,000 lbs. Massachusetts, and Connecticut 6,000,000 of lbs.; wine, from 221,000 gallons in 1850 to 1,800,000 gallons in 1860. Hay, in 1850, 13,500,000 tons to 19.000,000 tons in 1860, valued, at $20 per ton, $380,000,000. Orchard products, in 1850, $1,500,000; in 1860, $16,500,000. Total tonnage 5,500,000 tons, worth $221,000,000, and so on. If we should draw a line across the continent from Norfolk to the Pacific, the United States even above that line, under the protection of the stars and stripes, could easier pay within a century $5,000,000,000 principal and interest than any nation in Europe could pay its interest alone.

We have in another part of the JOURNAL made an abstract from an able work of Dr. Elder on the financial resources and power of the loyal states alone. Nothing can be more certain than that we are becoming the richest nation on the globe, with the greatest future before us, and he who looks gloomily on the pecuniary condition of the Government or the people, must be absolutely without the least comprehension, or judicially blind:

The Naugatuck Railroad Company have declared a semi-annual dividend of four per cent, free from tax, payable on the 15th instant.

The Pacific Mail Steamship Company has declared its usual quarterly dividend of 5 per cent., free of the Government tax, payable on the 20th inst.

The Oswego and Syracuse Railroad Company will pay its twentieth semi-annual dividend of 3½ per cent., free from Government tax, on and after Aug. 20, 1863. New York stockholders will be paid by Henry A. Oakley, Esq., Transfer Agent, at the office of the Howard Insurance Company, New York City; Albany and Troy stockholders at the New York State Bank, Albany; Utica stockholders at the Oneida Bank, Utica; Syracuse stockholders at the Bank of Syracuse; all others at the Lake Ontario Bank Oswego. All dividends not called for within thirty days will be paid at the Treasurer's office, Oswego, only.

The department of the interior have received notice of the acceptance of agricultural college grants by the States of Connecticut and New Hampshire, Connecticut will receive 1125 pieces of scrip or 180,000 acres, and New Hampshire 937 pieces of scrip or 150,000 acres.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Illinois Central full stock, 109¾; do., cancelled bonds scrip, 101¼; Ohio and Miss. certificates, 34; Miss. and Mo., 27; do., L. G. bonds, 58; Jersey City Water Loan, 109; Illinois Canal bonds, 1860, 98; Illinois Coupon bonds, 1870, 101; do., 1868, 98.

Philadelphia.—Camden and Atlantic 8; do., pref., 18¼; Camden and Amboy mortgage, 108; North Pennsylvania mort. scrip, 87½; 10th and 11th streets, 41; 17th and 19th streets, 12. The

☞ The city directory of Chicago for 1863 fixes the population of that city at 150,000.

Old Colony and Newport Railroad.

A meeting of the stockholders of the Old Colony and Fall River and the Newport and Fall River Railroad Companies was held in Boston on the 5th inst. The act of the Legislature to unite these two roads having been accepted, this meeting was for the purpose of organization. Alexander Holmes, Esq., President of the Old Colony and Fall River road, was chosen chairman, and Joseph S. Beals of the same road, clerk. Hon. F. B. Crowninshield of Boston, Hon. Wm. C. Cozzens of Rhode Island, and Hon. Osmyn Brewster of Boston, having been appointed by the chair, offered a code of by-laws for the new corporation, which were accepted. President Holmes, in the course of some remarks on the condition of the two roads, said that when the new road was completed the stockholders would have a road worth about $4,000,000, which he thought would pay eight per cent. on its stock. The new road would be opened in September.

A ballot for seven directors resulted in the choice of the following gentlemen: Alexander Holmes, Kingston; Geo. A. Kettell, Charlestown; Benjamin Fitch, Newport; Francis B. Hayes, Boston; Minot Tirrell, Weymouth; Uriel Crocker, Boston; Richard Borden, Fall River. The directors were authorized to dispose, at the earliest possible moment, of the real estate belonging to the company, which is not necessary for the use of the road, by public or private sale. They were also directed to divide the surplus on hand proportionately among the stockholders.

On motion a vote was adopted that the name of the new road be the "Old Colony and Newport Railroad Company."

Other votes providing for the issue of new cer-certificates of stock, etc., were passed and the meeting adjourned to the last Tuesday in October.

Condition of Southern Railroads.

A practical machinist and locomotive engineer, formerly employed on the Bellefontaine Railway, and who has for the last two years been employed in the South, lately escaped through the rebel lines at the capture of Jackson, Mississippi, and has reached Cleveland, Ohio. He says that the rolling stock on the Southern railroads is in wretched condition, and there are neither mechanics, nor shops, nor suitable tools to repair the machinery. The engines and cars have been kept on the move constantly, and a train cannot now, with safety, make over five miles an hour on most of the tracks. There were seven locomotives captured at Jackson, but only two were fit to haul a train of five cars. The tracks, too, are in a sad plight; the sidings have been taken up to patch out the main tracks, and trains are compelled to switch off on timbers at the turnouts. There is no way to remedy these things; there is no iron; there are few mechanics competent to repair the machinery; there are no suitable tools even were there men to handle them, and the trouble is daily becoming more serious.

Railway Locomotives.

The total number of locomotives at work in England and Wales, is of 5,956; in Scotland, 148; and in Ireland, 252; making an aggregate of 6,356. Assuming that the average cost of these locomotives was £2,500, the capital invested in them would be no less than £16,390,000.—*Canada Free Press.*

New York and Harlem Railroad Company.

SUPREME COURT—CHAMBERS, August 6.—*The New York and Harlem Railroad Company vs. the Forty-second street and Grand street Ferry Railroad Company, John Kerr, Jacob Sharp and Others.*—GOULD, J.—In this case there were three motions argued together: first, a motion to punish the defendants for violating an injunction granted by Justice Leonard; second, a motion to dissolve said injunction; and third, a motion for leave to file an amended and supplemental complaint. These motions involved the validity of the act of the Legislature under which the defendants, known as the Crosstown Railroad Company, claim the right to run their road. The defendants, having laid their track through Twenty-third street, from Fifth avenue to Fourth avenue, and on Fourteenth street, from Fourth avenue to avenue A, undertook to make the connecting link on the Fourth avenue, between Twenty-third and Fourteenth streets, and for that purpose commenced to tear up the pavement and to lay a track between the Harlem Railroad track and the Fourth avenue. The Harlem Railroad Company thereupon procured the injunction order before alluded to. The plaintiffs claim that their right to run a railroad through the Fourth avenue is exclusive, and that the Crosstown road has no title either to use the track of the Harlem Railroad, or to lay an independent track on the Fourth avenue. The question in this case is the same as that between the Sixth and Seventh avenue railroad companies, the former having procured an injunction against the latter, restraining them from using any part of the Sixth Avenue Railroad track, or interfering with the Sixth avenue in the operation of its road.

The case has been moved on, but still stands adjourned.

☞ The Port Huron and Lake Michigan Railroad Company has been re-organized, with A. G. Jerome as President, and D. Ogden Bradley as Secretary and Treasurer, and now proposes to complete its line from Port Huron, in St. Clair County, Michigan, to its junction with the Detroit and Milwaukee Railway in Shiawassa County, being 96 miles of road, on which nearly $2,000,000 was expended in 1857, but upon which the work has since been suspended. Being a virtual extension of the Grand Trunk road of Canada, and said to be on a more direct line than any of the other Michigan roads between New York and the Great West, it is believed the road will prove of value to the business public.

New Railway Propeller.

An experiment has been made in France with a new propeller on a temporary railway constructed with rails supplied by the Paris and Strasburg Railway Company. As the inventor asserts that his propeller is capable of exerting the greatest force, and of propelling railway cars at the greatest speed, the question of force alone was the subject of experiment. As the road was prepared so as to present the greatest difficulties—such as an ascent of three centimetres the metre, and two successive curves of a radius of sixty feet—it would have been dangerous to proceed at a greater speed than that of an ordinary French train, that is, about thirty-five miles an hour. The success of the experiment was complete as to the regularity of the action of the propeller, the motive being uniform and without any sudden shock

Northern Central Railway.

The directors of this company have made arrangements to rebuild in the most permanent manner, the bridges destroyed by the rebels in the recent invasion. Those over the Codorus, near Louck's mill, the Gut and the Conewago are to be of wood of the Howe Truss patent—those over the Codorus, between York and Brillhart's station, are to be of cut stone and arched. The two last will cost about $25,000 each. The whole loss to the company in repairing the recent damage and rebuilding the bridges, will probably amount to $150,000. All the trains are now running on regular time, and the road is doing an immense business. The temporary bridges have been thoroughly tested, and are considered entirely safe. Arrangements have also been made to rebuild the bridges destroyed on the Wrightsville road, and operations will commence in the course of a week or ten days.

☞ The people of the Chenango Valley are to have a railroad at last. It is to run from Greene to Binghamton, and the "motive power" will be horse flesh. The entire amount of capital stock has been subscribed and ten per cent paid in.—*Albany Journal.*

☞ The line of steamers between New York and Fall River, which has been managed here by Wm. Borden, agent, is now understood to be sold for $600,000 (three boats and some other property,) to the Fall River and Boston Railroad Company, whose line is extending, and nearly done, from Fall River to the Newport Landing. When the railroad is opened, it is believed the boats will stop at Newport.

☞ The express train from Chesnut Hill to Philadelphia, on the Philadelphia, Germantown and Chesnut Hill Railway, made its first trip to the city yesterday morning, reaching Philadelphia at eight o'clock, in half an hour after leaving the depot at Chesnut Hill. So much satisfaction was given by the experimental trip yesterday, that arrangements will probably be made for the running of other express trains over the same road. By the trains now running, Chesnut Hill is brought, in point of time, within five miles distance of Philadelphia, and it is thought that hereafter the trip will be made in twenty-eight minutes, instead of half an hour.—*Philadelphia Inq.*

☞ The New Jersey Central Railroad is constructing a bridge across Newark Bay, preparatory to the extension of its road from Elizabeth to Jersey City. The cars of this line now run over the track of the New Jersey road from Jersey City to Elizabeth.

☞ The Atlantic and Great Western Railroad Company have leased the Cleveland and Mahoning Railroad for a long term of years. The arrangement has been ratified by the Board of Directors of both companies. The gauge of the C. & M. will be changed to six feet, and in a couple of months there will be a continuous broad gauge route from Cleveland to New York.—*Meadville Jour.*

Telegraph Lines.

The new telegraph line from Philadelphia to Pittsburg, via Hanover Junction, Chambersburg, Bedford and Fayette county, is being pushed forward rapidly. When completed from Hanover Junction to Pittsburg, it will be connected with the Independent Telegraph Line already constructed from Portland, Me., to Washington, D. C., and with the new line from Harrisburg to Baltimore.

Lexington and West Cambridge Railroad.

The annual meeting of this corporation was held in Boston on the 5th inst. Isaac N. Damon, Esq., Treasurer, read the annual report, from which it appeared that the gross receipts of the road from all sources have been $22,504. Of this sum $5345 has been paid to the Fitchburg Railroad, and the other expenses cover $13,899. The net profits of the road were $3270, being $190 less than during the previous year. The Board of Directors for the ensuing year was elected as follows:—

Charles Hudson, President, Lexington; Samuel Butterfield, West Cambridge; Joseph N. Howe Boston; Addison Gage, West Cambridge; Arthur T. Lyman, Boston; G. Washington Warren, Charlestown; Wm. A. Tower, Lexington.

The Popular Loan.

To the Editor of the RAILROAD JOURNAL:

We are receiving numerous inquiries as to whether the United States five-twenty bonds are redeemable in gold.

We have received a letter from the Treasury Department most satisfactorily answering this question, (as it was once before answered by Mr. Chase,) a copy of which we hand you herewith.

The popular character of this loan and its wide distribution among the people, renders the subject one of unusual public interest and importance, and we presume the publication of the letter will be acceptable to your readers.

FISK & HATCH, Bankers.

TREASURY DEPARTMENT,
WASHINGTON, D. C., Aug. 5, 1863.

GENTLEMEN: Your letter of the 3d inst., relative to the redemption of 6 per cent. five-twenty bonds of the loan of Feb. 25, 1862, has been received.

The following is the decision of the Secretary in regard to the redemption of the public debt:

"All coupon and registered bonds forming a part of the permanent loan of the United States, will be redeemed in gold.

The Five-Twenty Sixes, being redeemable at any time within twenty years, after the lapse of five years, belong to the permanent loan; and so also do the Twenty Years Sixes of July 17, 1861, into which the three years Seven-Thirties are convertible.

All obligations and notes forming part of the temporary loan, will be paid at maturity in United States notes, unless before such maturity payment in specie shall have been generally resumed.

The Seven-Thirty, three-year bonds or notes, form part of the temporary loan, with the privilege of conversion into Twenty Years Sixes, in sums not less than five hundred dollars. They will therefore be paid, if holders prefer payment to conversion in United States notes.

GEORGE HARRINGTON,
Acting Secretary of the Treasury.

To Messrs. FISK & HATCH, New York.

Govanstown Railroad.

The last rail of our passenger railroad has been laid into the car house in this place, and that building is rapidly approaching completion. We understand that the company have made arrangements to procure a good article of gravel or disintegrated rock in this vicinity, and the work of ballasting the road will now speedily progress. The car which runs to Govanstown is filled each trip, and it is found that it will not afford sufficient facilities for the travel. The car now used is one of the city two-horse cars, but three horses are attached to it when there is a full load. We presume the new ones will be put upon the road when it is completed to this place. They are being built by Messrs. Poole & Hunt, at the Woodberry Works, and are different in construction from any heretofore used in this vicinity, being two stories high, or having an "upper deck" affording space for baggage, and an opportunity for passengers to smoke without annoyance to those inside.—*Baltimore County Adv.*

Raritan and Delaware Bay Railroad.

We passed over the entire length of this road a few days since, and found the track and equipments in much better condition than we had expected. The running time from this city to Long Branch, about 88 miles, was a little less than four hours, including all stoppages. The cars are new and very comfortable, and the roadway, though not ballasted, is tolerably even. The region of country through which the road runs is, for about 50 or 60 miles of the distance, the most barren and uninteresting waste of white sand and scrub oaks that can be found east of the Allegheny Mountains. As an outlet for local freight the road will, no doubt, prove a great convenience; and if the law allows it to carry through freight, it may be rendered productive. As an evidence that its proprietors purpose continuing it in operation, the site, about midway, is selected for the erection of a machine shop, a miniature "Altoona," and the work has been already commenced.—*Philad. Ledger.*

Steam on the Plains.

ENGINES RUNNING ON THE WESTERN WAGON ROADS.

The subject of applying steam power for the transportation of freight over common turnpike roads across the plains, has for several years been the theme of study by various energetic and progressive parties. The progress of the various experiments in appropriate machinery have not been generally known to the public, and on visiting Nebraska City a few days since, we were surprised to find a large locomotive, sent out from New York for experiment.

The machine mentioned, being the first one built, is propelled by four engines of ten horse power each. The cylinders are oscillating and connect with shafts, upon which are pinions of twelve inches in diameter, which move upon and give motion to wheels, about six feet in diameter, which are attached to the inside of the spokes of the driving wheels. The drivers are ten feet in diameter, made of boiler iron, and have a tread of eighteen inches. The steering wheel is six feet in diameter and attached at the middle of the axle to the forward end of the tank by a ball and socket arrangement. The tank forms the body of the "wagon." The boiler is an upright tabular, and aft of the driving shaft.

The wagon will carry wood and water sufficient for a four hours' run. It consumes one cord per eight hours. The hands required to run the steam wagon are an engineer, fireman and pilot.

The engine is the result of careful study and experiment, and its trial so far has been successful beyond the most sanguine anticipations of the projectors. It is proved to be capable of drawing eight tons of freight up a grade of six hundred feet to the mile. The heaviest railroad grade over which an engine has ever passed is three hundred and fifty feet rise to the mile. The treadwheels are ridged to prevent slipping, and the machine is capable of being stopped and of holding its train on any grade.

The success of this mechanical production has led to the commencement of a road from Nebraska City to Denver. It is already finished through Otoc county (the one in which Nebraska City is located). Through that county the road has cost $2,000, including sixteen bridges, and it is estimated that the entire route to Denver will cost but $10,000. Otoc county levied a special tax for building the road. The county is thirty-one miles across, and this road is only thirty-four miles long, thus going but three miles from a direct route. The work of building the road is to be vigorously prosecuted by Mr. D. H. Osborn, engineer in charge.

Three more engines of seventy horse power each are furnished, and will be sent out soon—probably arriving in Nebraska City sometime in July. Three besides these, of the same size, will

be sent forward by fall. They will haul ten tons of freight each one hundred miles per day.

The enterprise would doubtless have now been in a much more advanced stage, had it not been for the massacre in Minnesota, in which the family of one of the managers was captured by the Indians. He was obliged to spend several months in rescuing them from the savages, and during that time but little progress in the work was made. Some difficulty has also been experienced in procuring a suitable class of machinists.

The engine now in Nebraska arrived there last July.

Several large eastern capitalists, fully confident of the early success of this magnificent enterprise, are aiding the work, which is now being pushed forward in all its branches as rapidly as possible. Like all new enterprises there are hundreds of obstacles and discouragements to be overcome, with which none but an experienced inventor is acquainted. Mr. Osborn, who is a skillful mechanic of fifteen years' experience and upon whose judgment we place much reliance, is confident of the early and complete success of the work. The majority of the intelligent citizens of Nebraska are of the opinion that it will succeed, and in our opinion indications are exceedingly flattering. Should the hopes centered upon this enterprise be fully realized, a revolution in the freighting business will transpire, scarcely less surprising and gigantic in its results than the introduction of steam in water navigation. There are few persons, even among those whose residence is at our most enterprising starting point, who fully realize the importance and gigantic proportions which the trade across these great western plains is daily attaining. The mind can scarcely conceive the immensity of this interior commerce. Its ramifications extend throughout the length and breadth of the American continent, and the effect of so important an improvement made in the transit of freight, mail and passengers, as the one which these steam wagons will bring about, will scarcely have a parallel.—*Leavenworth, Kansas, Conservative.*

New York State Banks.

The following summary shows the aggregate of the resources and liabilities of the Banks of the State of New York, as exhibited by their reports to the Superintendent of their condition on the morning of Saturday, June 13, 1863:—

LIABILITIES.

Capital	$108,499,653
Circulation	32,261,462
Profits	19,403,336
Due banks	49,193,323
Due individuals and corporations other than banks and depositors	2,079,981
Due Treasurer of the State of New York	4,767,306
Due depositors on demand	218,717,725
Amount due not included in either of the above heads	2,496,394
Add for cents	505
	$436,419,685

RESOURCES.

Loans and discounts	$183,647,438
Overdrafts	463,785
Due from banks	22,404,878
Due from directors	$6,198,572
Due from brokers	16,311,600
Real estate	$11,300 and 8,972,098
Specie	40,250,389
Cash items	48,482,170
Stocks, promissory and United States 7 3-10 notes and indebtedness certificates	109,481,478
Bonds and mortgages, $86,000, and	5,734,518
Bills of solvent banks and U. S. demand notes	15,790,539
Bills of suspended banks, $65, and	245
Loss and expense account	1,191,229
Add for cents	918
	$436,519,685

Chicago and Northwestern Railroad.

The Chicago and Northwestern Railway Company has earned in the first four months of the fiscal year ending July 31, 1863 $448,914 84
In the corresponding period last year 338,452 05

Increase $110,461 89

Should the same rate of increase continue through the year, it would give an aggregate of $1,414,939 72.

Railroads of the World.

The following is a statement of the length and cost of the railroads in the several countries of the World, according to the latest accessible data:

	Miles.	Cost.	Cost p.m.
United States	32,871	$1,234,262,610	$37,549
Canada	1,975	120,540,987	61,033
New Brunswick	169	6,074,554	35,944
Nova Scotia	92	4,273,402	46,450
Mexico	24	1,179,800	49,160
North America	35,131	$1,366,331,353	$38,893
Cuba	519	$26,197,500	$50,477
Jamaica	10	250,000	25,000
West Indies	529	$26,447,500	$49,998
New Granada	49½	$8,000,000	$161,616
Peru	53½	2,829,500	52,888
Chili	296	17,398,200	58,102
Argentine Confederacy	13	260,000	20,000
Brazil	112	26,173,200	233,689
Venezuela	22	1,872,500	85,113
South America	546	$56,533,400	$103,541
Tot. of America	36,206	$1,449,312,253	$40,029
Great Britain & Ireland	11,386	$1,775,536,400	$156,028
France	6,721	1,013,182,450	150,749
Spain	1,568	151,876,480	96,861
Portugal	82	7,979,848	97,314
Belgium	1,012	109,422,533	108,025
Holland	334	32,018,242	95,863
Denmark	262	15,000,810	57,255
Norway	63	3,500,000	55,555
Sweden	288	26,986,432	94,314
Russia	1,374	224,541,828	163,422
Prussia	3,162	410,377,008	129,784
Smaller German States	3,491	309,745,957	88,727
Austrian Empire	3,287	234,941,612	71,471
Switzerland	611	10,916,666	83,333
Italy	1,414	130,922,260	92,590
Papal States	53	4,961,595	93,615
Total Europe	35,081	$4,461,910,321	$127,091
AsiaMinor(Turkey)	80	$2,693,400	$33,667
British India*	2,790	235,157,500	84,250
Total Asia	2,870	$237,750,900	$82,840
Victoria	264	$67,188,000	$254,500
New S'th Wales	172	12,359,920	71,860
South Australia	26	1,142,440	43,940
Tot. Australasia	462	$80,689,360	$174,652
Egypt	204	$20,400,000	$100,000
Algeria	30	2,000,000	66,667
Cape of G'd Hope	28	2,500,000	89,286
Total Africa	262	$24,900,000	$95,038

RECAPITULATION.

America	36,306	$1,449,312,253	$40,029
Europe	35,108	4,461,910,321	127,091
Asia	2,870	237,750,900	82,840
Australasia	462	80,689,360	174,652
Africa	262	24,900,000	95,038
Total world	74,908	$6,254,562,834	$83,499

* Total projected for British India—length 4,653½ miles—estimated cost $287,600,000, or $61,803 per mile. Total expended on lines completed and in progress $247,322,000.

Trade of San Francisco.

The circular of J. T. Coleman & Co., received by the Northern Light, contains a summary of the trade of San Francisco for the six months ending June 30, 1863. The exports, as compared with the corresponding months of previous years, were as follows:

To	1861.	1862.	1863.
N. Y. & Boston	$939,522	$1,450,821	$1,548,698
England	1,688,295	377,968	719,691
Mexico	576,389	371,796	1,034,742
Peru	38,719	141,116	99,663
Sandwich Islands	103,588	130,806	166,444
China	295,025	304,730	646,986
Australia	253,462	93,696	181,989
Victoria	557,810	1,172,448	931,964
Japan	5,486	4,578	19,622
Other countries	490,456	440,769	834,609
Total	$4,947,952	$4,452,728	$6,183,458

Of these exports our breadstuffs form a leading item, amounting to about one-fourth of the entire sum.

The exports of merchandise and treasure compared were:

Merchandise	$4,947,957	$4,542,728	$6,184,454
Treasure	18,565,143	16,832,616	22,757,681
Total	$23,513,100	$21,375,344	$28,942,135

A very important change in the drift of our treasure exports has been in progress this year, occasioned chiefly by currency derangements in the Atlantic States, but in part by the danger apprehended under our own flag from Rebel privateers. This change is exhibited in the following statement:

DESTINATION OF TREASURE EXPORTED FROM SAN FRANCISCO DURING FIRST HALF OF YEARS—

	1860.	1861.	1862	1863.
New York	$17,971,387	$15,916,290	$11,290,851	$15,650,976
England	1,280,404	1,103,948	4,216,841	15,006,427
China	2,213,241	1,343,247	1,007,272	1,603,659
Panama	168,533	187,514	232,607	304,360
Other co'tries	257,480	15,144	85,645	190,438
Total	$21,886,045	$18,566,143	$16,832,616	$22,757,460

The large diversion from New York to England is the point of special interest.

The receipts of treasure from various sources during the six months were:

From California and Nevada	$22,425,506
From coastwise ports, North & South	1,716,644
From foreign countries, including am't received from wreck of Golden Gate	1,500,848
Total receipts	$25,643,018

The following figures serve to show the extent of the interior currency movement during the first half of the last three years:

First six months of—	1861.	1862.	1863.
Coin remitted to interior	$6,065,451	$5,775,983	$6,019,610
Coin remitted from interior	2,840,236	2,230,427	3,101,396
Balance added to interior circulation in 1st half of each of those years	$3,225,215	$3,546,556	$2,918,214

Oil Creek Railroad.

The Oil Creek Railroad, running from Corry to Titusville, a distance of twenty-eight miles, is one of the marvels of the age. Built in the space of three months, under the energetic management of Thomas Struthers, Esq., it is now carrying an amount of freight probably unequalled by any other line of railroad in the country of equal length, and yields a revenue of corresponding magnitude. It will be extended eight miles further, to the location of the "great wells," in the lapse of two or three months, whereby greatly improved facilities will be secured to the vast body of men engaged in the oil trade.—*Cleveland Herald.*

☞ A sale of $10,000 worth of Toledo, Logansport and Burlington Railroad first mortgage bonds of 1884, was effected at auction on the 29th of July, at 80¼ per cent.—*Toledo Blade.*

Metropolitan Railroad.

The receipts on the Metropolitan road for the mouth of July were:

1861	$24,769 23
1862	27,666 05
1863	35,265 23

The stock is scarce at $75 which seems high, but as it divides 10 per cent., free of United States tax, it yields nearly 7 per cent, per annum on above price. The Company have over $50,000 reserved to cover depreciation, and they own land near Chickering's factory worth, it is estimated, $75,000, which is for sale. If the purchase of the Dorchester Avenue Railroad is consumated and new stock issued to cover the cost of same, it will give the old stockholders one new share at par for every three shares of old stock, or if they sell the rights to new stock at $25 premium it is equivalent to over $8 on old.—*Boston Journal.*

Saut Ste. Marie Canal.

The St. Mary's Canal is indubitably a massive work—an object of State pride to Michigan, a monument to its builders, and a national credit to the United States. Congress donated to the State of Michigan for the construction of this canal 700,000 acres of public lands, which Michigan conveyed to a company upon condition that for the lands so conveyed they would construct the work. The work was constructed, though, we believe, the land grant did not reimburse the expenditure upon the canal, which on one mile of length cost a million of dollars!

It is a grand work, planned on a bold scale and finished with a view to duration and usefulness. A portion of its prism was excavated out of hard rock; it is slope-walled upon both sides; the towing path and berm bank—both of which for most of the distance are raised artificial banks—are both broad, the berm bank, next the river, having a slope-wall, against which at the base are heaps of boulders, to prevent undercutting from the ice. The locks—of which there are two—have a joint lift of nineteen feet, each lock having a lift of nine feet six inches. The guard gate is a half a mile from the locks. *The chamber of the locks is three hundred and fifty feet in length by seventy-two feet in width.* Think of a lock chamber as wide as Arch street and almost a square long! We, ourself, saw four large schooners bound for Marquette for iron ore, locked through the St. Mary's Canal in the same lock at the same time, and with room to spare. This canal will pass through its locks at one time four vessels as large as can pass singly through the locks of the Welland Canal in Canada West, between Lake Erie and Ontario. As many as thirty vessels have passed through the St. Mary's Canal in one day. During the year 1862 the whole number of vessels, sail and steam, locked through was 527, with an aggregate tonnage of 276,639 tons. And according to the report of the Superintendent this tonnage comprised "twelve millions of dollars worth of copper and iron, and about ten millions of dollars worth of general merchandise." Here is a splendid Lake Superior trade already interchanged with the lower lakes and seaboard, via the St. Mary's Canal. How this trade will augment and duplicate hereafter, fleet-footed time will show.

The course of the St. Mary's Canal is due East and West. At Saut Ste. Marie the river flows over a sandstone ledge for a distance of three-quarters of a mile, the descent being from 18 to 21 feet. By St. Mary's river, which connects Lake Superior with Lake Huron, the distance is 80 miles, twenty from Lake Superior to the Falls and sixty from the Falls to Lake Huron.

Before the canal was built around the Falls at Saut Ste. Marie there was a railroad or tramway around them, whereby of course a transhipment was necessary. At either terminus of this tramway was a huge crane which swung the articles and packages, in transitu, from the platform cars on the track to the gangway of the boat at the landing. The crane, turntable, and some of the old trucks are still at the landing at the *Saut.* This tramway was useful in its day, but would not now half meet the reqirements of the Upper Lake trade; nor, indeed, would the Upper Lake trade have reached its present magnitude with the tramway in use. Besides, the transhipment which it unavoidably imposed, necessiated separate floating craft for navigation above and below the barrier of intercommunication interposed by nature at the Falls and by art at the tramway.—*Ed. Cor. U. S. R. R. and Mining Register.*

☞ Mr. C. R. Roberts having retired from the Presidency of the Delaware, Lackawanna and Western Railroad Company, the board have paid Mr. John Brisbin the deserved compliment of electing him to the vacancy. This gives great satisfaction to the friends of the able and energetic superintendent, who comprise this entire community. They have but one regret in connection with this reward of merit, and that is that it will cost them a highly esteemed and public-spirited fellow-citizen, for the new President will remove to New York City. To his successor, Mr. Watts Cook, we cannot pay a higher compliment than by saying that his mantle of office falls on one worthy to succeed him. It cannot be doubted that the executive ability which has made the machine shop a model one, will do full justice to the duties of a more responsible position. These two gentlemen have for years been identified with the management of the Delaware, Lackawanna and Western Railroad, and two better railroad officers cannot be found in the country. This road keeps in constant use a large per centage of its engines and rolling stock, turns out better work, is more regular with its frequent freight trains, has fewer accidents, and is more economical, all things considered, than any other in the United States, and these are very largely due to the conjoint labors of Messrs. Brisbin & Cooke. We but echo the universal feeling when we tender them our hearty congratulations on their deserved promotion.—*Scranton Republican.*

☞ The crossing of the Minnesota river at Mendota, and the surmounting of the lofty bluffs at that point, have heretofore been a perplexing subject to the engineering department of the Minneapolis and Cedar Valley Railroad, and the old scheme of construction proposed to overcome the difficulty by a lofty bridge over 100 feet high, at a cost of five or six hundred thousand dollars. But, by the plan adopted by the present engineer, the difficulties of the situation will have been skillfully avoided, or rather mastered by a tunnel which is to be made through the soft, white sandstone stratum which underlies the plateau on which Fort Snelling stands. This tunnel will be 1,100 feet in length, and on the Minnesota river side, will enter the rock near the residence of Franklin Steele, and emerge upon the bank of the Mississippi near the old graveyard. By this means the enormous expense of a lofty bridge is avoided. The crossing will be a short distance above the ferry.—*St. Paul Press.*

Railway Timekeepers,

WITH HEAVY STERLING SILVER CASES.

Frank Leslie's Illustrated Newspaper, of Feb. 21, 1863, says: "HUBBARD'S TIMEKEEPERS are becoming proverbial for their accuracy and reliability. They are particularly valuable for officers in the army and travelers."

The *Army and Navy Gazette*, of Philadelphia, in its number of May 9, reviewing this watch says:—"We are pleased to see that the importations of the HUBBARD BROS. are meeting the enormous sale that such extraordinary enterprise as theirs so richly merits. These watches are novelties produced by no other house, far exceeding other manufactures in point of accuracy and elegance. Fidelity and promptness to their patrons render the house a desirable medium for traders in the army."

The *New York Weekly*, of July 23, 1863, voluntarily says:—"We have been shown by the Messrs. HUBBARD BROS., who are the exclusive Importers of the article, what they most appropriately term, the RAILWAY TIMEKEEPER, being a superbly finished watch, which is warranted to keep the most accurate time in all climates. The beauty of these Timekeepers is only equalled by their cheapness."

The RAILWAY TIMEKEEPER has *heavy solid sterling silver cases*, beautiful white enamel dial, handsome gold hands, with superior regulated movement, *warranted to run and keep excellent time!* Price, per case of half dozen, $60, by mail $1 65 for postage. If registered, 20 cents additional. A safe delivery by mail guaranteed. *Sold only by the case.*

The RAILWAY TIMEKEEPER is also furnished in handsome silver-plated case, and in all other respects the same as the silver ones, while in appearance they are fully equal. Price $48 per case of six. Postage, $1 65. Registering 20 cents. *Sold only by the case.*

MAGIC TIME OBSERVERS!

THE PERFECTION OF MECHANISM!

Being a Hunting, or Open Face, or Lady's, or Gentleman's Watch Combined, with Patent Self-Winding Improvement!!!

The *N. Y. Illustrated News*, in its issue of Jan. 10, 1863, on page 147, voluntarily says:—We have been shown a most pleasing novelty, of which the HUBBARD BROS., of New York, are the sole importers. It is called the MAGIC TIME OBSERVER, and is a Hunting and Open Face Watch combined. One of the prettiest, most convenient, and decidedly the best and cheapest timepiece for general and reliable use ever offered. It has within it and connected with its machinery its own winding attachment, rendering a key entirely unnecessary. The cases of this Watch are composed of two metals, the outer one being fine 16 carat gold. It has the improved ruby action lever movement, and is warranted an accurate timepiece." Price, superbly engraved, per case of half dozen, $204. Sample Watches in neat morocco boxes, for those proposing to buy at wholesale, $35. If sent by mail the postage is 36 cents. Registering 20c.

☞ Watches sent by express to any part of the Loyal States with bill payable to Express agent upon delivery. Persons ordering in this manner must enclose $2 as a proof of their sincerity, the amount to be credited on the bill.

Conductors, Engineers, and all others in the disloyal States, or any parts thereof, must send payment in advance, as the Express Companies peremptorily refuse making collections in such precarious localities. Money can be sent by mail or express. If by express or mail in a registered letter, at our risk. Our patrons are requested to call in person, when it is convenient for them to do so.

HUBBARD BROS.,
IMPORTERS,
4t32 **169 Broadway, New York.**

SUBSTITUTE FOR
CAR DUCK.

Kingman's Car Covering.

THIS is a heavy Canvass imbedded in a coat of Elastic Mastic or Paste which is applied directly to the boarding of the top of the car, and then thoroughly painted with three or four coats of paint, thus making a covering VERY MUCH LIKE **CAR DUCK**, but at this time at half the cost. It is now successfully used by many Railroads and Car Builders. Directions and particulars sent when requested. This Mastic and Canvass for sale by

New York, Saturday, August 22, 1863.

New York Central Railroad.

The New York Central Railroad Company will receive proposals, until the 10th of September next, for an issue of $5,000,000 of Six Per Cent. Bonds, redeemable December 15, 1887, to meet in part the debt of three million dollars which becomes due on the 15th of June next.

Navigation of the Hudson River.

We are indebted to S. H. Sweet Esq., Deputy State Engineer and Surveyor, for a copy of his communication in answer to a resolution of the Senate relative to the removal of obstructions from the Hudson River, transmitted by him to the Legislature at its last session. It is a complete and satisfactory document, and supplies what has been long wanted, a full and intelligible account of the various attempts which have been made from the earliest periods to the present time, to improve the navigation of the river below and adjacent to the city of Albany.

Out of the numerous and scattered material furnished by legislative and other documents, he has also compiled a succinct history of the proposed methods to render its navigation practicable at all seasons, for the numerous craft which resort to its head waters, and brings to light the names and exertions of many distinguished Engineers and citizens who have been in past times engaged in examinations of the subject, and were the advocates of plans which would have not only added vastly to the commerce of the state, but if properly carried out would have made Albany a second Glasgow.

After all, the character of the Hudson river has not materially changed, since the time of its discovery. The earliest travellers speak of the same bars which still obstruct the passage of large vessels above the City of Hudson, and the Dutch found in the term *overslaugh*, the expression of their constant interruption even to the passage of sloops of 50 and 60 tons, not half the capacity of our Erie Canal boats.

The difficulty appears always to have been the same, viz., the formation of bars at points where the natural current of the stream and the tidal flow from the sea meet each other, exchange blows so to speak, and as they cease the contest, drop the weapons of assault and leave them behind in the shape of sand bars. The battle ground has invariably been at or near the same points, shifting a little with the advantage the current or the tide may have gained from natural or accidental causes, assisted by the deploying of considerable portions of the stream into numerous side streams, which the Dominie's, Papscanee, Staats, Cow, Schodac and Mull Plaats islands, create for many miles along the disputed and refactory way. It must not be forgotten however, that in spite of all these obstacles, Albany at an early day was a city of considerable commercial enterprise. Its vessels traded with the West Indies and one at least made a voyage to China. Its old newspapers contain in their advertisements, evidence of the fact that the Albany merchants formerly had their own foreign correspondents and advertised for sale their own direct importations. It was the largest exporter of furs and skins on the continent, with the exception of the Hudson Bay Company, and was the great outlet of the wheat country of the West, until the construction of the Erie Canal, which practically extended the navigation of the Hudson river to the lakes. Those who are curious as to the early commerce of the river will find many speculations in the works of Peter Kalm the traveller, and the admirable serial annals of Albany by Joel Munsell to whom, (particularly, the last) the antiquarians are under the greatest obligations.

As early as 1797 the improvement of Hudson became a subject of Legislative action, and appropriations were made on a small scale for works between Albany, Troy and Lansingburg, as the latter towns were founded by enterprising people from the East, and became active rivals of their ancient neighbor below. Mr. Sweet's report gives very interesting details of this legislation, the dates of the enactments, and the amounts expended. In 1804 the celebrated E. C. Genet, at one time the French Minister to this country and a prominent person in our diplomatic difficulties at the time, having become a citizen of the United States, and a connection by marriage with the family of Gov. George Clinton, proposed the construction of a ship canal between Albany and New Baltimore, a distance of twelve and a half miles, by which means vessels of large size could ascend to the former place, and the difficulties in the old channel be completely obviated. This interesting proposition attracted great attention at the time and was very near being adopted. As late as 1820 it received the special approval of a Board of Commissioners, among whose names we find those of the great Clinton, S. DeWitt, Surveyor General, I. N. Yates, Secretary of State, Martin Van Buren and others. In 1825 Governor DeWitt Clinton again recommended the plan of a canal, but yielding to the local interests of Albany and Troy, proposed as a substitute for the time, the old system of docks, dyks and dams. In 1826 a private company offered to build the ship canal at their own expense, but failed in getting a charter for the purpose. In 1831, the General Government having extended its jurisdiction over the waters of the Hudson by a judicial decision, growing out of the great controversy of the steamboat proprietors under the Fulton and Livingston's grants and those set up by the Gibbons associates in New Jersey, a new survey of this part of the river was made under that authority by Col. DeWitt Clinton, a Topographical Engineer, the same young gentleman who afterwards made the survey of the Croton river, as a source of supply of water for the city of New York, and which by the wisdom, persistence and influence of Myndert Van Schaick was finally adopted for that purpose. Dams and jetties

were proposed as an expedient by Col. Clinton and Congress made an appropriation in 1834 of $70,000, accordingly.

A special Board of United States Engineers composed of Col. Totten, Col. Thayer and Capt. Talcott, undertook the investigation of the subject, and after careful examination, came to a similar conclusion with Col. DeWitt Clinton previously, that the operations of the Government should, for the time being at least, be confined to the bed of the river. From that period to 1839 the improvements therefore took the form of longitudinal stone dykes and dredging, and it was attended with considerable success, much more so than had been obtained under the old plan of dams and wings. Water was found 12 feet deep on shoals where there had been but 4 or 5.

Major Delafield's report on the subject in 1855, is given in extracts by Mr. Sweet, showing the character of the works. These it is understood have never yet been completed according to the plans of the two last commissions. But we have no more room to give to the subject at this time, though we have scarcely entered upon it. The pamphlet before us contains a history of another canal project that of W. J. McAlpine as late as 1853, a most admirable conception, on a liberal scale, with large views and consequences; it also gives various reports and letters of Mr. Bache Superintendent of the Coast Survey; the written opinions of Mr. S. N. Payn, an eminent and successful contractor for river works, various tables, and a map of the river below Albany showing the improvements made and the places of the chief obstructions. The State engineer and surveyor W. B. Taylor, in a brief letter accompanying these documents, recommends further surveys, and a further appropriation for the purpose. We think with due respect, that he might very properly have asked the Legislature for appropriations to complete the plans already prepared by the first engineers of the country, and which have never been carried out by the General government, as it was its duty to have done. We do not like either the style in which he so verbosely approaches a pretty hacknied subject. "To enable the undersigned to reply *understandingly* to the above resolution, it *would* be necessary to ascertain the fall or geode*sick* (*sic*) declivity of the *seat* of the alluvions—also an investigation of the geological and hydrostatic causes of the deposits, and the nullifying effect of ascending tides against descending currents," possibly, we might add, of descending or ebb tides also.

The whole matter, however, is plain enough and simple enough. We know all about these obstructions. Every river captain and pilot understands where they are, and how and when they shift. We have the example of the Clyde on which the largest steamers now ascend to Glasgow, where a few years ago an Albany sloop could not have floated. The sole principle is longitudinal dykes and constant unceasing dredging. The expense of the latter is nothing in comparison with the results. The amount of custom dues of Glasgow in 1770, was about $750. It is now more than three millions per annum. In 1800 it had a population of 75,000 only, in 1841 it was 255,000, and the present year is upwards of 400,000. Being at the head of ship navigation on the Clyde, and connected by numerous canals and railways just as Albany is with the lakes and the ocean, Glasgow is a noble example of what engineering may do with a river that never has been comparable in any respect with our own, noble, picturesque, stately and historic stream.

Chicago, Burlington and Quincy Railroad.

At the Annual Meeting of the stockholders of this company held at Chicago on the 19th of June, the report of the directors, also the several reports of the Treasurer, General Superintendent, and officers in charge of the different departments, were presented, accepted, and ordered to be printed with the accompanying statistics. We have been favored with a copy of this report, from which we learn that the income for the fiscal year ending April 30th, 1863, on 138 miles of road, and 73 per cent. of earnings on 30 miles of the Galena and Chicago Union Railroad used, and of the road from Peoria to Burlington, 95 miles, were:

From freight	$1,927,944 79
" passengers	426,417 82
" mails and miscellaneous	58,458 79
	$2,412,821 40

The operating expenses were:

Repairs of track	$256,642 94	
" bridges	33,693 98	
" buildings	19,943 12	
" fences	17,852 35	
" locomotives	130,427 51	
" cars	123,290 88	
Loss and damage	17,083 19	
Fuel consumed	122,778 17	
Oil and waste	21,373 83	
Train, engine, station and water service	237,850 78	
General expenses	57,717 69	
Car service	8,781 82	
Miscellaneous	26,552 52	
		1,072,988 78
Earnings less operating expenses		$1,339,832 62
Add balance to credit of income account May 1, 1862		1,296,160 64
Balance to credit of interest and exchange		10,801 15
Balance to credit of Steamer Fannie		3,525 63
Total		$2,650,320 04

From which deduct—

Interest on bonds	$324,635 28	
Taxes—State	24,369 62	
" National	15,100 20	
Expenditures for improvements	37,148 95	
Rent of depots & tracks	17,074 98	
Transfer office expenses.	2,600 00	
Proceeds 5 locomotives sold	37,500 00	
Distribution of stock November 15, 1862	946,900 00	
Dividend Nov. 15, 1862.	203,108 00	
Transfer to sinking fund	437,023 63	
		2,045,460 66
Balance May 1, 1863		$604,859 38
Less dividend declared payable May 15, 1863		229,544 00
Balance		$375,315 38

The expenditures for construction and equipment, as shown in the annexed balance sheet, have been $7,934,813 04; including payments and advances for account of connecting roads, the aggregate of construction account has been $12,373,322 78. The capital stock of the company on the 30th of April, was $5,738,640; and the funded debt, exclusive of the bonds cancelled by the sinking fund, $6,102,593 75—making the total stock and funded debt, $11,841,233 75.

The other assets and liabilities of the company on the 30th of April, were:

Value of materials on hand	$170,678 11
Steamer Black Hawk, value	17,853 36
Bills receivable and accounts due	171,137 91
Cash in N. Y., Boston and Treasury	446,508 18
	$806,177 56
Amount of unclaimed dividends	$1,349 00
Unpaid accounts and pay rolls	18,506 28
Bills payable	1,330 00
Due agents and connecting roads	275,198 30
Balance	509,793 98
	$806,177 56

The capital stock of the company has been increased during the past year, $947,100; and the funded debt, $77,843 75—making the total increase of stock and bonded debt, $1,024,943 75.

The expenditures made during the year on account of construction and equipment mainly on account of new road into Chicago, have been as follows:

Lands and right of way		$5,229 00
Buildings, bridges and structures		50,966 18
Depot grounds at Chicago, buildings and improvements thereon		143,789 54
Union track at Chicago		828 99
Branch road (new line)		117,888 04
Raising road grade east of Burlington		9,467 95
EQUIPMENT—Locomotives		33,229 00
Freight cars		64,450 00
Total		$425,868 70
Less amount received for locomotive engines sold	$37,500	
Also premium on bonds sold	2,785	
		40,285 00
Balance		$385,563 70
The payments for account of purchase of road from Peoria to Burlington, have been		$91,618 58
On account of the Quincy and Chicago Railroad		8,150 63
Total		$485,332 81

The funded debt, exclusive of the bonds cancelled by the sinking fund, was as follows:

Chicago and Aurora and Central Military Tract Bonds outstanding, subject to be exchanged for Chicago, Burlington and Quincy Trust Mortgage Bonds		$349,000 00
C., B. & Q. Trust Mortgage Sinking Fund Bonds, exch'ged for Chicago and Aurora and Central Military Tract Bonds		2,163,000 00
Issued and sold of the same class of bonds	$1,656,000	
Less bonds purchased and cancelled by sinking fund	344,000	1,312,000 00
C., B. & Q. plain seven per cent. bonds, issued on account of purchase of road from Peoria to Burlington		755,000 00
C., B. & Q. second mortgage bonds, 4 and 4½ per cent., issued in exchange for bonds of Quincy and Chicago Railroad Company		935,500 00
C., B. & Q. scrip certificates, issued for the same purpose as above, not bearing interest	$697,000 00	
Less scrip redeemed	108,906 25	
		588,093 75
Total bonds and scrip		$6,102,593 75

Compared with the previous year the gross earnings show an increase of $861,594 01; and the expenses an increase of $341,958 58—making

the increase in earnings over operating expenses, $519,635 43. The report says:

The increase of the line of road owned and operated, as well as the increase in the business, has made it necessary to provide additional equipment, and also additional buildings and facilities for its construction, repairs and preservation. In part supply of this demand, sixteen locomotive engines have been purchased, four of which have been delivered, and twelve are to be delivered the present summer and fall. One hundred grain and merchandise cars have been constructed at the company's shops, besides thirty that were built to replace that number taken for Government use, on a requisition from Major-General U. S. Grant. One hundred have been contracted of other parties, and are now being delivered, to which it is intended to add at least one hundred more from company's shops, in time to accommodate the fall business. Large additions have been made to the shops and works at Aurora. Substantial and commodious shops have also been erected at Galesburg, and a large addition to the engine house at that place. The depot grounds in Chicago have been enlarged by the purchase of the south half of block 47, and a piece, about 1,500 feet in length, further west, on North street. The freight house in the course of erection at the date of our last report, was completed, and also a transfer house and tracks, and the freight business of the company transferred to our depot and grounds, on the 24th day of July last.

The agreement heretofore made with Armour, Dole & Co., under which they erected the first grain warehouse and elevators, has been enlarged and extended, and an additional house has been erected by them of the same capacity as the first building. The two, having a capacity of storing 1,600,000 bushels of grain, were filled before the opening of navigation.

The two slips, extending back from the river into the company's grounds, have been extended, one 138 feet, mainly to accommodate the new grain house, and the other 495 feet, for other business purposes.

An engine house is now being erected. An additional freight house, for storage and transfer of freight, is required, to facilitate the unloading and economical use of cars.

These grounds and appurtenances, although larger and more expensive than was originally designed, yet experience has fully demonstrated the necessity and sound policy of making the expenditures.

In compliance with the views of stockholders, as expressed at their last Annual Meeting, the directors have authorized the building, and, as may be seen by the Chief Engineer's Report, considerable progress has been made in the construction of the new line of road from Aurora to Chicago.

In view of the large business that must pass over this line when completed, and the facilities a double track near the termini would afford, it has been decided to lay a double track from the depot at Chicago to the station at the Desplaines river, a distance of 9.75 miles.

The cost of this work will exceed the original estimates, in consequence of the increased price of labor and materials, but not more than the advance in the price of the securities set apart to provide for its construction.

By the terms of the agreement with the Galena Company for the use of their road, this company was required to give two years' notice of their determination to discontinue such use. This notice has been given, and the term will expire on the 20th of May, 1864, at which time the new line will be ready for operation.

The suit in progress at the date of our last Annual Report, for the foreclosure of the mortgage on the railroad from Peoria to Burlington, has been decided. The property was sold, under the decree of the Court, on the 21st day of October, 1862, and purchased by trustees for this company for about the amount of the mortgage and the claims it held against the property.

The Lewiston Branch road was completed and put in operation on the 2d day of June last. The business of this branch has met the expectations of the officers of this company. $37,000 of the $125,000 of bonds issued under the agreement with this company, have been redeemed in conformity with that agreement, and are now held by this company.

Reference is made to the accompanying reports of the officers in charge of the several departments of the road, for the usual detailed information relating to the condition, business, and operating of the road the past year. These show the business to have largely increased over former years, and that it has been transacted in a manner, as usual, highly creditable to the officers and men in the service of the company.

The expenditures for account of construction and equipment have been as follows:

For construction	$5,965,372 26
" depots and grounds at Chicago.	401,668 69
For depots and grounds at East Burlington	37,399 47
For Union Track at Chicago	40,011 83
For equipment	1,490,360 79
Total	$7,934,813 04
On account of purchase of the railroad from Peoria to Burlington and the equipment thereon	$2,504,890 48
On account of agreement with the Quincy and Chicago Railroad Company, and for purchase of bonds and other interest on that road	1,933,619 26
Total	$12,373,322 78

The equipment of the road consists of 73 locomotives; 13 passenger, 14 second class, baggage and mail, 999 house freight and cattle, 200 platform and coal, and 30 drovers' and conductors' cars. In repair service, the company have 65 hand, and 40 gravel and dirt cars, a steam excavator, steam pile driver and car, and a wrecking car.

Cost of repairs of locomotives between Chicago and Galesburg, 168 miles, together with five months between Peoria and Burlington, 95 miles, is $124,310 11, less $15,620 36 for improvement, leaving $108,689 75 for repairs proper. Number of miles run by locomotives between above named places is 1,808,146. Cost per mile for engine repairs, 8.31 cents. The cost per mile for oil and waste is 78 cents.

The number of passengers carried between Chicago, Burlington and Quincy, Burlington and Peoria, Yates City and Lewiston, for the year, was 402,666, of these, 27,815 were through, and 374,850 way. Of the through passengers, 12,688 were carried east, and 15,127 west. Of the way passengers, 188,863 east, and 185,987 west. Total carried east, 201,551; west 201,114. Total mileage of passengers 23,358,939.

The whole tonnage moved over the C., B. & Q. R. R., 264 miles in 1862 was 500,301 tons; in 1863, over the same distance, 709,970—an excess of 209,669 tons. The whole tonnage over the Q. & C. R. R., 100 miles, in 1862, was 153,464; in 1863, 228,157—excess, 74,693. The total number of tons moved over the whole line in 1862 was 550,723; in 1863, 777,736—an excess of 227,013.

The total number of tons moved one mile over the whole line, 364 miles, in 1862, was 73,842,347; same distance in 1863, 107,995,842—excess in 1863, 34,153,495. The number of tons of freight forwarded from and received at Chicago during 1862 was 426,632; same for 1863, 623,921—excess in 1863, 197,289 tons. The total number of tons hauled one mile, of freight received at and forward from Chicago in 1862, was 57,708,763; same for 1863, 101,003,819—excess in 1863, 43,295,056.

The earnings of the whole line in 1862, were $2,246,084 17; in 1863 $3,037,372 54—excess, $791,288 37.

The directors chosen at the Annual Meeting June 19, 1863, are as follows:

President.—JOHN VAN NORTWICK.

Directors.—John Van Nortwick, Chauncey S. Colton, James F. Joy, Erastus Corning, John M. Forbes, John W. Brooks, Henry P. Kidder, Sidney Bartlett, Robert S. Watson, William Boott, Edward L. Baker.

Chairman of Board.—EDWARD L. BAKER.

Superintendent.—CHARLES G. HAMMOND.

Treasurer and Secretary.—AMOS T. HALL.

Northwestern Virginia Railroad.

In the Second Branch of the City Council, Baltimore, on the 15th inst., the engrossed bill for the relief of the Northwestern Virginia Railroad was passed, notwithstanding the objections of the Mayor, there being but one negative vote. The bill provides that upon the delivery to the Register of the city of certificates of stock of the said road, equal in amount to the par value thereof to the bonds of said company, and upon the register certifying to the Mayor that he has received certificates for the amount of the principal and interest for the bonds and advances paid by the Mayor and City Council, it shall be the duty of the Mayor to execute and deliver to the Railroad Company a release, to be approved by the City Counsellor, under the seal of the city, discharging the said company from all liability, and guaranteeing said company against all loss, cost or damage on account of said bonds, assuming the payment of the same in the hands of third parties, without recourse for principal or interest to the said railroad company; provided, however, that

in the event of the other creditors and guarantors of the said company, or any of them, failing to assent to the plan of re-organization as proposed, by agreeing and binding themselves in writing to the satisfaction of the Mayor and City Counsellor to accept stock of the said company for their respective claims or liabilities, on or before the first day of January, 1864, then, and in that event, the said release, as herein authorized, shall not be executed, and all the provisions of this ordinance shall become null and void.

North Missouri Railroad.

We have received from J. H. Concannon, Esq., a report of the North Missouri Railroad Company on its affairs in general, accompanied by a statement of its business from the 1st of January, 1862, to the 31st December, 1862, inclusive. Our readers have been already placed in possession of its financial condition, but this report is particularly interesting, as a record of the numerous difficulties the company has had to encounter from external causes, and the energy and fortitude of its managers in overcoming them. The North Missouri has suffered intensely from the rebellion, and its directors have not only been obliged to be engineers, but generals, in order to save their company from ruin.

It appears that on the 11th of June, 1853, the stockholders met at St. Charles to elect directors as provided by the charter. From this time, until April, 1854, the interim was passed in surveys and locating the line of the road. On the 15th of May, 1854, contracts were entered into for its construction from St. Louis to its junction with the Hannibal and St. Joseph's road, that is to say for the preparation of the road bed for the rails, and its use by the trains. The contractors performed their engagements until they had earned about one million of dollars. Difficulties arising however as to the construction of the roads from the words of the contract, the contractors proposed to surrender their subcontracts to the company and release it from those engagements in consideration of being paid ten per cent. in Missouri State Bonds, in lieu of the stock which they were by the contract bound to receive. This was done, though the subcontractors were like the original contractors bound to take 10 per cent. of the stock of the company as so much payment on their contracts also.

The effect of this arrangement was advantageous to some of the parties and very disadvantageous to others, and the propriety of it was much discussed at the time.

Notwithstanding these difficulties, the work on the road progressed under these modified contracts, and the iron, and chairs, and spikes, and rolling stock were purchased; so that, on the 25th day of August, 1855, the road was opened for business to the town of St. Charles, a distance of 19¾ miles from the starting point in the city of St. Louis.

On the 27th of August, 1857, it was opened to Warrenton, a distance of 57¼ miles.

On the 26th day of December, 1857, it was opened to Montgomery City, a distance of 81½ miles.

On the 20th of April, 1858, it was opened to Mexico, a distance of 107½ miles.

On the 11th of October, 1858, it was opened to Sturgeon, a distance of 129¼ miles.

On the 20th of December, 1858, it was opened to Allen, a distance of 146½ miles.

And on the 1st of February, 1859, it was opened to Macon City, the junction with the Hannibal & St. Joseph Railroad, a distance of 169 miles.

Although the rails were laid down so as to enable this Company to run a train of cars to these points, it was far from being a completed road to any of the places named. It was greatly deficient in rolling stock of all kinds; in fencing; in ballasting; in depot buildings; in machine shop and car shop buildings; water stations; wood sheds, and many other important improvements required to transact the business offered to it. The surplus earnings of the road have, as fast as they would admit of it, been applied to supplying these deficiencies.

When the rebellion broke out, the road became an object of attack by the enemy, and it appears that it was greatly damaged by raids incited by the then Governor of Missouri. Several pages of the report are devoted to the details of these outrages. The losses sustained by these means in the months of June, July, and December, 1861, amounted to $86,310 00, though the company in failure of the ability of the General Government to give it adequate protection, advanced from its own impaired receipts, about $7,000 for the support of several small bodies of troops stationed at different points for its defence.

It has survived all these misfortunes however, yet has by no means secured itself from difficulty. The report says:

The deficiency in rolling stock and other improvements still exists to a considerable extent. The members of the General Assembly who represent the counties along the line of this road, and who have travelled over it this fall and winter, can attest that, for want of rolling stock, much business has been lost to the road; and persons with stock have had to wait for weeks for their turn to get cars. To remedy this, as far as possible, the Directors have ordered one hundred combination cars to be built, ready for the business of the next fall and winter, and also four first class coal burning freight engines.

The cars will cost not less than $750 each.	$75,000
The engines, delivered on the road, about $13,000 each	52,000
	$127,000

It is believed that when the rolling stock now owned by the company is put in complete repair, as it can and will be by fall, this additional rolling stock will enable the company to do profitably all the business offered to it, and with satisfaction to its patrons.

Another disadvantage under which the road continues is the want of a bridge across the Missouri river, as at present all the freights have to be wagoned across, thus requiring rolling stock on both banks to operate the road, as neither cars nor locomotives can cross the river. The expense of the required bridge is estimated at $30,000. The hauling now costs 50 cents per ton and 35 cents for ferriage or about $15,000 per annum. A private company proposes to build it and the stock in it will undoubtedly be remunerative. The necessary outlays immediately required are fencing, and partial contracts for that purpose have been entered into. The machine and car shops are merely temporary and require to be replaced by fire-proof brick structures. A larger freight house is also required at St. Louis and some tressle work in the bottom opposite St. Charles. The company is purchasing for cash about $40,000 worth of property adjoining its present depot buildings in St. Louis, so as to shelter its cars.

The original estimate of the cost of the road from St. Louis to the Iowa State line was $9,091,665 25.

The total cost of the same to the Hannibal and St. Joseph's, 170 miles, was exclusive of interest and discount, $5,610,614 19, and when it is completed to the Iowa State line, the whole cost will be $6,610,604 19, or $2,481,061 06 less than the original estimate.

But if we add the interest paid to the State, to individuals and to the city and county of St. Louis to the cost of construction, amounting to $1,293,157 87, the whole cost is $7,903,762 06 or $1,187,903 19 less than the original estimate.

On the 1st of January, 1859, this Company failed to pay interest on the bonds of the State granted to it; consequently, there was due to the State for interest on the 1st of January, 1863, $1,174,500. If this Company be permitted to use the funds now on hand and its net earnings till the 1st of April, 1864, it would then owe the State for interest $1,500,750, and the State, it is believed, would have a road that would no longer be a charge to it for interest. It seems then, that at this time it would probably be demonstrated to the State that the company could not only earn the $261,000 of interest annually, but that with the road completed to Iowa, and the business on its line increasing, it could earn interest on the $1,500,750, and would be permitted to issue to the State its bonds for this sum on which the interest should regularly be paid.

The report gives the order under which the county of St. Louis made the subscription of $750,000 to the capital stock of this company. Prior to this subscription, the county of St. Louis had subscribed $500,000 to the stock of this Company, making in all taken of the stock by the county of St. Louis $1,250,000.

Some two years ago, when there was some hope of getting legislation to enable the company to complete its road to the State of Iowa, and to extend it to Brunswick, on the Missouri river, both the city and county of St. Louis passed resolutions expressive of their willingness to release all interest that had accrued and all future interest, conditioned that the State should grant legislation that would enable this company to extend its road to the points named. Any act that may be passed for the benefit of this company may be coupled with the condition that none of the moneys arising from net earnings, preferred stock, or any other source belonging to this Company, shall be applied to the payment of interest to the city and county of St. Louis, now due or to become due, as the terms would readily be acceded to by them.

In consequence of the rebellion, there has not been as much produce shipped out of the country as there would have been, but it is calculated that in less than one year, the earnings of the road will be large enough to pay the State interest and give a valuable return to the stockholders.

Work is to be immediately resumed on twelve miles of graded track above the Hannibal and St. Joseph road and iron for that purpose is ordered to be purchased.

Much of the balance due from individuals and counties is confidently expected to be collected.

Upon the subject of the extension of the road to the Iowa line, the president says:

It only requires a look at the map to convince any intelligent mind of the importance of extending the North Missouri road to Iowa. When I have urged this with some persons, I have been absurdly answered that there was no business up there to justify such an extension. Let me ask such persons why it is then, that the capitalists of the East are investing their means in roads tapping the Mississippi river, and running into Iowa and Minnesota. They are not apt to invest their money unless there is a very clear prospect of remuneration. It would be a waste of time to dwell on the importance of this extension to the State, and the city of St. Louis, and to the prosperity of this road.

Unless this road is extended to Ottumwa, we must lose the trade of Iowa and Northern Missouri. Extend it, and St. Louis becomes the natural market for nearly all the products of the year for this immense region of country; and here in St. Louis is where they will purchase their coffee, teas, sugar, molasses, iron ware, and many of them even their dry goods, and the innumerable articles that will be consumed in this country, which will so rapidly fill up with population, after the close of the war.

It is believed that one million of means, with what is owing by the counties of Adair and Schuyler, and what may arise from the net earnings of the company from this time until the first Monday of April, 1864, will be amply sufficient to complete the road to Iowa, and make the additions to the rolling stock now ordered, and the other improvements herein referred to.

When it reaches the Iowa State line we believe there is a company in that State who will build the twenty-five to thirty miles to carry the road to Ottumwa. Three different committees visited the city of St. Louis from that State to urge the completion of the road to the Iowa State line, and one of those committees attended a session of our State Legislature on the subject, and addressed a public meeting of the Chamber of Commerce of the city of St. Louis, called to hear them. The people have manifested every desire to give it their trade.

Great value is attached to the extension to the State line of Iowa. It would then command the rich trade of Chariton, Carroll, Saline, and part of the trade and travel of other counties. The county of Chariton has forty thousand acres of land to give in aid of its construction, besides other aid. This land, it is believed, will be worth every dollar of ten dollars per acre. The whole road is only 38 miles long, and the cost of it will not exceed $800,000. It will probably fall below instead of over-running the estimate of its cost. This branch and the extension to Iowa could both easily be built under either of the three plans named. Fifteen miles of this road is so far graded as to be nearly ready for the laying of the iron and ties.

It should be kept in mind that the State has a first lien on 800 miles of railroad, together with all its rolling stock and equipments, for the $23,800,000 of bonds and the interest which has accrued thereon, issued to the various railroads. These railroads will not become less valuable by the restoration of peace and the filling up of the State with population. It seems there is no need of haste to sell at this particular time. If none of the roads ever paid a cent, the State could pay both principal and interest loaned them for their construction without seriously burthening the people with taxation; but there is no need of this.

It is thought that the Hannibal and St. Joseph road will not become a charge to the State, also that the Kansas line of the Pacific road will, after completion to Kansas, pay interest on the amount loaned to it, and that the North Missouri road will be able, after April, 1864, to pay its interest to the State whether it is completed to Iowa or not. The Southwest Branch of the Pacific road must pay if it is extended so as to reach the rich country further West. The million of acres of land belonging to it ought to build the uncompleted portion of this road.

The litigation of the North Missouri Railroad remains about as stated in the last Annual Report, which has been heretofore submitted to the members of the Legislature. It has no suits pending of grave importance. It has a good many suits for stock due the Company, and there are a good many suits brought against the Company for stock killed. All put together are of little moment.

The Company has on hand—

20	passenger cars,	14	in	good order.
6	baggage "	5	"	" "
29	combination "		"	" "
73	box "		"	" "
72	stock "		"	" "
70	flat "		"	" "
22	locomotives,	1	"	" "

The residue requires some repairs.

SYNOPSIS OF FINANCIAL CONDITION.

Total cost including interest and loss on bonds	$6,903,762 06
Total amount received on stock subscribed	2,582,100 00
Due on same	122,892 91
Amount of interest on City, State and County bonds	120,750 00

BALANCE SHEET.

Gross earnings for 1862 from Jan. 1 to Dec. 31	$444,460 49
Gross expenses	261,565 00
Receipts above expenses	$182,895 49

Of these net earnings, $55,451 86 were expended in reconstruction, repairs, land damages, extensions and military subscription previously stated and which last will probably be refunded by the Government.

Massachusetts Railroad Decision.

Fitchburg Railroad Company vs. Somerville Railroad Company. Last winter the Somerville Railroad Company obtained permission from the legislature to extend their railroad from a point near Webster Avenue, in Somerville, through Milk street to East Cambridge, thence through Bridge street in East Cambridge to the track of the Cambridge Railroad Company. By section 2 in their act relating to the said extension, permission is given to the Somerville Railroad Company to cross the tracks of the Fitchburg Railroad and Grand Junction Railroad at Milk street in Somerville on a level therewith; provided, however, that in case the County Commissioners for the County of Middlesex, upon application of either of the companies or the selectmen of Somerville, within three months from the passage of the act, shall determine that the public safety requires said Somerville Railroad to pass over said Fitchburg and Grand Junction Railroads by a bridge, then said crossing shall be so constructed and established as said County Commissioners may prescribe and determine.

Last May, the Fitchburg Railroad Company petitioned the County Commissioners, asking them to determine and decree that the public safety requires that the said Somerville Railroad Company shall pass with their tracks over the tracks of the said Fitchburg and Grand Junction Railroad Companies at Milk street in said Somerville by a bridge, and to make such other decrees as may be required in the premises.

A few weeks ago, at a hearing had before the County Commissioners, at the Court House in East Cambridge, a large amount of testimony was introduced, and the case was very fully argued. Last week, the County Commissioners gave their decision, permitting the Somerville Railroad Company to cross the tracks of the Fitchburg and Grand Junction Railroads *at grade*, they not deeming a bridge as safe as a grade crossing.

Connecting Railroads.—Injuries to the Public.

RAILROAD COMPANIES ARE LIABLE FOR NUISANCES WHICH ARE PERMITTED TO EXIST ON ANY PORTION OF THEIR TRACK; BUT NOT FOR THOSE CAUSED BY, AND EXISTING UPON, CONNECTING ROADS.

The original action in this case, was brought in the court of common pleas of Greene County Ohio, to recover damages for injuries received by the plaintiff from falling through a bridge built by the Little Miami Railroad Company, on its road, across a small stream, near its depot, at Xenia.

From the evidence at the trial it appeared that the bridge was constructed by the defendant, on the line of its road, on ground which it either owned in fee, or had appropriated for the construction of its road; and that the road bed was not at that place, upon a street or public highway; but that the defendant covered the bridge upon laying down its track, with a close floor, and placed hand-rails on each side of its track, over the bridge, and that this track or road bed of the defendant, passing over the bridge, furnished the shortest and most convenient route for persons on foot, in passing and re-passing, between the depot and the town of Xenia, and was generally used for that purpose. That a year or two before the occurence of the accident to the plaintiff, the Dayton, Xenia and Bepere Railroad Company, wishing to make a connection of their road with the defendant's depot, made an arrangement with the defendant for that purpose, in pursuance of which, the superstructure of the bridge was widened, on the west side of the defendant's track; the road bed was widened at the sides of the bridge, by filling up with earth, near the abutments, and a track was thus constructed for and by the Dayton, Xenia and Belpre Railroad Company, on the west side of the defendant's track, by means of which the desired connection was effected. The evidence also tended to show, that in laying the new track over the bridge, the close flooring was taken up, and the west-hand-rail taken down and at the time of the injury to the plaintiff, there was a close floor over the bridge, extending in width, from the east side of the bridge across the defendant's track, and across the space between the tracks (which was about seven feet); but the space between the rails of the new track was imperfectly covered with loose boards, through which the plaintiff fell; and that a portion of the new track had been laid by the defendant's hands, but the whole was done at the expense of the Dayton, Xenia and Belpre Company, and that this company was, at the time of the accident, and for more than a year prior thereto had been, in the exclusive use, occupancy and control of said track.

The court charged the jury among other things, as follows:

"That originally, in the construction of its road bed from the depot to Xenia, and in crossing the stream know as Shawner creek, the defendant was under no obligation to make a pass way across the same for the public; but if the jury find that the defendant built the bridge, and covered it with plank and graded their roadway from the depot to Xenia, so as to furnish a shorter and more convenient thoroughfare for persons who might desire to take the cars from its depot, and others in passing from the depot to Xenia, and from the latter place to the depot, and that the same had been used for such purpose for several years by the public, then the defendant would be liable to the plaintiff for any injury he might suffer, in passing over the bridge, by reason of its not having kept the bridge in such condition that it was reasonably fit for the purpose of travel, so long as the defendant permitted the public to use the said way as a thoroughfare for foot travel, and had the same in its possession, and under its control. That the conduct of the defendant, in regard to said bridge and way, if such as supposed, might be regarded as an invitation and license to the public to travel over said bridge, and while it continued the defendant would be bound to keep the bridge in such condition that it might be safely used for that purpose. That if the defendant made an agreement with the Dayton and Belpre Railroad Company, whereby the latter company was to have the use of so much of the ground of the defendant, as is covered by the track of the Dayton and Belpre Company, including the side of the bridge, where the plaintiff received his injuries, for the purpose of constructing its track thereon, and if the defendant agreed to construct so much of the track as lay this side of the bridge, and did the same, but that the Dayton and Belpre Railroad Company took up the covering of the bridge and laid its own track across the bridge, and left the same in the condition it was at the time the plaintiff fell through or off the same, and that since the time of laying the said track, and the taking up the part of the covering of said bridge, that part of said bridge and the said track of the Dayton and Belpre Company has been in the exclusive control and possession of the latter company—in such case, the defendant would not be liable to the plaintiff; and this would be so although the agents of the defendants may have known of the condition of the bridge. That if the defendant agreed with the Dayton and Belpre Company to lay its track, and did lay it across the bridge and took up the covering of the bridge, and left the bridge in the condition it was at the time the plaintiff received the injuries complained of—in such case the defendant would be responsible for the condition of the bridge at the time of the injury to the plaintiff, although the Dayton and Belpre Company may have had the use, control and possession of that part of the bridge and track, from the time of its construction to the date of such injuries."

To the several charges of the court the plaintiff excepted, and, upon rendition of a verdict in favor of the defendant, moved for a new trial. This motion was overruled, and a judgment was entered for the defendant. From this judgment the plaintiff appealed to the Supreme Court of Ohio, which court now affirms the judgment of the court below. The following is the opinion in full rendered at the decision of the case:

SCOTT, C. J.—We fully recognise the principle contended for by the counsel for the plaintiff in error, in this case, that the owner of real property is responsible for all nuisances, created or continued thereon, either directly by himself or indirectly by his agents, or others acting by his authority, and under his control. Whenever the relation of principle and agent, or master and servant is shown to exist, the rule of *responde at superior* applies, and he who has the power of control is held responsible for its exercise. But the charge of the court below does not appear to be in conflict with this rule of liability. On the contrary, it seems fully to harmonize with, and rest upon the very principle we have stated.

The court charged the jury, that if the nuisance complained of was originally created by the defendant, the plaintiff would have a right to recover, although at the time of the injury, the premises were in the sole possession of another. And the charge contains no denial of the defendant's liability for the acts of its agents, or persons acting under its authority, direction or control.

The defendant's charter expressly gave to other railroad companies the right to join and connect their respective roads with defendant's road, on such terms as said companies might agree upon. It was, therefore, competent for the defendant to make such an agreement with the Dayton, Xenia and Belpre Company as would give the latter the right to lay its rails on the side of the defendant's road bed, and to have the exclusive use of the same, when laid, for the purpose of making such connection. And after having thus parted with the possession and control of a portion of its land, for this lawful purpose, we know of no sound principle which can make the defendant responsible for the improper manner in which the Dayton Xenia and Belpre Company may have exercised its power of control over the premises. Unless the defendant's contract contemplated, or its execution necessarily involved the production of a nuisance, it cannot be held answerable for the negligent and wrongful manner in which the Dayton, Xenia and Belpre Company constructed a track for its sole use, upon premises no longer in the possession or control of the defendant. The rule of liability in such cases is sufficiently stated, with a reference to the leading authorities on the subject in the case of Clark *vs.* Fry; and a further discussion of it is deemed unnecessary.

Whether the terms of the agreement between the two railroad companies, placed the construction and use of the connecting track, on which the alleged nuisance existed, under the sole control of the Dayton, Xenia and Belpre Company, and whether that company in fact created the nuisance, and had the sole possession and use of that track thenceforward until the occurrence of the injury complained of were questions of fact, which were properly left to be ascertained by the jury. from the evidence. If the evidence answered these questions affirmatively, then the jury was properly instructed to find for the defendant.

In relation to that part of the charge, which holds the defendant bound to keep the bridge in repair, so as to afford the means of safe transit for foot passengers, so long as the company permitted it to be used for that purpose, the plaintiff in error can have no just ground of complaint. The defendant was held responsible for the condition of the bridge, to the full extent of the defendant's possession and power of control.

Judgment affirmed.

The Great Railway of the Pampas.

During the last week in April, the greatest railway enterprise in South America was inaugurated at Rosario, in the Argentine Confederation. The ceremony was befitting the occasion. The first sod was turned by Gen. Mitre, the President of the republic, in the presence of other high officials of State, representatives of foreign governments, and others, accompanied by a splendid display of military, triumphal arches, etc., etc. Among the Americans was W. Wheelwright, Esq., the enterprising cosmopolitan, a native of Massachusetts, the peaceful Prospero whose wand in Chili made the locomotive scale the Andes, and who now, in the fertile Pampas, begins a regenerating work for the most revolutionary of Spanish Americans. Mr. Wheelwright has obtained for this railway from Rosario to Cordova, a distance of 250 miles, important concessions from the Argentine Government, which will doubtless be confirmed by the Congress of the country. Such a man, however, deserves notice before we devote a few lines to his great undertaking on the rich plains of the La Plata.

Mr. Wheelwright is a son of Newburyport, Mass., and his ancestral family was one of the most respectable that ever emigrated in the early colonial days. When a young man, Brazil had just attained her independence, and Mr. Wheelwright sailed from the United States with the ship "Rising Empire," destined for the young empire, the off-shoot of Portugal. From the east coast he proceeded to the Hispano-American republics on the Pacific, and there he has left monuments of his industry, enterprise, charities and far-seeing plans. In 1833 he projected the Pacific Steam Navigation Company, and obtained exclusive privileges from Chili and Peru. But years of toil and anxiety rolled by before he could induce English capitalists to invest in anything dependent upon a Spanish American Government. At last he had the good fortune to enlist the late Lord Abinger, who entered very warily into Mr. Wheelwright's plans, and the enterprise soon was a success. Well did Hadfield, the English civil engineer, say that "probably nothing has contributed so much to the advancement, welfare and prosperity, of the Chilian and Peruvian republics as the successful establishment of steam navigation upon this coast, where the name of Don Guilliermo Wheelwright will never be forgotten." To-day this steamship line is a blessing to all the Pacific coast.

For a number of years Mr. Wheelwright next devoted himself to the development of the internal resources of Chili. He planned and successfully carried through the Copiapo railway, thus opening a mountain region filled with the richest of silver and copper mines. Caldeira, the seaport, where a gigantic mole had to be built, was at that time almost a wilderness. He climbed the Andes with the locomotives at gradients which perfectly astonished the engineers in Europe. One foot in forty is the steepest gradient overcome in Europe and in India. A railway, laid out by English engineers, has an ascent of 1 foot in 37. In the United States we do not recall any gradient that is greater than 1 in 25. But the continuation of the Copiapo railway, known as the Caldera and Chanarcillo Railroad, has as its average gradient for 10 miles 1 foot in 24, and the maximum 1 in 20!

We pass over his many charities to religion and science; but the Seamen's Friend Society and Lieut. Gillis, of the Washington Observatory, can testify of both.

So soon as Mr. Wheelwright had succeeded in making the Copiapo Railroad yield 10 per cent., he conceived a still greater undertaking, nothing less than to connect the Atlantic and the Pacific

by a railway, which from the exigencies of the case, would have to surmount a pass in the Andes at a height beyond that of Mont Blanc! No isthmus was to be spanned like Panama or Tehauntepec, but a thousand miles of land, the most of which is that fertile region of the pampas of the Argentine Confederation which answers to the prairies of Texas. The remaining portion to the Copiapo Railroad would be over those stupendous summits the very passage of which forms an era in a man's life. The defile of the mountains chosen for the iron rail is that known as the San Francisco Pass in Chili, just under the 26th parallel of south latitude, and not far from the boundary of Bolivia. The whole of this route has had its preliminary surveys; and Mr. Wheelwright, a few years ago, read a most interesting report on this project before the Royal Geographical Society, London. Admiral Fitzroy on that occasion bore the highest testimony to Mr. Wheelwright, whom he had known for a quarter of a century, stating that "there was not a more reliable, discreet and enterprising person in whom scientific or commercial men might repose with perfect confidence." Admiral Fitzroy had spent much time in Chili, and he gave the reason why the San Francisco Pass was chosen rather than one near Mendoza, and of course so much nearer Buenos Ayres, viz., the San Francisco Pass, though much loftier than the passes further south, is never snowed up, while the others are impassable three months in the year.

Mr. Wheelwright put forth his plans several years ago, but they have just begun "to take form in fact." In the month of April, as we have intimated, the eastern section of this great enterprise was inaugurated with pomp and ceremony, civic, military, and clerical. The first spadeful of earth was turned by the President of the Argentine Confederation on the fertile plain adjacent to the city of Rosario. The addresses delivered on the occasion, whether by President, archbishop, or minister of State, were to the point, and bespoke a new era for the rich regions of La Plata. So slow had been the march of improvement, that until 1852, ox teams drew most of the goods destined for various parts of the interior up to Rosario, a distance of 250 miles, while the majestic La Plata, upon whose broad bosom the largest man-of-war could float, rolled by within sight of the wagon road! Now steamers run regularly to Rosario, to Paraguay, and to distant Cuiba in Brazil. The railway inaugurated is to run from Rosario to Cordova, over the fertile prairie, where to-day is a considerable population engaged in wheat growing, raising herds of sheep, horned cattle, and horses, &c., &c. The government guarantees a most liberal per centage, and side grants of land along the railway, to the amount of several thousand square miles. The whole region is analagous to Texas, only the climate is superior to that of the "Lone Star" State. Here the best of bowed cotton can be raised, and from time immemorial the aborgines of the country have cultivated cotton. The company have a more generous grant of land than the Illinois Central, and the inducements for English and other emigrants are of the most potent kind.

Mr. Allan Campbell, the American engineer, who surveyed the route, has published *data* showing that the railway will cost per mile only abont one quarter what the Brazilian railroads have cost, while the amount of freight in produce and goods, wool, wheat, manufactures, &c., will make a sure return. Mr. Wheelwright is now in Europe, completing the company, organizing machinery, labor, &c. Not many years will pass by before the 250 miles of the eastern division of the great South American inter-oceanic railway will be completed, and a people, hitherto feverish with revolution, finding a ready market for their wool, minerals, &c., will have learned to be peaceful and will have advanced in civilization. Eighty miles are already finished on the Pacific end of the line, the Copiapo Railroad, and, doubtless, the child is now living who will at some future day pass from the Atlantic to the Pacific, drawn by a locomotive, over a summit more lofty than the scientific ambition of De Saussure scaled in the Alps. Such vast undertakings require skill, undaunted perseverance, and the confidence of one's tellow-man. All this William Wheelwright possesses, and with the smile of Providence, his great plans will be realized to the blessing of South America.—*Journal of Commerce.*

Railroad Earnings--Weekly.

The earnings of the Grand Trunk Railway for the week ending August 8, 1863, were:

Passengers	$37,007 23
Freight and live stock	36,226 11
Mails and sundries	2,800 00
Total	$76,033 34
Corresponding week, 1862	60,030 17
Increase	$16,003 17

The traffic of the Great Western Railroad for the week ending August 7, 1863, was as follows:

Passengers	$22,239 18
Freight and live stock	18,747 11
Mails and sundries	1,190 68
Total	$42,176 98
Corresponding week of 1862	45,099 74
Decrease	$2,922 76

The earnings of the Toledo and Wabash Railroad Company for the 1st week of August, 1863, were $23,246 21
Same week, 1862 36,055 46

Decrease $12,809 25

The earnings of the Chicago and Northwestern Railway for the 1st week in August, 1863, were $21,851 11
Do., 1862 16,573 29

Increase $5,277 82

The earnings of the Galena and Chicago Union Railroad for the 1st week of August, 1863, were:

Freight	$17,051 45
Passengers	10,302 44
Mails	1,300 00
Total	$28,653 89
Same week, 1862	23,827 14
Increase	$4,826 75

The earnings of the Chicago and Rock Island Railroad for the 2d week of August, 1863, were $31,090 00
Same week, 1862 23,959 00

Increase $7,131 00

The earnings of the Illinois Central railroad for the first 2 weeks in August, 1863, were $213,000 00
Same period, 1862 128,883 65

Increase $84,116 35

This large increase is due to the opening of the Mississippi.

The earnings of the Michigan Central Railroad for the 2d week of August, 1863, were $42,349 48
Same period, 1862 44,878 44

Decrease $2,528 96

The earnings of the Michigan Southern Railroad for the 2d week of August, 1863, were $47,787 85
Do., 1862 48,558 10

Decrease $770 35

The earnings of the Terre Haute and Alton R. R. for the 4th week of July, were $43,216 00
Same week, 1862 24,036 00

Increase $19,179 00

Foreign Dry-Goods Trade.

Imports at New York for the year ending June 30, 1863.

ENTERED FOR CONSUMPTION.
